This week Pool officials have secured 13 interim injunctions against members who are alleged to have sold their grain to non-pool buyers. The Pool is claiming damages for non-delivery of the crop of its members, and at the same time is asking injunctions to prevent further "bootlegging."

Train Crash Proves Fatal

Brakeman Killed When Grain Trains Collide Near Sioux Lookout

Sioux Lookout.—One trainman was killed and another injured when two Canadian National Railway grain trains, en route to the Head of the Lakes, collided in the McIntosh yards, 60 miles east of here.

Leslie White, a brakeman, was instantly killed when struck by grain car trucks, which were hurled through the air, while Joseph Hunter, another brakeman, suffered a broken leg. Grain cars were piled up along the right-of-way and one of the engines was thrown clear of the tracks.

MANITOBA ASKS FOR $2,000,000 TO PROVIDE WORK

Winnipeg, Man.—Two million dollars for Manitoba. This will be the plea of Premier John Bracken when he journeys to Ottawa next week to ask for his province a share in the $20,000,000 voted in the House of Commons for relief of unemployment in Canada. The Premier announced his "quota" with representatives of 60 urban, suburban and rural municipalities.

The session at the legislative building was the second of a series of four meetings to be held within a week. Premier Bracken conferred with representatives of the banks asking and receiving assurance of every effort to assist farmers worried by low livestock and grain values.

The selection of the undertakings which the Dominion would be asked to construct was a matter solely for the provincial government, declared Mr. Bracken. The cabinet will make its decision before he leaves for Ottawa. Completion of the Mafeking cut-off on the Canadian National Railway to The Pas and development of the Riding Mountain National Park will be requested, the premier mentioned.

During the six-hour discussion, it was stated that the unemployment situation in Manitoba was more grave than in most of the other provinces. Bridge and subway programs were pressed for by delegates from Winnipeg and St. Boniface. All projects would be given consideration in the government's proposal to the Dominion, the premier promised.

Winnipeg and the suburbs have difficulties which must be met separately from those of the rural delegates, the premier mentioned. In view of this fact, he announced that he will hold two sub-conferences before he leaves for the east. He will meet suburban and urban delegates and will confer with the executive of the municipal union on the agricultural situation.

At the opening of the conference, Premier Bracken stated that the government was prepared to increase its unemployment relief contribution from one-quarter to one-third of the project-costs, to parallel the one-third offered by the Dominion; to pay one-third—and possibly one-half—of the excess cost of winter unemployment relief work; and to pay 50 per cent. of interest charges on capital cost of work prematurely undertaken.

It was revealed that the city of Winnipeg has prepared a program of subway and bridge construction costing approximately $7,000,000, which it would submit to the Dominion Government as part of the plan to relieve the jobless, providing the provincial administration would bear its share in construction costs.

French Wheat Crops Poor

Should Estimate Be Correct Imports Will Be Heavy

New York.—The New York Times publishes the following special cable from Paris:

"The wheat crop in France this season will be so poor as to constitute a disaster, according to estimates made by Delphin Dostombe, statistician of the Bourse de Commerce, who places the total crop at 56,500,000 quintals. Should this estimate prove accurate, France will be obliged to import 20,000,000 quintals to supply her needs.

ACROSS CANADA BY AUTO

Vernon Dynes, who in company with Dick Merry, both of Oakville, Ont., have set out in an attempt to cross the continent in record time by automobile.

British Cattle Men Alarmed

Canada Applies For Extension Of Quality Mark On Meat

London, England.—Canada's plan to make a mass attack on the British meat market and her official application for an extension of the national mark—the quality sign now reserved for home meat—to cattle exported from the Dominion ready for killing in Britain, is causing alarm among English and Scottish cattle farmers, according to the Daily Herald.

The seriousness of the situation is receiving the consideration of the National Farmers' Union. The national mark for beef has caused British housewives to insist upon British meat and has resulted in a higher standard of quality. Old Country farmers have been forced to produce a higher grade of cattle and they have benefitted substantially by the national mark privilege.

It is understood that the Canadian demand for the privilege of using the mark is based upon the fact that Irish cattle are already included, and the dealers who receive Canadian cattle are anxious for it to be extended to them.

The Daily Herald regards the Canadian attack on the British meat market as a blow to Lord Beaverbrook because it disproves his argument to British farmers that imports from Canada will not affect them.

Ontario By-Elections

Elections Will Be Held In Nine Constituencies On October 20

Toronto, Ont.—By-elections will be held in nine Ontario Legislature constituencies on October 20, following nominations October 13, it was announced recently, following a meeting of the provincial cabinet. These by-elections are necessitated by vacancies caused by the death or resignation of members and the changes made recently in the administration.

The constituencies affected are Waterloo South, Nipissing, Lanark South, Perth South, Algoma, Peel, York South, Brantford and Renfrew North.

Atlantic Flight Cancelled

Roosevelt Field, N.Y.—The proposed flight of Errol Boyd and Lieutenant Harry Connor to England has been cancelled, according to a cablegram received here from Charles A. Levine, owner of the trans-Atlantic plane "Columbia," in which the flight was to have been made.

Game to the Finish!

When the talk is of game fish, the above picture of a typical [illegible] Pike, hooked at French River, Ontario, speaks for itself. Visitors and sportsmen from the four corners of the earth pour into French River Bungalow Camp each summer, over Canadian Pacific Railway lines, to holiday, golf, fish, swim and canoe under the guidance of Jack Strathdee, camp manager, who delights in showing neophytes where and how to land the big fellows. The above is a fair specimen of what luck may be expected. Game fish? Just wait till you play one!

Good Roads Association

Officers Are Elected At Annual Meeting Held In Quebec

Quebec, Que.—Hon. J. E. Perrault, Minister of Highways and Mines, of the province of Quebec was unanimously chosen as the next president of the Canadian Good Roads Association at the annual meeting here.

Hon. N. S. Lougheed, Minister of Public Works of British Columbia, is first vice-president, Hon. A. C. Stewart, Minister of Highways of Saskatchewan, second vice-president, and Hon. W. R. Hibbs, Minister of Public Works of Newfoundland, third vice-president.

George McNamee of Montreal, was re-elected secretary-treasurer while 19 directors from all sections of Canada were also chosen.

Canada Has Retired From League Council

Not Eligible For Re-Election For Next Three Years

Geneva, Switzerland.—The Irish Free State replaced the Dominion of Canada as a member of the council of the League of Nations. There were three retiring members of the council, namely, Cuba, Canada and Finland, and Guatemala. Norway and the Irish Free State were chosen to fill the vacancies.

Canada will not be eligible for re-election to the council until three years have expired.

BILL TO AMEND THE CUSTOMS ACT PASSES HOUSE

Ottawa, Ont.—The bill to amend the Customs Act in respect to dumping received third reading in the Commons, after a lengthy debate. It went on to the Senate. The bill extends penalties to imported manufactured goods as well as imported natural products dumped into Canada, and makes the wholesalers' and jobbers' prices in the country of origin the basis for deciding whether they are fair, instead of the manufacturers' prices.

The bill met with a great deal of opposition on the ground that it gave the Minister of National Revenue wide powers in regard to tariff impositions. Final protests were made by J. S. Woodsworth (Labor, Winnipeg North Centre), E. J. Young (Liberal, Weyburn), and John Vallance (Liberal, North Battleford). Hon. E. B. Ryckman, Minister of National Revenue, was piloting the bill through the House, and defended the measure.

Mr. Woodsworth, in resuming the debate, protested against what he believed to be an attempt upon the part of the government to "rush through the House" a measure that should be carefully studied both by the House and by the public before it was dealt with. There should be time given to the public for an expression of opinion on such a "reactionary measure."

The prime minister had stated that he would remain in Canada rather than go to the Imperial Conference, if the present session was not ended in time to enable him to attend. It might be possible, said Mr. Woodsworth, that the Imperial Conference could get along without Mr. Bennett.

He did not agree with those who thought that the people "should take their medicine," for once this legislation was on the statute books it would be difficult to get it off again. The government was violating the right of parliament to protest against taxation.

The legislation before the House was intended to prevent a decline of commodity prices, said Mr. Young. The whole trouble with the country at present was that prices of other commodities had not declined along with farm products. This had reduced the purchasing power of the farmers and the only way to restore prosperity was to increase purchasing power. This could not be done unless commodity prices came down for there was no way of increasing farm prices.

Mr. Vallance declared the government's proposals regarding tariff affected every industry but one, agriculture. The farmers, he said, had to be content with promises.

Hon. E. B. Ryckman, Minister of National Revenue, in a brief statement before the close of the debate, said the principle of the bill had been approved by parliament in 1922 and not until today had any protests been made. He believed it was necessary to the government's program to deal with the unemployment situation.

The bill was then given third reading.

INTER-EMPIRE TRADE STRESSED BY N. Z. PREMIER

Ottawa, Ont.—"I feel confident from the little conversations I have had here in Ottawa that we will be able to get together in matters of trade to the mutual advantage of New Zealand and Canada," declared the Rt. Hon. G. W. Forbes, prime minister of New Zealand, addressing the Canadian Club here. "However there can be no one-sided agreement."

The address of the New Zealand statesman traversed the fields of inter-imperial trade with special emphasis on New Zealand butter. New Zealand, he said whimsically, had secured a great deal of advertising throughout Canada in the matter of butter, and for that inexpensive publicity he was duly grateful. He realized that New Zealand was supplying a particularly fine article of food, but had not suspected that it contained such political qualities.

Mr. Forbes outlined the supervision exercised by the New Zealand government in the matter of manufacturing this produce, and the co-operative system of collection and sale. His country expended a great deal of money on agriculture, which was the primary industry of New Zealand. The farmers paid great attention to pasture and top-dressing. Australia and New Zealand had bought out an Anglo-German phosphate company operating in the Mandated Island of Naru. The result was a steady supply of phosphates for the New Zealand stockmen.

Unemployment was also a problem in New Zealand, the result of a world-wide depression; it affected that dominion to some extent, but a measure had been adopted at the last session of parliament providing for a direct tax on every male worker. It was not a question between manufacturer and employee, but one for the community at large, one between those who had work and those who had not. It was therefore fair, contended Mr. Forbes, that the people provided with work should furnish a fund for those who were not so provided. A million pounds a year would be raised from this fund, and out of it would be granted loans to farmers and the like. The problem as it affected New Zealand was not an industrial one but social.

Touching on the Imperial Conference, the prime minister said that New Zealand looked on this as an assembly of the very greatest importance.

New Zealand, he said, was intensely British—98 per cent. of its population was of British origin. The people entertained a great respect and affection for the Old Land, and anything that could be done to assist the Mother Country would cheerfully be done by New Zealand.

The more that could be done to bring the dominions and the Motherland closer was all to the good, continued Mr. Forbes. He recognized that the claims of one's own people must be attended to first, but after that there was the broad question of co-operation with the other dominions of the empire. The big task was to get down to a working basis and, the interests of the dominions having been seen to, ascertain what mutual agreements could be made to the benefit of the empire as a whole. In New Zealand a great deal was expected from the conference.

Present at the luncheon were Hon. R. B. Bennett, prime minister, and Rt. Hon. W. L. Mackenzie King, leader of the opposition.

Forestry Patrol

Provinces Suggest That Federal Government Should Continue To Carry On This Work

Edmonton.—Inter-provincial arrangements with the Federal Department of National Defence are in process for the continuance and operation of the aeroplane service in connection with forestry work. While the forests will hereafter be under provincial ownership and control it is felt that the operation of air services will be a difficult and costly matter for the provinces to undertake, and it is therefore hoped that they will be continued as part of the federal function.

Premier Brownlee says that Alberta is joining with Saskatchewan and Manitoba in negotiations to this effect. The importance of aerial work in forestry protection and surveys is recognized, he says, and arrangements for carrying it on as effectively as possible are being sought.

The Anglo-Egyptian Sudan has an intensive good roads campaign.

TARIFF CHANGES –

FOR GOOD or ill—whatever tariff changes bring to Canada—one can admire the promptness and despatch in which the changes were made. Premier Bennett made promises, believed in those promises and having received the endorsation of the country, at the first opportunity put those promises into effect.

It has often been stated that protective tariffs are one man's meat and another man's poison, which is true enough; furthermore the general assumption in the past has been that protective tariffs were good for eastern Canada and bad for western Canada. Now, however, due to changing conditions of world commerce, western farmers find themselves "cashing in" on protective tariffs.

Here in this district a good many depend upon the dairy industry and those who have had cream to sell for the past year or two do not need to be told what effect the importation of New Zealand butter had upon their own product. Actually, to us at the present time, upon the horizon of general low prices, the dairy industry shows as a bright light for Alberta. It is very difficult indeed to tell what will become of the wheat market, but there is some indication that the dairy industry will become better and in common with the rest of Alberta this district will benefit.

The fruit growers of British Columbia too, appear to be western people who are going to benefit by the imposition of a tariff upon fruit entering Canada. For many years now, Okanagan Valley fruit growers have been fretting because United States fruit came into Canada duty free. Their main complaint was that American fruit was dumped, which means sold at a low price in Canada so as to keep up the price on the home market. Now, however, with a certain amount of protection, a greater degree of prosperity should be evident there.

While writing somewhat casually of the Okanagan fruit problem, we have not forgotten that prairie housewives are anxious to procure fruit as cheaply as possible. Debarred by climatic conditions from growing much fruit of their own, they are for the most part entirely dependent upon British Columbia fruit, with a certain amount of course shipped from the east. Getting fruit to the prairie housewife at a low price seems to us to be as much a matter of transportation and handling costs as it does a question of tariff. For instance, we have it on reliable authority that when prune plums were retailing in Tofield this summer at $1.10 a box, growers in the Okanagan were receiving 11c a box. For the consumer to pay ten times as much as the grower receives seems to be too wide a margin. Prairie housewives need something to cut down distance and time between the Okanagan Valley and prairie cities.

But getting back to the changes in tariff, few people appear to be displeased, while quite a large number of Albertans are fully expecting much good to their own province to come from them.

FOREST FIRE PROTECTION—

THE TIME of year has again arrived when with dry and falling leaves, combined with warm fall sunshine, every group of trees, bluff or forest is a potential fire hazard. Campers, especially those hunting are urged by all out-door magazines to use every precaution to prevent camp fires spreading and to be doubly sure that camp fires are dead out before leaving them. Forest fires are disastrous in so many ways that from coast to coast, governments and various associations are continually urging the public to use care.

The time of the year has arrived too, when the householder need exercise more than ordinary precautions. Many stoves will be used that have been idle for several months. During that time stovepipes may have had an opportunity to come apart, get clogged up, become rusted through and in other ways become a source of danger. The chimney too, may have become blocked or partially so, or where pipes pass through partitions they may have become defective. In any event it is wise before starting fires in the fall to inspect the stove, pipes and chimney for defects. A little care exercised this way might prevent a disaster or tragedy. These remarks apply particularly to the country as in town gas is used almost exclusively for heating and the danger is somewhat lessened, but even so, an inspection of the furnace register and the proximity of draperies to radiants would not be wasted labor.

JOY AT LAST

After the crash the motorist carried his wife to the nearest doctor. The physician stuck a thermometer under her tongue and told her to keep it there for five minutes—which she did. As the couple were leaving the office the man lingered a moment and tapped the doctor on the shoulder, confidentially:

"Say Doc," he whispered, "What will you take for that little thing?"

A married man, much against his inclination, had to attend a fancy dress ball with his wife.

He went dressed as a Roman, but found the short, airy robes very draughty. Feeling thoroughly disgusted, he sat out in a corridor.

A bright young thing anxious to air her knowledge of Roman historical heroes, said brightly: "Ah, You are Appius Claudius".

"No, I'm not," he retorted. "I'm miserable as hell". —Efficiency Mag.

FASTEST STEAM-DRIVEN GIANT ON WHEELS MAKES ITS APPEARANCE

The fastest steam-driven giant on wheels ever to make its appearance in Canada the Hudson locomotive 5700 was released September 16, from the shops of the Montreal Locomotive Works, to haul the world's fastest train "The International Limited", of the Canadian National System, from Montreal to Chicago. This is the first of a family of five. The remainder will be delivered within a month.

To keep to schedule, 5700 will sometimes travel at the rate of 90 miles an hour. Its driving wheels are 80 inches in diameter, the largest in Canada. The drivers of the mountain type 6100 are seven inches smaller in diameter.

From end to end the new Hudson is 92 feet five and three quarters inches long and weighs, engine and tender more than 341 tons. The water and coal capacity of the tender is greater than that of any locomotive on the system, twenty tons of coal will be carried and 14,000 imperial gallons of water. The boiler pressure is 275 pounds, the maximum tractive power, without the booster, 43,300 pounds; with the booster, another 12,000 pounds may be added.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

TUBERCULOSIS AND CHILDREN

Tuberculosis is a disease which occurs at all ages and which may affect any part of the body. It is one of the communicable diseases and by this we mean that it is caused by a germ called the tubercule bacillus which is passed on from the sick to the well.

There are two sources of the disease—persons suffering from the tuberculosis and tuberculous animals. More than one case of tuberculosis frequently occurs in a family but this does not mean that the disease is hereditary. It usually indicates that the disease has been passed from one member of the family to another.

When a case of tuberculosis is found in a child, a careful inquiry will nearly always reveal another case in the home or amongst relatives or friends with whom the child has been in frequent contact.

Tuberculosis occurs in the lower animals, and cows are very frequently found to be affected with the disease. Tubercule bacilli may gain entrance to the milk as it leaves the cow's udder or by way of dirt off the cow during milking. Children are susceptible to the germ which causes the tuberculosis in the cow. This is known as the bovine type and differs somewhat from the human type.

Children must be protected from infection from these sources if tuberculosis is to be prevented in childhood.

The danger from the milk can be avoided by having the milk pasteurized. Pasteurization of milk supplies is advisable for many good reasons, one of these being that through pasteurization children, who should use milk freely are protected from any danger of contracting tuberculosis from the milk.

The danger from human beings can be overcome providing those who have the disease know it and take the necessary care to prevent the spreading of infection.

The germ of tuberculosis leaves the body in sputum of the sick person, and it is the dissemination of this germ laden sputum that is responsible for the spread of tuberculosis from one human being to another.

Coughing, sneezing and spitting in a careless manner are responsible for the spread of the germs of tuberculosis, because in these actions a spray of droplets is scattered, and so the seed of disease is spread. The case who spends sometime in a sanitorium learns there how to live and how to control the cough, or if it is necessary for him to cough, how to collect and destroy the sputum so as not to endanger others.

All adults should protect children by the observance of common decency in refraining from spitting.

Questions concerning health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

SHE VETOED HIM

(How fast can you say it)

A tree toad loved a she toad
That lived up in a tree,
She was a three toed tree toad,
But a two toed toad was he.
The two toed tree toad tried to win
The she toad's friendly nod,
For the two toed tree toad loved the ground
That the three-toed tree toad trod.
But vainly the two-toed tree toad tried
He couldn't please her whim,
In her tree toad bower with her V-toed power
The she toad vetoed him.

The Hum Of The Binder-
The Song Of The Thresher-
The Roar Of The Tractor-

EACH YEAR AS THE DAYLIGHT HOURS NOTICEABLY BECOME SHORTER, AND WE REALIZE ANOTHER SUMMER IS ON THE WANE—A CHORUS IS HEARD THROUGH OUT THE LAND. NOT MUSICAL AS WE UNDERSTAND THE MUSIC OF MEN, NOT EVEN NATURE'S MUSIC OF WIND, TREES, AND WATER, BUT A CHORUS OF FRENZIED ACTIVITY.

RIPENED GRAIN HAS BEEN CUT AND STOOKED, AND MEN TO PROCURE THE GOLDEN KERNELS, HAVE COME WITH HUGE MACHINES THAT DO NOT PERMIT DEFEAT.

WITH A ROAR THAT IS WELCOMED BY THOSE WHO KNOW IT BEST, THE TRACTOR DRIVING THE SEPARATOR STARTS UP A SONG FROM WITHIN THE SEPARATORS VITALS—A BATTLE SONG WHICH SHRIEKS OF VICTORY. THRESH, THRESH, THRESH FROM EARLY MORNING UNTIL EVENING. THRESH, THRESH, THRESH AND THE GOLDEN GRAIN COMES DOWN THE SPOUT ADDING ITS PARTICULAR NOTE TO THE CRESCENDO OF NOISES. THE TIME OF HUSTLE, AND HARD WORK, BUT WITHAL A PLEASANT TIME—THE TIME OF REWARD.

THERE IS ANOTHER NOISE WITH WHICH WE ARE FAMILIAR, WE, HERE IN THE MERCURY OFFICE HEAR IT FREQUENTLY. NOT ONCE EACH YEAR BUT ONCE EACH WEEK—THE NOISE OF THE PRINTING PRESS.

NOT THE ROAR OF THE CITY DAILY PRESS OF COURSE, BUT IF YOU FEEL SO INCLINED TO CALL IT SO THE PLEASANT SONG OF A COUNTRY PRINT SHOP. A SONG THAT SINGS OF EVENTS, LOCAL EVENTS, PERSONAL EVENTS. SINGING BARDS OF CENTURIES AGO WERE NEVER SO PROLIFIC OF THOUGHT; THE SONGS OF MARCHING ARMIES WERE NEVER SO NUMEROUS AS THE ITEMS PUBLISHED.

TWO DOLLARS A YEAR, THE OLD PRESS SINGS. RENEW PROMPTLY — RENEW PROMPTLY — RENEW PROMPTLY.

YES! SEPTEMBER BRINGS A WESTERN CHORUS. A CHORUS OF NOISES ON THE FARM, WHILE EACH WEDNESDAY BRINGS ITS OWN PARTICULAR NOISE TO THE MERCURY OFFICE. CAN WE, DARE WE, HOPE THAT BOTH NOISES WILL BE HARMONIOUSLY BLENDED, WHICH SIMPLY EXPRESSED MEANS THAT EACH AND EVERY MERCURY SUBSCRIBER WILL PAY HIS OR HER SUBSCRIPTION THIS FALL.

WE THANK YOU.

THE TOFIELD MERCURY

Development Work Commences On Townsite Of Churchill, Western Canada's New Seaport

Development of the townsite at Churchill, Canada's newest seaport, on Hudson Bay, terminus of the Hudson Bay Railway, is expected to start next spring. Churchill is about 1,000 miles from Winnipeg. The new line to the seaboard runs from Hudson Bay Junction on the Winnipeg-Prince Albert line of the Canadian National Railways, via The Pas, Manitoba. From Hudson Bay Junction to Churchill is 600 miles. The Hudson Bay Railway was built by the Canadian National Railways.

The entire townsite at Churchill is owned by the Province of Manitoba and it is to be developed along modern town planning lines. No property will be sold, but, instead there will be long term leases subject to reasonable revision at stated periods, such as every three or five years.

Engineers are now at Churchill working out plans for water works, water mains and sewerage lines. The town plan will specify locations of public buildings, schools, churches, railway station, hotels, business streets, residential section and recreation grounds. Adequate surveys will be made this year. A compact settlement is planned with the initial residential construction possibly in the form of apartment houses, heated by a central plant that would also furnish heat for business blocks and public buildings. Settlement will adhere to a carefully devised town planning scheme with proper safeguards made for future development and attention given to recreational facilities.

Many applications from those who wish to establish business houses of all descriptions at the new seaport are being received by the Manitoba Government. Three or four hotels and restaurants and a lumber yard will start with the initial construction at Churchill and work on these will probably start in October, when the survey will, it is expected, have been completed.

Bringing Crop Up-To-Date

Dominion Cerealist Is Changing Grain Of Field Peas For Feed

Field crops, like styles, have to keep abreast of the times. L. H. Newman, Dominion Cerealist, is always on the lookout for something new and useful in the line of field crops for the Canadian farmer; sometimes he makes new crops, and frequently he brings them up-to-date - this is what he is doing with the humble pea. Peas are a crop possessing high protein food values, but one which at the present time is difficult to handle, and often uneconomical because of loss due to break up in machine handling and the excessive cost of harvest labor. By changing the grain of the pea and making it stronger, Mr. Newman expects to produce a pea which, while retaining the desirable protein qualities of present varieties, will be strong enough to permit of harvesting with the use of the binder. In modernizing the pea the Dominion Cerealist is in fact changing a crop.

A Strange Epitaph

A strange epitaph has been discovered in Bolsover, that of a watchmaker buried nearly a century ago. It reads: "Here lies in a horizontal position the outside case of Thomas Hinde, clock and watchmaker, who departed this life, wound up in hope of being taken in hand by his Maker and being thoroughly cleaned, repaired and set going in the world to come, on the 15th of August, 1836.

The Same But Different

Cabby (on being told to go to the courts of justice): And where be they?

Judge: What! A London cabby and you don't know where the law courts are?

Cabby. Oh, the law courts. But you said the courts of justice.

Doctor. "Show me your tongue again, please. Thank you; now keep it out till I've finished speaking."—Hummel, Hamburg.

Canada Is Exporting Rabbits To Japan

British Columbia Agency Has Big Contract For Three Years

Angora rabbits raised and bred in British Columbia are finding a ready and lucrative market in Japan and large numbers of them are being shipped on almost every outgoing steamship for the Far East. One agency alone has a contract to supply a thousand rabbits a year for three years to the Japanese market.

In Japan they raise rabbits for wool and not for meat, it is explained by J. Kumaghaya, manager of the Consolidated Farmers Co-Operative Association, who has been supervising the shipments from British Columbia.

"We plan to furnish every farmer in Japan with at least five rabbits," said Mr. Kumahhaya. "We already have provided the machinery for handling the wool in all manufacturing stages."

The Japanese importers find that Canadian rabbits are superior to those raised in the Western United States, which were previously a source of supply. The cooler summers tend to produce hardier stock and better conditioned fur, and as a result Japan has turned to British Columbia for the foundation of its rabbit industry.

Winnipeg Newspaper Union Fashions

(By Eva A. Tingey)

7278

THE MODERN TOUCH

All Tingey models are created and sketched in Paris, and the patterns are made in New York.

So many delightful accessories to Fashion! So many delightful ways of using them!

This charming evening frock, gracious and lovely in every detail, favors the clips of strass, so smart just now. It has two. One worn on the shoulder to catch a beau — bow I mean, and the other at the waistline—also to catch a bow—and incidentally [illegible] a beau also [illegible] easily be caught, [illegible]

The frock is very graceful carried out in satin—while being still popular, or pale shades of [illegible] peach, black, etc. Moire in brilliant red yellow or orange is a stunning medium. Very fluid chiffon velvet is also a lovely material for such a model. Rather shadow effect patterned lame are seen here and there, too.

This pattern may be obtained in sizes 14 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Facts About Empire Marketing

Denmark Leads In Giving Attention To Quality Of Exports

Referring to the problem of Empire marketing of agricultural products, it was stated that the Empire Marketing Board in London, England, was doing excellent work. Denmark, be it noted, is probably the most highly organized agricultural country in the world with respect to the marketing of its agricultural products. "One lesson which Canada must learn from her if we are to play a big part in the world's markets, is to meet in every possible detail their exacting demands. Denmark gives attention to every peculiarity of the markets she seeks to serve, which are chiefly in Britain, and nothing is permitted to go out of the country that is not of top notch quality. Danish agriculture is remarkable for this fact, for its uniformity of products of all kinds, and above all, for the marvellous system of marketing which has been built up, through which the farmers are enabled to obtain returns fully ten per cent. higher than they otherwise would. Through an equally fine system of purchasing, the farmers are enabled to buy their supplies cheaper than otherwise would be the case. Canada has another lesson to learn and that is to take more account in the future of other wheat growing countries and their possible competition. We are so accustomed to think that because we export a vast amount of wheat, we are one of the biggest wheat producers. France and Germany both produce an immense amount of wheat, much of which came into competition with ours last year, and Russia is again rapidly getting back into production and will be a big factor soon in the world markets."

Silos For the West

Many Farmers Are Alive To the Advantage Of Using Them

The silo is a valuable means for storing feed for winter use or to supplement the pastures in spring and fall. By properly packing it, particularly at the edges, when filling, and by removing six inches per day, a succulent nutritious feed is available for all classes of stock at all seasons of the year, with very little waste.

Silage has certain laxative properties which keep the digestive organs of animals in good condition. Animals receiving some kind of succulent feed have keener appetites, softer and more pliable skins, and a more thrifty, more healthy appearance than those fed exclusively on dry rations.

Each year is marked by the erection of a few more silos in the prairie provinces, but unfortunately the number is not so large as is warranted by the success which attends their use. At the Dominion experimental station, Lacombe, Alberta, three general types of silos, the above-ground, the pit, and the trench, have been used for a number of years with such excellent results, that we have no hesitation in recommending them to anyone keeping a number of live stock.

Mexican Market For Seed Potatoes

Experimental work by the Mexican government along agricultural lines may open a market for Canadian seed potatoes, according to a report received by the Department of Trade and Commerce from C. Noel Wilde, Canadian Trade Commissioner in Mexico City. Small quantities of seed potatoes have been sent to Mexico where they are being tested for growth, volume of production, etc.

If you are not envied you haven't accomplished much.

Fish Resources Of Hudson Bay

Dominion Government Making Survey Of Possibilities

In its investigation of the fish resources of Hudson Bay, the Dominion Government expedition has practically completed a survey of the west coast of the northern inland sea. So far, nothing has been found to justify commercial operations in that area.

The results, so far, however, are not disappointing, according to officials of the Fisheries Department here. Owing to the muddy bottom in the western section of the bay, it was not expected fish would be found in any large quantities there. The expedition is now proceeding to the east side of the bay, where conditions are more favorable.

So far, no examination of James Bay has been made. From the point of view of sea fishing,—James Bay offers little encouragement, although there are ample quantities of fish to justify operations in the rivers flowing into the bay.

The study of fishing prospects in Hudson Bay, by the Federal Department of Fisheries, takes on an added importance at this time, because of the early completion of the Temiskaming and Northern Ontario Railway to the shores of James Bay. The building of the road is now well advanced, and within a year it will be possible to run trains to the Bay.

Should commercial fishing prove practicable, the fish could be shipped rapidly by a direct rail route to the large cities of southern Ontario and the thickly populated areas of central United States.

First Welland Canal Built Century Ago

Lock Eight In New Canal Is Longest In World

The figure 8 and its multiples are curiously in evidence in the construction of the new Welland ship canal. For building purposes the canal was divided into 8 sections. There are 8 locks in the canal, it takes 8 minutes to fill each lock with water, and 8 hours for a vessel to pass through the entire canal. The 8 locks have each a usable length of 820 feet with a depth of 80 feet, and 82 feet is the height of the lower mitre gates. The greatest height of lock wall is 138.8 feet and the weight of metal in the valves of locks is 3,800 tons. A pond 80½ feet deep, covering 84 acres feeds the flight locks. The span of the lift bridge at Peter Street, Thorold, is 88 feet, and lock 8 with a length of 1,380 feet is the longest in the world. The greatest width of the entrance to Port Weller is 880 feet. Over 8,000,000 cubic yards of rock have been excavated, and more than 28,000,000 lbs. of reinforced steel used. It is interesting to note that the first Welland canal was 8 feet deep, and was practically completed in 1828, over 100 years ago, the first vessels having been locked through early in the following year.

The Subway Of Paris

The "Metro" of Paris like the "Tube" of London, and the "Subway" of New York City, grows in mileage and popularity from year to year. Last year it had 72 miles of operating lines and carried 830,000,000 passengers: next year it will have 80 miles, and doubtless a commensurately increased passenger traffic. Neither the New York subway, nor the London tube carries as many passengers per mile as the Paris Metro.

"Leap year is so called because the earth goes around the sun for three years, but in the fourth it leaps over it!" wrote a very youthful student in an examination paper.

MAKES GOOD-WILL AIR TRIP

The photograph above shows Ruth Alexander, noted aviatrix and holder of altitude record for women, just prior to taking off from Agua Caliente race track, Baja, California, on her "Three Flag" good-will non-stop border-to-border dash from Mexico to Vancouver and return, which she has just successfully completed. Note her toy pup, "Maryland," official mascot on the trip.

Canadian Railway Trains Make Faster Time Than Any Other Trains in the World

A Profitable Investment

Beautifying the Farm Home Will Greatly Add To Its Value

Every unimproved or unplanted home in Canada can be made more attractive and more valuable by the planting of trees, shrubs, vines and flowers, and a well-kept lawn. The cost of the nursery stock required is one of the most profitable investments a farmer can possibly make, because such improvements will actually increase the money value of the place by many times the amount spent in a simple plan of home planting. It will make it more valuable as a home and it will certainly command a better price if put up for sale. It is surprising how a few improvements will turn a mere house into a real home. In addition to its increased monetary value the attractive farm home goes a long way in holding the family together; in keeping the young people on the farm. They will love their home and be proud to bring in their friends.

Some may say that it costs too much or that it takes too much time to care for flowers and shrubs. It is, however, more a matter of disposition than of time or money. The farmer who is disposed to have flowers and attractive home surroundings will have them, no matter how busy he may be. Canadian farms should be more than just farms, they should be homes in the country.

Says Contract Signed

President Of Manitoba Wheat Pool Claims that Hon. Robt. Forke Is Still a Member

Hon. Robert Forke, who in the Senate declared he had not renewed his membership in the Manitoba Pool, is still a member of the farmers' co-operative organization.

In a statement issued here by C. H. Burnell, president of the Manitoba Wheat Pool, it is declared that Mr. Forke signed a contract with the Pool in March, 1924, and he renewed this contract for another five-year period in January, 1928, his contract expiring with the 1932 crop.

"That there is no mistake in this is proved by a notation in Mr Forke's own writing on the contract," said Mr Burnell, "the notation reads 'send all mail to Ottawa.' If Mr Forke is not delivering his wheat to the pool this year then he is violating the contract he made with his farmer neighbors and is liable to the penalties provided in the contract."

Blinded Birds Used As Decoys

Italian Peasants Have Inhuman Method Of Obtaining Food

Swallows, sparrows, skylarks, finches and many other small song birds form the chief meat diet of the peasantry of Italy, according to Dr. Gilbert T. Pearson, well-known bird protectionist, who addressed the opening session of the convention of the International Association of Game, Fish and Conservation Commissioners at the Royal York Hotel, Toronto. The birds are lured into nets or pools of glue by living decoys or painted imitations. The living decoys are usually birds that have been blinded with red-hot needles to make them sing. Hidden in cages under thickets, they repeat incessantly automatically, their mating call. They cannot stop. They go on calling out night and day until they die.

A Real Fish Story

This story from Portland, Oregon, may sound fishy.

Kenneth and John Fisher were arrested by Art Fish, deputy fish warden, charged with possessing unlawfully a truck load of fish.

Fish said Al Fishburn called his office to report the Fisher brothers' truck loaded with fish upset. Fish said the Fishers said they were fishermen, but Fish put the fish in cold storage until the court decided whether the fish the Fisher brothers possessed were their's or whether Fish could confiscate the Fisher brothers fish.

The Famous Cariboo Trail

During the summer of 1930 the Geodetic Survey of Canada, Department of the Interior, carried a precise level line in British Columbia from Quesnel to Prince George, over the route of the Cariboo highway. This is the most northerly section of the [illegible] highway now open to motorists from Vancouver to Prince George.

Roadside stands in the United States now do a business amounting to more than $300,000,000 a year.

Canadians who talk about the fast United States trains to the disparagement of their own, will some day realize that for speed on main lines, the Canadian trains not only push Uncle Sam's fastest far into the background, but that two Canadian trains make faster time than any other road in the world, for the distance, says a Montreal Star news writer.

No train in the world runs as fast for the distance as the Canadian National six-hour train from Montreal to Toronto. It covers the first part, 126 miles, in two hours, or an average of 63 miles per hour. Even the much vaunted Flying Scotsman and the Royal Scot, in England, over tracks that only Old Country railways can provide, would watch the taillights of Canada's crack flyer disappear.

Many people think the New York-Chicago trains are the swiftest on the continent. They make the run from the two points in 20 hours, or at a rate of about 50 miles an hour. When one considers that these trains charge $10 extra fare, have no day coaches, and enjoy the richest clientele in the world, American trains do not appear to have the best of it after all.

The Trans-Canada Limited, over the C.P.R., is the fastest train in America from coast to coast. It averages a little better than 33 miles an hour when everything is considered. That means, the passenger from the time he gets in at Montreal till he gets off at the wharfside in Vancouver, would average that time. But the Trans-Canada loses 4 hours and 12 minutes, in scheduled stops at divisional points, thus making the run about a 35-mile an hour one. When one considers the climb over two heights of land in New Ontario, and the terrific grades in the Rockies, it gives some idea of what this de luxe train must contend with. The American rivals to it do not fare any better on their averages.

In the United States, the Congressional Limited, Washington to New York over the Pennsylvania, makes the 226 miles at around 52 miles an hour. But this is over one of the greatest tracks in America, if not in the world, and it traverses very level country. But the Missouri Pacific's Sunshine Limited, St. Louis to Little Rock, makes 44 miles an hour, and slows down under 40 beyond the Arkansas capital. The Overland Limited, all-Pullman extra fare train, over the Chicago and Northwestern, from Chicago to Omaha, on the California run, takes extra cash from the customers for making 43 miles an hour.

The Crescent Limited, New York to New Orleans, that has showers on board, paints its engines green, employs special coach decoration and charges extra fare, makes the 333.7 miles between Washington and Salisbury, North Carolina, in 6 hours and 50 minutes. Compare this with the International Limited's 330.4 miles in six hours, or the regular trains doing it from seven and a half hours to seven hours and 45 minutes. And day coach passengers can ride on those Canadian trains, while on the southern railway, they must take slower trains.

Successful Yacht Owner

His Majesty the King, it is not generally realized, is the most successful yacht owner who has ever lived. The Britannia, which again distinguished herself at Cowes this year, has won him this distinction. Built 37 years ago, she has raced nearly 500 times, and has now won 209 first and 86 other prizes — an achievement which has never been equalled by any other similar craft.

Alexander the Great forbade his Greeks to wear beards, lest the enemy seize them in close combat.

"At my age one can expect anything. I often walk round the cemetery to get used to it."

"Oh, are you that far gone? I often walk round the hospital."—Pages Gaies, Yverdon.

BACKACHE

Wonderful relief from pain

Backache is one of those worrying complaints which bind all their victims together with a common bond of misery. And when any one sufferer from backache finds a sure remedy, fellowship prompts the glad report of that discovery to others. Here's a woman who has her friend to thank for knowledge of a remarkably successful treatment. Now gratitude compels her, in turn, to pass along the good news to you.

"I am writing to tell you of the great benefit I have received from Kruschen Salts. My friend, Mrs. H. had received so much benefit that she begged me to give Kruschen a trial, although at first I was doubtful, because I had tried so many things. At last however, I tried some of her Kruschen, and feeling hopeful, I purchased a bottle, and I can honestly say that before I had finished the bottle my backache was gone. I have suffered for years with kidney trouble and dreadful headaches, and now to be free from the pain altogether is wonderful."—(Mrs. L.)

WORLD HAPPENINGS BRIEFLY TOLD

Fewer convictions for drunkenness in England and Wales were reported during 1929 than in any other year since 1919.

Berenice and Phyllis Zittenfeld, the 15-year-old United States girl swimmer twins, failed in their attempt to swim the English Channel, nearly reaching the French coast.

Henry Roller and his two sons, aged 24 and 26 respectively, of Hull, England, are all blind as the result of three accidents in the last few months in the factory where they worked.

The Arctic canoe expedition of Fisher Brothers and Bruder, which reached Prince Rupert recently, after covering nearly 9,000 miles in six months, is being discontinued at Prince Rupert for the winter.

Two hundred thousand persons are facing death by starvation near Chocheng Honan province as the result of warfare, bandit depredations and floods, said a Chinese news [illegible]

Report On Immigration

Saskatchewan Commission Submits Its Report On Immigration Matters

While some inflow of immigration must be permitted "if we are to maintain a biologically and economically sound condition of rural population, such immigration must be under strict control, effective checks and proper safeguards, provincial as well as federal."

This statement is the keynote of the report of the Saskatchewan Royal Commission on Immigration and Settlement submitted by Premier J. T. M. Anderson, and by him released for publication Thursday, September 18.

Because the "reserves of unutilized land suitable for settlement in Saskatchewan are much less than is often assumed to be the case," the Commission argues that restriction of immigration rather than its promotion is essential at the present time. Consequently it confines the greater part of its attention to ensuring that what immigration is permitted shall be of the most approved type and that those newcomers who penetrate the restrictive barriers shall have a reasonable chance of making good.

Upon the premise that rural population is a "sine qua non" so far as Saskatchewan is concerned, and upon decisions reached after a thorough study of the 58 volumes of evidence collected in the examination of 476 witnesses at forty sittings, one of which was held extra-provincially (at Winnipeg), and of a mass of pertinent data, the Commission bases a series of correlated recommendations creating a complete mechanism for the control of immigration and the regulation of settlement. Personnel of the Commission which began its work, January 20, 1930, and closed its public sessions, June 3 was: Prof. W. W. Swanson, chairman; P. H. Shelton, vice-chairman; T. Johnston, G. C. Neff and A. R. Reusch.

The Commission's recommendations are submitted under five headings: A—the Machinery of Control; B—Immigration Agencies and Their Licensing; C—Classes of Immigrants in a Broad Order Of Preference; D—Methods of Land Settlement and After-Care and E—General Recommendations dealing with matters germane to the subject studied and designed to promote the development of the land and other resources of the province.

Saskatchewan being an agricultural province the recommendations deal essentially and predominantly with agriculture and land settlement and, in the wording of the report, [illegible]

Discovery Of Franklin Relics

Resident Of Vancouver Credited With Giving Valuable Information

The Toronto Mail and Empire publishes the following despatch from Vancouver, B.C.

"Major Burwash's success in finding the two Franklin camps is credited here to clues supplied by T. W. 'Judge' Jackson, a little, white haired resident of Vancouver. For more than 60 years Mr. Jackson has been interested in finding Franklin's grave. He has followed clues of elusive Eskimos, studied old charts, diaries and books, and with the help of George Jamme, a veteran mining engineer now living in Seattle, he felt sure he had obtained information which would lead to Franklin's tomb.

"After many years of effort the Dominion government became convinced of the plausibility of Mr. Jackson's conclusions. They acquired his documents, obtained all the necessary information and sent Major Burwash into the Arctic this summer. Burwash was instructed to go [illegible]

[illegible] get in touch with his son who stayed in the north country.

"Finally I got hold of Rayne's charts and plans and I believed they held the key to Sir John's resting place.

"I did not place any confidence in stories by living Eskimos about first-hand memories of the burial of Franklin. They would have to be 100 years old and Eskimos do not live that long."

Memorial To Sir Walter Scott

Tablet Will Be Unveiled In London, England, By Hugh Walpole

One of the many tragedies of old London is recalled by the announcement that a tablet on the site of the old St. James' Hotel, in Jermyn Street, where Sir Walter Scott spent his last days in London, will be unveiled by Mr. Hugh Walpole next month. It was in a second-floor back room of the hotel that Sir Walter Scott lay while the twilight of his great life slowly deepened. Scott's courageous end really began when, at the age of 55, he was faced with a debt of about £120,000. He refused all offers of aid, and said [illegible]

PAT'S CASE

An Irish Truck Driver was charged with reckless driving in having stopped his truck so suddenly that a cow behind rammed into him.

The judge asked him why he had not held out his hand. Pat indignantly answered: "If the poor fool couldn't see me truck, how in hivin's name could he see me hand?"

Man can fly like a bird but he still has lots to learn from birds.

Birds are the only friends. It will be a long time before we can sit on a bark wire fence

"Now, who remembers the name of the animal we were talking about yesterday?" asked the teacher

"Please, sir, it's warsaw."

"The warmer What nonsense—there's no such animal."

Another little band shot up.

"Please sir, he means the otter."

FALL AND WINTER CHANGES IN TRAIN SERVICE ANNOUNCED BY CANADIAN NATIONAL

Changes in passenger trains for fall and winter service on the Canadian National Railways in Western region are announced for September 29th, according to R. Creelman, Passenger Traffic Manager, Winnipeg.

While there are a number of changes in the various districts in each province some of which are the usual changes made each year at this season, the most important is the discontinuance, temporarily, of "The Confederation," in the west but this train will continue to homeshore between Winnipeg and Toronto, under the name of "The National".

SLIGHT ERROR

Rastus (after survey accupy at a railroad crossing): "Quit blowin' you' horn, dat don't do no good."

Mose: "Dat 'cos we'se neah born you inward nigger, dat was Gabriel's horn."

A Cheerful Message

Predictions of forthcoming markets and events always have a degree of uncertainty. Therefore it is hoped all those who are predicting a less period for farmers are wrong. Just the same it would be better to play safe and milk more cows. The dairy industry is the silver lining to the agricultural cloud at present hanging over us.

Local and Personal

Mrs. F. Parker of Bow Island, Alberta is visiting at the Herlehead home in this district. Mrs. F. Parker is a sister of the McSorley brothers.

Miss Lorelie Gray is visiting friends in Edmonton for a few days. She will be back on Thursday.

Mr. and Mrs. Kinnear, of Jasper spent Sunday in Tofield visiting their son Jack.

Miss LeonBelle Jeffreys of Chipman spent the week end with Annie Smith and Ethel McClymont.

Mr Fred McSorley is in Edmonton this week serving on the jury.

Mr. Harris was a visitor in town Monday.

Mr. Leach has returned from his two weeks holiday at the coast.

Mr. Mason of Edmonton was a visitor in town on Sunday.

Word has been received of the untimely death of Mrs. Bradley, which took place at Vancouver recently. Mrs. Bradley will be remembered by many Tofielders as Miss. Mae MacOwen, a former teacher at Tofield, being here under the principalship of Mr. F. G. Young.

HOLY TRINITY CHURCH

Sunday, Oct. 12th.
HARVEST THANKSGIVING SERVICE

11 a.m. Holy Communion.
Address: "Laws of the Spiritual Harvest".

7:30 Evensong.
Address: "From Affluence to Penury in a moment".
Preacher: Rev. W. Leversedge

NEW TRAIN SERVICE EFFECTIVE SUNDAY, SEPTEMBER 28th

No. 2 Eastbound, due to arrive and leave 9:16 a.m.
No. 28 Eastbound due to arrive and leave 9:38 a.m.
No. 26 Southbound due to leave 9:40 a.m.
No. 25 Northbound due to arrive 5:05 p. m.
No. 27 Westbound due to arrive and leave 6:10 p. m.
No. 1 Westbound due to arrive and leave 9:17 p. m.

—

Mr. Earl Beard of Chipman visited friends in the district over Sunday.

Mr. and Mrs. Donnell, Warner came down from Chauvet Bar on Sunday to help with threshing on Mr Warner's farm, some time but as per usual the inclement weather discouraged threshing late.

Lilah Johnston spent Sunday with her friend Ruth James. The occasion being Ruth's twelfth birthday.

Mrs. H. D. Stone of Lindbrook spent Tuesday at the home of Mr. and Mrs. Phillips.

Dr. I. [illegible] was out to the school on Friday morning giving the children their [illegible] of anti-diphtheria serum. He was assisted by nurse Wood.

Miss Mildred Ingram of Ketchemoot spent several days last week with her sister Mrs. T. D. Ferguson.

LARGE ATTENDANCE AT RALLY DAY SERVICE

On Sunday evening, September 28th the United Church held its annual Rally Day Service. Owing to the illness of Mr. Swift, the superintendent, the service was postponed from the morning to the evening. Mr. Swift was still unable to be present in the evening and Mr. Gordon acted as superintendent.

The service was put over splendidly by a choir by Mrs. C. H. Reeve and Mrs. Fyth was very nicely sung. Mrs. McCauley gave a legend which was true to every day life. The Primary Department under the supervision of Mrs. Firth sang very well and a recognition followed the service by the use of Rally Day programmes.

V. P. S. EXECUTIVE HOLD BUSINESS MEETING

The Executive of the Young People's Society met at the home of Mr. and Mrs. Bert Swift on Monday evening with the purpose of reorganizing the Young People's Society.

It was decided to hold its reorganization meeting on Friday evening in the form of a supper in the basement of the church at 6.30 p.m. All old and prospective new members should see Miss Thelma Noland or Bert Powell.

It was also decided to have a membership ticket printed this year for which one dollar will be charged be-

Lindbrook

Mr. R. E. Clarke returned here from Edmonton to finish his work here with his crop, as soon as this is done he is returning to their new place at the above mentioned place.

Mr. Deere who has bought the farm of Mr. A. E. Hicks has moved into same and expresses himself very well satisfied with same also the district. We wish him all the best of luck, etc.

Messrs. Scott and Lindgren shipped a bunch of lambs to Edmonton and report that although the prices being low they did pretty well out of them.

Mr. D. McCaw is around checking up the flax, that means the country-side and making the necessary arrangements to extinguish same.

The inclement weather is still hindering threshing and harvest operations here and by the way, where's your for famed Indian summer got to this year; seems as if the ducks got a bad exchanged places with it.

The wheat situation is by no means encouraging to any farmer having to-day's cash prices to work on, and no one cares to predict the cash bottom prices, lets hope it will be reached before we are all on the rocks. The prices of other farm products is nothing to exult over either, still in spite of all no one around here is in dire distress or anyways near it, so carry on Sept. Mr., You'll get some in the next issue" Next year Maybe, maybe not!

Lakeshore

Once more rainy weather has stopped threshing operations and what looked like a short harvesting season is stretching out interminably.

Mrs. L. H. Graham and Miss. Elsie Graham left the week end to Edmonton.

Mr. and Mrs. T. R. Murray motored to Camrose on Thursday on business.

Miss Maggie Wood was a Sunday afternoon visitor at the Abernethy home.

Mr. Joe Matejahn of Camrose was a visitor at the Wood home on Sunday. Mrs. Matejahn accompanied him home after spending some time visiting relatives here.

Mr. Earl Beard of Chipman visited friends in the district over Sunday.

Mr. and Mrs. Donnell, Warner came down from Chauvet Bar on Sunday to help with threshing on Mr Warner's farm, some time but as per usual the inclement weather discouraged threshing late.

Lilah Johnston spent Sunday with her friend Ruth James. The occasion being Ruth's twelfth birthday.

Mrs. H. D. Stone of Lindbrook spent Tuesday at the home of Mr. and Mrs. Phillips.

Dr. I. [illegible] was out to the school on Friday morning giving the children their [illegible] of anti-diphtheria serum. He was assisted by nurse Wood.

Examiner's Weekly Review Of Western Markets

BEEF — Edmonton reports the markets [illegible] showing a decidedly better [illegible] light receipts. Prices are [illegible] to 50c higher. Choice heavy steers [illegible] sold from $5 25@5 75; choice [illegible] $5@5.25, good $4@ $5.25; common [illegible] $3.50@4. Choice heifers [illegible] over the scales at $5.50@$6, good $5@5.50. Heavy cows, sold at $4@4.50; good $4 @ $4.50 [illegible] $3@3.75, common $2.50 [illegible] canners from $1 to $2 [illegible] bulls sold at $2.50@$2.75 [illegible] $2.25 and common kinds selling at $1@$2.

FEEDER STOCKERS— Demand on the [illegible] has been fairly active, and [illegible] are turning over at [illegible] from Feeder steers making $4@$4.75, stock steers $3.50@$4.50, stock heifers $2.50@$3.50, stock [illegible] from $2.50@$3.50.

HOGS

Edmonton reports that heavy hogs made $11 on Wednesday, while outsorts sold at $11.50 and butchers at $10.65, fed and watered.

SHEEP

Edmonton reports a slightly better tone to the market with yearlings at $4@$4.50, ewes $2@$4, and lambs $5.50@$6.75.

CREAM—BUTTER—MILK

CREAM Receipts continue to show a decline but prices on Monday were advanced 2c as a result of some strength on eastern and western markets. Special now bringing 37@ 37c, first 35@37c, and second 32@ 33c at country points and central-ers.

CREAMERY BUTTER—Near approach of date set for change in tariff has strengthened market and Alberta values jumped 2c on Monday. No. 1 Cartons 35c; No. 2, 33c; No. 1 prints, 36c and No. 2, 32c. Sales in the province good. Few shipments still being made to the east.

DAIRY BUTTER—Harvest operations have helped to curtail offerings, but there is still more than cream-ers can handle available. Prices firmer as a result of jump in creamery values. Fancy table quality bringing 31c; No. 1 31c @ 31c and No. 2, 31c.

POULTRY — EGGS

POULTRY—Little change has been noticeable in receipts this week. Market undertone not very encouraging owing to large storage holdings of last year for which little demand can be found. Prices are unchanged. No. 1 fowl, over 4 lbs., 21c; No. 1 under 4 lbs., 9c; No. 2, 5c; roosters 5c, and broilers 18@ 19c.

EGGS—Offerings continue light, with quality on the whole is not very good. Extras finding fair demand, but other grades inclined to be drag ging. Prices steady at extras, 29c, firsts, 21c; seconds 17c.

HAY—Carlots

HAY — OATS — GREENFEED

HAY—Carlot lot movement of hay very limited. Reports about the only shipments noticeable are those going direct from owner to consumer Export demand will develop as winter approaches. Upland quoted at $12 and timothy at $17 per ton at country points.

OATS—Bulk of offerings consist of last year's crop. Demand not very active, market weak. Quoting No 2 C.W. basis, delivered Greenfeed—Only small lots being handled. Few enquiries received regarding early movement, but nothing developed so far. Quotations of $9@$11 per ton prevailing.

HIDES—WOOL

HIDES—Receipts from country points light owing largely to low prevailing prices. Demand slow; offerings reported to be of good quality Prices steady with those quoted last week.

WOOL—Receipts very limited, for bulk of clip has already been marketed. Jobbers quoting 19c per pound.

U. F. W. A. NOTES

Mrs. Peter Lee entertained the U. F. W. A. at her home last Thursday. An excellent paper on the life of Hon. R. B. Bennett was read by Mrs. Booth. A delicious lunch was served by the hostess at the close of the meeting.

We will meet again on October 9th at the home of Mrs. John Morton. Roll Call will be "Is Gossip of any Benefit?"

—

Mrs. Peter Lee entertained the meeting of the monthly fees.

It was decided not to have the Solo dividend into groups this year.

Russia's Five-Year Plan

Under all known conditions, the republic of Western Canada was, during part of each year, interested in events transpiring and developments taking place in Russia. For some time past and to an ever-increasing extent, Russian policy has been a matter of wondering and a definite effort upon the part of the Dominion, in fact upon the whole business community of Canada as well, to study the countries.

In so far as can be learned at present, exactly what is taking place in Russia at many regards are mystifying and confusing, consequently it is not surprising that people in this country are still puzzled and perplexed as to their minds whether Russia constitutes a real and permanent menace to Canada, not politically or in economy, we but economically.

Until the Soviet government became fairly well established, for example, it is known that in October, 1928, Russia inaugurated what is known as the "Five-Year Plan" of national development which, in every of the special features of the most interesting economic experiment anywhere in the world.

In the short space of the second year of this experiment will come to a close the estimate has been the progress made that now the slogan is: "The Five-Year Plan in Four Years." What is this "Five-Year Plan"? It was established by a Soviet Government agency over a year ago and is, in part, the plan.

Provision for industrial investments, at the five years' beginning are $\frac{1}{2}$ billion dollars, or more than one and one-half times the actual investments in the preceding five years. A specific share of the $\frac{1}{2}$ billion dollars for the establishment of industrial plants and for the purchase of foreign equipment and machinery. Among large projects are the construction of about 12 automobile factories, one tractor plant. Among the outstanding projects scheduled for completion, and in most instances completion during the five-year period are: an iron and steel plant, the largest in the world, with an annual production capacity each, an aluminum industry with an output of 100,000 tons per annum, a motor car plant to produce over 100,000 autos per year, among others, besides, machine building, electro-technical, paper, glass, leather, and other industries, as well as a dozen or more large power projects among many others.

That was the plan, but according to a Moscow correspondent of the Manchester Guardian, the Five-Year Plan in many instances is already surpassing the figures expected to be attained in the year. The first version of the Plan visualized the production of 22 million tons of pig iron by the end of 1933, but these figures have been revised upwards, some claim, to 50 million and 17 million. During the current year 221 new industrial enterprises, built at a cost of approximately $420,000,000 have been put in operation, and the list of unusually large factories which have been completed and are now operating, recently, includes a tractor plant, an agricultural machinery factory, a paper mill, a pipe factory, two oil refineries, several electrical plants.

The "Five-Year Plan" also included what practically amounts to the nationalization of agriculture and the erection of those huge tractor and agricultural machinery factories, oil refineries etc., are all a part of this new agricultural policy. The Manchester Guardian correspondent in Moscow, further notes that in collective farming 25 per cent. of the peasant households have already been drawn into the cooperative method, although the "Plan" originally contemplated only 20 per cent in 1932."

Russia is now importing wheat coal lumber into many European and other markets further encroaching the already badly demoralized world price level. Moreover, the Russian Government is reported to have actually chartered a large number of vessels to convey orders from Russia to France, Britain, and other countries and that this wheat will be sold abroad regardless of price. The United States Government has charged that Russia has engaged in transactions in the Chicago grain markets to force down the price of wheat in the United States. The United States Government has secretly sent representatives into Canada, the League of Nations at Geneva is discussing the Russian policy and all other countries.

It is further alleged that under Soviet auspices this great "Five-Year Plan" is being carried out with mostly cheap labor and much of it forced labor, and that the products of this labor are being dumped into foreign markets, thus food and coal, especially, at prices are sharply ratioed with the result that other countries manufacturers of latter are forced to greater industrial efforts, or shut down entirely, unable to compete with Russia.

The Dominion government has established certain safeguards in the way of tariffs, etc., to protect Canada from Russian competition, but on the other hand, the government is encouraging the development at home of many industries, the products of which are in competition with Russian goods, and a committee of experts is now investigating the whole question of Russian trade and further depressing already depressed conditions throughout the world.

The farmers of Western Canada, who must depend for their success upon finding suitable markets for their products in world markets, are among the most interested.

Sales Have Increased Rapidly

"Dry Ice" Is In Demand All Over the World

Says Dr. Richard Borden

Canada Held As Example

Has Solved Problem Of Minorities Country

The first pound of "dry ice" or solid carbon dioxide was sold for commercial refrigerating purposes in 1925, by the Dry Ice Corp. of America, and as a result of the popularity of the commodity, sales for 1930 may reach 35,000 tons.

The material is being used in 18 states from coast to coast in the United States.

Canadian carbon dioxide is produced from the exhaust gases of boilers in oil or coke fired and by other of the low temperature of its formation dry.

Fittings in Limousine of Sugar-Shooting King Very Complete

A Packard sedan has come recently delivered to King Alexander, of Jugo-Slavia, is said to be one of the most richly appointed cars of its type in Europe. The interior of the glass partition separating the front compartment from the driver's space is divided into a number of compartments. A large locker to the rear of the seats with a leather bench top, equipped with a complete silver and 4 of table service in a double compartment at the right are three large bottles for warm foods and a large toilet case Thermos bottles for hot or cold liquids are fitted into a locker at the left of the range hood, as also in the top of this space are a fold-out kit and a large cigarette case. A built-in compartment for the King's sword extends across the back of the limousine and is closed immediately in front of this by a tray to accommodate coat maps.

Source Of the Thames

Seven Springs In Cotswold Hills Feed World's Most Famous River

How many people—even among the millions who live in London—have ever gazed any offhand where the source of the Thames may be found? The fact that so few of us know anything about the beginnings of the world's most famous river is reflected in the statement, that, until recently the Thames had its source in a rubbish dump. Now the rubbish has been cleared away and visitors to the source will find a fine spring of good water with, at one side, a stone figure of Father Thames. Springs in the slopes of the Cotswold hills in Gloucestershire are beyond question the true source of the Thames, that title in the case not in the spring in Cotswold Hills where Seven Springs is situated, we are not thinking of London and London's River Thames. Even a glass is now on hand to keep the site in a worthy manner and to build a Roman archway which the Seven Springs flow.

A famous beast has a complete record of his fighting. He might be keeps them in a scrap book

Her Two Children Had Summer Complaint

Mrs. S. Z. MacDonald, Clear Bay, B.C., writes: "I am the mother of six children, and have had the battle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and nothing I tried could equal that of Dr. Fowler's. I had used everything, but they would get no relief. Dr. Fowler's made a change in both of them in less than two hours."

Get the genuine Dr. Fowler's Extract of Wild Strawberry. Automatic Insurance

Insurance companies and the Automobile Insurance corporations and the Retail Merchants' Association, which have been engaged by the Attorney-General Lymburn, to take place in Edmonton.

A meeting of the bank representatives with government officials was held a few days ago, and four of the cabinet ministers were present with the President interests in the south.

"The farmer must be allowed his living this winter, and we are trying to get to the bottom of the situation and then decide what can be done. Among other things, it may be possible to get through the freight stock to use up the surplus coarse grains and other crops this winter," the premier stated

Deplores Alarmist Talk

Dr. Sorenson Says There Is No Over Production Of Wheat

Quebec, Que. All alarmist talk of world over-production of wheat was, in his opinion, unwarranted, Dr. W. W. Sorenson, of Montreal, head of the Department of Economics of the University of Saskatchewan, said, prior to sailing for London, England for Panama in one of the wheat experts attending the London conference in an advisory capacity.

"There is the world's basic food there has never been any true surplus of food and there probably never will be," Dr. Sorenson said. "There certainly is none at present, and a country such as Canada may safely regard its stores of wheat as the truest form of wealth, certain to be converted into money on a fair basis of price, despite temporary difficulties of marketing."

Bashaba's First Welfare Conference

Important Conference To Be Held In Winnipeg Early This Month

Winnipeg, April 1. Much interest is now being taken throughout the Province in the first Manitoba Conference on Social Work that is to be held at the Marlborough Hotel, Winnipeg, on the 7th, 8th and 9th of October.

This is to be a conference where everyone interested in social work or any phase of it, and including social workers, church workers, teachers, nurses, municipal officials, school trustees and board members, and those who come in contact with the different human problems of their communities will be welcome, and take their part in the discussions appreciated.

What has been given over the past nine months to the series of topics related to Manitoban problems that should occupy a place on the programme, and in the securing of as important persons to lead in their discussion. Over fifty men and women, all prominent in their various fields, have already accepted the invitation to address the conference on the topics assigned them.

These outstanding speakers, Dr Bernard H. McHale, of Orillia, psychologist, Canada's foremost authority on the training of the feeble-minded child, and Dr. Henry L. McKay of Chicago, a noted student of the problems of the delinquent, are among the speakers on the program.

The problems of the underprivileged or wayward child, the defective, the delinquent, to their relation to the home, the school, the church, the provincial game branch, the provincial department of agriculture and the Manitoba parole commission left to count a similar survey of the Lost Mountain and Quill Lake conclusions.

Her Substitute Is Focused

Saskatchewan City Adopts Many Important Rulings

Saskatoon has been a much visited city this summer. Recent visitors included the 150 British medical, which on September 7th closes the Sun Life special leader, on the Pit the Canadian Ticket Agents' Association and on September 19th the Dakota farmers some of whom. It is pointed out, may decide to remain in the region. "Commissioner Joseph Hobbs," says The Hub, "had to take special measures to straighten out the right hand against the intensive period of welcoming the strangers within our gates."

Is Proving a Success

Canadian Cattle Experts To Britain Will Be Continued Indefinitely

Ottawa, Ont.—"The resumption of Canada's export cattle trade to the Old Country has apparently got away to a good start," commented Hon. Robert Weir, Minister of Agriculture, following receipt of a report on the initial shipment of Canadian beef cattle to Great Britain, recently.

"Our cattle have evidently met a very satisfactory reception despite the fact that they arrived on the market during one of the hottest spells of weather England has experienced in many years," he added.

"Now that we have made such a good start, Canadian shippers should see to it that no inferior cattle are allowed to go overseas."

Saving To Dairy Farmer

Cream Exporters Now Have Inspection Free Of Charge

Ottawa, Ontario.—As a measure of relief for dairy farmers producing milk and cream for export to the United States, Hon. Robert Weir, Minister of Agriculture, has issued instructions to the veterinary inspection staff that beginning September 23, inspectors required under the United States Federal Import Milk Act to permit of milk or cream being shipped into the United States, shall be made free of charge.

This means a saving to the dairy farmer of from $2 to $5 or more for the official inspection of his premises and herd.

Evolves White Tomato

Vancouver, B.C.—A returned soldier farmer at Chilliwack, after years of experimenting, has produced a white tomato. This most unusual variety is non-acid and has been cultivated especially for sufferers from diabetes

SOVIETS HAVE SINISTER SYSTEM OF MARKETING

Montreal. The menace of Russian wheat lies not so much in its volume, as in the marketing method which the Soviet employs, said Hon. Robert Weir, Dominion Minister of Agriculture, here.

"The Russians appear to have developed a particularly sinister marketing system," the minister explained. "They take a quantity of wheat and dump it on the market at all times and give the impression of having an unlimited volume. That breaks the market and creates a panic amongst our growers. They think that there is no outlet for their wheat, whereas there is, of course, always an outlet."

The minister would not forecast how long the present Russian situation would overhang the market. He repeated, however, that it was not the volume but the sinister marketing method of the Soviet which was sinister in the present case, and added that it would take but a relatively small change in the general situation to induce a substantial movement upon the part of Canadian wheat.

Hon. Mr. Weir outlined his hope of building up not only a substantial cattle trade with Britain, but also an interprovincial trade between eastern and Western Canada in pegged feed for cheaper transportation, he believed, were capable of substantial development. Such a trade would redound to the advantage not only of the western farmer but also of the Eastern Canada dairyman.

New York. The World today quoted Adam Smith, famous authority on commodities and marketing as saying he believes the Russian Soviets are planning to unload wheat on the coming year which they can produce at less than 30 cents a bushel. Soviet figures, as compared with the American production cost of upward of 70 cents a bushel, are said to be thanks can be dumped on foreign markets.

He said he had reason to believe that Russia was figuring that the United States next spring would have a surplus of at least 300,000,000 bushels which, together with the huge Russian crop, would depress prices greatly.

The short sales in his opinion, were made to make money for the anti-Russian forces, believing that exports the price to be down as a result of the huge Russian crop, and to be able to cover at a large profit.

For Relief Of Farmers

Alberta Government Taking Steps To Relieve Conditions

Calgary, Alberta.—A moving plight being considered by the provincial government of Alberta, and of Alberta farmers during the coming winter. Premier J. E. Brownlee announced here, were separate conferences between the cabinet ministers of the province and representatives of the Dominion government, mortgages and loan companies, Canadian Pacific corporations and the Retail Merchants' Association, which have been arranged by Attorney-General Lymburn, to take place in Edmonton.

A meeting of the bank representatives with government officials was held a few days ago, and four of the cabinet ministers were present with the President interests in the south.

"The farmer must be allowed his living this winter, and we are trying to get to the bottom of the situation and then decide what can be done. Among other things, it may be possible to get through the freight stock to use up the surplus coarse grains and other crops this winter," the premier stated

Deplores Alarmist Talk

Dr. Sorenson Says There Is No Over Production Of Wheat

Quebec, Que. All alarmist talk of world over-production of wheat was, in his opinion, unwarranted, Dr. W. W. Sorenson, of Montreal, head of the Department of Economics of the University of Saskatchewan, said, prior to sailing for London, England for Panama in one of the wheat experts attending the London conference in an advisory capacity.

"There is the world's basic food there has never been any true surplus of food and there probably never will be," Dr. Sorenson said. "There certainly is none at present, and a country such as Canada may safely regard its stores of wheat as the truest form of wealth, certain to be converted into money on a fair basis of price, despite temporary difficulties of marketing."

W. N. U. 1857

SPIRITED REPLY TO CRITICISMS OF WHEAT POOL

Saskatoon, Sask. The individual farmer in Saskatchewan is harder pressed financially today than he was in 1923, when the Wheat Pool was organized and depression was world wide, in the opinion of H. B. Fry, of Regina, publicity director of the Saskatchewan Wheat Pool.

Commenting on the Winnipeg news despatch which said that reports had been circulated in various exchanges that the Pool was facing financial disaster, Mr. Fry said that was "only an exaggerated example of what has been going on particularly during the past few months."

Opponents of organized marketing on the part of farmers, he said considered the present an opportune time to try to shake the faith of farmers in their marketing organization. The attempt would fail, he was convinced, for the area being a larger percentage of the crop than last year.

What would happen, farmers will not go back to a system which the late Sir Daniel J. Morse, president of the Continental Oil Company and food controller during W 34 Harrison managing editor of the Daily Oklahoman and former editor of the Washington Post in the United States ever made he human from Oklahoma City to Winnipeg.

Mr. Morse had a date in Winnipeg with Governor Sales of the Hudson's Bay Company and he started from the southern city with a forty-mile motor trip by road in tail all the way through. He left there in the afternoon and had lunch in Winnipeg the following morning. He was accompanied by Mr. Harrison managing editor of the Daily Oklahoman and former editor of the Washington Post in anticipate large crowds would flock to welcome

Relief Work Started

Unemployed Nine Workers Of Nova Scotia Will Receive Help

Halifax, N.S. Distribution of relief in mine workers and their families in the various colliery districts of Nova Scotia affected by unemployment will be started immediately, the need to be borne by the Federal and Provincial Governments and the municipalities in communities concerned. This statement was made by P. W. Morrison, president of the United Mine Workers district 26 and mayor of Glace Bay, following a conference with Hon Percy C. Black acting premier of Nova Scotia

Mick Narcotics Traffic

League Of Nations Told That Canada Is One Of the Victims

Geneva, March 31. Canada and Irene Parley of Alberta told the social questions committee of the League of Nations that Canada is one of the victims of the illicit traffic in narcotics

She said the situation was improving owing to the arrest of many taking part in the traffic through control of narcotics exports. She was also aided in this crossing the quantities illegally brought in.

Sea Trade Revival

Business Predict Permanent Improvement In Volume Of Business

Victoria, B.C. We have reached the bottom and are at the turn, said Robert Hunt president of the Royal Bank of Canada and here recently in commenting on conditions in Canada.

"There is no stringency of money in the country commented Mr. Charles Gordon president of the Bank of Montreal another Canadian financier visiting here

"The trade of the country has suffered a setback due in wage measure to the low price of commodities but there is a better feeling now, Charles added.

The revival is coming but it will be gradual," he continued. There is plenty of money in the country for the business being done and we are always ready to advance loans for legitimate commercial enterprise

This year's crop, which has been estimated at four hundred million bushels, is better than had been expected, Sir Charles commented.

There should be a permanent improvement in the volume of business done by the manufacturers of the country," he said when questioned concerning the new tariff

CAREFUL CHECK WILL BE KEPT ON IMPORTERS

Ottawa, Ont. Careful check on the transactions made by Canadian importers under the anti-dumping act will be kept through the customs department, it is stated in official circles here. The new tariff was enacted by parliament in February. It is understood that the prices should not be increased, for some time. However a guard is to be kept nevertheless. Canada and in the meantime it is claimed that prices are showing up the poor. The department has the matter under consideration

A BETTER DAY DAWNING?

AGRICULTURE IN its varying forms is the mainstay of this district and at the present time agriculture, to use a slang term, "is not so hot". Wheat has been steadily tumbling for some long time past until it has reached a point where statisians have to turn to previous years to find a parrallel in price. Oats and barley also are down to a point that must dampen the enthusiasm, a field of standing grain or a field of stooked grain creates within most men. Cream is low to what it has been in the past, a cream cheque today while very welcome and very useful, is only a shadow of a cream cheque ten years ago. Potatoes, source as they were last year were at least worth coin-cidable money to those farmers who were fortunate enough to have them to sell. Now one can almost have them for the digging, the labor involved in handling them being responsible for the greater portion of their cost. Even and oddly the hen and the younger fry are down in price and eggs are down, just beginning to climb from sub-cellar depths. Cheese heavy sheets are down two cents from a year ago, and other cattle in like proportion. Hogs appear to be the bright spot in the stock market, they being up a little from last year an still a fair price.

All the above, with the exception of the last paragraph is cheerful reading. So much so, that it might be reasoned that it were better not to mention these things at all, and it is possible we might have done so unless we saw or thought we saw something better ahead. Ever since the depression began to make itself felt, students and writers have been telling the world "the fundamental causes". These causes run all the way from mass sociology to an excess of good bullion stored in the United states and France. Whatever the causes, periods of prosperity and depression come and go on this continent and are very inconvenient to those with less money than they need and very convenient to those with a money surplus. However, we are not so much concerned with the cause as with finding a way out.

Right now Britian is in a bad way economically. Heavy taxes, decreasing exports, increased unemployment, billions spent in doles, all these things, and others, are causing grave concern to leaders in Great Britian. In the minds of many there is only one salvation, that of protection of industry by tariff walls, even turning to taxes on food stuffs. Free trade within the Empire, protection without! The suggestion is gaining ground and while it is not likely to be passed by the British House of Commons with the present government in power, it is a sufficiently large issue to bring about a change of government.

The Empire conference now being held in London will most likely be the pivot upon which the entire scheme will turn. For if the various parts of the empire are not wholeheartedly in favour, there is little chance for the scheme's complete success.

To the Prairie Provinces, as to all agricultural Canada, it is the silver lining to the cloud of depression. With unrestricted entry of Canadian grain and meats into British ports and a duty against American, Argentine and Russian grain and meats, there is little doubt that there will be a larger demand for Canadian agricultural products, with a price more in keeping with the cost of production than the prices obtained are at present.

RADIO TIME COMING—

WITH THE approach of winter, many will again turn to the radio, which may or may not have been silent for the past few months. Various Alberta broadcasting stations are arranging for special features for their winter programmes and C.K.U.A. (University of Alberta) is again on the air after and absence of several month's duration. Then again on Wednesday, the world's baseball series commence and baseball fans throughout the country will be tuning in on their sets to get the latest results. This event so many signifies the beginning of the fall and winter season of radio.

It is quite possible, when the time comes for parliament to re-assemble and when the radio season is in full swing, the question will again be raised of the government control of radios. As everyone who owns a set already knows, the reception of programmes has been in the past and is now due to the enterprise of privately owned stations who are assisted in their undertaking by advertisers who use the radio for advertising purposes.

This is the method of operating broadcasting stations in the United States.

In Great Britain the system is one of pure government control and programmes are not interspersed with verbal advertising. Many claim this to be the best system, not liking their appreciation of musical programmes broken into by gratuitous advice to buy this that or the other commodity. For some little time Canadian broadcasting was fairly free of advertising and when it appeared the writer was anything but pleased with it, but now, having grown used to it, the casual interjection of a verbal advertisement seems to make little difference to the enjoyment of the programme.

Like all questions of public policy on which there is a division of opinion all the good arguments are not on one side. There is little doubt that some of the enterprise on the part of broadcasting stations would be lost if there were none other than government conducted stations. Various commercial concerns, urged by the competitive spirit, frequently present really good programmes. On the other hand if the government controlled all stations one would most likely get programmes more complete and of greater length without intermixtant talks advising one to buy this and that. At the present time there does not appear to be a great deal of interest displayed, but we believe when the winter radio season is more advanced, the government control of radio will be again a question of importance.

INITIALS COMMEMORATE UNUSUAL EVENT

She was too young to know any thing about it, at the time, but another Montreal girl will never forget that she was born on a railway train. She has hereby named Cecile Norma Rollande Turgeon and her initials are C N R her father, Arthur Turgeon, who is an employee on the railway, as it happens, boarded the Canadian National train with Mrs. Turgeon at Chesham, Quebec, Tuesday later Mrs Turgeon took ill. There was no doctor on board but Nurse Shirley Sulte, of Kenogami who was a no ranger, came to the woman's aid, he conducted giving her his first of kit and having a drawing room made up for the sick woman. The train had passed Lake Edward and there was no way of letting anything at a doctor until Riviere-a-Pierre was reached At that village a conductor telephoned Dr. Tur-bide of Montmagny to meet the train. Just as the train was leaving Riviere-a-Pierre a child to the amazement Cecile Norma Rollande came into the world.

Her father grateful for the assistance given by the railway, announced that he hoped the circumstances of the child would to have the initials C N R

CHILDREN TRAVEL HALF WAY ABOUND WORLD TO REJOIN MOTHER

From Ceylon to Scotland seven children travelled half way around the world to rejoin their mother. Starting from Ceylon more than a year ago, they voyage which took them through the Indian Ocean, across the Arabian Sea, up the Red Sea to the Suez Canal, the entire length of the Mediterranean to the Straits of Gibraltar, thence to Scotland for a visit to their grandparents and finally across the Atlantic to their mother in Winnipeg, in a journey which very few children of their years may boast.

Grace was carrying a doll in her arms when she arrived here at which was given her in Ceylon and which has been her inseparable companion throughout the journey. Ship-mates stepped off the train with an air of experienced travellers and to be truly at for he has sailed for all the seven seas.

PREVENTING DIPHTHERIA

Diphtheria bel ongs to the group of communicable diseases, as it is caused by a disease germ. It is a sore throat frequently fatal disease and its most dangerous attacks are made upon children from six to five years of age.

The germ which causes diphtheria lodges in the throat and nose when the patient coughs or sneezes or simply talks, these tiny little drops of germ laden which the germs are present in.

In order to convince yourselves that this happens, we would suggest that you stand in front of a looking mirror and that you cough, sneeze or talk at the mirror. You will find that you throw out a spray of tiny droplets, and as you gradually increase your little drops of germ laden which the germs are present in.

In order to convince yourselves that this happens, we would suggest that you stand in front of a looking mirror and that you cough, sneeze or talk at the mirror. You will find that you throw out a spray of tiny droplets, and as you gradually increase your little drops of germ laden or you will discover that the sneeze is even rough or severe sends these droplets a distance of several feet.

This then is the reason why you should always cover your nose and mouth with a handkerchief when you cough or sneeze. You can at least keep your face to the floor if the sneeze comes unexpectedly. You will also understand why you should not talk directly into a person's face or allow him to do the same to you.

These points have been mentioned before they show how in our daily lives, we are absolut sure to be exposed to disease germs. It follows, but as we are frequently exposed to disease germs, we should, as far as is possible, keep ourselves in such a condition that we will be enabled to deal with any germs which may gain entrance into our bodies.

Diphtheria is one of the few diseases which we can prevent. The deaths, suffering and damage for which Diphtheria are responsible each year can be prevented This wrath of human life, this injury to health could not occur because it is an easy matter to prevent children against Diphtheria.

By the injection of Diphtheria toxoid, which or a harmless substance, which gives to the child artificial protective f orce When these protective forces are present in the body, then diphtheria germs are powerless to do any harm to that person.

Every child has the right to be protected to be prevented from this disease We have the means to protect children from diphtheria. The cost is trifling. We cannot be so lax in what about my child? If all parents of there are protected against Diphtheria the disease would soon be considerably wiped out.

It is a wonderful help in work and play — keeps you cool, calm and composed.

ADDS A ZEST

WORLD HAPPENINGS BRIEFLY TOLD

Canada has twelve factories for the manufacture of macaroni and the annual production has a value of about a million and a half dollars, according to the latest figures from Ottawa.

Premier James H. Scullin, of Australia, making his first appearance before the League of Nations Assembly denounced armaments as a menace to peace and urged the League to call a general disarmament conference.

A cable received by the Child Welfare, Inc., New York, from its administrative committee in China, said 5,000 children are dying as a result of famine and that war and communism are adding difficulty to the situation.

The committee which will administer the War Veterans' Allowance Act, was appointed by the late Federal Government and its personnel is now preparing for the operation and administration of the act.

The superannuation of E. R. Cameron, K.C., as registrar of the Supreme Court of Canada, was announced at the Prime Minister's office at Ottawa. He is succeeded by James F. Smellie, K.C., a lawyer of Ottawa.

Portage la Prairie, Man., known for its No. 1 hard wheat, has added new laurels to its brow. On the farm of J. Prout, one mile from the town, peanuts and almonds have been produced this season. He grew two sacks of peanuts and a few pailsful of almonds.

James C. Brady, former Conservative member of parliament for Skeena, B.C., has been appointed a census commissioner of the demography branch of the Dominion Bureau of Statistics. Mr. Brady will organize the census of institutions such as hospitals, asylums, penitentiaries and houses of refuge all over Canada.

New Market In Egypt

Trial Shipment Of Apples Being Made From Okanagan Valley

A new market for British Columbia apples in Egypt is being opened up by a trial shipment there under arrangements completed by the provincial department of agriculture.

This shipment will consist of 2,000 cases from the Okanagan Valley at a price to net the growers a profit which would be small in a domestic market but satisfactory in an export market. The agricultural department believes that Egypt will offer a large market for British Columbia fruit in the future and is anxious to cultivate this business. A few apples from this country have found their way into Egypt before, but the market has never been built up in a big way.

"My wife used to play the piano a lot, but since the children came she hasn't have time."

"Children are a comfort, aren't they?"

Scenic Automobile Route

Endorse Lake Superior Route For Trans-Canada Highway Through Northern Ontario

At a meeting of representatives of the Port Arthur and Fort William city councils and chambers of commerce held in Port Arthur and addressed by John Lang and R. A. Gibson, delegates from Sault Ste. Marie, a resolution was adopted approving of the Lake Superior route for the proposed trans-Canada highway through northern Ontario.

The meeting was unanimous and accepted the view that while the cost per mile of construction might be slightly higher, the aggregate cost, because of saving in distance, would be considerably less than for the proposed alternative routes further to the north, and felt also that it would open up a scenic route second to none on the continent.

It was further believed that with a time saving of one day over any other possible route for such tourists as would make the circuit it would be a much greater attraction for visitors from the south.

In order to get action on the matter, the Fort William Chamber of Commerce some time ago adopted a resolution, approving a compromise route which would touch Chapleau and Oba, considerably to the north and adding 145 miles to the 475 miles between Port Arthur and the Soo. Representatives present at the meeting said the Fort William Chamber of Commerce would almost certainly be willing to reconsider the matter and join Port Arthur and the Soo in urging the all-lake shore route.

COLLEGE DAYS

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Are you needing a cute little dress for return to class, or may be your first venture into the world of business? Here's a darling style, so fresh and chic!

'Neath the wee bolero jacket, the dress is held by simple shoulder straps.

One of the new season's closely woven jersey tweeds would be lovely for this model—the collar and cuffs are pique. Plain or spotted crepella could also be used or almost any dress weight woolen of the plain or tweed variety.

For afternoon wear, the model is charming developed in marocain, flamenga, or broadcloth, when naturally the collar and cuffs will be of finer type perhaps lace or embroidery or contrasting silk or satin.

The belt is leather or suede.

This pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

School For Flin Flon

Mining Town In Northern Manitoba Town To Have Public School

Efforts of the mining town of Flin Flon to have modern public school instruction this year have at last been successful, according to word received in The Pas. Equipment is now being installed in the class rooms, and it is expected that work will begin within ten days.

Financial plans are about complete. With grants from the province, the town, and with the aid of the Hudson Bay Mining and Smelting Co., grades up to eight will be taught this year.

It has been decided to engage Miss Doris M. Foster, of Winnipeg Beach to teach the primary grades, and Miss Margaret Sutherland for grades three, four and five.

Find Early Coins

Interesting Discovery In Wales Of Gold Coins Minted In 1340

Thirty golden nobles, in perfect condition and apparently fresh from the Mint where they were struck to celebrate the defeat of the French fleet by Edward III., at Sluys, in 1340 were discovered recently on the edge of an ancient road leading from Taliesin, Cardiganshire, to the Dovey Estuary, where a ferry in olden days carried travellers across to North Wales.

The coins depict an English warship breasting the waves and surmounted by the English coat-of-arms and the King's head.

Recipes For This Week

(By Betty Barclay)

BREAKFAST MUFFINS

2 cups special cake flour, sifted.
4 teaspoons baking powder.
½ teaspoon salt.
1 egg, well beaten.
¾ cup milk.
4 tablespoons butter or other shortening, melted.

Sift flour once, measure, add baking powder and salt, and sift again. Combine egg and milk and add to flour, beating until smooth. Add shortening. Bake in greased muffin pans in hot oven (400 degrees Fahrenheit) 25 minutes. Makes 10 muffins.

BAKED FISH

1 average helping filleted flounder, fresh haddock or whiting.
2 tablespoons butter.
Salt and pepper.
1 lemon.

Grease a plate and lay the fish on it with the skin side upwards. Put in the oven five minutes and the skin can be easily removed. Melt butter in a flat pan, lay fish on it and place in hot oven 400 degrees Fahrenheit, eight to ten minutes. Baste twice while baking. Remove season and squeeze lemon juice over. Serve hot.

Tour To the Orient

Business Men To Sail On Chamber Of Commerce Tour To Japan and China

Several business men of Edmonton and Calgary have already signified their intention of joining the Canadian Chamber of Commerce tour to the Orient, which sails from Vancouver on the "Empress of Asia" on October 16th. The tour will include a visit to Japan and reception by the Japanese Government, and trips to Shanghai, Nanking, Hong Kong and Canton, and the members will be back before Christmas. The tour is not limited to members of Chambers of Commerce and Boards of Trade, but is open to the general public as well.

In many parts of Africa there is a tree which bears large seeds resembling huge cabbages.

A Shaving Lotion

When mixed with sweet oil, Minard's serves as an after shaving lotion and antiseptic. Soothes and freshens the skin.

MINARD'S KING OF PAIN LINIMENT

Wins First Prize For Layer Cake

Above is a photograph of Mrs. W. McKenzie, 9 Fernwood Park Ave., Toronto, to whom was awarded the first prize for layer cake, at the Canadian National Exhibition, Toronto. There were a large number of entries of cakes of various kinds and Mrs. McKenzie not only won first prize for iced layer cake, but also for muffins and small cakes. We give below the recipe used by Mrs. McKenzie for the prize-winning cake.

Golden Layer Cake:—½ cup butter; 1 cup sugar; yolks of 6 eggs; ½ cup milk, 1¾ cups flour; 4 teaspoonsful Magic Baking Powder; 1 teaspoonful of orange extract. Cream butter and sugar, add well beaten yolks and beat again with butter and sugar until very light. Sift flour and Magic Baking Powder together and add to first mixture alternately with milk. Beat lightly for about one minute, put into greased layer pans and bake. Temperature 400 degrees Fahrenheit. Time about 20 minutes. Put together with lemon filling and ice with boiled frosting.

Lemon Filling:—1 lemon and rind; 1 cup cold water; 1 cup sugar, 1 egg; 1 tablespoonful flour. Beat lemon-rind and egg together. Stir in lemon juice and sugar. Dissolve flour in water. Cook in double boiler till it jellies and spread.

Boiled Frosting:—Dissolve a cup of granulated sugar in ⅓ cup of hot water. Wash down the sugar from the sides of the pan, cover and let boil three or four minutes, uncover and let boil to a rather firm soft ball stage. Pour in a fine stream on the whites of 2 eggs, beaten dry, beating constantly meanwhile. A few Maraschino cherries chopped and added to the frosting gives a delicious and pleasing flavor.

Alberta Dairy Record

Last Year 95 Creameries Produced Sixteen Million Pounds Of Butter

The dairy record of the Province of Alberta is an encouraging one. In 1912 the province had only 53 creameries producing a little over 3,000,000 pounds of butter. Last year there were 95 creameries with an output of 16,000,000 pounds. In 1912 six cheese factories produced but 40,000 pounds of cheese, while last year ten factories produced over a million pounds.

In days of yore if anybody missed a stage coach he was contented to wait two or three days for the next one. Now he lets out a squawk if he misses one section of a revolving door.

SUNDAY SCHOOL LESSON

OCTOBER 5

ZACHARIAS AND ELISABETH — Life In a Pious Jewish Home

Golden Text: "And they were both righteous before God, walking in all the commandments and ordinances of the Lord blameless." Luke 1:6.

Lesson: Luke 1:5-80.

Devotional Reading: Psalm 128.

Explanations and Comments

A Righteous Couple, verses 5, 6.—In the days of Herod, King of Judaea (Herod the Great, who reigned from 37 to 4 B.C.), there lived a priest named Zacharias, of the course, or group of Abijah. "David divided the priests into twenty-four courses, each of which in rotation was responsible for the temple services for a week. Each course, therefore, officiated twice a year, at an interval of six months. After the captivity only four courses returned, but these were subdivided into twenty-four courses under the old manner. The course of Abijah is said to officiated in April and October." The wife of Zacharias, who was a descendant of Aaron, was called Elisabeth. Their home was in the hill country south of Jerusalem. Both were righteous before God, strict Jews who observed the Mosaic law, kept all the commandments and ordinances. They were not faultless, but blameless according to the Old Testament standards.

The Birth and Naming Of John, verses 57-66.—When Elisabeth's son was born, all her neighbors and relations rejoiced with her. "There is nothing else in the world so important as children, nothing else so interesting." — David Starr Jordan). Those present at the circumcision of the child when he was eight days old, wished to name him Zacharias after his father, but Elisabeth said, "Not so; but he shall be called John." See verse 13. "John" means "the grace of God." "There is none of thy kindred that is called by this name," they said in astonishment, and turning to the father, they asked him what the name should be, making use of signs, for he seems to be supposed deaf as well as dumb (Verses 18-20. "Five words cost Zacharias forty weeks' silence." — Thomas Fuller. "Various suggestions have been made to evade the conclusion that he was deaf; that men are very apt to treat a dumb person as if he were also deaf; that they communicated by signs instead of by speech to spare the feeling of Elisabeth, whose judgment was being appealed from; that a sign was all that was needed, Zacharias having heard all that was said."- Expositor's Greek Testament. Zacharias called for a writing tablet a tablet covered with wax, and upon it he wrote with a stylus, "His name is John."

Then Zacharias burst forth into speech, blessing God. The people were much impressed by his recovery of speech and by the unexpected name given the babe, and they perceived that some great future was before the child. "What, in view of these things, shall this child be?" they asked. "For the hand of the Lord was with him," the Evangelist comments.

Pure Bred Sire Areas

Twenty-eight rural municipalities in the Province of Saskatchewan have been established as pure-bred sire areas, which means that these areas have become entirely free of scrub sires.

Calculating machines, similar to those used for tabulating census returns, are being used in the British nautical almanac office to compute daily positions of the moon until the year 2000.

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have been taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides.

"Now I am glad to say I am a well woman, feel much stronger, younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say.

"I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good that is in it."—Mrs. S. A. Soloman.

"P.S. You may think I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

Canned Chicken

New Business Is Likely To Develop Into Large Proportions

In his annual report recently published the Veterinary Director General of the Dominion Department of Agriculture calls attention to the increase in the number of poultry products processed under government inspection. The packing trade are canning more meats and poultry in Canada, and there appears to be room for considerable development in the field of canned chicken. Canned whole chicken made its appearance on the market last year and from the reception accorded it the new business is likely to develop into one of considerable proportions.

Strength Of Canadian Woods

A comparison of strength values of wood of sugar maple and yellow birch show that sugar maple is considerably the stronger in the green condition, whereas after seasoning, they are of approximately the same strength. This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Products Laboratories of Canada, Department of the Interior.

There is a Manchester sexton who believes in accuracy, as witness this entry: "Died—, male, aged three months; unmarried." Which leaves no possible doubt.

Rheumatism?

Quick relief from rheumatic pains without harm:

BAYER

To relieve the worst rheumatic pain is a very simple matter. Aspirin will do it every time! It's something that you can always take. Genuine Aspirin tablets are harmless. Look for the Bayer Cross on each tablet.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia, just a tasteless dose in water. It is pleasant, efficient and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE DUSTY HIGHWAY

BY CHRISTINE WHITING PARMENTER

Copyright 1930

CHAPTER I

When, after years of slavery to the whims of a hard old uncle, Nicholas Hastings went forth on his quest for freedom, he started tramp-wise, his belongings tied in a blue-checked handkerchief which he had bought for the occasion. For years he had foreseen this departure from the home of his fathers—the haughty farewell he should bestow upon an irate uncle—the tears of his gentle Aunt Nettie when he took her in his arms. But Fate frustrated those plans. His patient little aunt had been laid away in Elmwood Cemetery two months before, and only a week ago his uncle had followed her, as if, Nick thought with grim and sacrilegious humor, he was loath to let her enjoy a peaceful residence in her Heavenly Mansion.

So there were no farewells to say. Instead, Nick left by the back door (because he didn't want Selina Smith, the village gossip, to see his stick and handkerchief), and stood for a moment looking off at the familiar landscape.

He had always loved the view from this little porch. An orchard sloped gently to a green intervale, through which a sleepy river travelled to the sea. One wouldn't have dreamed that the house stood on a dusty thoroughfare. From here were visible only "green pastures and still waters." Nick could remember sitting here with his mother on summer evenings and after his mother's death, with old Aunt Nettie. For a moment a wave of tenderness for the place swept over him, then gave place to an overwhelming exhilaration. He slipped the door key into his pocket, and with no tinge of regret vaulted the stone wall and strode across the orchard, where once beyond the eyes of curious neighbors, he would strike into the broad highway.

Free! No more toiling over ledgers in that stuffy corner of the First National Bank! No more horrible deceit when he got a raise, for fear his uncle would claim it for added board. No more stifling of natural impulses. How had he endured those years?

"I've been a slave," said Nick, pausing beneath an ancient apple tree, "but I'm a slave no longer. I can conquer the world!"

Then, because he knew he was behaving like a foolish little boy, he laughed at himself, and reaching up, picked a bit of spray apple blossom, breathing deeply of it.

"May!" he exclaimed. "May in New England—and I'm free! Gee! how I've longed for just this moment—longed to start out with no cares or responsibilities—without even a destination, and all my possessions in a blue bandanna! As Gay would say ..."

He stopped suddenly at an amazing thought. He had forgotten to say good-bye to Gay! What a cad he was—especially when she was alone in the world like himself. He might send her a postcard—but no, that wasn't fair. Gay had always sympathized with his dreams and encouraged him to believe they would come true, as they had. In those last busy days of settling affairs, he had—forgotten her.

"I'm an ungrateful scoundrel," he told himself, and though it meant retracing his steps, and the risk of passing Selina Smith's back windows, he faced about immediately, and was rewarded by the sight of a pink-clad figure bending above some budding jonquils. Nick whistled softly and, starting up, the girl faced him.

"You're off—so soon?"

The color that pounded in her face might have come from her sudden change of attitude, or from emotion. Nick never saw it, so wrapt was he in his own affairs.

"I'm off," he echoed. "Did you suppose I'd stay here mourning my dear late uncle? Don't look so shocked, Gay. I needn't pretend to you, need I, that I'm bereaved?"

"I'm not shocked," the girl protested instantly, "only surprised. I've been thinking every day that you'd run in ..."

"My dear, I've been deep in—packing."

He laughed, proudly displaying his handkerchief and stick.

The girl laughed too, and said: "Where are you going?"

"Where? Nick looked at her reproachfully. "Have you shared my plans so sparingly all these years, Gay, that you ask that question? Where indeed! To the ends of the earth!"

He threw both arms wide, as if to embrace the universe, and Gay smiled a wistful smile that caught at something in his heart which hitherto had remained untouched.

"I wish I were a man, Nick."

He answered, his eyes devouring her sweet girlishness: "You're pretty nice as you are. I don't think I'd want you changed, Gay; and I don't believe you would change if you could."

She sank down on the grass beside the jonquils, and, as if he had forgotten his haste to be away, Nick sat beside her, his hands clasped round his knees.

"No," she said honestly, "I wouldn't change, of course; but it must be wonderful to start off as you are starting, Nick. Do you suppose I, too, don't long to go to the ends of the earth? Do you imagine I like living here with Sadie Twitchell, and sewing on other women's clothes in order to pay my board?"

Nick looked at her, his brows drawn into a frown.

"Do you know," he admitted, "I never thought of it. It's because you're a girl. Somehow one doesn't expect a girl to go a-gypsying, though why she shouldn't—Gay," he broke off suddenly, "what pigs men are!"

She laughed.

"One would hardly call you that, Nick, after the way you stuck by your Aunt Nettie."

"But I am," said Nick, still frowning. "I came to say good-bye to you," (his honesty made him want to reveal the fact that in selfishness he had almost forgotten the farewell, but his kind heart forbade the disclosure that he knew would hurt her). "I came to say good-bye, never thinking that you, too, might long to do what I am doing. I'm ashamed of myself Gay. What must you think of me?"

"I think," she said, meeting his eyes soberly, "that you're getting just what you deserve—a good time. What do you think of me, to imagine for a moment that I don't rejoice with you? Nick, you're only a boy, and you've never had much fun. Why shouldn't you be a little thoughtless? I—I believe I'm glad you are!"

He stirred, a bit uneasily, while Gay added with an understanding smile: "I mustn't keep you. I know you're chafing at the bit."

She arose, leaning down to brush an imaginary something from her skirt, and as he got to his feet she stretched out a friendly hand.

"Good-bye, Nick. The best of luck to you."

He took her hand, squeezed it hard, and lifting the stick and bundle, said, with a gaiety that was a little forced: "Well, I'm off. I'll drop you a postcard from California, or Alaska, or Timbuctoo, or wherever I happen to land. Good-bye, old friend."

He found it unaccountably difficult to meet her eyes, so didn't meet them. But he got away. He got as far as the stone wall that divided Miss Sadie's land from Selina Smith's. Then he turned, though even as he did so something warned him that it is dangerous to look back. He turned squarely about, his hand raised in a last salute.

Gay was standing just where he had left her, but it seemed to Nick that all the buoyancy of youth had dropped from her. She was leaning against the gnarled trunk of an old apple tree, with the jonquils at her feet and the pink, sweet blossoms all about. In her pink gown she should have looked the embodiment of spring, but in reality she drooped, like a flower plucked by some ruthless hand and left to die. Nick couldn't bear it. He tossed his stick and bundle, emblems of freedom, to the ground, and strode back, while Gay, pulling herself together, ran to meet him.

"Did you forget something?"

"Yes," said Nick. "I forgot the best friend a fellow ever had. Gay, listen. You'll think me crazy, but—why don't you come along?"

"With you?"

Her eyes widened at the amazing proposition.

"Why not? It would be bully. I ——"

Fortunately for Gay there was a rustic bench behind her. She sank down breathlessly, while Nick, with a cautious glance at the hedge that hid them from Selina Smith, took the place beside her.

"We could have the time of our lives," he urged. "I've always done things alone, but with you along ——"

Gay found her tongue.

"I believe you are crazy," she said sternly. "What would people think? They'd say ——"

"Oh, Lord!" Nick interrupted, with a characteristic grin. "I meant, of course, that we'd get married first."

"Get married!"

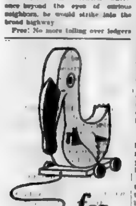
He laughed at her amazement.

"Why not? It's been done before. We're both of age, you know. Why shouldn't we?"

"But—you don't love me."

"Nonsense! I love you a lot. Always have. Of course, if I'd bore you ——"

(To Be Continued)



for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or fretful and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

Fletcher's CASTORIA

Douglas' Egyptian Liniment makes the finest blister known. Invaluable for stock. Leaves the hair roots in natural and healthy condition. Hair comes back. No scar remains.

Testing Rain-Making Device

Tests of a new device for making imitation rain are being made in Central Africa, in Egypt, and in the West Indies. The machine is a huge sprinkler, and distributes water in such a way that it falls from a projection height of 200 feet in the form of a fine mist.

Wealthy residents of the ill-fated city of Pompeii had houses consisting of as many as forty rooms.

"THEY WORK WHILE YOU SLEEP"

MAGIC BAKING POWDER never varies

Its uniform leavening qualities give the same satisfactory results with every baking.

3 out of every 4 Canadian housewives,* who bake at home, say they use it because it does give consistent, better baking results.

If you bake at home, the New Magic Cook Book will furnish you with dozens of attractive baking suggestions.

A copy will be mailed free on request.

Look for this mark on every tin. It guarantees that Magic contains no alum or any other harmful ingredient.

Try this Recipe for Muffins

1 tablespoon butter	3 teaspoons Magic Baking Powder
2 tablespoons sugar	½ teaspoon salt
2 eggs	1 cup sweet milk
2½ cups flour	

Cream butter and sugar. Add eggs one by one, beat well. Sift dry ingredients together and add to first mixture alternately with milk. If batter not stiff enough, add a little more flour. Put in well-greased muffin pans and bake for 20 minutes in a quick oven.

*This fact was revealed in a recent Dominion-wide investigation.

Ancient Warship Discovered

Hull Armed With Heavy Iron Guns Found In Stockholm Canal

The hull of a 500-year-old Swedish warship, armed with heavy iron guns, recently discovered on the bottom of the Riddarholms Canal, in the heart of Stockholm, has been pumped dry and is being raised to the surface. Archaeologists who have examined the relic believe it to be the oldest war vessel from the medieval period hitherto discovered. It is built of oak, low and slender in type, and seems to be a direct descendant of the Viking ships, which were among the swiftest and most seaworthy boats ever constructed. Close by the ancient guns have been found round cannon balls of stone, lead and iron, and some iron powder chambers for the breech-loading guns of that period. Several cone-shaped pieces of hollow wood also have been brought to light, partly loaded with small pieces of flint and stone, which may have been primitive case-shot projectiles for close range firing. Below the deck, which is partly broken down, other interesting objects belonging to the equipment of the ship have been found. The work of recovering the vessel is very difficult, but the hull itself is so well preserved that it may be possible to reconstruct the ship with its armament and rigging fairly complete.

Is Fond Of Music

Ramsay MacDonald Listens In On Radio Broadcast Programs

Ramsay MacDonald, Prime Minister of Britain, is a great lover of music.

Speaking at the jubilee of the Guildhall School of Music in London, England, Mr. MacDonald said he had enjoyed many Sunday afternoons listening to the broadcast of Bach's church cantatas from the school.

"I confess that whether I am at home in my quiet peaceful house in Hampstead or down at Chequers," the Prime Minister's official residence, he continued, "I make it a rule to issue an order—and I am not given to that very much—that there shall be no engagement, no interference, no business, but that my friends and I shall retire to a quiet corner and spend a very inspiring, comfortable, and peaceful half-hour listening to the broadcasts."

Persian Balm, the ideal toilet requisite for every discerning woman. Perfect in results. Creates complexions of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth lotion toning and stimulating the skin. Making it truly rose-leaf in texture. All dainty women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

New Folder Of Canada

"Canada" is the title of a new folder that has been issued by the Department of the Interior at Ottawa, which contains a concise summary of the country's natural resources, their potentialities and development. The folder also presents a very interesting map indicating natural resources and industrial areas in southern Canada, in addition to illustrations depicting commercial activity in the various provinces. A copy can be obtained from the National Development Bureau, Department of the Interior, Ottawa, Canada.

Nearly 1,400 automobiles a month are being imported into Sweden.

Russian export trade in chemicals is very active.

After Thirty-Three Years

Bodies Of Arctic Explorers In Excellent State Of Preservation

The bodies of Salomon August Andree and his two companions, according to the dispatches, were in an excellent state of preservation when they were found on White Island in the Arctic Sea, although it has been thirty-three years since they disappeared. This curious refinement of cruelty in the frigid parts of the earth, to preserve for years the appearance of life even in death, has made its impression on the human imagination long before now.

We recall a short story many years ago about a couple who went to the Alps on their honeymoon. The man fell into a crevasse and the guides were unable to recover his body. The girl, frantic with grief, consulted scientists as to what she could do. They told her that the glacier moved a few inches a month, at the end of fifty years, perhaps, it would move far enough to make possible penetration of the crevasse. So for fifty years she waited. And at the end of that time the body was recovered, and she by now an old, decrepit woman, was permitted to look at the body of her husband. It was perfectly preserved, and she saw the handsome boy she had married fifty years before.

The Third Emigration

Russia Worried Over People Who Will Not Come Back

The Russian Government is considerably worried over what has been designated as the "third emigration." The first emigration was that of the Socialists and anarchists in czarist days. The second was that of the one or two million Russians who fled to all parts of the world from the bolshevist terror. The third is that of the "nonreturners," soviet citizens appointed to diplomatic or other posts abroad who refuse to go back home when so ordered. The penalty for such refusal is death and confiscation of goods.

The third emigration is a striking indication of the conditions of tyranny prevailing in Soviet Russia. When government officials, presumably selected for their special zeal in the cause, desert the ship of state in considerable numbers there is reason to believe that the soviet system ought to be confined to Russia.

No Room For Argument

At an exhibition of paintings, recalls Sir John Ross, former Lord High Chancellor of Ireland (in his reminiscences, "Pilgrim's Scrip"), this conversation was overheard between two women who were looking at a picture "The Dance of Salome":

"Now what's that, Maria?" asked one.

Maria (glancing at catalogue): "Salome dancing for Herod."

"But he never done it, Maria!"

Maria (tartly): "He musta done, else he couldn'ta been photographed."

Has Warm Job

H. B. Stevens, chef of the Royal Scot express, has spent 20 years of his life in a space of eight yards long by two and one-half yards wide, with a temperature that is mostly around 150 degrees. His train kitchen is an ingenious affair. The whole of one side is taken up by stoves and tanks, and the other by collapsible tables on which food is prepared. Stevens and an assistant prepare meals for 200 in this tiny kitchen.

Minard's Liniment for Chest Congestion.

Little Helps For This Week

"Blessed are they that keep my ways." Proverbs viii. 32.

And oh! in my exceeding weakness,
Make Thy strength perfect. Thou art strong;
Aid me to do Thy will with meekness,
Thou, to whom all my powers belong.

If thou wilt but go on with thy duties, desiring to love—in such cases the desire of loving is love in His sight—the irksome dullness and dryness is the thorn in thy flesh, the messenger of Satan to buffet thee. But fear not, God's grace is sufficient for thee. His strength will be made perfect in thy weakness. Only set yourself in earnest to obey His word. Say to Him night and day, "Behold the servant of the Lord! be it unto me according to Thy Word."

—John Keble.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Eclectric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Feed Skim Milk

Feeding tests at the Cap Rouge Experimental Station of the Dominion Department of Agriculture show that it pays to feed laying hens skim-milk. Five years tests show that with a basal ration of grain, bran, shell and vegetable feeds, hens fed skim-milk laid more eggs and gained more in weight than hens fed beef scraps. Incidentally the cost of skim-milk is just one-ninth that of beef scrap.

Athletes recommend Minard's Liniment.

He—"If your father catches me eloping tonight I wonder what he'll say to your mother?"

She—"He'll probably say 'Sh-h'!"

There are almost 600 different kinds of parrots.

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

EGGS HATCH IN SHED, PLACED TO KEEP COOL

JOHNSON CITY, Ill., Sept. 21.— It was so hot here recently [illegible] Six motherless baby chicks [illegible] about the home of John Ho[illegible] being hatched by the inter[illegible] heat. The eggs were hatched, Ho[illegible] says, three days after he had placed them in a shed where he hoped to keep them cool.

NOTICE

The Tofield Young People's Society will hold their re-organizing meeting on Friday, October, 3rd. Prospective new members are asked to please notify Bert Swift or Thelma Noland.

FOR SALE - EARLY Jersey Wakefield cabbage at 3c per pound. Also a number of other vegetables for sale. Apply to Mrs. Gray Phone 900, Tofield

BANK OF MONTREAL CROP REPORT

GENERAL- Taking the Prairie Provinces as a whole, threshing is well advanced, with wheat 70 per cent completed. Recent wet weather has impeded harvesting particularly in the Northern sections of Saskatchewan and Alberta. Yields are better than those of last year, and, up to the present the grades are good, but following the recent wet spell some deterioration may result. In Quebec wet weather has delayed the completion of grain harvesting. Threshing shows a heavy yield of good quality. In Ontario threshing is nearing completion under favourable weather conditions. Grain yields, on the whole are above the average and of good quality. In the Maritime Provinces the weather has been generally good. Grain harvesting is practically finished and the crops are a good average. In British Columbia the weather has been cooler, with a touch of frost reported in the interior of the Province. The threshing of grain is completed and the crop is about 90 per cent average and of good quality.

Prairie Provinces

ALBERTA. Northeastern area— Threshing is about 10 per cent completed. Wheat yields are from 8 to 30 bushels, oats about 30 bushels.

Southeastern area—Threshing is about 85 per cent completed, average wheat yields are 9-12 bushels, chiefly grading No. 1 Northern.

Western area—Threshing has begun in the north and 75 per cent done in the south. Yields vary from 5 to 30 bushels, grading No. 2, oats yield about 30 bushels. The digging of beets has commenced earlier than usual.

SASKATCHEWAN. Northern area—After a week of steady rain, threshing which about 60 per cent completed is now being resumed and 10 to 14 days will be required for completion. Rain has caused sprouting in some sections with resultant deterioration in grade.

Southern area—Threshing is 90 per cent completed. Recent rains in some localities will assist fall cultivation.

MANITOBA.- Heavy winds and intermittent rains have interrupted threshing operations which are, however, 90 per cent completed and have now been resumed. Good quality grains are being harvested. Wheat yields averaging approximately 18 bushels, while coarse grains are a good average crop. There is a tendency not to market coarse grains owing to low prices.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF HENRY WOOD, LATE OF TOFIELD, ALBERTA, FARMER, DECEASED

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Henry Wood, who died on or about the 28th day of August, 1930, are required to file with Messrs. Short and Cross, Bank of Nova Scotia Building, Edmonton, Alberta, Solicitors for the Administrator, by the 15th day of November A. D. 1930, a full statement, duly verified, of their claims and of any securities held by them; and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been filed or which have been brought to his knowledge.

Dated this 29th day of September A. D. 1930.

SHORT AND CROSS,
Solicitors for the Administrator, Bank of Nova Scotia Building, Edmonton, Alta.

SIR HENRY THORNTON ANNOUNCES WINTER BROADCAST SCHEDULE

A distinct and characteristically Canadian series of broadcasts for the fall and winter season has been arranged by the Canadian National Railways, Sir Henry Thornton, chairman and president of the National System announces. In addition to continuing the all Canada Symphony Concerts from Toronto, a series of dramatizations depicting incidents in the early history of Canada will be presented in the form of playlets in which the parts of various characters will be represented by actors of outstanding ability.

Referring to the programmes for the coming season, Sir Henry said, —"Last year we brought to Canadian listeners a series of symphonic programmes featuring the world's greatest composers and played by the most outstanding orchestra in the Dominion. The expressions of appreciation from innumerable family groups scattered across the entire country have so encouraged us that we have renewed the arrangement, and commencing October 12th, the series of 26 concerts for the season will open.

"As was the case a year ago, this will be known as the All Canada Symphony Hour, and as a further symbol of its national character, it will open each Sunday at 5:00 p. m. (E.S.T.) with the striking of the great clock in the Peace tower at Ottawa, thus bringing clearly to the minds of all listeners the Capital of our country and also its magnitude through the variation of time.

"Again we will feature Canadian soloists exclusively. By creating and environment and atmosphere in which Canadian artists could best express themselves, we succeeded in revealing and in a measure developing a wealth of talent that I venture to say most Canadians did not dream existed. The keen interest and response on the part of our best artists themselves showed so clearly that among them exists a deep intensity of interest in the future of Canadian Music and Art and a keen appreciation of our efforts last year.

Old Dug-Out Rests From World Cruise

The old "Tilikum", battered and storm-torn, but still gallant under its new coat of paint, was brought from a marine graveyard on the banks of the Thames, London, recently, and placed on public inspection in front of the famous Crystal Gardens, Victoria, B.C., where it is becoming one of the sights of the British Columbia capital. The old dug-out canoe was built by Indians near Victoria more than 120 years ago and a century later carried Captain J. C. Voss and N. K. Luxton, Banff newspaperman, on a round-the-world trip in 1901 of 40,000 miles, weathering typhoons in the Pacific and hurricanes in the Atlantic. The canoe was brought to Victoria through the efforts of George I. Warren, commissioner, and other officials of the Victoria and Vancouver Island Publicity Bureau. Picture shows close-up of the old dug-out.

Local and Personal

A Plymouth Rock pullet owned by Mrs. Wm. Thompson has been reported to have laid nineteen eggs in the month of September.

Miss Marion Forman, of the Killam teaching staff spent the week end with her parents, Mr. and Mrs. W. Foreman of Tofield.

Mr. and Mrs. F. Skitch and L. Ross motored to Bashaw to visit Mr. and Mrs. Geo. Bissett for the week end

Mr. and Mrs. Weeks, Hilda Noeseland, Jack Kinnear, W. Donaldson and Mr. Malcolm were visitors to the city on Sunday.

Mr. and Mrs. Rowe, and Mrs. Firth visited the city last week.

Mr. and Mrs. Bud Hanson visited Camrose on Sunday.

Mrs. McCauley and Helen attended Miss Lela Clement's wedding on Saturday evening last.

Mr. and Mrs. Brinck visited friends here on Sunday.

Mrs. Taylor and Allin returned from the city on Sunday after spending a few days there.

Mr. and Mrs. Burchard motored to the city last week.

Mrs. Tofield visited relatives here this week.

The Anglican W.A. will hold their annual bazaar and sale of work on Saturday, December 6th.

The Bardo Ladies' Aid will hold their annual lutefisk dinner and sale of work on Monday, November 10th, Thanksgiving Day.

The W.M.S. of the United Church will hold their Thank-Offering meeting on Wednesday, October 15th, at the home of Mrs. Firth. Meeting to be at three o'clock. Mrs. A. Richard of Edmonton will deliver an address. Everyone is cordially invited to attend.

KETCHAMOOT

Very little has been done in the way of threshing owing to the unsettled weather. All machines were running on Saturday and now again the weather is very uncertain.

On Sunday, September 28th, at 11 o'clock rally day services were held at the school house. Mrs. Carlisle, superintendent of the Sunday school led the services. The congregation followed by the use of the printed programs. Miss Hazel Sears was organist for the hymns, Mrs. Maurice McGinitie gave the story of the picture on the leaflet and the little Misses Marie and Evelyn Lawson sang a duet "Bring them in."

Mr. and Mrs. A. Hosler and son Gerald, Mr. and Mrs. Frank Shupe and daughter Irma, motored to New Sarepta last Sunday to visit their daughter and niece, Mrs. Allan Lewis

Mrs. W. A. Mitchell accompanied Mrs. Ardley to her home at Tees for the week end.

Mr. Howard Lee motored to Edmonton on Thursday to enter a hospital where he will undergo an operation on his knee. In the summer when he was playing ball it was badly injured, necessitating an operation now.

Mr. and Mrs. John Brown and family were Sunday guests of Mr. and Mrs Chas. Williams on Sunday of last week.

Mr. and Mrs. Chester Chinneck and family of Edmonton motored down on Saturday and visited with old time friends.

Mrs. Wesley Ingram returned Wednesday evening to her home at Victoria, B.C., after a months visit with friends and relatives.

Mrs. C. A. Ingram and Mrs. C. W. Sears visited at the Geo Lawson home on Wednesday afternoon.

Miss Mable Lawson has been slow in recovering from her recent operation but expects to be able to return to her school in Camrose on October 13th.

Mrs. E. McMullen entertained the M.A.S. at her home on Wednesday afternoon. Twelve members and five visitors were present. Mrs. A. Hosler of Tofield, Mrs. C. Coombes, Mrs. Earl Carlisle, Misses Lillian Carlisle and Gertie Ingram. It was decided not to serve the annual thanksgiving dinner. After the business and devotional session a dainty lunch was served by the hostess. The November meeting will be held at Mrs. J. Appleby's.

Lakeshore

Mr. and Mrs. Thos Noland and Mr. and Mrs. Lester Noland were dinner guests on Sunday of Mr. and Mrs. J Noland of Tofield.

Miss Ethel Barnes visited at the T. R. Murray home on Friday evening.

An accident which might easily have been fatal occured at the Abernethy home on Friday. In working around a blower operated by a gasoline engine George Abernethy's clothing caught in the machinery and but for his presence of mind and quickness he would undoubtedly have been badly hurt. As it was his overalls were torn completely off him and wound and ground by the machinery to a mere handful of rags. Fortunately he was quite unhurt.

Mr and Mrs. John Logan, daughters Rachel and Myrtle and sons Harry of Dinant visited at the Frank Bauers home on Sunday.

Nurse Wood was called a day or two to Tofield to care for Mrs. T W. Taylor.

Mr and Mrs. Sherlock had as guests one day last week, Mr. and Mrs. Lindsay, of Stony Mountain. Mrs. Lindsay is a cousin of Mrs. Sherlock and it had been some 31 years since they had met. Needless to say the visit was much enjoyed. Mr. and Mrs. Lindsay were on a tour from coast to coast.

AMISK CREEK

Threshing is now in full swing, the weather not being any too promising. We hope it will clear up and stay nice the rest of this month.

Mr. and Mrs. A. Haugen invited the Y.P.A. here to help their daughter Tora and son Arthur to celebrate their birthday on the 29th of Sept. On account of the busy time there were not so many present as there otherwise should have been. Those present report a jolly time. A delightful lunch was served at midnight and those celebrating their birthday were accorded many hearty wishes for many bright and happy years to come.

Mr. and Mrs. P. O. Moline and family were visitors at the Mr. and Mrs. E. A. Moen home on Sunday

Miss S. Haugen left last week for Camrose College where she is attending school this winter.

ONE CENT SALE SOON TO BE HELD

A merchandising event of much interest will shortly be held when A. A. Beirnes commences his three day one cent sale. This event is eagerly looked forward to by a large number of people as it affords an excellent opportunity of procuring standard merchandise at half price—and there are no doubts about it.

Articles include many lines of family medicines, toilet articles, fancy china, perfumes, candy and stationery. Posters are out and if you will turn to page four you will find a partial list of articles on sale. Another equally large list will appear next week. Make a note of the dates—this is important.

PHILADELPHIA ATHLETICS WIN WORLD SERIES

The Philadelphia Athletics defeated the St. Louis Cardinals on Wednesday 7—1, thus winning the baseball world series. This was the 6th game the Athletics winning the first two the Cardinals the next two, and the Athletics the next two, making four wins for the Athletics. The series is four wins out of seven or less games played.

CHINESE LAUNDRYMAN DIES
The Tofield Chinese laundryman,

Mah Yim, who was taken ill with appendicitis and removed to a city hospital by Dr. Law, died in that institution on Saturday last.

The man had been ailing for some time but neglected to procure proper medical treatment in time.

He has a wife in China and a son in Mexico. Also a son in China who is a doctor.

The funeral which was of a Chinese nature, was held in Edmonton on Wednesday.

Several from here attended the festival held at the Franklin Church on Sunday September 28th, it being 28 years since that congregation was organized.

The Ladies' Aid met at Mrs. P. O. Flaaten's home last Wednesday for a quilting bee. Several members and a few visitors were present

Mr. R. O Berg and Alice motored to Edmonton last Friday returned the same evening

Mr. and Mrs. P. O. Flaaten and Gunvald were visitors at the I Moen home in Bardo on Sunday.

Disaster Overtakes R-101

A joint British-French investigation was begun to-day into destruction of the British dirigible R-101 largest airship in the world which Sunday morning crashed into a wooded hill side near Beauvais and burned.

Forty-seven or forty-eight persons lost their lives as a result of the disaster. All but one were either burned to death or killed in the initial impact. One died in hospital. There were seven survivors, all injured seriously. Among the dead were Lord Thompson, British Air Minister and Sir Sefton Brancker, director of civil aviation.

Astounded and grief stricken at the disaster which in a moment robbed it of its mistress of the air and its finest air talent, the British government despatched Sir John Salmon, air marshal and chief of staff to institute an inquiry and determine circumstances and cause of the catastrophe.

The R-101, big sister of the R-100, which successfully crossed the Atlantic to Canada and returned last July, was seven hours out of Cardington, enroute to Karachi, India, on an 8000 mile journey when the crash occured. After hours of fighting the violent storm which raged over north west France Sunday morning. The dirigible lost altitude, and some time after two a.m. failed to rise above an encircling rim of hills about a valley south of here and met its end.

H. J. Leach engineer of the Royal Airship Works and pilot of the ship at the time gave the most coherent account of the tragedy.

"We got into a terrible storm with high winds and the dirigible simply would not rise. I gave her more gas to get her up into the air, she did not respond.

"Rain was falling in such torrents that our ship was blown down to earth. She bumped twice slightly and then with a terrific impact she buried her nose into the ground. Immediately there came a tremendous explosion, followed by two lesser ones and flames engulfed the airship.

"I was shot outside my pilot's window - I do not know how and found myself on the ground. At the moment of the catastrophe everybody aboard except myself and assistant navigators were asleep. The motors were turning to perfection. It was the tempest which caused our destruction."

What Is Right With Canada?

... we are told ... one who sees both the good and the bad ... deploring the bright and the dark ... but prefers to think and talk about the brighter and better things.

... we have more than a sufficiency of pessimists ... of blue ruin group. We also have a few ... shut their eyes and ears to the actual facts of any situation ... well.

What ... the world needs today are more moderate optimists, men and women ... looking at both sides of the pictures, refuse to be depressed by ... colors and shadows and find encouragement and great ... brighter colors and the rays of sunshine breaking through the clouds.

Major ... an Englishman, is the type of moderate optimist whose number should be multiplied. As an offset to the many things that have been said ... to the query "What is Wrong with England?" he reverses the question, "What is Right with England," and proceeds to answer his own question most entertainingly in the London Spectator.

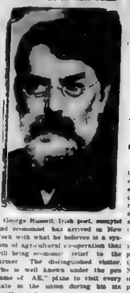
Would it not be advisable for us in this country to also reverse the usual question we hear so often asked these days and, rather, make answer to the query "What is Right with Canada." We may well do so because there are so many things that are right with this Dominion, so many more right things than there are wrong things, that we are doubly foolish to ignore them and dwell upon the smaller ills.

Looking around Canada we can discover a multitude of good things, the very best things. We find, for example, one of the most healthy robust people in the world possessing an abounding vitality and charged with initiative and energy. And of all the blessings which can be bestowed upon a nation or individual, what other one blessing or group of blessings surpasses that of health? Possessing health all things are possible; lacking it all the wealth of the world is valueless to bring joy and happiness into one's life.

Looking at other countries we find many of them filled with hatreds, with strife uppermost in the minds of the people, their thoughts and energies devoted to preparation for possible warfare. In Canada, on the other hand, we have a land occupied by a peace-loving people with a positive and growing hatred of war, making no preparations for war, but devoting their thoughts and energies to the arts and advancements of peace. No other country in the world is so "right" on the subject of peace and disarmament as is Canada.

Grouped with health and a sane viewpoint of man's relations to man we can place the moral and intellectual outlook of a nation. Looking over our broad Dominion we find a deep-rooted moral fibre, strong and sturdier than in most lands, with an abiding respect for law and order which no other country can excel, and which far surpasses that entertained by the people of any other country in either North or South America. We find Canada a land of schools and universities ...

IRISH POET IN NEW YORK



George Russell, Irish poet, essayist and economist, has arrived in New York with what he believes is a system of agricultural co-operation that will bring economic relief to the farmer. The distinguished visitor, who is well known under the pen name of "AE," plans to visit every state in the union during his six months visit.

To Study Canadian Methods

Seed Potatoes From Maritimes Make Hit With American Growers

The humble spud, which is produced in such quantities in the maritime provinces, has become almost a trade mark of Canada in some American markets, and it rose to real eminence during a visit of 160 members of the Pennsylvania Potato Growers Association to New Brunswick and Prince Edward Island. These two areas produce the finest seed potatoes on the continent, and the purpose of the visit by the delegation was to study the method under which those superior spuds are raised. The provincial departments of agriculture feted the visitors and showed them all that was to be seen.

Impatient For Disarmament

League Of Nations Is Called Upon To Take Quick Action

A vehement and sometimes impatient demonstration, urging the hastening of the League of Nations' disarmament programme and early calling of a general conference for reduction and limitation of armaments, was witnessed in the League assembly's disarmament committee at Geneva recently.

From this rally there arose a promise of J. J. Louden, chairman of the preparatory disarmament commission, that the commission would meet November 3 and fervidly seek to finish its task of clearing the way completely for a congress of all nations to construct a scheme of general disarmament. Voices from countries that were neutral during the World War, joined those from states which were disarmed by the war in the demand that the League should get along quickly with its long delayed purpose of inducing nations to lay aside their fighting.

German Property Sequestered

Conversations Between Officials Of Canadian and German Governments To Be Held

German property seized in Canada during the war will be the subject of conversations between officials of the German government and Hon. C. H. Cahan, secretary of state. Accompanied by Thomas Mulvey, under-secretary of state, Mr. Cahan will sail from New York. Discussions will take place in Berlin.

Of the large amount of property of German nationals sequestrated by the Canadian government during ...

English Being Taught In German Schools

Classes Are Popular and Students Show Great Interest

Every boy and girl in Germany is being taught English, according to Prof. Max Zimple, author of English and German textbooks, who was in New York recently.

"Our students are tremendously interested in anything about America," he explained. "Every language teacher reports that the classes teaching English are very popular. We teach the same pronunciation heard in the South of England."

The school system in Germany is quite different to the United States, the visiting professor says. Over there the aim is to have an aristocracy of learning. They do not desire to have every boy and girl graduate but rather to make the work so difficult that only the brightest pupils can finish their high school course. Children who are backward in school are given a sound elementary training and then the government apprentices them to a good trade for four years.

Socialist: After all, what is the difference between the rich man and the poor man?

Bystander: The rich man has acute laryngitis and the poor man has a cold.

We read of a man who pushed a collector of income tax out of a third-floor window. It is not thought he meant any harm.—Punch

An efficacious household remedy—Douglas' Egyptian Liniment. Brings immediate relief to lame back and muscular rheumatism. Also relieves inflammation, burns, sores, corns and warts.

Tommy (arriving at the country cottage): — Where's the bathroom, mother?

Mother: There's no bathroom here, Tommy!

Tommy: Good. We're going to have a real holiday, then.

Bring the Family

Eight Members Enrolled As Students At Arkansas University

"Bring the family, too," seems to be a motto at Arkansas schools.

Mr. and Mrs. W. H. Carter of Scranton, their son, Jack, and their daughter, Hilda, all were enrolled as summer students in Arkansas Polytechnic College at Russellville.

At the University of Arkansas in Fayetteville, eight members of the family of W. H. Smith were summer students in the school of education. They include five children, two grandchildren, and a son-in-law.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills. They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. ...

SAYS CANADA IS NOW EMERGING FROM DEPRESSION

Winnipeg, Man.—Veering toward thrift, viewing her future with stern-er-faced confidence, Canada already moving out of a depression period, was advised to pay even more attention to business by General Sir Arthur Currie, president of McGill University, and wartime commander of the Canadian expeditionary force overseas. In an address to members of the Winnipeg young men's board of trade, he pronounced himself more proud and more confident of Canada than ever before, after a searching inspection of the west, and he thought the Dominion was on the way to cutting extravagance.

"I know there is too much luxury, too much extravagance," asserted Sir Arthur, "but hard times are curing that and so out of an evil, a blessing flows. I know we are not thrifty enough, but I believe we are becoming more serious."

Passing, as she is, through a "somewhat uncertain and somewhat anxious time," the Dominion is without any sign of wailing, Sir Arthur observed. "We no longer hear whispers of death, no longer hear of the secession of the Maritime provinces, no longer hear that the Prairie provinces will pass to the United States, no longer hear that we are passing rapidly to our doom."

He added: "I am glad that this is so. I can't bear to hear so many announcements or denouncements that we are an enervated or a played-out race."

Sir Arthur spoke enthusiastically of the Peace River country. "The great kingdom of the Peace," he termed the extensive Alberta agricultural area.

For the Blind

Free Radio Licenses Issued By Government To Blind Radio Owners

Ottawa, Ont.—Radio licenses issued free by the Canadian Government to blind radio owners totalled 624 for the period of the fiscal year 1930-31 to date, compared with 580 for the entire fiscal year 1929-30, according to official figures, issued recently.

The total number of radio licenses issued for the first five months of the current fiscal year was 348,674, which also indicates a steady increase in the number of radios operated in the Dominion.

Find White Seals

American Expedition Discovers Specimens Off Mexican Coast

San Diego, Cal.—The existence of white seals heretofore regarded as mythical, was reported here by the San Diego Zoological Society's expedition after its return from Guadalupe Island, off the Mexican Coast.

Members of the party reported that white seals had been found on the inaccessible rocks of an outer islet where landing was impossible. They were unable to obtain a specimen.

Vancouver Wheat Exports

Shipments To Date Double the Amount Of Record Year

Vancouver, B.C.—Wheat exported from Vancouver during the current crop year to date totalled 3,283,275 bushels, double the amount shipped out during the same period of the record crop year of 1928-29 through Vancouver, when total shipments reached 100,000,000 bushels. Last year at this time only 2,679,278 bushels had been shipped.

Cattle Exports To Britain

Montreal, Que.—Canada's cattle export trade to Great Britain amounted to 1,800 head through the port of Montreal to date this year, with the recent shipment of 377 head which was the sixth shipment for the season. No cattle were sent to Great Britain last year.

Stresses Empire's Greatness

Hon. R. B. Bennett Addresses Brilliant Gathering In London

London, England.—With a brilliant gathering in attendance the delegates to the Imperial Conference were entertained at the Guildhall by the Royal Empire Society and other Imperial bodies.

"In the diversity of the peoples of our Empire, their talents and their resources, lies the real secret of the Empire's greatness," declared Hon. R. B. Bennett, prime minister of Canada, in his address.

The speech of the Canadian prime minister was greeted several times by cheers.

"Before us," said Mr. Bennett, "lies the task of Empire consolidation and with that task we meet in the heart of this great city, where trade, commerce, finance, and other great affairs engage the attention, to think of our Empire as an economic unit."

Mr. Bennett was cheered when he declared the nations of the Empire were not yet bankrupt in statesmanship. Men and women occupying a quarter of the land surface of the globe and comprising a quarter of its population, were still capable, by guidance and leadership, of achieving in the future what they had not already achieved, namely, the economic solidarity of the Empire which was as capable of achievement as the development of their constitutional liberties had been.

H.R.H. Prince Arthur of Connaught, former governor-general of South Africa, presided at the banquet.

Canada's Fire Loss Heavy

Total Of $47,000,000 Shown In Report For Last Year

Ottawa, Ont.—The fact that Canada's fire loss last year, $47,000,000, represented almost two and one-half times the amount the Dominion Government set aside to relieve unemployment, was called up by Premier John Bracken of Manitoba, to impress on delegates to the Dominion Fire Prevention Association convention the need for greater effort.

Prime Minister R. B. Bennett was named honorary member. W. H. Shapley, Toronto, is the new president.

Among the many resolutions given approval was one recommending that institutions receiving financial assistance from federal, provincial or municipal authorities be compelled to provide adequate fire safeguards.

Hope Is Fulfilled

First C.P.R. Train Reaches Historic Town Of Battleford

Battleford, Sask.—Another page in the history of Battleford was written when the first Canadian Pacific railway train pulled into the depot at 12.30 on the afternoon of Sept. 30.

To the citizens who crowded the station platform, it was a fulfillment of a long cherished hope, which had its birth in 1875, when the first projection was made which was to carry the steel from Winnipeg, Fort Livingstone, Battleford, through the Yellow Head Pass to New Westminster.

In 1881 it was decided that the route should be diverted to serve the southern part of the province, and for nearly half a century citizens of this historic town have labored for the achievement marked recently.

Have Extensive Program

Railways To Proceed With Construction and Improvement Work

Ottawa, Ont.—Official announcement has been made by Senator Robertson, Minister of Labor, that the Canadian National and Canadian Pacific railways would proceed immediately with a $21,000,000 construction and improvement work. Employment for 10,500 men would thereby be provided for a year, and 2,000 teams of horses would be given work for a considerable part of the time, especially for grading purposes. The employment of teams will help the farmers in many districts.

GOV'T PROGRAM ENLARGED FOR RELIEF PURPOSES

Ottawa, Ont.—Details of the Federal Government's campaign to relieve unemployment in Canada were outlined recently by Senator Gideon Robertson, Minister of Labor. Between $80,000,000 and $90,000,000 will be "put to work" to better distress conditions and provide work for Canadians, he said. This included the $20,000,000 supplied by parliament at the last session, the remainder being contributions from the provinces and the municipalities, and the $21,000,000 program of construction and improvement work to be undertaken by the Canadian National and the Canadian Pacific railways.

The Federal Government's scheme was not limited to setting aside money for construction in co-operation with the provinces and municipalities, the Minister of Labor declared. A sum of $4,000,000 would be set aside for "direct relief." The grade separation fund of the board railway commissioners would be augmented by a total of $1,000,000 for the benefit of any subway work undertaken. The government would contribute on a 50-50 basis with the provinces in building a trans-Canada highway from Sydney to Vancouver, and was prepared to pay 40 per cent. of the cost of general provincial highway work this winter.

There will be other angles to the government's relief program, Senator Robertson emphasized. Tariff changes made at the last session would afford immense stimulus to Canadian industry, he believed, and would result in the creation of more jobs. Restrictions had been placed on immigration for the benefit of Canadian labor. It was the minister's belief that the expenditure of from $80,000,000 to $90,000,000 throughout Canada in relief work by one kind or another, would reach every type of laborer, clerk or artisan.

The program of construction and improvements to be undertaken by the two large railroad companies, which has been formally approved ...

MINISTER OF AGRICULTURE

Hon. Robert Weir, Minister of Agriculture in the Federal Cabinet.

Staff Reduced When Resources Handed Over

Accounts Can Be Handled By Smaller Number Of Clerks

Edmonton, Alberta.—No ceremony of any kind marked the formal transfer of Alberta's natural resources. Twenty-eight officials, clerks and stenographers in the Dominion Lands office here, found themselves out of employment, as transfer of the resources was made.

Regina, Sask.—Effective reduction of staff to permit financial savings by the administration of the natural resources is forecast by Premier J. T. M. Anderson in a statement issued as the provincial government took over the natural resources of Saskatchewan.

The transfer of the natural resources involves the transfer of about 20,000 accounts for grazing leases, mining claims, timber permits and contracts, land sales and contracts and school land contracts.

ROBERT BUCK, TO ATTEMPT TO LOWER RECORD

Robert Buck, 16-year-old Elizabeth, N.J., lad who made his first flight eight months ago, will take off soon in his Pitcairn biplane in an attempt to lower the junior coast-to-coast flight record. He is a friend of Eddie Schneider, 18, present holder of the transcontinental mark.

Maritime Ports Are Important To Canada

Only Avenues Open On Our Atlantic Coast At Certain Seasons

Halifax, N.S.—Emphasizing the important position the ports of the Maritime provinces hold in relation to the Dominion at large, Sir Henry Thornton, president of the Canadian National Railways, reminded his hearers at a luncheon given in his honor here that, at certain seasons of the year the harbors of the Maritime provinces are the only avenues of ingress and egress on the Canadian Atlantic coast.

To contemplate any separation of the Maritimes from the rest of Canada, said Sir Henry, "would be to contemplate economic suicide." The position of the Maritimes economically he added, was the best in the Dominion today. He pledged the fullest co-operation and support of the C.N.R. in development of the port and province.

Making Inspection Trip

Hon. R. J. Manion To Look Over Bay Railway and Terminals

Ottawa, Ont.—On his first inspection trip, Hon. R. J. Manion, Minister of Railways and Canals, departed from the capital to make a personal survey of the Hudson Bay Railway and the terminals at Churchill. Dr. Manion will be absent from Ottawa for a fortnight.

Accompanying Dr. Manion were his deputy, D. I. Smart, Col. A. E. Dubuc, chief engineer of the department and Charles Haddow, assistant high commissioner for Great Britain.

ARE PLEDGED TO THE CAUSE OF EMPIRE TRADE

London, England.—The self-governing nations of the British Commonwealth pledged themselves to the cause of Empire trade. Throughout the speeches which marked the opening proceedings of the Imperial Conference the ever-recurring note was the desire to co-operate, to meet the common problem with common action.

"I should like to make this conference another turning point in the wonderful history of our people," exclaimed Prime Minister Ramsay MacDonald in a radio broadcast. "Our weakness," he continued, "is in our psychology far more than in our skill, our material or our resources. It is a renewal of will that we need."

"What we have to consider," said the British Prime Minister in opening the conference, "is, I would suggest, what practical means we can devise for helping one another and thereby helping us all, always remembering the different world contacts and internal industrial circumstances to which we have to accommodate ourselves."

The conference, for the first time, met in the great Locarno room of the Foreign Office.

"At this table," said Mr. Ramsay MacDonald, "are the shades of many great men and of many great events which are enshrined in a history common to us all. They do not receive from all of us the same welcome or the same homage. But there are, dignified by time, their aspects and their results smoothed and mellowed by the passing of the years and by the progression of the pageantry of history which is now our inheritance for good or for ill.

"We are still in the flesh, with fate or destiny still unwritten regarding we who have to live and plan for the future. We face a world still unsettled, beyond us is a prospect of intangible fears, set purposes, unhappy suspicions, firm convictions, numbing experiences and yet radiant idealism, and it is our lot to try and find a sure way amidst the confusions—a way which those who will sit here after us will gladly pursue to the goals which are to us but promises. If it be our good fortune to find that way it is only because we have confidence in each other, because we are inspired in all our deliberations ...

PROSPECTS FOR GREATER TRADE WITH ANTIPODES

London, England.—The Imperial Conference of the British nations has got down to work and the first business was concerned with constitutional questions, which arose from the Balfour report of the 1926 Imperial Conference dealing with equality of status as between Dominions and the mother country.

In the background of the constitutional discussion was the speech made by Hon. Patrick McGilligan, Irish minister of external affairs. "For us," said Mr. McGilligan, "the recognition of our position as a free sovereign state comes before all other consideration."

But it was not in the council room alone that progress was made. Canada and Australia, represented by Hon. H. H. Stevens, Canadian Minister of Trade and Commerce, and by Prime Minister James Scullin of Australia and Hon. P. L. Maloney, Australian Minister of Markets, respectively, opened conversations with the greater development of mutual trade their goal.

It was found that both countries can buy from each other many things they now buy outside the Empire. Australia had dried fruits and oranges, pineapples and wool to offer Canada, which at present buys pineapples from the Hawaiian Islands, and wool on the New York market. And Australia, it was pointed out, buys from foreign sources a number of products she could just as well take from Canada.

Hon. Mr. Stevens also had some informal conversations with the New Zealand representatives in regard to trade with New Zealand, with particular attention being paid to the higher Canadian tariff on butter, which is to be eight cents instead of four cents a pound.

Scholarships Awarded To Canadian Nurses

Will Take Post Graduate Course In Public Health Nursing

Ottawa, Ont.—Following a policy in the organization since 1921, during which time 144 scholarships have been granted, the Victorian Order of Nurses for Canada has again given scholarships to enable well qualified nurses to take a post graduate course in public health nursing at Canadian universities.

This year's awards have been made to Miss Hazel Latimer and Miss Edith Stevenson, both of Ottawa; Miss Elizabeth Edwards, Kingston, Ont.; Miss Mary Henderson, Niagara Falls, Ont.; Miss Margaret Ferguson and Miss Jean Watt, both of London, Ont.; Miss Annie R. Smith, of Calgary, and Miss Jacqueline Noel of Montreal.

A Weekly Newspaper Published At
Tofield, Alberta

THE LOSS OF THE R101

IT WAS with profound sorrow that Britishers in all parts of the world, yes, and all other peoples in the world, learned of the destruction of the giant airship R101.

That forty-six lives were lost in the disaster was all the more sorrowful and it will be many days before the people of Great Britain, accustomed as they are to shouldering shocks will cease to mourn for the departed and to lament the loss of the pride of the empire and giant of the skies.

At time of writing we are unable to say whether the R101 was on her way to India or simply upon an ordinary flight. Up to Monday night there has been no daily newspaper on sale in Tofield containing the story of the tragedy, our information being received from the Edmonton Journal's radio announcements. But in the R101 Britain's hopes and aspirations of the air were centred. Commencing with Canada she was to have made flights to the various dominions and it was fondly hoped that she would be the forerunner of as large or larger airships that would carry passengers, mail and freight, and thus considerably lesson the traveling time between the mother country and the far flung dominions.

That travel by airship will have received a severe setback is obvious though at present there is no announcement as to the actual cause of the disaster. The heavy loss of life makes the event a particularly sad one and that among them should be Great Britain's brightest airship talent makes the loss exceptionally severe.

But even in our sorrow we remember the history of the human race is one of achievement. Disasters on land, on sea, beneath the sea, and in the air have happened before. Steamship travel to-day has been made safe and comfortable, not because our ancestors found it easy to do so, but because the spirit of adventure and achievement forever beckoned them onward. Larger and faster boats were their aim and travellers can now encircle the globe in comfort. There were wrecks and sinkings and loss of life, but always there were men ready to step into the breach and win ultimate success.

The will to travel through the air will not die despite the sorrowful and tragic loss.

THE IMPERIAL CONFERENCE

THE IMPERIAL Conference which assembles in London to-day is a lineal descendent of that first gathering of statesmen from the self governing portions of the British Empire which met to commemorate Queen Victoria's jubilee in 1887. The discussions were then little more than formal because only one of the overseas nations, Canada, had been federated, and Great Britain entirely overshadowed the representatives of small and still thinly peopled colonies in population, wealth, knowledge and experience. Now the discussions are between self-governing nations equal in status and not so markedly unequal in population and wealth. The Dominions, moreover, bring to the conference today a wide experience not only of internal self government but also of diplomacy both during the war and in the League of Nations since the war.

The primary business of the conference will be to ratify the recommendations of a legal committee which has been sitting in order to carry out to logical and legal conclusions the decisions of the Imperial Conference of 1926 which defined a new relationship of equality and responsibility as the basis of that commonwealth of nations which has taken the place of the old British Empire.

Agreement on political questions seems likely to be easy to arrive at. The questions which will excite active interest are economic. Unemployment and the bad trade which has beset Great Britain since the war and recently has affected the Dominions has given rise to vigorous agitation that the nations of the Commonwealth should organize into a single large economic unit instead of remaining a number of small national entities. It has been urged with force that the Commonwealth contains within its boundaries every kind of foodstuff, raw material and manufacturing capacity, and that the proper answer to immense modern economic units such as the United States, Soviet Russia or an economic zollverein of Europe is a rationalized British Empire.

But on analysis the difficulties in the way are obviously great. Canada, Australia and South Africa are now all committed to a policy of developing their manufacturing industries by high protective tariffs. They certainly will not consider for a moment the admission of British manufactured articles free of duty. On the other hand, Great Britain is still a free trade country and is averse to putting duties on foodstuffs and raw materials imported from foreign countries.

At the moment, it is true, the tide of public opinion is running strongly in favor of protection. But if the protective policy prevails, British agriculture will certainly demand protection against empire grown as well as foreign-grown foodstuffs for the same reasons that the Dominions ask for it against empire manufacturers.

The conference is sure to discuss privately the problems raised by the rapid movement toward self-government in India and the failure to reach an agreement with Egypt—both matters which affect communications through the Suez Canal. But it is not likely to say much about them in public.

In fact, from present indicatioos the Imperial Conference will be a useful stock-taking of the international and economic situation, but is not likely to bring forth any sensational disagreement or very dramatic results. The Commonwealth will neither dissolve, as some people prophesy, nor is there much liklihood that it will become a zollverein or frame a new constitution for itself, as others hope.—Christian Science Monitor.

The Red Man Tries the Pipes

Sandy has a broad grin on his face as he watches brother Redman take a fling at the bagpipes which he has loaned him for a moment to try his luck. The Indian is all intent on his unaccustomed task and since it is only a photograph and not a sound picture you can contemplate the scene without misgivings. Photograph was taken during the recent Highland Gathering and Scottish Music Festival held at Banff, Alberta.

WHAT IS A REXALL ONE-CENT SALE

IT IS a sale where you buy an item at the regular price then another item of the same kind for one cent. As an illustration: The standard price of Klenzo Dental Paste is 50c. If you buy one tube at this price and by paying one cent more or 51 cents, you get two tubes and save 49 cents. Every United Drug Co. article in this sale is a high quality guaranteed product just the same as is sold every day at the regular price. No limit—buy all you want, but on Thursday, Friday and Saturday only!

ONE CENT SALE

At A. A. Beirnes', The Rexall Drug Store

Thurs., Fri., Sat., Oct. 16-17-18

Come Early While the Assortment is Good

A PROFIT-SHARING METHOD OF ADVERTISING

THIS SALE has been developed by the United Drug Co. as an advertising plan. Rather than spend large sums of money in other ways to convince you of the merit of these goods, they are spending it on this sale in permitting us to sell to you two full size packages of high quality merchandise for the price of one, plus one cent. It costs money to get new customers, but the sacrifice in profit is justified, because we know the goods will please you.

Livestock Is Shown To Be A Prime Factor In Economic Development Of The West

A popular idea is that revenue in the Canadian prairie provinces is derived almost wholly from grains. A second idea is that the growth of home-steading vastly increased grain production at the expense of livestock and cut down drastically the number of head of livestock between the Great Lakes and the Rocky Mountains. Both ideas need considerable revision.

The rapid settlement of the Prairie Provinces made possible by grain growing has been accompanied by an increase in livestock that has more than compensated for the reduction in ranches, so far as numbers are concerned. Self-sustaining farming demands the raising of livestock, and the change in the West in this respect within the past decade or so has been remarkable. Today, though the livestock industry in Manitoba, Saskatchewan, and Alberta has only touched the edge of possibilities, the number of head of cattle, sheep, and swine on farms is an important percentage of the whole in the Dominion. The fact has great value economically, for it tends to spread agricultural wealth more evenly over the seasons than is possible with grain farming only.

The four western provinces have now more than three times as many cattle, more than four times as many sheep and nearly eight times as many swine as there were in the ...

... grain is being produced on the prairies would lead one to believe that the West should be the source of the heaviest hog shipments in the Dominion, for swine production goes hand in hand with grain production. It is an axiom that nowhere can hogs be produced more cheaply than at the fountain head of the grain supplies. Yet Eastern Canada, with very small grain fields, although having a certain advantage in the matter of dairy by-products, turns out nearly two hogs for every one that comes from the West.

The following table, showing number of bushels of wheat and all other potential feed grains produced for every hog carried in the various provinces respectively, indicates that hog production in the older provinces has become more or less stabilized in relation to their grain supplies, but it also points out the possibilities open to swine men of the West.

Ratio of Bushels of Grain Per Hog

Veteran Canadian Explorer Returns To Atlantic With Relics of Franklin Expedition

Satisfied that all the information which it is humanly possible to discover regarding the fate of the Sir John Franklin party, which perished among the Arctic islands off the mainland of Canada 85 years ago, has been gleaned, Major L. T. Burwash, veteran explorer, returned to Ottawa with a number of relics.

Their discovery in an abandoned camp on King William Island, between Victory Point and Lady Jane Franklin Point, added little to what was already known, beyond definitely establishing the locale of at least one staying place in the long trek which appears to have ended hundreds of miles south, on the Canadian mainland, near the mouth of Back's Fish River.

The fragment of a canvas tent, circular in shape, and lending color to the assumption that this portion had been frozen to the ground while those occupying it had torn away the remainder, pieces of naval broadcloth, some inch-thick rope, and the rusted blade of a knife constitute Major Burwash's find. He encountered two graves on King William Island, but from these nothing could be gathered. Of the grave of Sir John Franklin himself, no trace was found.

That this trek was attempted is clear from Eskimo tradition. In 1850, Dr. John Rae of the Hudson's Bay Company, surveying the coastline in that neighborhood, encountered natives who were then using tableware and other utensils which bore the mark of the Franklin expedition. They informed him that years before a group of white men had been seen struggling across the ice to the mainland, dying as they walked. Verification of the Eskimo tradition was secured at Starvation Cove, where later expeditions located about 40 graves.

The purpose of Major Burwash's flight to King William Island was, in part, to verify, if possible, the story of an American mining engineer, named Jemme, who, many years ago, originated a report concerning the Franklin party which would if correct have thrown new light on their fate. This story, in document form was bought by the Department of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister Major Burwash definitely establishes that the Jemme story is without foundation.

During the war he prosecuted Sir Roger Casement, Irish leader, who was hanged for his wartime activities.

Shipbuilding in Sweden

Breaks Mobilization Load in Industry Among Neighboring Countries

Sweden maintains the lead in the shipbuilding industry among the neighboring countries according to the latest reports. At the Swedish yards 36 vessels with an aggregate tonnage of 127,000 gross tons were in the course of construction at the end of the first half-year. Launchings were carried out with 20 ships of 114,000 gross tons and Norway followed with 13 ships of 60,000 gross tons. Of the ships at present in course in Sweden nine are steamers of 16,000 ships 2,000 gross tons each, two motorships of 2,000 to 4,000 tons four motorships of 5,000 to 6,000 tons and six motorships of 8,000 to 10,000 tons.

DELINQUENT'S WEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Here, we see, the sweeping scene may almost strike home for the cooler days here is a charming model. If long sleeves are the fall demand then this model is equally suitable because the lower sleeves may be omitted and Hey Presto!—short sleeves!

Very pretty is this dress carried out in the shade of the kinds of wools in checks or some similar thin wooden or wool and cotton. The original is scarlet kasha has yellow and blue Mandarin stitch around the bottom of the edges, sleeve yoke, and cross stitchery for the sleeves and here and there. Owing to its color-ful nature this model is especially suitable because the lower sleeves may be omitted and Hey Presto!—short sleeves!

SUNDAY SCHOOL LESSON

OCTOBER 12

MARY, THE MOTHER OF JESUS —AN EXAMPLE OF MOTHERHOOD

Golden Text "Mary kept all these sayings, pondering them in her heart." Luke 2:19.

Lesson Luke 2:15-19; John 2:1-5; 19 25-27

Devotional Reading: Psalm 67.

Explanations and Comments

The Annunciation, Luke 1:26-38. Luke 2:15-19—The shepherds were amazed at the angel's message, but not all of them, but they were not incredulous and they said, "Let us now go even unto Bethlehem, and see this thing that is come to pass which the Lord hath made known unto us." Read the rest of Chapter 2. Luke 2 They went and found the Christ-child. They told what they had been told. They told the Joseph, Mary and the Baby. They told the shepherds told what they had heard and seen and marveled. Mary retained their words in her heart—gathering them up and pondering them.

The Mother Of the Man. John 2:1-5 The third day after Jesus' talk with Nathaniel. John 1:47-51. He came to Cana of Galilee, Nathanael's home town. At a house where Mary was well known, wedding festivities were being held, and when her Son appeared with His followers they were invited to attend Toward the end of the festivities, which in the eastern lands days, the supply of wine was exhausted. Mary heard that and turned to Jesus for help. "They have no more wine." She told Him. She made no request; she simply told Him of His situation.

The Mother Of the Saviour John 19:25-27—Standing by the Cross of Christ were His mother her sister Salome Mary the wife of Cleopas and Mary Magdalene. The two phrases, "the mother's sister, Mary the wife of Cleopas," may be taken to refer to one woman, but in that case the two names are both named for her, which is improbable.)

We see three of her affection: Here, who won God's benediction Christ, who was God's benediction Christ, who was God's benediction O that speechless, ceaseless yearning! O those dim eyes never turning From their vision of the Coming Son!"

Jesus looked upon His mother and John ("the disciple whom He loved." John never mentions his own name in his Gospel), and said to His mother, "Woman, behold, thy son!" and to John, "Behold, thy mother." Dr F. B. Meyer says that what Jesus would not call her "mother" lest He should embarrass Himself still more by her homage.

"In that hour of excruciating agony He did not forget his mother's need No other person's sorrow was eclipsed by His own. He was never self-centered in His grief, so as to ignore the sorrows or others." (F. B. Jowett).

And from that hour John took the mother of Jesus into his own home

Conduct Mass On Eldrf Tower

A religious mass was said at the top of the tower of Eiffel that morning, the first time since it was built more than 40 years ago. It was said in the lofty wind-swept little cage 4,000 feet above the earth A small table was used as an altar and the music which accompanied the liturgy was the hymns. Special tribute was paid to M. Eiffel.

Made It Stand—

The wife had been put on the budget plan. At the end of every month she and her husband would go over the accounts together. Every once in a while he would find an item, "L.O.K., $5."

Finally he said, "My dear, what is this—"L. O. K.?"

"Lord Only Knows," she replied.

Mending clothes is accomplished in the same manner as patching an automobile tire, with a mending paste, which withstands washing, boiling and ironing.

A woman's tongue is her sword—and she never allows it to rust.

Tea Biscuits unusually good when made with Magic Baking Powder

If you bake at home send for the New Magic Cook Book. It will suggest many attractive dishes and save time for you.

Look for this seal on the can. It guarantees Magic Baking Powder has the correct proportions of the best ingredients.

Magic Baking Powder does not contain alum or any harmful ingredient.

$ out of every 4 Canadian housewives* who bake at home, use Magic Baking Powder because they find that Magic gives consistently better baking results.

Next time you bake biscuits, try Magic and see for yourself how it will help you with your baking.

*Based on actual survey

Try this Recipe for Biscuits

2 cups flour
2 teaspoons Magic Baking Powder
½ teaspoon salt
2 tablespoons shortening
1 cup milk

Sift dry ingredients together three times, maple baking powder and salt, rub in shortening with tips of fingers, add milk a little at a time to make a dough so soft it can be handled, using a knife to mix. Toss on floured board for a moment, then dough out to ½ inch thickness. Cut with floured cutter and bake in hot oven (450°F.) 12 minutes.

*This fact was revealed in a recent Dominion-wide investigation.

Huge New Glacier Found

Ice Field in British Columbia May Be Largest In World

Bringing back a story of having discovered an ice field that will outrival any previously known, Christian Hasler and Ernest Feez, former guides of the Chateau Lake Louise and Banff Springs Hotel, arrived at Golden B.C., by using train, motor and push train.

With Major Longstaffe, of Vancouver, the guides reached the headwaters of the South Canoe Lakhead and Tuba Rivers, 180 miles north of Vancouver, in the Cascade range. The explorers say the ice field is the largest discovered in the mountains of the virgin country of the headwaters.

Huge snow fields and glaciers extended at an area of 300 square miles, were seen and photographed for the first time. Ernest Feez states that they were due only a part of the huge ground and there.

Another Wonder Of Science

How Evelyn Hutes Breath a Kind Of Third Hand

As we have roamed to wonder at the marvels of science, it is not surprising to learn that inventors have found new uses for the products of the human body besides just breathing. Take the case of one's breath when cold, or on a cup of tea when hot—something one is not taking too when "conspiracy" is present.

Dr E. S. Pros, New York, consulting engineer and scientist, comes forward with a device which can be attached to many things, and all one has to do is to blow into a sort of telephone mouthpiece, and it will do the rest of it. It makes the breath a kind of third hand when a person is busy.

For instance, if you are playing the piano, simply blow into the mouthpiece and it will turn a page of music. If typing, you don't need to lift your hand to shift the carriage, simply blow and the carriage will slide back. Blow again and it will open the door of your safe, or open the window. In a "piano your breath may manipulate the controls. In the same way you may operate boxing machinery. In fact, there is almost no limit to the possibilities which a little "blowing" may accomplish. Only this is a purposeful sort of blowing, not mere winding stuff.

Saving For the People

Says Saskatchewan Has Saved Over $300,000 in Connection With Its Weight Rules On Canned Goods

"People of Saskatchewan will save over $500,000 this year on canned goods," states Hon. J. A. Merkley, Minister of Railways and Labor. The figure, $300,000 has been given to the department as the estimate of a large wholesale grocery firm with a warehouse in Regina, he said.

"The estimate will be very close to correct," Mr Merkley said. The rules in effect would continue until the close of navigation on the great lakes and then would be revised as he is thought out all over again," he added.

The government had resolved the support of the boards of trade of Saskatchewan, the Retail Merchants' Association, and the United Farmers of Canada in the fight, which had been on July 14 and September 16, Mr. Merkley said in conclusion.

"The stalls," we are reminded, "do not applaud as heartily and unanimously as the pit and gallery." No; they are the reserved seats."

In all Belgium there are only about 12,000 unemployed.

Try To Decipher Document

Second Andrew Henry Causing Experts Much Difficulty

Experts examining the documents found with the remains of members of the Andrean balloon expedition in icy Nivitoven are having difficulty with the second of the Andrew diaries, which they believe supplies the record of the last days of the party.

It had been exposed during the 33 years since the deaths of the three men and the sentences are well nigh erased by time and the elements.

"If you haven't a doctor," said the landlord in the hamlet, "what happens when anyone is taken seriously ill?"

"Oh, they just die a natural death."

Another Wonder Of Science

Believe It Or Not

Mountain goats in the Caribou range are growing taller, according to ranchers at Fairbanks, Alaska. As proof, one trapper points out that he has found trees on mountain sides with high water marks on them from lakes and streams now hundreds of feet below. A government geological party has been asked to investigate the growth of the goats.

An Energy Dressing

CHAPTER I.—Continued

Here her—thick, rich, she never said a dull thing in his life! And he really meant it. She could tell by the look in his eyes. He wasn't just being made her smile, even as she conversed steadily, almost coolly, until quite excited her voice "I always knew, Nick, that you possessed a streak of chivalry. It was inherited from your fine extinct——"

"Chivalry be damned!" he interrupted "That's tommyrot, my dear, and you know it! Come on, Gay. Be a sport. I've got a couple of tickets—or whatever bootlegger you prefer to a few seconds in a handkerchief, and——" He closed his eyes, folded his arms, and softly sang: "Oh, that we two were Maying."

Nick's voice, sweet and true as a bird's, always stirred the girl. She turned now and laid her hand on his. "You're a good friend, Nick——the best I ever had, or ever shall have. I'll never forget what you've done for me just now. Remember, it makes everything easier; but I refuse to spoil your freedom, and you shall."

Nick squeezed her hand.

"A half hour ago," he proclaimed loftily, "I start in the vineyard. I'm quenched me by my late uncle and announced to all who cared to hear that I could conquer the world. And now you imply that I can't conquer a girl—a girl in a pink gown. I refuse to be vanquished! Something tells me that you'll not be able to get rid of me so easily. Without conceit, I think I can promise to prove a more thrilling homemate than Miss Sadie Fum along now and pack your bag. I'll drive you a mile—to hut as at State Line. In forty minutes no, thirty, I'll be at the back gate in uncle's rusty Ford-ster. We'll leave it behind us after the parson has done his worst. Be game, girl. The hour waxes late."

"Are you really proposing to me?"

Gay's cheeks burned, and the young man answered: "I am. Gee! I've always supposed it would be a big undertaking, and it comes so easy! For two cents I'd kiss you, if I weren't afraid Selma was at the window."

To his surprise Gay sidled a sob. "I can't, Nick."

"Try it."

"It wouldn't be fair."

"Not to you, perhaps," he agreed amiably. "For me, it would be a cinch."

"You're—so young," she hesitates. "I'm older than you!"

"Not really," she contradicted "Not in your feelings, Nick. You're just a kid."

"Before night," he announced proudly, "I'll be a married man; but you, my dear, will be my wife in the sense that it's the very top o' the morning. Let's be off!"

He drew, pulling her to her feet, and at his touch something of his own youthful gaiety, his enthusiasm, a trace of his daring, stirred her. Her eyes sparkled. She said, her heart palpitating wildly "I'll go and get my hat."

"But see no hats," he quoted, and again turned away, calling over his shoulder: "In thirty minutes...at the back gate." And stopping to rescue the nonsense of freedom that he had dropped for her sake, vaulted the low wall and disappeared.

CHAPTER II.

Thirty minutes!

Gay stood paralyzed in her own kitchen its whole self she had fled when Nick strode away. Thirty minutes" he had said, "at the back gate" Now could one get ready to change one's entire life in a half hour? Where was one to begin? There was so much to do: a note of explanation to Miss Sadie; a hunch to write the price of dinner at a hotel, thought prudent Gay; a suitcase..... What, on what should she put into her suitcase?

Still dazed, she opened her closet door, where, as if in answer to question, hung a big handsome that had adorned her shoulders when she acted as Gypsy fortune teller at a church fair. Th' night brought an inspiration. Gather the suitcase! She would be as good a tramp as Nick himself!

Gay laughed joyously. She didn't know that this inspired decision was something Nick was never to forget; but she felt dazed no longer as she snatched the handkerchief and spread it on her bed to receive the things that were out of the pink gown and zipping into a khaki windy. In fifteen she was tying a hunt to a bulging handkerchief. Then, finally she was pressing a hasty note which was doomed to scandalize Miss Sadie and Selma, and in thirty, when Nick rose to schedule, arrived at the back gate, she stood waiting, breathless to be sure, but waiting, her hands tied to the late Grandpa Twitchell's best cane swung over on shoulder, a crisp sun sweater on her arm, a crimson tam upon her head, and a lunch basket at her feet.

"Oh time," said Nick.

He eyed, sweeping upward from the stout Cordovs on her small feet, to the tam and basket, evidenced with surprise. Gay never forgot that look. If, in those thirty minutes Nick had regretted his rash decision, his fears were put to flight The smile he threw her caused every drop of blood in her body to race and dance.

"Good girl," he said with real approval, and was at her side. He lifted the basket questioningly.

"Lunch," Gay answered. "I'll save buying one."

Nick laughed. "I see I have chosen a thrifty wife," he said and proceeded without further comment to stow away her bundle in the back of his limousine.

There followed a quarter of an hour that to Gay seemed breathlessly constrained. It wasn't the silence she was used to silences with Nick; it was something within herself something that noted: "Oh, have I done right? Is this fair to him?"

As for Nick, he appeared to be unnecessarily intent upon the familiar road. It was not until the town was left behind, and they had chugged to the top of Sunset Hill that he stopped the car, breaking the silence to say quietly: "Take your last look at our native heath, Gay."

She arose and turned about, saying a steadying hand upon her shoulder. Something clutched at her heart as she looked down on the town that had sheltered her all her life. It had sometimes seemed a prosaic town to Gay; now, in comparison with a bewildering and unexpected future, it looked dear and friendly. Almost, she was sad to leave it. The grace of the moment was so gaily green, topped by tender, unsullied heaven of calm tones that had stood there for a century. Hitherward everybody clopped in the quiet river; and everywhere was the sweet scent of spring.

Gay's heart lightened and Nick sensed it with his own.

"Homesick — already?" he questioned gently.

Gay shook her head as they began the descent of the long hill.

No, Nick. I wasn't homesick, exactly; but it looked so natural, and what we're doing is so amazing. Why, even an hour ago I didn't dream——"

He stopped, as if it were difficult to express her thought; and Nick continued "That before the sun was noon-high you'd be starting on your honeymoon? Well, Gay, we're both in the same boat. I don't suppose you feel a little dazed. I'm dazed myself but you're not to feel homesick. I don't let you. I tell you what, young lady, we're lucky to five within forty hours of a state where we can get a license and be married all in an hour."

"And how I've scorned the people who have done it!"

Gay blushed hotly at the memory; but Nick only smiled as he admitted: "Same here, but I'm not scorning now when the shoe may pinch the other foot, do we? But there's one thing I'm glad of, and that is that we're not eloping. Elopements are a disgrace to any family. Why, only last week Lem Jones' horses were common, three living bedspring gowns were scattered by hill-billies, and a scratched Ford—or horses caused by a fall, was likely to have associated with them Gertrude Hill's marriage."

"Gertrude Hill!" Gay echoed. "Why, she's gone, Dr. Suppington recalls, seems enter the county hospital as a broken skin. Some kind of scratch or cut is necessary.

Nowadays, with fewer horses to scatter the germs, such accidental abrasions of the skin are less likely to become infected with lockjaw germs, although it is still a good plan, Dr. Suppington agrees, to have all such cuts cleansed and disinfected by an expert physician at once, and to take a dose of lockjaw serum if the physician so advises.

Recipe For This Week

(By Betty Barclay)

BRAZILA WALNUT CAKE

1½ cups sifted cake flour.
½ teaspoons baking powder.
½ teaspoon salt.
1 cup sugar.
½ cup strong decaffeinated coffee infusion.
½ cup walnut meats, broken.
½ cup Brazil nuts, broken.
Sift flour once, measure, add baking powder and salt, and sift again. Cream butter, add sugar, and cream together thoroughly. Add egg, then flour alternately with milk, a small amount at a time Beat after each addition until smooth. Bake in greased muffin pans in hot oven (450 degrees Fahrenheit) 25 minutes. Makes 18 small cakes.

Private Accordions For Prince

Sandringham, the Royal residence in Norfolk, is to have a private accordion for the Prince of Wales and Prince George on their air visits. If the final details of the plans now under consideration receive the King's approval, a banger large enough to accommodate four pianos will be erected on the estate, fronting on the Royal golf course.

The unicorn fish wears a single horn.

Minard's Liniment has a hundred uses.

True dyes are easiest to use!

Diamond Dyes are the highest quality dyes you can buy because they're so rich in pure aniline. That's what makes them so easy to use. That's what they've been famous for 50 years. 15 cent packages—at drug stores.

Diamond-Dyes
Highest Quality for 50 Years

Automobiles Get Credit

Have Lessened Cause Of Jackpine Says Dr. Soppington

In spite of the enormous number of auto wrecks and bruises for which automobiles are responsible each year the automobile must be credited, believes Dr C O Soppington of the Provincial Safety Council, with a great decrease in cases of lockjaw in the United States in the past ten years.

Not that automobiles or automobiling have any direct effect on the lockjaw germ What has happened, Dr. Soppington explains in a recent issue of the council's industrial bulletin, the "dash fighter," is that automobiles have displaced a number of horses, especially in cities. The lockjaw germ, which normally exists in the intestinal of the digestive system of many animals, is found in dung. Where horses were common, theses living lockjaw germs were scattered by hill-billies and horses caused by a fall, was likely to become infected with these lockjaw germs, which then multiplied in the blood and tissues. Soon after a few days, the denoded spasm of the jaw muscles—lockjaw—would give the disease its name. The bootlegger germs, Dr. Soppington recalls, seems enter the body through the broken skin. Some kind of scratch or cut is necessary.

Nowadays, with fewer horses to scatter the germs, such accidental abrasions of the skin are less likely to become infected with lockjaw germs, although it still is a good plan, Dr. Soppington agrees, to have all such cuts cleansed and disinfected by an expert physician at once, and to take a dose of lockjaw serum if the physician so advises.

Demonstrate Invention

Woman Has Contraption Which Will Revolutionize Starches and Shinolene Gum

Mrs. Mark Payne of Brighton Down, New York gave a demonstration of her new invention a device who's she hopes will soon revolutionize the gumms of starches the gums of moisture gold and the gumms of darning holes out of socks.

Mrs. Payne, who is 36, has a 5-year-old son who inspired the invention. The boy used to come in with holes in the knees of his stockings and while his mother sewed them up the idea of revolutionizing things suddenly smote her.

Her invention looks like a cross between a bicycle and a gearshift lever. It has a hitch at the top, attached to a rod which runs down through a cylinder At the bottom of the cylinder is an opening and a little flipper

The marble player simply steadies on his foot, changes the thing over a marble given the knob a when with his hand and the marble shoots out. Any self respecting boy can spend such a contraption would not stop to shoot marbles

Little Helps For This Week

"And this commandment have we from Him, that he who loveth God love his brother also."—John iv. 21.

Lovest like God; as they supplant, then lovest thou likewise thy brother.

One is the sun in the heaven, and one, only one is Love also.

Scarce not each human figure the Godhead bears on its forehead?

Recollect thou not in his face thine origin? Is not each man thy brother?

Love like thyself on an ocean unbounded. Is not God guided by the same stars that guide thee?

Love thy brother then with the love brother!

—Bishop Tegner.

Therefore come what may, hold fast your heart, let them not embitter or harden it. We are by brotherman, we conquer by forgiveness.

—Frederick William Robertson

Young Miner Was Studious

Passed Matriculation Examination Of University Although Working All Day

Although he worked underground all day until the dangerous hours of the Welsh coal-debts threw him out of work, Thomas Shoemake, of Cwmaman Street, Aberdare, Glamorganshire England a young miner, went to evening classes and passed his exams to square three

His hours have been rewarded, for it is now announced that he has passed the matriculation examination of the University of Wales.

He passed in English, French, mathematics, chemistry, one physics

Good-bye Asthma. Persons suffering from that extremely trying trouble of Asthma should know what it is to be long with all their sufferings. Mendaco can from a trial. Never do they know when an attack may come and they have had to struggle against what is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however they can say good-bye to their enemy and enjoy life again. It helps at once.

Feeding Laying Hens

Ten Year Average Cost Reported By Chicken By Experimental Station

The ten-year average cost of feeding laying hens at the Lennoxville Experimental Station of the Dominion Department of Agriculture is $2.43 per hen which's means that with eggs selling at an average of 32 cents per dozen it takes 9.86 dozen, maintains Mr. Graves, the keep of the laying hen eggs laid in excess of that number being profit

"It is said that paper can be used effectively in keeping a person warm."

If baby has COLIC

A CRY in the night. Colic! No wonder for alarm of Castoria is handy. This pure vegetable preparation helps quick relief and a good night's rest. It is the sensible thing when baby has an attack. Whether it be the stomach, or the little bowels, pain or constipation, or diarrhea. When ingredients are coated, or the breath is foul. Whatever there's need of prompt regulation Children love the taste of Castoria, and its mothers think it safe for frequent use

And a recent liberal deal of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

Why Kicking Horse Route Was Chosen

Ex Railway Could Be Built Close To Boundary Line

An interesting bit of railway history was revealed by Sir H. H. Stevens, Dominion Conservative member for Vancouver, when he addressed a meeting of "Empire Settlers" in Vancouver.

Sir Henry, who was Minister of Customs in the Borden Government, said that the Canadian Pacific route was determined by the fact that the Canadian Northern had already been built south of the international boundary line and very close to it. Old Jim Hill and his friends were determined to build Canadian into British Columbia to drain one district after another into trade routes of the United States

"So it was Sir William Van Horne, then president of the Canadian Pacific went run the railway to the Kicking Horse Pass instead of to the International

SPEEDY NEWSPRINT

It is interesting to read, in an English paper just received, a manufacturer is has been made possible to read the form next the latest news of the day on paper which at dawn was still in undistorted in the forest.

"This manufacturer decided to time the speed with which newsprint is produced. He had a tree felled about 6:30 a. m. in the forest belonging to his paper mill. The wood was working into pulp and then into paper through the machinery with such speed that 9:30 a. m. the first bale was delivered to a waiting car, which conveyed it to the nearest newspaper printing works, and at 11 a. m. the newspaper was on sale in the streets printed on the newsprint thus manufactured".

This is really lively work, for the Swedish mill. But Canada can get interval times better. Along in 1916 the Duke of Connaught, then Governor-General of Canada, and it so happened that Ike Grace was in the vicinity of what then was the Spanish River Paper Mills. He was conducted through the mills. As he began his tour the mill crew began also to work. Taking out time, they fell and a pulpwood tree, cut into lengths suitable for pulping, ran it through the barking processes and machines, and put the resulting pulp into the Fourdrinier machine.

When the pulp became finished newsprint it was put on a newspaper press and an Ike Grace emerged from the mill, having spent an hour and a half holding it over, he was handed a newspaper and was told that it was a tree when he entered the mill. He was then surprised at the immediate utterance, but at length he acted a peculiarly English remark:

"Ah, my word!"—Forest and Outdoors.

ROBBERS "BLOW" SAFE AT WAINWRIGHT

A daytime during the early hours of Thursday morning, safe-blowers entered the Wainwright branch of the Royal Bank of Canada, in Main Street. Just after making three attempts to open the safe by explosives, apparently left in disgust without any for their pains but an iron screwdriver which was taken from the teller's cage on the premises.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

THE GATEWAY OF THE BODY

The mouth is the gateway of the body. Our health and freedom from disease depend, in a large measure, upon what passes between our lips. Health is very closely related to nutrition, and proper nutrition, in turn, means that a wide variety of foods, per portions by proper combination. It is not that the foods, and fluids that the body requires for growth and repair, and to maintain the energy needed to keep the body functioning, must pass through the mouth of the body.

Most of the germs of disease gain entrance into the body through this gateway. If the diseases which are caused by germs are to be prevented this gateway must be barred to them.

Foods, drink and the toothbrush are the only things which should go into the mouth. Just as we wash our hands before meals, or after using the toilet, so the lips, our inside mouths, and teeth may be rolled, and, as a matter of fact, there is real danger that they may become germs into the body.

In our own interests, we should be careful with regard to what goes in our mouths. We should use only water that is pure, milk that is pasteurized, meat that has passed inspection, and foods that are sound and handled in a cleanly manner.

The gateway should be kept clean and this means healthy. Food and drink should pass into a clean mouth. The toothbrush should be used regularly, night and morning, if possible, after each meal. The most important time for using the tooth brush is at night, and we should never go to bed without having given it our teeth a very thorough cleaning.

A dirty mouth means a diseased mouth. It means that food and drink are being mixed with undesirable material and swallowed. Disease in the mouth is very often responsible for trouble in other parts of the body.

If there are abnormal conditions present, such as diseased teeth or tonsils, they should be remedied. A regular visit to the dentist is advised because dental care will help to keep the mouth healthy and will prevent pain and expense of dental treatment unnecessary when the teeth are neglected.

Keep the gateway of the body clean. Open it only to food, drink and the toothbrush. Close it tightly against those things which have no right to be in the mouth.

Questions concerning health, addressed to the Canadian Medical Association, 184, College Street, Toronto, will be answered personally by letter.

YOUNG PEOPLE'S ASSOCIATION OPENS SEASON WITH BANQUET

The Tofield Young People's Association opened their season of winter meetings on Friday night last with a banquet and social evening. Our social reporter, being on the end of a pitchfork instead of the end of a pen, the report of this social event, must necessarily be brief.

Farmers Want Alberta Livestock

Many farmers want feeding and breeding Cattle. Livestock is one of the best means by which grain can be marketed. Help to preserve this market by keeping established cattle and breeding stock in ALBERTA farms.

WHAT HAVE YOU FOR SALE?
If you have cattle for sale, send a list giving full particulars of number, breed, age, condition, etc., to—

Livestock Branch, Alberta Department of Agriculture, Parliament Buildings, Edmonton.

DO YOU WISH TO BUY?
Those wishing to buy cattle should write to the above Branch, giving full particulars of their requirements.

HON. GEORGE HOADLEY, Minister of Agriculture. — H. A. CRAIG, Deputy Minister of Agriculture.

Local and Personal

Mrs. T. W. Taylor has been quite ill for the past week, her condition over the week end being so serious that Dr. Law called in Dr. Terrill-ague, of Edmonton for consultation. We are pleased to say at time of writing there is much improvement.

Visitors at the Lee home over the week end were Mr. English and Miss McCracken, and Lillies of Edmonton and Clifford and Miss McKinsley of Riley.

Miss Hazel who is residing at the Imler home visited her parents in the city.

Melvin Walker is a patient in the hospital at Edmonton.

Mrs. Walker sr. and her daughter Mrs. Guy Walker and her small son are visitors at the city.

Mrs. Kendall is visiting her sister in Edmonton for a few days.

Miss Ellen Walker visited the city over the week end.

Miss Helen McCauley, who is attending Normal School in Edmonton has been over the week end.

Mrs. Swift's parents who have been visiting at the Swift home for the past two weeks left Tofield this week.

Mrs. Bert Lovell visited her sister at Jarrow last week.

Miss Jean Baptiste of Edmonton spend last Monday with her parents.

Mrs. Mabel Thompson assisted her sister, Mrs. Carl Bisbe last week during threshing.

WEDDING
Ward—Clement

A quiet but pretty wedding was solemnized at the home of Mr. and Mrs. C. W. Clement, 10720 81 ave., at 9 o'clock on Saturday, October 4th, when Lois May Clement became the bride of Mr. Frank Ward of Edmonton.

The home was tastefully decorated for the occasion and at the hour set, the bride entered the room on the arm of her father, to the strains of Lohengrin's wedding chorus, played by Miss Agnes Ward, sister of the bridegroom.

The bride was exquisitely gowned in white georgette with tulle veil held in place with a bandeau of orange blossoms, and carried a bouquet of bridal roses.

The bride and bridegroom were attended by Miss Vera and Miss Stella Clement, sisters of the bride, and George Butler. Rev. William Hollingsworth performed the ceremony. Those present were Mrs. Register, Mr. Victor Stauffer played violin solo.

Mr. and Mrs. Ward were recipients of many beautiful gifts.

TOFIELD YOUNG PEOPLE HOLD PICTURE PROGRAM

On Monday evening the Tofield Young People's Society held a motion picture in place of their regular meeting.

Mr. Robert Dean, of Edmonton brought down a motion picture outfit and showed several reels of an educational nature winding up with a comedy.

BAD SNOW STORM

In common with other districts in central Alberta the Tofield district is now experiencing an early and bad snow storm. Monday was fair and practically every threshing machine in the country was going full blast in the afternoon. There commenced every promise of a good stretch of fine weather, but Tuesday morning broke dull and drizzly which later turned into a blizzard and at time of writing there is plenty of snow everywhere. If fine weather comes Thursday, it will be at least a week before threshing can be resumed. This delay is very unfortunate.

FRANK WOOD MILL MAKES RINK THIS WINTER

At a regular meeting of the Tofield town council held on Monday night Frank Wood was made lessee of the Tofield skating rink.

Frank is going to revive the popular pastime and sport of skating. An old time skater and having lived here since his childhood he knows the requirements of skaters and being equipped to render good skating should be popular this winter.

Tofield Library

Below is the beginning of our list of 650 books, part of which Mr. Wood has kindly offered to publish alphabetically each week, in order that you may know of the wonderful selection there is to choose from at your local library. The fee is only one dollar a year, which entitles you to two books a week, and more may be would be much appreciated by the ladies in charge, who are doing their best for the benefit of the Tofield district. Have you joined? The library is open every Saturday from 4 to 5:30 p. m.

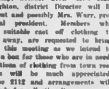
U. F. W. A. NOTES

The U.F.W.A. met at the home of Mrs. John Morton's on October 9th. The business transacted was followed by a social time. Refreshments were served by Mesdames Wm. Thompson, Baptiste, Morton and H. Beale.

The next meeting will be held on Tuesday, October 21st. Mrs. MacNaughton, district Director will be present and possibly Mrs. Warr, provincial president. Members who have suitable cast off clothing to give away, are requested to bring it to this meeting as we intend to pack a box for those who are in need. Donations of clothing from town residents will be much appreciated. Thone 2112 and arrangements will be made for collecting it.



PROVINCE OF ALBERTA
Department of Agriculture

Threshers' Return

For the purpose of statistics, only, it is necessary that the owners or operators of threshing machines furnish reports of total threshing, to the above Department, at the earliest possible date. Your co-operation will be appreciated.

H. A. CRAIG,
Deputy Minister of Agriculture

Wheat Pool Notes

Ninety new members joined the Alberta Wheat Pool during the first week of October. Contracts have been coming in so fast that a steady stream is now the rule. There is also active canvassing in being done. During the month of September 171 signed contracts were received by the Alberta Wheat Pool. Deliveries of wheat to Pool elevators reached the high water mark on Monday, October 6th, when the day's receipts totalled over 800,000 bushels. The bulk of the receipts of grain by Pool elevators has been received from Southern Alberta as threshing has been delayed in the central and northern portions of the province.

The earliest threshed grain from the southern part of Alberta showed remarkably high protein according to reports from many points. Samples received at Edmonton and Lethbridge showed a protein content of 19 per cent, while many other points supplied samples of wheat which tested from 18 to 18 per cent protein content.

The terminal elevator at Victoria is now owned by the Pacific Elevator Company has been leased by the Alberta Wheat Pool. This terminal has a capacity of one million bushels. The Alberta Wheat Pool now has control of terminal storage of over nine million bushels on the Pacific coast.

DISHWARE MAN ROBBED OF $36 AT POINT OF GUN

The third victim of a sensational series of holdups in Edgemton Sunday night was Charles F. Harris of Duxbury, who was robbed of $36 by two men.

In his story to the police, Harris declared he had been walking along in the vicinity of 103 ave. and 79 st. when a man passed him.

Turning almost as soon as he had passed, the stranger produced a revolver

"Step up to the fence and say nothing", he told Harris, indicating a fence nearby. Harris complied with the command and the robber was joined by another man

"All right Bill, you keep an eye on him and I'll go through him", the second robber said

He searched Harris, removing $36 in cash from his pockets.

"We are on foot", the man said and told Harris to move on. Harris reported the theft to the provincial police who notified the city force immediately.

CAN YOU BEAT IT?

Using horse hair hands. Mr Nettleton of Meadow Valley, captured a giant snake, writes F. I Beebe of Peers.

Running through the barn yard when his dog began barking at an object which had escaped low in the grain at a chicken. Mr. Nettleman started the bird but it could not clear the fence as it turned, and was forced to clutch the top rail of the fence. It was about to escape away Mr Nettleman reached the spot and grabbed the great bird by the feet and had bearing it off to the house where it was dispatched by a knife thrust into the throat.

It measured eight feet from tip to tip of the outspread wings and back feet high.—Edmonton Journal.

PARKED IN CAR; MEN HELD UP; ROBBERS LEFT $62, 2 MATCHES

Two men, one of them armed with a revolver held up Ernest Kubik, Ellerslie, and Alex. Herschell, Patricia ave., as they sat in a car with two young women at the entrance of Riverside park at 9:25 p. m. Sunday city police have state.

Kubik had five dollars and his watch taken while Herschel lost $73 dollars and his watch. Their companions were not disturbed.

The victims were sitting in their parked car at the entrance to the park when one of the holdup men jammed a revolver through a front door and forced Kubik to put his money and watch on the running board. Herschel was forced then to do the same thing and the robbers picked up the loot and ran away.

A report of the occurrence was made at the south side police station within a few minutes but a thorough patrol of the area by several uniformed men and detectives failed to bring in the robbers.

Police believe that the same robbers may be responsible for the theft of a car owned by F. H. McDonald, 9026 85th ave., from in front of his residence at 8:05 p. m. The machine is a chevrolet sedan with license number 31-011.

TOWN GOSSIP

In England, where many of our holidays originate, there is no part apart for Thanksgiving Day, peculiarly in connection with harvest. There is a deep sense of gratitude however, for agriculture, and other blessings. This feeling is expressed by harvest thanksgiving services at the churches and homes both old and young alike find important events.

At harvest thanksgiving services of many years ago churches were invariably decorated with the fruits of the land, cereals, roots and flowers. It was always the choicest fruit produced which was taken to the church and the decoration was not complete unless the baker member of the congregation had made his offering of a large "cottage" loaf.

* * * * * * *

The following evening the offerings were sold by auction, the money going to the church, so the offerings were distributed among the poor. Certainly it was an event to look forward to, and rarely failed to give real pleasure as well as a lesson in kindness to others.

* * * * * * *

Here in Tofield the custom is carried on by both churches, even though we have a similar holiday, the ruraugeration day. On Sunday last the Holy Trinity Anglican Church at Tofield held their annual thanksgiving service and the ladies of the congregation had tastefully decorated the church with fruit, vegetables and fruit etc.

* * * * * * *

Rev. Loversedge, who conducted both the morning and evening services, is a favorite in this locality, and not only at Tofield but at many places around the Edmonton circuit. His name holds up in news reports of many places and out in the Barrhead country he is as welcome as he is here, which is saying much.

* * * * * * *

Fifteen years ago I had the pleasure of Mr. Loversedge's company for a whole evening. Having a happy knack of making things more pleasant for those around him, Mr. Loversedge invited me to remain an evening at his home which invitation I accepted. The evening decided upon proved to be dark and stormy with now of considerable depth. However, after pleasant navigating of the road in the vicinage, I arrived there and spent a pleasant evening in the company of Mr. Loversedge and his charming wife and several happy children.

* * * * * * *

Observed on Sunday, one could see that the passing years had added many grey hairs to the reverend gentleman, but the eyes remain undimmed and his power for good in the land was more powerful than ever.

* * * * * * *

Our old friend Pete Ingram of Victoria is again in the market for Tofield poultry. Pete is a marvel of the age. That's right! While a resident of Tofield help Ernest Kuhlli, Ellerslie, and Alex. Herschell, Patricia ave., as they sat in a car with two young women at the entrance of Riverside park at 9:25 p. m. Sunday city police force state.

Kuhlli had five dollars and his watch taken while Herschel lost $73 dollars and his watch. Their companions were not disturbed.

The victims were sitting in their parked car at the entrance to the park when one of the holdup men jammed a revolver through a front door and forced Kuhlli to put his money and watch on the running board. Herschel was forced then to do the same thing and the robbers picked up the loot and ran away.

A report of the occurrence was made at the south side police station within a few minutes but a thorough patrol of the area by several uniformed men and detectives failed to bring in the robbers.

Police believe that the same robbers may be responsible for the theft of a car owned by F. H. McDonald, 9026 85th ave., from in front of his residence at 8:05 p. m. The machine is a chevrolet sedan with license number 31-011.

Dances which desire to powder their noses; young sports who like a skin with a velvet touch, those with a sweet breath and whishing for candy, those with a frog in their throat and those with a tummy ache will make a raid on the drug store this week. Two for the price of one and one cent. Pair enough.

Attitudes Of Mind

[illegible] daily newspaper that some doubt existing as to [illegible] national boundary line between Canada and Maine [illegible] was located, surveyors were employed and the [illegible] that it was on the United States side [illegible] glad [illegible] Canadian winters are so severe.

[illegible] United States to Canada on one occasion the writer [illegible] remark just after the train had entered Canada, [illegible] and purer now that we are back in Canada."

Climate to these people was an attitude of mind, but, nevertheless, very [illegible] to wonder whether many people do not ap[illegible] activities not on a basis of actualities but from [illegible].

[illegible] the general election of July 28 last a [illegible] a strong Conservative by the way, declared [illegible] greatly improved. He overlooked the fact that [illegible] then in session in the city might have added [illegible]. No, it was an attitude of mind with him,- [illegible] over night because the Conservatives had won the election.

[illegible] many in respect to hard times. Some people whose salaries or wages or other sources of income are the same now as they were in the boom years, or even greater, but whose cost of living is much less due to lower commodity prices, feel harder up than many who actually suffer. They become terribly pessimistic and continually harp on the blue [illegible] of things and how difficult they are finding it to make ends meet.

Without in the least discounting actual conditions, it is safe to say that with many people hard times is an attitude of mind, superinduced, maybe, by fear of the real thing rather than the thing itself. Unfortunately there are many who are faced with truly hard times and have concrete problems to solve and difficulties to overcome, but there is a multitude of others who are no worse off today than they ever were but who "think" they are. They are largely responsible for cultivating and disseminating ideas that conditions are much worse than is actually the case.

The influence of mind over matter is a well authenticated and recognized fact. Records in doctors' offices contain scores and hundreds of cases of people who, having nothing the matter with them, imagined there was something wrong and by constantly and morbidly dwelling on their imagined [illegible].

There is [illegible] that state of mind whereon people develop suspicions of others without any cause or evidence to support such suspicions, but, having become suspicious of another, every word and act of such person, however simple and innocent, only serves to confirm and intensify the suspicions of the former.

Such attitudes of mind are to be deplored, and their cultivation to be guarded against by every individual. The harm done through constant thinking of unpleasant and evil things, and the harboring of thoughts of suspicion of others or even of weaknesses in one's self is almost incalculable. It spreads like a miasma through society polluting the life of whole communities.

Fortunately, the reverse of this is also true. The cultivation of clean, kindly and noble thoughts, the development of feelings of confidence in and goodwill towards one's neighbors, [illegible] of the habit of looking at the bright rather than the dark side of things also spreads through society and uplifts and brightens the lives of all persons with whom such a sane and happy individual comes in contact.

Jamaica Buys From Canada

Is Grateful For Tariff Preference On Fruits and Vegetables

Canada is getting all kinds of business that formerly went to the United States, [illegible] Jamaica's gratitude to Canada for recent tariff preferences, according to L. T. Kennedy, prominent business man of Kingston, Jamaica, who was a recent visitor in Montreal.

We in Jamaica are very grateful to Canada for her preference in fruits and vegetables and [illegible] dollars worth of [illegible] which formerly went to the United States is now [illegible] to Canada. We buy a great deal of flour from you among other things, he said.

New Building For C.N. Exhibition

Another permanent building [illegible] be erected for the Canadian National Exhibition, Toronto, at a cost of $1,[illegible]. The buildings [illegible] on exhibition park [illegible] over 3[illegible] [illegible] exhibiting [illegible] cattle.

Mr. Smith said [illegible] "Mrs. [illegible] husband [illegible] but [illegible]."

"[illegible] indeed he does," [illegible] Mrs. Smith, "[illegible] blessed [illegible] buy anything."

A woman may be clever enough to do any work a man can do but the cleverest girls [illegible] her.

Unemployment Relief

Separate Unit Of Labor Department Will Deal With Details

A separate unit will be established in the Labor Department to administer the details of the $20,000,000 fund for dealing with unemployment relief. It will operate under the Minister of Labor who will have associated with him in the work the Minister of Railways and Minister of Public Works. Harry Hereford of Ottawa, will be in charge of this unit, with the title of Director of Unemployment Relief. He was formerly in the Labor Department as registrar under the Industrial Disputes Investigation Act.

Maple Sugar Industry

Production of maple syrup and maple sugar in Canada in 1930 had a value of $5,250,620. Of this amount 1,[illegible] gallons of syrup accounted for $3,908,107 and 8,206,276 pounds of sugar for $1,361,513. The average price of the syrup was $1.77 per gallon and of the sugar 17 cents a pound.

Pedigreed Poultry For Philippines

A shipment of six crates of pedigreed white leghorn hens and cockerels has recently been made from Vancouver, British Columbia, to the Philippines as foundation stock.

Freddy: "Father, what is an egotist?"

Father: "An egotist, my son, is a man who tells you those things about himself which you intended to tell him about yourself."

Wealthy For a Day

Girl Student From Copenhagen Enjoyed Herself In Berlin

Miss Maiken Borring, a student of medicine from Copenhagen, Denmark, experienced being a millionaire for a day in Berlin. She had won first prize in a contest sponsored by the Danish daily, "Politiken," which meant that she was permitted to spend one day in Berlin with all bills, no matter how high, paid by the paper.

There was one condition, however. Miss Borring was not allowed to acquire anything which might be of value to her after her role of millionairess expired.

She therefore found the task of spending money somewhat difficult. A visit to Prof. Albert Einstein, an airplane spin, a drive about town in a costly limousine, sumptuous meals at the most expensive Berlin restaurants and attendance at a theatre comprised her day's "extravagances."

Pale People Are In Peril

Some Form Of Nervous Breakdown Always Threatens Them

Pale people are almost always nervous. Paleness denotes lack of blood and too little blood usually results in jaded nerves, sleeplessness, headaches or neuralgia.

Dr. Williams Pink Pills are different from most other medicines. It is impossible to take them and not feel better. Their whole mission is to make rich, red blood. This new blood strengthens the nerves and gives vitality to the whole body. Concerning them Mrs. G. Cook, Bloor Street, Toronto, says: "Two years ago I used Dr. Williams Pink Pills for a nervous breakdown with the result that I have been well and strong ever since."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Canada Playing Valuable Part

Vancouver Expert Will Lay Rails For Bermuda's First Railway

Canada will play a valuable part in the construction of Bermuda's first railway which is hoped will be completed within a year or so. Louis McDonald, of Vancouver, expert in road beds and track laying, has gone to Bermuda aboard the C.N. steamer "Lady Somers," after engaging ten men in Montreal to follow him later to Bermuda. The Vancouver expert has been 25 years in the business of rail laying. He served under General J. W. Stewart in the 12th Railway Troops during the world war and is now working with Belfour, Beatty and Co., London, England, builders of the new railroad.

If Miller's Worm Powders needed the support of testimonials they could be got from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly and the child to whom they are administered will show improvement from the first dose.

Permits Are Cancelled

Foot and Mouth Disease Bars Imports From Britain

Owing to the existence of foot and mouth disease in England an order has issued from the Department of Agriculture at Ottawa under the Animal Contagious Diseases Act cancelling all permits for the importation of ruminants and swine from Great Britain to Canada. This action has been made necessary as foot and mouth disease has been confirmed near Leeds in England. The order reads in part: "Owing to the presence of foot and mouth disease in England all permits for the importation into Canada of cattle, sheep, goats, other ruminants, and swine from Great Britain are cancelled, with the exception of those covering shipments which are at this date actually embarked on vessels en route to Canada." The order was dated September 8, 1930.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Newest In Machines

To learn what and how much you should eat simply drop a coin in a new slot machine, which was shown at the International Hygiene exhibition at Dresden, Germany. The machine weighs you, measures your height and then delivers a card outlining your diet, showing the natures of the food and the number of calories you should consume daily.

Americans spend approximately $1,000,000 a day for ice cream.

Minard's Liniment has a hundred uses.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases, sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

An Interesting Discovery

Iron Foundry In Northern Rhodesia Thousands Of Years Old

Entirely new light will be thrown on the history of metallurgy by the discovery of an enormous iron foundry 3,000 or 4,000 years old, at [illegible]bwa, Northern Rhodesia. Three different races appear to have used this foundry. The last race was an intelligent people, who knew how to choose stones, mix them in the right proportion with bone and quartz, place them in curiously-constructed moulds, in which they would subject them to a torrid heat, pour in molten lead from the furnace and so fashion wonderful cutting and piercing implements.

Recipes For This Week

(By Betty Barclay)

GREEN TOMATO AND ONION PICKLE

- ½ pk. green tomatoes.
- 1 qt. sliced onions.
- 1 tablespoon black pepper.
- 2 tablespoons whole allspice.
- 4 tablespoons dry mustard.
- 2 tablespoons mustard seed.
- ½ cup sugar
- 4 cups vinegar

Slice the green tomatoes. Put a layer in the bottle, then a layer of sliced onions. Sprinkle with salt. Then add another layer of green tomatoes, and so on. Let stand over night. The next morning drain off the liquid, put into preserving bottle with all the other ingredients, and simmer gently 20 minutes. Fill glass jars and when cold put in cool, dry place.

PENNSYLVANIA CHILI SAUCE

- 24 medium-sized ripe tomatoes.
- [illegible]
- 3 green peppers.
- 2 red peppers.
- 1 cup sugar.
- 4 tablespoons salt.
- 3 cups cider vinegar.
- 1 tablespoon nutmeg.
- 1 tablespoon ground cinnamon.
- 1 teaspoon ground cloves.
- 1 teaspoon allspice.

Cut tomatoes in small pieces. Grind onions and peppers through food grinder. Mix all ingredients and boil [illegible] jar immediately.

[illegible] numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many [illegible]. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

[illegible]

A parachute for an aeroplane, designed by Dr. J. T. Parr, a dentist of Oakland, California, is released by pressing a control lever. This opens a trap-door in the upper wing and the parachute is shot out. The 'chute swings the 'plane and pilot slowly to earth, and has a landing speed of [illegible].

His Nightly Message

This often repeated nightly message which his chauffeur delivered to Sir J. Bickerstaffe was on the latter's [illegible]. "The fire's dying out, the water is nice and hot; the windows and doors are bolted, the mouse traps are set and there are no mice. Good-night, Sir John."

Against Grippe
Having a bottle of Minard's handy at the right time will often save a doctor's fee. For colds, sore throat, bronchitis
MINARD'S "KING OF PAIN" LINIMENT

Meet Hardships In North

Man and Wife Blazing Trail Had To Live On Moose Meat

A three-months' silence since a daring couple plunged into the trackless wilderness of Northern British Columbia bound for Alaska on foot, has been broken by word from William Albee to his parents at Glendale, California, telling of the successful adventure of the young man and his wife.

A short letter, scribbled on a sheet of ledger paper and borne in a brown, weather-beaten envelope, delivered to the home of Mr. and Mrs. E. P. Albee, recounted a [illegible] struggle against a series of hardships. The letter was mailed September 17, from Telegraph Creek, British Columbia.

Leaving Fort George, British Columbia, in the middle of June, Albee, 24 years old, and his wife, 22, cut a path toward Liard Post, far to the north.

Albee carried an 83-pound pack, his wife a 53-pound pack, and a dog was loaded with 30 pounds. They hoped to make Liard Post in four weeks. "Instead," Albee wrote, "it took nine weeks." Five weeks out of Fort George, their provisions gave out. "We lived the remainder of the journey on moose meat - three times a day," he added.

Albee said what maps they had apparently were in error for they never found any landmarks. They will spend the winter in Dawson.

The young man's parents said the couple probably will cross Alaska next summer and they might plan to continue across Bering Strait to Siberia and around the world.

A Gesture Of Friendship

McGill University To Receive Fountain From United States

A gesture indicative of the friendship of the United States toward Canada will soon be made at Montreal, when a marble fountain designed by Gertrude V. Whitney, will be presented to McGill University by an United States committee of goodwill to Canada.

Dr. John H. Finley, of the New York Times, and a member of the United States committee, will make the presentation address, and His Excellency Lord Willingdon, Governor-General, will, in turn, present the fountain to [illegible] through its chancellor, E. W. Beatty, and its principal and vice-chancellor, Sir Arthur Currie.

A London bookseller has collected more than 400 editions of "Robinson Crusoe" in all languages.

HIGHER DUTIES ON WINDOW GLASS ARE REVOKED

Ottawa, Ont.—Increased duties on window glass, approved at the last session of parliament, have been revoked. This action constitutes the first definite step of this kind by the government to protect the consumer against enhanced prices of commodities, the duties on which were increased. The action according to an official statement issued by Sir George Perley, acting prime minister, follows complaints that the price of ordinary window glass to the consumer has been doubled since the special session of parliament.

Enquiry by the government, it is stated, resulted in the conclusion that no active steps have been taken to produce glass in Canada by those having factories here.

Duties on window glass now return to what they were before the special session of parliament, namely 7½ per cent. under the British preference, 12½ per cent under the intermediate and the same under the general tariffs. The schedules approved at the last session divided the commodity into classes and fixed specific rates which were a great deal higher than those which had been effective.

Strenuous debate followed the introduction of the new glass schedules into the House of Commons. Premier Bennett read to the House a letter from the Canadian Libbey-Owens Sheet Glass Company, Ltd., in which that company undertook to take immediate steps to bring their factories into operation, if the increased duties were granted. There was to be no increased price, a number of undertakings from manufacturers declared.

Prime Minister Bennett said if the prices were increased duties would come down. The government had the power to reduce the duties whenever it felt that the undertaking had not been lived up to.

Under the tariff approved at the special session of parliament specific rates on window glass became effective. They were as follows:

Common and colorless glass: (A) In sheets not exceeding 90 square inches in area, per pound, British preferential tariff, 1¼ cents, intermediate tariff 1¾ cents, general tariff 1¾ cents. (B) In sheets exceeding 90 square inches but not exceeding 120 square inches in area, per pound, British preferential tariff 2¼ cents, intermediate tariff 3 cents, general tariff 3 cents. (C) In sheets exceeding 120 square inches in area, British preferential tariff 3¼ cents, intermediate 4½ cents, general 4½ cents.

Favors Submarine Venture

Stefansson Thinks Wilkins Expedition Will Succeed

New York.—Vilhjalmur Stefansson, Arctic explorer, arrived on the liner "Majestic" with the statement that the submarine is safer and more practical than the aeroplane as a means of reaching the North Pole.

Mr. Stefansson, who has been lecturing for three months at Cambridge University, expressed the belief that Sir George Hubert Wilkins, his first aide on the Arctic expedition of 1913-1916, will successfully negotiate his under-water venture to the polar cap.

The explorer corrected a popular belief that the Arctic seas are filled with deep-reaching icebergs and said there were none within 400 miles of the pole.

"The human race has centred its activities on the northern part of the globe," he said, "and will continue its growth and population in that area. In this development there must be [illegible] of food and supplies and if Wilkins demonstrates that a submarine may successfully negotiate the polar cap, then frozen Canada, around Hudson Bay, Russia and Siberia, become new fields for man's exploitation."

Favor Meat Inspection

Regina, Sask.—A vote in favor of the establishment of a system of meat inspection at the [illegible] by [illegible] the city council subcommittee on meat inspection, which met representatives of surrounding municipalities, and live stock and butchers associations at a meeting in the city hall council chambers.

Assassins Sentenced

Lahore, India.—Three of those accused of complicity in the assassination of the assistant superintendent of police in Lahore in 1928, were sentenced to death by a special tribunal. Seven others will be transported for life.

Work On Bay Line Satisfactory

No Foundation For Criticism Says Minister Of Railways

The Pas, Man.—Returning here from his first trip to Churchill, a journey made at this time partly because of charges that the seaport project was not proceeding as speedily as it might be, Hon. R. J. Manion, Minister of Railways and Canals, declared that criticism is unfair and unfounded, and that the undertaking is going ahead in an extremely efficient manner.

The minister said that it is the government's intention to open the route in September, 1931, for [illegible] in both export and import shipments. Unforeseen circumstances may change present plans, but it is hoped that the late government's plan to open the route in a commercial way next autumn will be carried out.

He stated he was especially pleased with the excellent roadbed to the seaboard, and he also paid tribute to George Kidd, superintendent at Churchill, and his staff for their efficient handling of the entire scheme. To his mind, an immense amount of work has been accomplished, reflecting great credit on both the department of the interior and the C.N.R.

Authorities Must Work Together

Co-Operation Is Only Way To Solve Transportation Problems

Kelowna, B.C.—S. L. Squires, of Toronto, chairman of the Canadian Good Roads Association, in addressing the annual convention of the Good Roads League of British Columbia, here, said that it was essential for federal, provincial and municipal authorities to work together to solve transportation problems. He outlined how good roads were changing the national and even political life of Canada.

"Good roads," he said, "are bringing about a better national understanding and are having a greater effect on the business life of Canada than any one realizes. Distance is now measured by time and not miles, and East and West are becoming better known to each other by means of fast autos and improved roads."

Mr. Squires strongly opposed use of commercializing roads in competition with railways, although he recognized that railways secured added business through improved highways.

Preference For Canadian Goods

Canadian Chambers Of Commerce Suggest That Farmers Diversify Operations

Toronto, Ont.—If the Canadian consumer will give preference to Canada-produced commodities, and if the farmer will diversify his operations sufficiently to produce articles for which a good Canadian market is available, then there will be a marked improvement in the ration of the grower's return.

This is the conclusion reached by the agricultural committee of the Canadian Chambers of Commerce, and placed before the convention of that body here.

Majority Of Women Voters

Women Voters Greatly Outnumber Men In England and Wales

London, England.—Woman has, indeed secured the last word. The registrar-general has announced there are now 362,000 more female voters than men in England and Wales.

The city of London proper is the only metropolitan district containing more men than women electors. In South Kensington [illegible] women outnumbered the men by more than two to one.

Curiously enough, women voters are relatively fewest in the working class areas.

Welland Canal Damaged

St. Catharines, Ont.—Downbound traffic through the Welland Ship Canal had to be diverted to the old canal which was still being used for upbound traffic, as the result of extensive damage to two valves at Lock 7, at Thorold. Excessive air pressure on the valves is blamed for the accident, which will cause considerable delay to traffic through the canal.

Returns From North

Winnipeg, Man.—R. G. O. Johnston, reputed to be Canada's farthest-north drill operator, has reached Winnipeg from working on a claim 300 miles north of Churchill, Man., on Hudson Bay. He was a member of the party [illegible] two weeks by equinoctial gales while coming down by boat from the claims.

MORE SUPPORT FOR AVIATION IN CANADA IS URGED

Toronto, Ont.—"Governments should refrain from carrying out aerial work which rightly belongs to commercial aviation, notably aerial survey," said Gen. J. J. MacBrien, president of the Aviation League of Canada, in speaking before the Canadian Chambers of Commerce here. "Experimental, development, exploration duties and advanced training provide plenty of [illegible] for the government machines," he said.

Among other suggestions made by General MacBrien for the assistance of commercial aviation were:

Progressive government policies, Dominion and provincial, needed so that commercial operators and manufacturers may plan accordingly.

Organized airways, which include [illegible] airports. The airways system of truck and branch lines should be energetically developed.

Substantial support should be given to Canadian aircraft manufacturers as it is most important the industry should be firmly established.

Small companies should be encouraged to amalgamate and branch transport lines should be entrusted to them. Commercial schools should be supported by an allowance for certificates issued.

Aeronautical education and research should be established. Any educational institution not providing facilities within its scope for its students to gain a knowledge of aviation will be considered behind the times and unprogressive.

General MacBrien outlined the present regular aeroplane routes in the Dominion, and predicted that within two years the present jump from Ottawa to Winnipeg would be bridged by air mail.

Aids To Beauty Costly

Statistics Show $[illegible] Yearly Spent In United States

Washington, D.C.—Two thousand tons of rouge, 4,000 tons of face powder, 6,000 tons of bath salts, 25,000 tons of vanishing, nourishing and other facial creams, 9,000 tons of complexion soap, 20,000 tons of skin lotion and more than 50,000 tons of cold cream assist the people of the United States in annually maintaining that schoolgirl and schoolboy complexion. These aids of beauty cost $250,000,000 a year. The "Beautician" business in the United States is worth $1,000,000,000 annually and ranks among the first ten, according to C. C. Concannon, of the Department of Commerce.

Threat Of Power Shortage

Winnipeg, Man.—Low water level in the Winnipeg River carries the threat of a power shortage for Manitoba, it was revealed recently by the Winnipeg Electric Company. Customers of Winnipeg Electric, the Suburban Rapid Transit Company and the Winnipeg, Selkirk and Lake Winnipeg Railway, were advised by the companies to discontinue the use of electric water heaters for the winter.

WILL VISIT CANADA

Dr. E. Leslie Burgin, M.P., one of Britain's outstanding authorities on international legal problems, who has been attending the international law conference in New York, and who is to visit Canada.

Lay Heavier Steel

One Hundred Men Put To Work On C.N.R. Line Between Melville and Watrous

Saskatoon, Sask.—One hundred men have started work on the Canadian National line between Melville and Watrous. A stretch of 36 miles, commencing five miles east of Melville, will be torn up and the 85-pound rails replaced by 100-pound rails. This work is part of the 140-mile program recently announced by the Canadian National Railways.

A. M. MacGillivray, district engineer, C.N.R., stated that the reason for the change was on account of heavy traffic over the line and the large type of engine now used by the company. Laying the new track will not interfere in any way with traffic, according to Mr. MacGillivray.

Air Minister Made Will Before Flight

Lord Thomson Bequeathed Everything To His Brother

London, England.—On the eve of the departure of the R-101 on the dirigible's tragic voyage toward India, Lord Thomson, Minister of Air, prepared a will bequeathing all of his possessions to his brother, Col. Roger Gordon Thomson.

The document, witnessed by two officials of the air ministry, read:

"I am setting out on a flight for India and in case anything happens to me I leave all of my property and possessions to my brother, Col. Roger Gordon Thomson."

Lord Thomson ordered that the will be locked in a safe, and that it should be destroyed should he return.

Mapping the Moon

Mt. Wilson, Cal.—Mapping the moon by a new type of astronomical survey has been begun at Mt. Wilson Observatory. An adaption of aeroplane map making photography gives views equivalent to swinging the astronomical cameras a few thousand miles out into space to get more directly above side areas of the moon's face, something impossible from earth.

Plans Canada's Finest Terminal

Sir Henry Thornton, Chairman and President of the Canadian National Railways, inspects the model of the $50,000,000 terminal which his company has started to build at Montreal. The building to which the railway president is pointing is the proposed central passenger station and office building in the heart of the theatre and business district of Canada's metropolis. The plans provide for electrification of all passenger lines entering the terminal [illegible] make adequate provision for long distance and rapid transit traffic as well as for development of freight facilities which Montreal will need during the coming years.

Japan Seeks Increased Trade With Canada

Japanese Minister Makes Plea In Address At Toronto

Toronto, Ont.—A strong plea for increased trade between Japan and Canada was made by His Excellency Hon. I. M. Tokugawa, Japanese Minister to Canada, in an address before the Canadian Chamber of Commerce here. The organization were guests of the Ontario Government at dinner.

The Japanese people realize that if Canada thinks her rising industries need protection, "it must and will be done," the minister said after outlining the growth of trade between Canada and the Orient since 1913. "They realize that every country has a right to regulate its own economic policy. They do not and cannot seek any modification of such policy of any foreign country. They merely desire to discover if there are any articles produced in Japan which have not come so far but have the possibility of finding their way into Canada in future, or those which may possibly come to Canada in larger quantities than in the past."

STUDY QUESTIONS OF INTEREST TO THE DOMINIONS

London, England.—In a room of the House of Lords, the committee headed by Lord Sankey, the Lord Chancellor, opened consideration of two constitutional questions of wide significance to the dominions.

The first is the establishment of the Empire tribunal of appeal which was mentioned in last year's report of the committee on operating of Dominion laws. The second problem is that of the nationality of British subjects domiciled in the dominions. Linked with the second is the further question of whether a married woman, upon her marriage to an alien, is to be enabled to retain her nationality.

Official communiques on the committee's program only give the trend of the discussion in barest outline, although it is officially intimated that on neither point has anything approaching a definite decision yet been reached.

Hon. Maurice Dupre, Canadian solicitor-general, who represents Canada on the Sankey committee, took the view, it is understood, that the Empire tribunal should be constituted from panels representing Britain, the Dominions, and India, as occasion arises, rather than having a permanent body. In the event of a dispute between two units of the British commonwealth, the court should be representative of each party to the dispute, with a neutral president, chosen either from Britain or from one of the other dominions in the opinion of Mr. Dupre.

In accordance with its unreserved acceptance of the optional clause of the court of international justice, the Irish Free State wishes to reserve the right to appeal to the Hague if it so desires. Britain and the Dominions, except the Irish Free State, signed the optional clause with the reservation that appeal to The Hague would not be made in case of disputes between members of the British commonwealth.

Discussions on the subject of nationality revealed a cleavage of opinion. The point at issue is one which received preliminary consideration by the heads of delegates at their meeting at Downing Street, namely, whether there shall be one common British nationality for the whole commonwealth or seven separate nationalities, those of the United Kingdom, Canada, Australia, New Zealand, South Africa, the Irish Free State and India. South Africa and the Irish are pressing for a straight [illegible] and they are said to be receiving the wholehearted support of New Zealand [illegible] are pressing for the recognition of one British nationality only for the whole commonwealth.

Hon. Maurice Dupre, it is understood, favors a compromise which would retain the wider British nationality while limiting it with the nationality of a particular dominion. To a Canadian travelling abroad it is felt the arrangement would be of special advantage. He would not only possess his Canadian citizenship but would retain the wider British nationality which would give him the protection of the British consular services. The greatest difficulty in this plan would lie, perhaps, in the choice of a convenient term. The title of "British-Canadian" has been suggested, but there has, as yet, been no formal proposal along this line. The present indications are that Australia is likely to support the Canadian position.

MILLING TESTS REVEAL WHEAT OF HIGH GRADE

Winnipeg.—Milling, baking and protein tests conducted by the cereal laboratory of the Canadian Wheat Pool indicate that the top grades of the new wheat crop are of excellent quality according to a report released recently. Analysis of more than 1,700 samples from all western crop districts are included in the tests.

The survey covers a comparative study by grades of the inspection standards, culture standards, averages of inspections at various inspection points, and average of terminal unload samples.

Of the total quantity of wheat inspected to date, 10.5 per cent graded No. 1 hard, 46.5 per cent No. 1 Northern, 25.2 per cent No. 2 Northern, 6.1 per cent No. 3 Northern, 1.3 per cent Nos. 4, 5 and 6, 0.5 per cent Nos. 4, 5 and 6 special, 8.1 per cent Durums and 0.6 per cent no grades due to excessive moisture, 3.0 per cent others. The comparable figures for last year were 3.3 per cent No. 1 hard, 30.2 per cent No. 1 Northern, 23.6 per cent No. 2 Northern, 7 per cent No. 3 Northern, 3.0 per cent Nos. 4, 5 and 6, 8.1 per cent Durums, 2.0 per cent no grade due to excessive moisture, 2.7 per cent others.

The average protein content of the wheat crop of Western Canada based on analysis made to date is slightly lower than last year the report says. The average of some 1,700 samples collected from all parts of the west is 12.9 per cent. This is approximately one-half per cent below the protein of the 1929 crop. The average percentage protein of the samples from the three provinces was Manitoba, 11.0, Saskatchewan 13.4, and Alberta, 13.2.

The weight per bushel of the crop is below normal, being under that of last year's crop. Samples from Manitoba and southern Saskatchewan are particularly low in test weight while the average at Saskatoon and Calgary show more normal weights per bushel. According to the report, all samples mill well, producing flours of good color.

Appointed To Directorate

Hon. Chas. A. Dunning Becomes Identified With Insurance Company

Waterloo, Ont.—Announcement was made here from the head offices of the Ontario Equitable Life and Accident Insurance Company, by S. C. Tweed, M.L.A., president, that Hon. Charles A. Dunning, former minister of finance, had been elected a director and vice-president of the company. Mr. Dunning will be actively associated in the work of the company.

Ottawa, Ont.—The entrance of Hon. Charles A. Dunning into the life insurance business has no bearing on whether or not he decides to return to the House of Commons. The new activities he has embarked upon would not interfere with his duties as a member of parliament. The former minister of finance made this clear, adding that he was glad to have this opportunity to become associated with life insurance business and familiarize himself with this very important phase of Canadian finance.

Schooling Still Being Opposed By Doukhobors

Few Radicals Are Making Trouble In British Columbia

Victoria, B.C.—While internal disorders have been reported in interior Doukhobor communities, the problem of the Doukhobor school attendance has been virtually solved, except for a few radicals, according to Hon. Joshua Hinchcliffe, Minister of Education.

These reports show that the community Doukhobors have adopted Canadian education so enthusiastically since the opening of the fall term that their schools are full and in some cases must be enlarged.

About 40 children of radicals altogether are absent from their classes. This is a small proportion of the school population but it is sufficient to create a problem.

It is understood the Department of Education plans action to force all these children to be educated.

Direct Parcel Service

Ottawa, Ont.—A postal treaty providing for a direct exchange of parcel post between Canada and Cuba has been signed and will come into force at an early date, it is announced by Hon. Arthur Sauve, postmaster-general. Hitherto, parcels have had to be routed through England or France.

THE TOFIELD MERCURY

W. Worton Publisher

A Weekly Newspaper Published At

Tofield, Alberta

BETTER CREAM PRICES—

IT WILL be with few regrets that most farmers of this district will bid goodbye to the Australian and New Zealand treaty whereby New Zealand butter was admitted almost duty free to the Dominion. This trade treaty ceased being effective on Monday the 12th, and from now on New Zealand butter will have a tariff of eight cents a pound levied against it. Already since it was known that the treaty agreement would not be renewed, the price paid for butterfat has raised a few cents. It is expected, however, that owing to the immense stocks of New Zealand butter in storage in Canada there will not be any rapid raise in the price of butterfat.

To a mixed farming community such as Tofield is, there will, no doubt, be much benefit come from the ending of the treaty, while the increased price to the consumer will be lightly felt.

PATIENCE REQUIRED—

PERHAPS MORE so than any other year that we remember the farmer must exercise patience. Here it is nearly a month since threshing commenced in this district and so far only about one quarter of the threshing is done. There has been time enough to complete threshing and have everything in first class shape for the winter, but just as soon as the grain dries enough for the threshers to go to work some moisture falls and work is held up for a few days. It is very annoying, but must be endured. It will be remembered that this district was compelled to endure a long period of waiting in the spring. With the seed in the ground needing rain to make it germinate, it seemed as if rain would never come. A few straggling seeds in gardens planted early came through the ground and were promptly cut down by cut worms. Other seeds just laid there for four or six weeks and then when rain did come, how those seeds did grow. Everyone had an excellent garden. It is not unlikely that following this period of unsettled weather we will have a long stretch of Indian Summer which will allow threshing to proceed uninterruptedly until finished. But in the meantime it is hard on one's nerves to have [illegible] ready to be threshed and the weather unsuitable for it.

CANADIAN NATIONAL PROGRAMME TO STIMULATE EMPLOYMENT

A new freight shed at Port William to replace the structure destroyed by fire a few weeks ago, track laying of 140 miles of new branch lines on the Pacific Provinces and the relaying of more than 100 miles of the Company's main line trackage in Western Canada, is provided for in the emergency construction projects of the Canadian National System announced at Montreal. These are the works specially undertaken after conference between Government and the railways for the purpose of stimulating employment and business activities in the Dominion.

The Canadian National already has extensive works under way in Western Canada which will be proceeded with. These include such projects as the construction of the hotels at Saskatoon and at Vancouver, B.C., and the construction of the new steamship docks at Vancouver to replace those recently destroyed by fire. The special programme, on the cost of which the Dominion Government is assuming interest charges for a limited period, is in addition to the programme which the company had already arranged to commence this fall and winter, which programme has not yet been announced but which with the special programme now brought forward, provide for construction and improvement activities in every section of the Dominion.

TRAIN TELEPHONE SERVICE SUCCESSFUL

"The train telephone service in operation on Toronto-Montreal trains of the Canadian National System, has proved eminently successful", said J. C. Burkholder, Chief Engineer, Canadian National Telegraphs, addressing the American Association of Passenger Traffic Officers convention at Atlantic City.

"Since April 28th, 1930" he stated, "the train telephone system has been operating daily on one train each way between Montreal and Toronto, namely, "The Maple Leaf", leaving Montreal at 9.30 a.m., and the "International Limited", leaving Toronto at 9.00 a.m. Since service was inaugurated, there have been no interruptions to calls or circuit time loss due to failure of any of the train telephone equipment.

The Bell Telephone Company have recently commented favourably in a printed statement of the quality of transmission furnished by this system, stating that the service was 95 per cent perfect, based on their method of computation".

"During the five months in which this system has been in commercial service," Mr. Burkholder continued, "a total of 812 calls have been handled, 768 of these originated on the trains for various cities in the United States and Canada. On one call placed, by a passenger to London England, the transmission quality of the call was reported 100 per cent perfect. There were 67 calls for passengers originating from points as far away as Chicago."

Asked to pray for warm weather so that her grandmother's rheumatism might pass away, a six year old girl knelt and said:

"Oh, Lord, please make it hot for grandma."

Brewing is an Important Industry in Alberta

ALBERTA'S BREWERY PRODUCTS ARE WINNING THEIR WAY IN THE EXPORT TRADE BY SHEER EXCELLENCE

The Brewing Industry is an important factor in the industrial life of this Province.

It is hardly necessary to emphasize the millions of dollars which have been invested throughout Alberta in this Industry.

Hundreds of Albertans enjoy steady employment throughout the year in the brewing, storing, transporting, of the products of the five great modern breweries of Alberta.

Alberta Brewery Products are served by the bottle or glass at hotels. Sold by the barrel or case from our warehouses.

Where beer by the glass is available, most men are satisfied to forego the full bottle of more potent liquor.

WHAT IS A REXALL ONE-CENT SALE

IT IS a sale where you buy an item at the regular price, then another item of the same kind for one cent. As an illustration. The standard price of Klenzo Dental Paste is 50c., you buy one tube at this price and by paying one cent more or 51 cents, you get two tubes, and save 49 cents. Every United Drug Co. article in this sale is a high quality guaranteed product, just the same as is sold every day at the regular price. No limit—buy all you want, but on Thursday, Friday and Saturday only.

ONE CENT SALE

At A. A. Beirnes', The Rexall Drug Store

Thurs., Fri., Sat., Oct. 16-17-18

Come Early While the Assortment is Good

A PROFIT-SHARING METHOD OF ADVERTISING

THIS SALE has been developed by the United Drug Co. as an advertising plan. Rather than spend large sums of money in other ways to convince you of the merit of these goods, they are spending it on this sale in permitting us to sell to you two full size packages of high quality merchandise for the price of one, plus one cent. It costs money to get new customers, but the sacrifice in profit is justified, because we know the goods will please you.

Canadian Aviation History Is Made When Bird Men Travel 20,000 Miles Over Arctic Area

When two seaplanes soared down to a safe landing on the Ottawa River recently, it marked the end of possibly the most outstanding flight in Canadian aviation history. For the past two months the 'planes had traversed the frozen wastes of the far north. In that time, they travelled 20,000 miles, mapped a small empire of virgin territory and made mineralogical and topographical surveys of many parts of Canada's hinterland.

Yet it was all in the day's work for the men who made the trip. With a mere shrug of the shoulder and the terse comment, "Why, it was nothing!" they, who had written such an important chapter in Canadian exploration and aviation history, dismissed the whole matter. Flight-Lieut. F. J. Mawdesley was in charge of the detachment and piloted one of the machines. Flight-Sergt. H. J. Winny handled the other 'plane, while the survey and photographic work was in charge of C. S. Macdonald, of the Department of the Interior, an experienced Arctic traveller. Sergt. S. C. Dunsany was the mechanic and camera operator.

The trip took the two 'planes as far west as Aklavik, on the Mackenzie River, and as far east as Repulse Bay, an inlet on the extreme northerly portion of Hudson Bay. Chesterfield Inlet and Churchill were two of the intermediate points touched which are familiar. A total of 2,800 photographs were taken, representing thousands of square miles of territory never before mapped or surveyed. In addition to this work, the caches of gasoline and oil, maintained in this mechanized age for exploration work in the north, were inspected. Suitable air routes were mapped and the river bottoms charted. This latter work was undertaken to determine, if possible, the economic possibilities of the country.

The party made numerous tests of aeronautical equipment and, among other things, discovered a device for counteracting the effects of the magnetic pole. Previously it had been reported that the proximity of the magnetic pole influenced the compass needle, making it sluggish and, in some instances, utterly destroying its usefulness. Equipped with a British periodic compass, neither 'plane experienced any difficulty in navigating within the pole region.

Mink Shipped From Yukon

[illegible] United States Points

Five hundred dark, damp, little noses pressed entreatingly against strong wire bars, and five hundred little mouths screechingly crying disgust at being caged, signified the arrival at Vancouver of the steamship "Princess Louise" from Alaska, with the largest shipment of mink to ever pass through British Columbia. Raised in captivity by George Simmons, of Carcross, Yukon Territory, the fur-bearers were en route to Gothenburg, Sweden, with a few for United States points, where they will either serve milady's wardrobe or be distributed for the nucleus of mink farms in and around those territories.

Dairy Cattle Capture Prize

Eighteen Head From C.P.R. Strathmore Farms Win Awards At Spokane

Eighteen head of dairy cattle from the Canadian Pacific Supply Farm at Strathmore, carried off sixteen firsts and ten second prizes as well as all the championship ribbons at the Washington Inter-State Livestock Exhibition at Spokane recently, according to E. Ward Jones, superintendent of the railway's department of agriculture and animal industry. Included in the awards won by the Strathmore herd were the male and female grand championships, senior and junior female championships and the junior male championship.

Although tea was grown in China as early as the sixth century, it was not heard of in Europe for another thousand years.

"Have you serious intentions to that girl you are always with?"

"Yes, to get rid of her as soon as possible."—Allt for Alla, Stockholm.

W. N. U. 1869

Automobile Export Business

New Zealand Canada's Best Overseas Market In 1929

New Zealand was Canada's best overseas market for automobiles in 1929, according to a return issued by the Dominion Bureau of Statistics. The two Antipodean dominions, New Zealand and Australia, accounted for nearly 33 per cent. of Canada's export business in this industry. To New Zealand this country exported automobiles amounting in value to $5,632,000, while Australia took cars valued in the aggregate at $5,805,772.

Second to New Zealand was the United Kingdom, which purchased $4,380,132 worth of automobiles, while British South Africa bought automobiles with a value of $2,782,189. Thus, of a total export trade of $39,834,423 the United Kingdom and the three other dominions accounted for considerably more than 50 per cent.

Of the foreign countries the Argentine republic was Canada's best customer, purchasing $3,905,000 worth of automobiles.

Automobile production in Canada during 1929 reached the figure of $177,215,590, as compared with $162,867,495 in the preceding year, and $128,700,514 in 1927.

(By Eva A. Tingey).

SCHOOLGIRL CHIC

All Tingey models are created and sketched in Paris and the patterns are made in New York.

For wear in school here is a charming style. If, however, it is not school wear which is required other materials will render the model suitable for various occasions. For instance for afternoon velveteen would be a most attractive material with white or some other contrast against the frock for collar and cuffs. For very smart wear a wee [illegible] cuffs of [illegible] can be worn.

With woolens and washing materials like challis or gingham, collar and cuffs can be of pique, linen or washing silk according to the type of the frock. If the dress is developed in crepe-de-chine or taffeta, lace for the collar and cuffs is charming and a rather wider, self sash instead of the belt to knot at the back.

This pattern may be obtained in sizes 8 to 14. It is ready for immediate delivery. It is hand cut.

Sent 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Shipment Under Empire Marketing Board Scheme

British Columbia Receives Consignment Of Pure Bred Livestock

The B.C. Provincial Department of Agriculture received word recently from Agent-General F. A. Pauline in London, England, that the first shipment of pure bred live stock to be shipped to British Columbia under the Empire Marketing Board scheme via the Panama Canal had left the Old Country for Vancouver. The shipment consisted of [illegible] and ewes for breeders on Vancouver Island and the lower mainland, and a Red Poll bull for H. E. [illegible], of Enderby, president of the Canadian Red Poll Breeders' [illegible] Government has established a [illegible] tine station for live stock at Vancouver, which was ready when the shipment arrived at the end of September.

Special interest attaches to a part of this shipment of sheep as it comprises the first group of Kerry Hill sheep ever to come to Canada. These animals have been brought out as an experiment by Chas. Ecclestone, Victoria, and come from the flocks on Lord Harlech's Brogyntyn estate at Oswestry, Shropshire, England. His brother, [illegible] Ecclestone, is shepherd there, but formerly resided in B.C., and believes that these sheep will stand the [illegible] climate well.

Extraction May Be Costly

Germans Find [illegible] Beryllium From Beryl Hardly Pays

Canadian technical experts professed themselves as being unaware of any special report for the Imperial conference on the beryl deposits near Winnipeg in Manitoba. On behalf of the mines branch of the Canadian government there had been inquiries into the possibilities of extraction of beryllium which is used in light metal alloys from the Manitoba beryl, it was stated.

Experiments by a German concern, however, had tended to show the cost of extraction of beryllium from beryl was very high in comparison with the result obtained and the Germans were now turning to lithium for light alloy, it was pointed out. The Canadian officials are watching the German experiments closely, for lithium occurs in greater frequency in Manitoba than does beryl.

Real Drive Against Weeds

The sow thistle, twitch grass and other troublesome weeds, the roots of which have been turned to the full strength of the sun, [illegible] vitality left to reestablish them another year. More early ploughing of sod and after harvest cultivation than [illegible] this year. Even without a word from the weed inspector, farmers are making a real drive against weeds.—Farmers' Advocate.

Wheat Situation Sound

Canada's wheat situation, both as to marketing and prospective price, and also as to the wheat-growing future, fundamentally is such as to discourage pessimism. That is the verdict of B. P. Alley, assistant-general manager of the Canadian the bank's?ReR Bank of Commerce, in charge of the bank's business in Western Canada.

Although the water in the Arctic and Antarctic oceans is salty, the ice that forms is free from salinity.

Appendicitis caused more than 18,000 deaths in the United States in 1929.

Sodium Sulphate Plant

Important Industry Is Established In Southern Saskatchewan

A visit to the sodium sulphate plant at Horse Shoe Lake at Ormiston, Sask., along the Amulet branch of the C.P.R., gives a fine indication of the program that is being made, and the prospects for the future success of this valuable provincial resource, according to a statement issued by the Saskatchewan [illegible] of Publications.

Horse Shoe Lake contains millions of tons of sodium sulphate, and already a considerable start has been made on its utilization, the statement [illegible].

The plant which is operated by the Horse Shoe Mining Company, Limited, is a very [illegible] and the [illegible] of several hundred thousand dollars. It is owned jointly by the Burton Reduction Company of Charleston, West Virginia, which holds a majority of the stock, and the International Nickel Company of Canada.

This company has successfully solved the problem of dehydrating the product, which seems to have been the di[illegible] in the past in the way of utilizing these deposits.

Saskatchewan possesses most of the world's supply of sodium sulphate in [illegible] condition, and there are [illegible] it is likely to find a large and [illegible] market.

In the past it has been regarded as the most valuable digestant in the manufacture of paper from pulp. Owing however, to the difficulty of [illegible] supplies in [illegible] many of the pulp plants in Eastern Canada have been using a process known as the "sulphate" process. The mills, however that manufacture kraft paper must have sodium sulphate, and in the past have been supplied by a [illegible] made from the by-product of [illegible] acid, in the chemical centres of the United States, which has been coming into Canada duty free. Sodium sulphate is also used in textile manufacture, the making of loaded [illegible] graphic supplies, dye establishments, and many other things, besides being the basis for many veterinary [illegible]. It is found in an exceptionally pure condition, and in vast tonnage in the southern portion of Saskatchewan.

This company which has a payroll of approximately $7,000 per month, and being situated in an area that has suffered severely from recent crop failures, is helping, according to the statement, to relieve the local situation. It at present preparing about 100 tons per day. Additional units are being installed to greatly increase this [illegible]. Already 150 cars of 40 tons each have been shipped to the International Nickel Company, and the output is so booked ahead that the Horse Shoe Company can take no outside orders.

Weather Posts Near Poles

An ambition to establish meteorological stations near both the north and south poles in the hope that information will be secured which will permit forecasting the seasons years in advance was revealed by Sir Hubert Wilkins, noted Arctic explorer in an address to the Canadian Geographical Society. Sir Hubert reviewed his polar exploration work during the past few years and told of plans for invading the Arctic in a submarine next summer.

Mr. Speaker: "But why did you buy a dachshund for the children?"

Mr. Linke: "So they can all pet him at once."

THREE RECORD BREAKERS

Three heifers that have made dairying history in Alberta are shown above. They are, right to left, Mona Pontiac Walker, Rose Echo Warwick and Laura Fremona, and between them they produced 77,460 pounds of milk and 2,902 pounds of butter in the year, respectively, to last June, last May and last April. This averages out to 25,820 pounds of milk which beats the highest record made by a four-year-old in Canada in 1929 by 2,000 pounds, while the average dairy cow in Alberta produces less than 4,000 pounds. They are the property of the Canadian Pacific Railway at the company's experimental farm at Strathmore. The first two are four-year-olds, and the last is a three-year-old. They were bred on an average Ontario farm, all sired by the same bull and each purchased by the Canadian Pacific when under eighteen months of age.

Production, according to E. W. Jones, superintendent of Agriculture and Animal Industry for the railway, is very largely a question of proper development and handling. These three cows produced in one year more than nineteen average Alberta dairy cows. To do it, they were well fed and given good care during the lactation period, but up until freshening were developed outside where in winter months they were given good roughage but very little grain.

Wide Discrepancy Exists In Estimates of Amount of Russian Wheat Exported To Britain

Winter Feeding Of Bees

Entire [illegible] Is Given Them At One Time

One of the strangest things to the ordinary individual is that the feeding of bees for the winter differs from that of other live stock in that the bees are given their whole winter supply of food at one time while other stock receive their rations day by day. Toward the end of September, the bees should receive sufficient food to tide them over the fall, the winter and the spring until the warm days come and they can gather nectar.

Some beekeepers feed their bees sugar syrup; others give them natural stores—honey. When natural stores are given, the food chamber method is usually employed. To get an idea of what the food chamber is, let us look at a hive and we will see that it is built up like a large building,—storey by storey. The lower or ground storey is called the brood chamber and it is here that the queen reigns. The [illegible] this are the ones in which the honey is placed by the bees.

As the first honey brought in at the beginning of the main flow is considered the best, and as the bees, which are [illegible] fined to the hive [illegible] chance of a cleansing flight for close on 22 weeks, must have the best, this honey is set aside for [illegible]. This storey or box full of honey is called the food chamber.—Experimental Farms Note.

As He Saw It

Japanese Schoolboy's Essay On Banana Was Not So Bad

Japanese descriptions are almost always good for a few laughs, says the Los Angeles Times. One of the latest is the theme of a little Japanese schoolboy in the Sacramento Valley. The subject was "The Banana," and the little fellow wrote:

"The banana are great remarkable fruit. He are constructed in the same architectural style as the honorable sausage. Difference being skin of sausage are habitually consumed while it are not advisable to eat rapping of banana.

"Banana are held aloft while consuming; sausage are usually left in reclining position. Sausages depend for creation on human being or stuffing machine while banana are pristine product of honorable mother nature.

"In case of sausage both conclusions are attached to other sausages; honorable banana on other hand are joined on one end to the stem and opposite termination are entirely loose.

"Finally banana are strictly member of vegetable kingdom while affiliation of sausage is often undecided."

Skim Milk For Hens

Tests Show It Gives Better Results Than Beef Scraps

In tests carried on for five winter seasons, November to February inclusive, Barred Rocks receiving skimmed milk laid more eggs and gained more weight than the ones getting beef scrap, reports G. A. Langelier, of Cap Rouge Experimental Station. On the basis of the experiment, beef scrap is worth nine times as much as skim-milk, weight for weight, so that at the usual valuation of skim-milk at 20 cents per 100 pounds, beef scrap would only be worth $36 per ton.

"That skim-milk may furnish all the protein required, 100 layers should get from 12 to 14 quarts per day," Mr Langelier estimates. "If this can be spared for the poultry, care should be taken that it be given always sweet or always sour, to prevent digestive troubles, and that it does not freeze."

Twenty Hours To Go

A very tired man left a call with the telephone girl at one of mid-town hotels at 4 o'clock Sunday morning to be called at 2 p.m., but instead of making it explicit, he said:

"Please call me at 2 tomorrow afternoon," forgetting of course, that it was then 4 o'clock in the morning.

He slept through fourteen hours and, dressing, went to the management to complain that the girl hadn't called him.

When the manager talked to the girl about it, she said:

"Why, he's got twenty hours to go yet!"

Soviet Russia is purchasing 100 carloads of combine harvesters.

Production of window glass has just been introduced into Mexico.

A wide discrepancy exists in estimates available in London, England, of the amount of Russian wheat exported to Great Britain this season.

In Liverpool, centre of the grain trade, it was stated that only 620,000 quarters or about 130,000 tons, all of fairly good quality, have been received at ports of the United Kingdom from Russia between Jan. 1 and Sept. 27.

Estimates of British traders and official observers in London, fixed the figure roughly at 450,000 tons for United Kingdom ports in July, August and September.

The difficulty of fixing figures of Russia's export wheat trade and of her exportable surplus is admitted because the Soviet government trading agencies are dealing independently with various grain concerns and there is no central place to obtain actual totals.

Russian officials here have no authority to disclose grain shipment figures, even if they were available. The problem of checking wheat exports is likely to be simplified soon. Arrangements are being made to keep a tally at Istanbul of all Russian grain shipments from the Black Sea, whence all substantial cargoes pass.

According to figures available in London, heavy wheat shipments from Russia began in July. During that month 28,000 tons of wheat were estimated to have arrived in British ports. Heavy consignments began to arrive early in August and during August and the first half of September grain cargoes from Russia [illegible].

It is estimated that about 13,000 tons are on the way to United Kingdom ports and an additional 36,000 tons en route to continental Europe. Besides these amounts it is believed in grain circles that nearly 100,000 tons, which already have been sold now await shipment from Russia.

It is pointed out that Russia bought $100,000,000 worth of goods from the United States last year and $30,000,000 worth from Great Britain. These bills are falling due and must be met and the great stores on the shores of the Black Sea constitute the Soviet's most easily convertible asset. This despite the fact that Russia's domestic demands for wheat may not justify selling abroad.

There is an idea in some quarters that decreases in other Russian exports, such as timber, may be forcing the Soviet Government to take a chance of selling foodstuffs which may be needed later. For example, as a part of the five-year programme of development Russia originally planned to send 750,000 standards of timber to the British market. This figure is not actually expected to pass the 600,000 mark and the Soviet planners face this deficiency in some other exportable product.

Trade officials in London are watching the wheat situation closely. One opinion expressed was that a great deal of forcing down of prices and propaganda to force prices down has been done by traders and others who are opposed to the operation of the Canadian wheat pool, the United States farm board and the proposed Argentine wheat pool.

An idea of the amount of Russian wheat shipped during pre-war years can be had from the fact that between 1909 and 1913 some world wheat shipments were: Russia, 4,734,000 tons annually, the United States, 3,350,000, and Canada, 3,000,000 tons.

Early Canadian Shipbuilders

The first shipbuilding in Canada was done by Pont-Grave, who built two vessels at Port Royal (Annapolis Royal, Nova Scotia), in 1606, when he believed himself to have been deserted by DeMonts. It was Talon, however, who gave shipbuilding the status of an industry for in 1665, before he returned to France 350 men out of a total population of less than 7,000 were engaged in constructing wooden [illegible].

The gent who tries to beat the "Limited" to the crossing is the one who puts the auto into autopsy.

"Influence my boy is what you think you have till you try to use it."

"Suppose we fall in the water now?"

"How dreadful! The lake would overflow its banks."—Hummel, Hamburg.

Immediate Relief for INDIGESTION

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, sourness, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid, never made in tablet form. Look for the name Phillips' on the bottle. All drug stores—50c.

PHILLIPS' MILK OF MAGNESIA

WORLD HAPPENINGS BRIEFLY TOLD

Alex. Chisholm, prospector and veteran of the trail of "98," is dead at Smithers, B.C., at the age of 78.

Wireless telegraph service has been established between Buenos Aires and Chilean cities and with Spain.

The $100,000,000 Canadian government bond issue floated in the New York market October 7, was heavily over-subscribed.

Assembly of the League of Nations stood in silence several moments on [illegible] the first anniversary of the death of Gustav Stresemann, German post-war foreign minister.

The eleventh assembly of the League of Nations adjourned Oct. 4, after wrestling earnestly for three and a half weeks with pressing world [illegible].

Reports published [illegible] trouble had arisen aboard the British battle cruiser "Revenge," anchored in Golfe Juan harbor, Nice, France, were denied by authoritative sources.

A number of delegates attending the Canadian Automobile Association convention at Vancouver endorsed the proposed highway through British Columbia to Alaska in addresses made at the annual banquet.

The London Times editorially said that Russian dumping of grain on European markets was "clearly due first and foremost to desperate need of the Soviet Government for credits to finance their five-year industrialization plan."

The Department of National Defence announces that Major D. R. Sargent has been promoted to the rank of lieutenant-colonel and to command the 2nd Battalion, the Scottish Regiment. The regimental headquarters are at Nanaimo, B.C.

Athletes recommend Minard's Liniment.

Had Never Seen Ocean

To have lived within 215 miles of the Atlantic Ocean for a lifetime without seeing it is an experience that comes to few in these days of automobiles. Yet fifteen of the seventeen Vermont clergymen who attended the New England rural church workers' conference near Old Orchard, Me., had never seen the sea.

Germany planted 1,000,000,000 [illegible] 1929.

Flaky Pie Crust

The secret of making good pie crust is: "Use Purity Flour—and keep the dough dry!" Try this recipe—for 2 shells.

2 cups Purity Flour · 1 cup lard
½ teaspoon salt · 1 cup cold water

METHOD: Mix the flour and salt, cutting in half the shortening until the size of lima beans, gradually adding [illegible] quantity of water but not a drop more than necessary, if you can, and the paste will be even flakier.

Turn out on board very lightly sprinkled with Purity Flour, roll about ⅛ inch thick. Spread balance of shortening over dough, fold over three times and roll again to required thickness. Bake in hot oven (450°).

Send 30c for Purity Flour Cook Book.

PURITY FLOUR

Winnipeg Newspaper Union Fashions

(By Eva A. Tingey).

7260

GRACEFUL AND LOVELY

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Here is an afternoon dress of exceptional charm and style. In spite of its seeming complications and its professional air, it is really quite a simple model to make.

The neckline is new and becoming. A straight band set in the neckline as shown knots prettily on the shoulder. To match there is a similar bow posed on the hipline. Tucked beneath the neck drape a triangular section of tissue finishes the V neck and beneath the belt a similar section repeats the line.

Crepe-de-chine, especially in red, is a lovely medium for this dress. Either bordeaux, scarlet or Chinese red can be chosen. Dark rich greens are also lovely and modish for fall wear. Plain or patterned marocain, satin, triple georgette, etc., are other suitable silks.

This pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Immigration Returns

During the first four months of the current fiscal year, 50,273 immigrants were admitted to Canada as compared with 94,214 for the similar period of 1929. Those from the British Isles numbered 19,317 and from the United States, 12,075, while 11,100 came from Northern Europe.

IS ELECTED PRESIDENT

Walter Ashfield, Editor Of the Grenfell Sun

Weekly Newspaper Publishers Meet

Fourteenth Annual Convention Of Canadian Weekly Newspaper Association, Saskatchewan Division

At their fourteenth annual convention held at the Saskatchewan Hotel, Regina, the Canadian Weekly Newspaper Association (Sask. Division) elected Walter Ashfield, Editor of the Grenfell Sun, as president for the ensuing term.

H. G. Sheldrake of North Battleford, the retiring president, was chosen as honorary president; A. King Ramsden, vice-president; E. J. Dorman, Alameda, secretary-treasurer while the following were elected to the executive: S. N. Wynn, Yorkton; E. P. Hodgins, Vanguard; J. J. Dubick, Kerrobert; J. Scott, Whitewood; H. Berryman, Blaine Lake.

Several instructive addresses were given during the sessions. Mr. T. A. McInnis, of the Bureau of Publications, gave an interesting talk, and Hon. J. F. Bryant spoke on the subject of Saskatchewan's Resources. The members of the association were the guests of the Saskatchewan Government at a banquet on Thursday evening, Oct. 2. Following the banquet an informal dance, sponsored by the Toronto Type Foundry Co., was greatly enjoyed. At noon on Friday, Oct. 3, the members were tendered a luncheon by the Saskatchewan Wheat Pool, and on Friday evening the Weekly Newspaper Association banquet was held at which the newly-elected president presided. It was decided to hold the 1931 convention at Regina.

Good Recipes

Smoothness Of Texture In Recipes That Call For Milk and Sugar

Do you ever have difficulty in getting a smoothness of texture in recipes that call for milk and sugar? Good recipes obtain wonderful flavor and consistency through the use of Eagle Brand Sweetened Condensed Milk. The milk and sugar are thoroughly combined (almost pre-cooked you might say) so that results are obtainable that could not be expected if you mixed the sugar and milk yourself. Having the milk and sugar already blended is a great advantage. Aside from saving sugar—and the trouble of mixing—there is the certainty of a finer flavor to the dish. The condensed milk combines quickly and easily with all other ingredients—binds them closer together—and gives the recipe a smoother texture. Another advantage of condensed milk is its convenience. One can keep several cans on hand as it keeps perfectly, so there is no such thing as running short, but rather a certainty of pure, fresh milk whenever it is required.

Saskatchewan Wheat Pool

Nomination papers for the annual election of Saskatchewan Wheat Pool delegates are being mailed out from the Head Office at Regina. Nominations will be accepted up to 6 p.m. on Tuesday, November 4. As soon as possible after the closing of nominations, ballots will be mailed out to all Wheat Pool contract-signers in the sub-districts where two or more candidates have been nominated. The closing date of the election has been set for Tuesday, December 2.

Marvellous Yield Of Oats

Alert to the possibilities of "Marvellous" oats, William White, farmer of the Alert district, southeast of Biggar, Sask., has reaped a marvellous yield. From an experiment plot of four and a third acres, he threshed 121 bushels to the acre. The oats weighed 42 pounds to the bushel. The land was new breaking on an old pasture field. Neighbors threshed the grain, measured the plot and verified the yield.

Canada has lost in eleven years, through insect pests, almost as much as she spent on war demobilization from 1918 to 1920.

Baby's Colds Checked without "dosing"

VICKS VAPORUB

A Huge Undertaking

Building Of Sydney Bridge In Australia Requires Much Skill

The central arch of Sydney Bridge in Australia has been closed and it is expected that 18 months will elapse before the bridge is open for traffic. Construction by the British firm of Dorman, Long & Co., it is the largest arch bridge in the world. The contract price was £4,217,721, but the total cost will probably exceed £8,000,000. There were provisions throwing on the New South Wales Government the extra cost due to rises in wages, which have been large.

In planning the bridge it had to be considered that more than half the total traffic of Sydney, the chief port in Australasia, had to pass under it. The bridge had to give headroom and clearance to big ocean liners. The central arch is a single span of 1,650 feet, and there is a clear headroom for shipping of 170 feet at low water. The top of the arch is 440 feet above the water, exactly the same height as the highest point on Hampstead Heath, and 75 feet higher than St. Paul's Cathedral. With its approaches the bridge is 3,770 feet long. The total width of the deck of the bridge is 160 feet. It carries four lines of electric railway, in addition to a 57-foot roadway and two footways. There are 37,000 tons of steel in the arch construction and 13,000 tons in the approaches or a total of 50,000.

Daily Air Service

A daily air service between Lethbridge, Calgary and Edmonton, Alberta, a distance of 320 miles, has recently been inaugurated. This new service connects with the air mail service from Calgary to Winnipeg.

Large steel manufacturers in Canada are operating nearly at capacity.

SIMEON AND ANNA — THE INSIGHT OF THE PURE IN HEART

Golden Text: "Blessed are the pure in heart, for they shall see God."—Matthew 5.8.

Lesson: Luke 2:25-39.

Devotional Reading: Psalm 84.1-7.

Explanations and Comments

Nunc Dimittis, 2:25-32. At the time of the birth of Jesus there was living in Jerusalem a righteous and devout (the Greek word means literally "God-fearing") man named Simeon, who was looking for the coming of "the consolation of Israel," for the promised Messiah. "It is striking to observe how the description of Simeon's character expresses the aim of the whole Old Testament revelation. All that was meant by the preceding long series of manifestations through all those years was accomplished in the man. For hearken how he is described—'just and devout,' that is the perfection of moral character, stated in the terms of the Old Testament; 'waiting for the Consolation of Israel,' that is the ideal attitude which the whole of the gradual manifestation of God's increasing purpose running through the ages was intended to make the attitude of every true Israelite—an expectant, eager look forwards, and, in the present, the discharge of all duties to God and man. 'And the Holy Ghost was upon him,' that, too, in a measure, was the ultimate aim of the whole revelation of Israel. So this man stands as a bright, consummate flower which had at last effloresced from the roots; and in his own person, an embodiment of the very results which God had patiently sought through millenniums of providential dealing and inspiration."—Alexander Maclaren.

The Holy Spirit had revealed to Simeon that before he died he should see the Lord's Anointed. "Some inward monition, which he recognized to be of God, sent him to the temple in the expectation that at last he was to see the Lord's Christ." When the parents brought in the child Jesus, Simeon took the Babe in his arms and blessed God and spoke the beautiful words which have received the name of "Nunc Dimittis, the first two words of the sentence in Latin.

Simeon's Words To Mary, verses 33-35. Simeon blessed Joseph and Mary (Joseph fulfilled here the part of a father), who stood there marvelling at his words, and to Mary he said, "Behold this Child is set for the falling and the rising of many in Israel"; some will reject Him and "fall," while some will accept Him and "rise" to a high spiritual life.

An Unusual Voyage

Two Germans Plan To Cross Atlantic In Rubber Ball

To bounce across the Atlantic in a rubber ball is the unique project of two Germans in New York. They have written nine rubber companies giving them the opportunity of making the ball. They calculate with the help of the ocean and wind currents to make the unusual voyage to Europe in sixty days, but to be on the safe side they intend to take provisions and water for ninety days.

Plenty Of Wheat

George Kabel, 67-year-old Illinois farmer, estimates that he has threshed enough wheat during the past 60 years to make 118,320,000 loaves of bread. His average has been 30,000 bushels a year.

WHY FAT MEN STAY FAT

"The trouble with me, and I guess this applies to 90 out of every 100 men who are putting on weight, I didn't have the energy or "pep" to keep it off. Lost all interest in any healthy activity and just loafed around accumulating the old pounds, until I got that "Kruschen feeling."

Start taking Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fill you with vigor and tireless energy.

As a result, instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoon in a glass of hot water to-morrow morning and every morning—be careful of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

Catering To Visitors

Windermere, England, Bans Sunday Civic Sports To Boost Scenery

To boost its scenery and also give city employees a holiday, Windermere, England, has decided that all municipal tennis courts, putting greens and golf courses be closed on Sunday. Those in favor of sports on Sunday afternoons said that records showed that the clergymen and residents of Windermere used to watch football being played after church on Sunday, but the city council decided that visitors should go to Windermere for scenery and solitude.

CHAPTER II.—Continued.

"Do you know," he broke in prosaically on this sober reverie, "I'm almost famished. No" (as she turned a surprised face to him), "don't say it. I know it's only eleven-thirty. I know it's not time to eat; and I don't care. Thunder! Gay, I've lived all my life by rules. I hate 'em. From now on, unless you make a nice tame house-cat of me, we'll eat when we're hungry, that is," he added, grinning, "if we can arrange to be hungry at the same time!"

"Otherwise," smiled Gay, her fears vanishing before his carefree grin, "I infer that we'll eat when you're hungry."

Nick laughed, but refused to answer this awkward question. Instead he said, stopping the car: "Here's a brook and a pine tree, so near that we can easily keep an eye upon the flivver, though no self-respecting tramp would consider stealing it. Say! you don't mind eating early, do you?"

The girl laughed at this tardy [illegible].

"What am I, to dare to when I shall eat, if my lord and master ...?"

"Gosh!" Nick interrupted fervently. He raised awed eyes to heaven. "She calls me her lord and master! But" (with a sudden dropping to earth), "you can cut out that line of talk, Gay. It's medieval. Call me 'the boss' if you must, but not your lord and master. I'm at home in jumpers, but I'd look a fool with an ostrich feather in my cap."

"I'm not so sure of that," Gay contradicted, regarding his clear-cut profile critically. "One of those three-cornered hats, you know, with a plume resting on your shoulder. . . . ."

"Glory!" gasped Nick, staring at her. "Have you lost your mind, Gay? Come on; let's eat. It's lucky you brought along that lunch."

To her surprise Gay found that she was hungry. They devoured Miss Sadie Twitchell's chicken, with all the greed of childhood days. Indeed, after feasting on the drumsticks, Nick was obliged to wash in the convenient brook.

"Clean?" he questioned, turning a dripping countenance upon her; and Gay, laughing, dried his face on a paper napkin. But when he suggested wading, and confessed a yearning to build a dam, she hesitated.

"The water's like ice, Nick; and besides ..."

She was thinking that they were still some miles from that place where one procured a license and got married, "all in an hour"; but Nick sighed resignedly and for a moment his face clouded.

"When I planned this trip, Gay," he explained, "I vowed I'd do every darn thing that came into my head, yet I begin—"

"You begin," she interrupted, a little catch in her voice, "you begin by asking a girl to marry you. I suppose that just 'came into your head,' but it changed—everything. Oh, Nick, I don't want it to change things! I want all your dreams to come true. Build that dam if you want to terribly, and—and wade. I'll wade with you. I'd really like it, Nick. I——"

In her contrition she was pulling at his shoestrings, but he caught her hands, holding them with gentle firmness.

"Why, Gay!" His voice was tender. "I believe you're almost crying. What a dear goose you are! And why should it matter if things are a little different than I planned? Don't you know that I love having you along?"

"Really, truly, Nick?"

She lifted a sweet, flushed face, and he smiled into her eyes.

"Really, truly, Gay." He bent to her, then straightened up abruptly. "And you were right to squelch my kid desire for wading. There's something better ahead of us today."

He gave her hands a reassuring squeeze, and lifting the empty basket, threw it with careful aim into the car.

"Let's be off," he said, with all the enthusiasm she could desire. "I refuse to speed. I want to enjoy everything we see. By three o'clock we should reach State Line, and then. ..."

He gave her a comical glance; a curious blending of affection and amusement, as if he were not yet quite ready to be serious about the [illegible].

This was Nick's great adventure, thought the girl tenderly—his quest for the freedom he had never known. Not by word or look must she dim his happiness. She wondered, as mile after mile slipped by and he showed no sign of the nervousness she felt herself, if he realized the enormity of the step they were about to take. Only once did he mention it, and then to quote laughingly when a tire went flat: "'Needles and pins, needles and pins, when a man marries. . . .' You see, Gay, what you've brought me to. But for you I'd be on my trusty feet." Yet he whistled cheerfully as he worked, and said, as they started on their way: "We're a half hour late at the goal, my dear, but why worry, so long as we're together?"

But it was after four o'clock when they drew up before a shabby wooden building which flaunted a sign reading: "Josiah K. Miller, Justice of the Peace."

Nick stopped the car, but for a minute he did not stir. He sat there, arms folded, looking straight ahead, till Gay said gently, "Nick, it—it's not too late now if—if you want to ..."

"Back out?" smiled Nick. He faced her, and something in his eyes made her [illegible] race. "I don't desert my bride at the altar, Gay." He grinned. "Doesn't look much like an altar, does it?"

His eyes were raised to the window below which hung the sign. Then, before she could speak, he was out of the car, giving a little brush to his clothes as if in a desire to appear well on this occasion.

"I'll just run up and see if this is right, though I believe the town clerk usually perches near a Justice in these Gretna Greens. I never got a marriage license before, Gay, and it may take time. If I'm longer than you expect, don't worry. I shan't go back on you! My dear girl, you look solemn as a funeral. Cheer up — the worst is yet to come!"

He turned away, then hesitating at the dingy doorway, came back to say: "Of course you know, Gay, that I was only trying to brace you up." There isn't going to be any 'worst' about it, either for you or me."

It seemed to Gay, waiting nervously outside, that he was a long time gone, yet when she saw him coming, she felt, with womanly inconsistency, a sense of panic. The street was almost deserted of passers-by, but he came near and spoke softly.

"I've got the license, and the Justice is waiting for us. I——"

"Nick," broke in the girl suddenly, "couldn't we go to—to a minister?"

He laid a comforting hand on hers.

"I'm afraid not, dear. There's been a lot of publicity lately about under-age couples getting married here. You look about fifteen, Gay, and I'm no Methuselah! The parsons have been forced to shut down on these hasty weddings—that is, they won't do it without some sort of investigation. And we haven't time for that, though I hate like thunder to ask you to come up here."

"Is—is it an awful place?"

[illegible]

"I haven't seen it. The town clerk offered to act as witness and tell the Justice we were here. Come, dear. We mustn't keep him waiting."

Gay stepped onto the sidewalk, glancing down with apprehension at her dusty shoes.

"Do I look a sight?"

"You look all right to me, Gay, and that's all that matters." [illegible] with a sudden understanding of her mood, he added: "You look great! I bet that town clerk will expire of envy!"

So it was with a laugh that they started up those dingy stairs that were to [illegible] they [illegible] where. The echo of that laughter was on their lips when Nick opened the door [illegible] the [illegible] of [illegible] K. Miller; but it died at their first glimpse of the room beyond. It was, thought Gay, with a sense of suffocation, so much worse than she'd expected! The dust of the stairs and hallways seemed to penetrate the very atmosphere. Josiah K. Miller, his beard stained profusely by tobacco, slouched in a chair [illegible] roll-top desk. The town clerk, a dapper little man wearing a red necktie, stood by the window, whistling, with strange cheer, the Miserere from Il Trovatore. Before a typewriter sat a slovenly, gum-chewing girl, who yawned widely at Gay's approach, and removing the gum stuck it on a corner of the table; while the town clerk, with a smirk that struck terror to Gay's heart, remarked jocosely: "Ah, here's the bride!"

He hummed lightly a bar or two from Lohengrin.

Gay's hand went to her throat, as if to stifle the revolt that choked her. She couldn't be married here. She threw an appealing glance at Nick, but he was speaking to that dreadful man behind the desk. Loathing the whole scene she lowered her eyes, only to behold a tin spittoon as evidently in need of attention as was Josiah K. Miller's beard. It was too horrible!

Then something steadied her. She glanced up to meet the benign gaze of Abraham Lincoln, looking down from a steel engraving above a dirty marble mantel. She thought (and laughed at herself later), "If Lincoln can stand it, I guess I can!" Then she felt Nick's hand upon her arm, and the Justice, slouching to his feet, began to speak.

(To Be Continued)

Denmark In the Lead

While the so-called world powers are trying to make up their minds what to do about naval reduction Denmark has decided to scrap one of her two remaining cruisers and sell the other probably to China. This would come under the heading of practicing what the other fellow preaches.

All true cacti are natives of America.

Do Not Hesitate to Try It

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the sample Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—*Mrs. G. W. Poliff, 263 Huron St., Stratford, Ontario.*

WHEN CHILDREN FRET

THERE are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness, Castoria has a good taste; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

CASTORIA

Health Service By Air

Interest Taken In Possibilities Of Development For Peace River District

Possibilities of developing a regular aerial health service for the Peace River country similar to that in use in rural parts of Australia, were viewed with interest by Dr. W. W. Chipman, professor emeritus of obstetrics and gynaecology at McGill University, who returned from the north recently.

Interviewed, he said: "The medical people, I believe, are keeping pace with the demand as far as is practicable. I would like to see more nurses in the country. Motor transportation and the aeroplane have revolutionized medical conditions and sick people now can be brought to the hospitals. There are excellent hospitals in the country.

Asked if he thought an aeroplane service carrying doctors and nurses to outlying points such as is in operation in Australia, would be practicable in the Peace River country, Dr. Chipman said he thought it had interesting possibilities and might be employed to advantage.

"I was not in any settlers' homes, but the people looked healthy and vigorous and were extremely optimistic even with the price of wheat lower than it has been for 16 years and hitting them extremely hard. I was impressed by that."

When Men Were Men

Feat Performed In Pioneer Days Hardly Possible Now

Papers recently carried the story of an athlete who collapsed after carrying a 100-pound weight a few miles, says the Waseca Herald. This brings to mind a story current in Le Seur County, Dakota, in pioneer days. In the early '60s a big Irishman named Patrick Sheehan, who settled in Montgomery, accompanied a neighbor to Hastings to get flour for his family. The trip was made with the old-fashioned ox team. At Hastings one of the oxen got sick. Sheehan knew his wife and babies were out of food, so he threw a 100-pound sack of flour on his shoulder, took a package under his arm and struck out for home, making the trip of more than 60 miles in a little over 24 hours. This feat never got front page headlines in the newspapers, but we doubt if any modern athlete would attempt to equal it today.

The Oil Of Power.—It is not claimed for Dr. Thomas' Eclectric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Research Is Essential

In the modern world a nation cannot expect to hold its own, unless it encourages in the fullest way fundamental, unoriented research into the arcana of Nature, and unless it is alert to take immediate advantage of every practical outcrop of such research.

It took news of the Crimean War a week to get to London, England, by messenger, as modern methods of transmitting news were not known then.

Minard's Liniment aids tired feet.

No Unemployed In Iceland

Hon. W. J. Major Found People Busy and Prosperous

Economic depression may be world-wide at the present time, but it has not reached Iceland, where unemployment is practically unknown, and business flies on wings of activity, Hon. W. J. Major, K.C., attorney-general, told the Winnipeg Rotarians at a recent luncheon in the Fort Garry Hotel. Mr. Major described his visit to the island democracy of the north last summer when he represented the Manitoba government at the millenial celebration of Parliamentary government.

Reykjavik, capital city of Iceland, Mr. Major said, was much like a Canadian city of similar size, with excellent schools, business houses and public buildings. In the realm of literature, both in poetry and prose, he said that Iceland had achievements of which she could be proud. Her influence for good had spread far across the earth.

Out of a population of 105,000 at the present time, not a single mentally sound adult was unable to read or write, and there were only four or five cases of unemployment at the time he visited the country.

The Major painted a pleasing word picture of Iceland, with its pleasant green fields and majestic mountains, describing how its people had wrung every possible advantage from its resources. He paid special tribute to the sterling qualities of its population.

KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed. They gently regulate the stomach and bowels and thus drive out constipation and indigestion, break up colds and simple fevers and allay teething pains. Concerning them Mrs. W. E. Forsyth, Dover, N.B., writes:—"I would not be without Baby's Own Tablets as I know of nothing to equal them for fretful, fussy babies who are troubled with colds or sour stomach."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An Interesting Discovery

First Illustrated Book Printed In England Was Found Recently

One of the heads of a firm of English booksellers has recently discovered the first illustrated book ever printed in England. It is the Machlinia Book of Hours, and is stated to be worth $100,000.

William De Machlinia was London's first printer to use wood blocks for illustrations, and this volume was issued from his second printing press near Fleet bridge in the middle of the 15th century.

Although fragments of the Book of Hours have been found from time to time in the bindings of old books, no one ever suspected it was illustrated. The volume consists of a hundred vellum pages and has eight illustrations, portraying the meeting of the Virgin and Elizabeth, the holy family at Bethlehem, the presentation at the temple, the worship of the magi; the massacre of the innocents, the shepherds, the judgment and the crucifixion.

The find is particularly interesting, because these first line drawings may be said to be the foundation from which all picture reproductions have their origin. It is thought that the book may go to America.

Douglas' Egyptian Liniment is recommended for sore necks, galls, distemper callouses and spavins. Removes proud flesh and Hoof Rot. Stops bleeding instantly.

[illegible]

It is an interesting historical fact that although the Duchess of York is a daughter of a Scottish peer, she has a considerable amount of English blood in her veins, as her surname [illegible] indicates, and, curiously enough, she is herself descended from the first Duke of York there ever was—Edmund of Langley, a son of King Edward III.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wear and washing.

Diamond Dyes never give things that re-dyed look. They are just 15c at all drug stores. When perfect dyeing costs no more—is so easy—why experiment with makeshifts?

Little Helps For This Week

"God is our God for ever and ever. He will be our Guide even unto death." Psalm xlviii. 14.

Thy way, not mine, O Lord,
However dark it be,
Lead me by Thine own hand,
Choose out the path for me.
Not mine, not mine the choice
In things, or great, or small;
Be thou my guide, my strength
My wisdom, and my all.
—Horatius Bonar.

We want a guide who knows us, whether we be self-willed and overconfident or despondent and oversensitive or worldly and aspiring. We want a guide who knows our frame and pities us, is not vexed with our ignorance or mistakes, but is tender towards us and patient. We want a guide who values character, and knows how to train while He guides; who guides for the purpose of training, sometimes into very hard paths, but profitable for the soul.

—Theodore Dwight Woolsey.

Radium Ore Discovery

Deposits In Ontario May Yield Sufficient To Supply the British Empire

Belief that there are deposits of radium ore near Wilberforce, in Haliburton County, Ont., capable of supplying the needs of Canada, and possibly of the whole Empire, is expressed by Dr. G. E. Richards, head of the enlarged X-ray department of Toronto General Hospital. Dr. Richards is director of a company interested in the project.

He asserted that investigations over a period of three or four years had uncovered an apparently extensive deposit which averaged 186 milligrammes of radium per ton of ore treated, a higher average than in the radium-bearing ore of the Belgian Congo, at present the world's chief source of supply.

Persian Balm—the delight of dainty femininity. Imparts a fragrant charm to the complexion. Tones up the skin and makes it velvety soft in texture. Cooling, refreshing. It is delightful to use. Never leaves a vestige of stickiness. Invaluable for hands, face and as a hair fixative. Wonderfully soothing and protective. Especially [illegible] in cases of roughness or chafing caused by weather [illegible].

Remarkable Crops

Good Yields Of Grain Reported In Lloydminster Area

Some remarkable crops have been gathered in the Lloydminster area this year, running from 40 to 50 bushels to the acre in the case of wheat, and from 90 to 100 bushels in the case of oats. There has also been quite an active sale of farming machinery this year, one machinery agent stating that he had sold more threshing outfits this fall than during the past three seasons.

"Was Harold's wedding a 'swell' affair?"

"Positively! They even used puffed rice!"

Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Lauzier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

BUFFALO HEAD FOR LONDON Board during their recent conven- CLUB tion in Winnipeg, and was received on behalf of the Association by Dr Ernesto in London where it will Harvey Smith, of Winnipeg, Presi- adorn the walls of the Brita Medi- dent of the British Medical cal Association in Victoria Square, Taken from the Buffalo herd in Walsworthy Park, the head is now a mounted Buffalo head, a gift of of the finest specimens according to the people of Canada, left Winnipeg a head taxidermist who packed the by Canadian National Express. to head for shipment. Its movement to England is in charge of the Canadian National Express, and it will add to Medical Association by Premier from Montreal early in October.

$1 000 L WARING FURMENDOUS EFFORT TO MARKET HIGH PRODUCE

With two of the five pounds set apart for their great agricultural adjustment already passed, the Hoover farmer movement is planning a tremendous effort to lay their produce before the purchasing powers of the world during the next twelve months, according to Mary T. Gannon, World Traveller and Foreign Correspondent of the Christian Science Monitor, who passed through Winnipeg recently enroute to Japan on the Canadian National Railways express at Vancouver where he will spend the winter.

Mr. Greene, who has just returned to America after an extensive visit to the Soviet Republic, expressed his opinion that "although Russia is exporting a tremendous volume of wheat, she is practically starving her rural population to do so. The line between actual necessity and starvation is so finely drawn", said Mr. Greene, "that it is just a question whether Russia can continue on the outcrop of her present population, sell her wheat, and with the money gained, mechanize her agricultural industry to that next year a still larger amount of wheat can be sold; or whether the rural districts will reach under strain of long hours and hard labour coupled with insufficient food and make it necessary for the Soviet Government to turn back to some of the now scattered for the time, to the farmers for home consumption."

In speaking of Russia as a whole, Mr. Greene went on to say that conditions hardly were any of starving, better than the popular conception of them. "The standardization of wages seems to be working out very well, and with the reconstruction halls, theatres, and many amusements and holidays provided for the workers of Russia, at the government's expense, they are if anything, happier than in the days of the old regime. At any rate, they are no worse," said Mr. Greene.

Mr. Greene left Winnipeg on the "Continental Limited" for the Pacific Coast where he will stay for a few months. From there he goes on to Honolulu, and from there he has tentative plans to visit China, where he will study conditions in the province through which the automobile and improved troops have been fighting for not number of years.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

HYGIENE O FTHE NOSE

The nose has more than one important function. By warming or cooling the air we breathe, it adjusts it to the temperature of the body. At the same time, it moistens and filters the air. The nose is the organ into which drains the sinuses or bony cavities which lie adjacent to the nose. A large part of our sense of taste really is the sense of smell as perceived through the nose.

A healthy nose filters, warms and moistens the air before it reaches the lungs. If we breathe through our mouths, this control of the air is lost, and the air arrives inside of the body without the preparation it should have had, and which it would have had if it been breathed through a healthy nose.

The healthy nose does not need to be washed out. Indeed, there is some danger in the use of washes. The way to clean the nose is to blow it gently, first out of a tissue. If the nose is healthy, the the use of sprays or drops is recommended by the physician to relieve the condition and make the nose to a healthy state which it or I can able to do by itself, cleanse itself without interference.

The two symptoms which most commonly occur and which indicate that there is something wrong with the nose are obstruction to breathing and excessive secretion from the nose.

When a child cannot breathe freely through the nose, he becomes a mouth breather. This usually means that there is some obstruction in the nasal passages. Every child is born with some adenoid tissue at the upper and back part of the nose. If the adenoid tissue grows beyond a certain size, it obstructs and should be removed. In addition to obstructing breathing, it will very likely result in partial loss of hearing if not removed.

When we catch cold, the secretions of the nose are altered in a way with which we are all familiar. The cold germs increase, it makes the nose irritable and interferes with our work. It is very serious when the germs responsible for a cold spread to sinuses or parts. If they spread into the sinuses connected with the nose, a yellowish secretion from the nose, after having come from the head, is a sign that one or other of the sinuses is affected.

Infected sinuses are serious even though they are draining freely and not causing any pain. Any collection of pus in the body is a focus which may undermine the general health and be responsible for disease in other parts of the body. Such a focus of infection should be treated promptly.

Obstructed breathing should be corrected, because it is necessary for the promotion of health to breathe freely through the nose. Children who are mouth-breathers should be examined for adenoids, and these should be removed if they are found to be obstructive.

Local and Personal

Mr. A. Young was home for a few days this week.

Mr. R. W. Pissott continues poorly. We understand that he will come to Edmonton hospital this week. We trust he will soon be back among us feeling much better.

Paul Thompson of the Bank of Montreal staff visited his parents in Edmonton over the week end.

News is scarce this week. Most everybody was busy keeping warm last week.

SURPRISE PARTY

A surprise party was sprung on W. and R. Young on Tuesday night, the event being held at the latter's ranch. Both boys are having for the occasion on Wednesday, where it is expected they will operate a job printing establishment. The final arrangements of the deal have not been settled, and until they are there is little probability that they will return. Anyway they are a surprise party in the good, at which all had a good time and the two boys were the recipients of many good wishes for their future success and prosperity.

The party was organized by the Tofield Hockey Club and Horace McHaffey on behalf of the club presented each boy with a Gladstone bag. Beirnes, Mrs. Clutterham and Mrs. Hetsler were pressed with the party arrangements.

BURGLARIZING AT TOFIELD

On Monday night or early Tuesday morning Darkfield's Meat Market was entered by burglars. A few stamps were taken, there being no cash on hand at the time. It appears that entrance was made through the door.

The same night the Crown Lumber building was entered and after rummaging about for some time there were able to get was a few postage stamps.

Entrance in the case was made through the window.

Lindrook

Until on lake on last Monday, the roads most here (Tofield—Edmonton) presented a scene of hustle and animation. The road gangs were busy altering the contours of the hard-scraps and had started the diversion back of the store here to link up with the old road at the north end and on the other end by Mr. Scott's place. For, all at Lindrook, the storm king having presented his credentials, the gangs have dispersed.

Mrs. A. Swain came here on a visit from the coast to her daughters, Mesdames Hetsler and Whitley of this district, but is away now on a visit to Edmonton.

Mr. Chas. J. Kortzman, section foreman here, had to have off work for a few days on account of illness which has been troubling him for some time until at last he had to give up. He went to his home in Edmonton where he will take medical treatment and get a change of temperature. We hope soon to see him back on the job as well as ever.

The sympathies of the neighborhood are extended to Messrs. Joe and Prosper Lepine of this district on the death of their brother, Mr. A. Gabriaux of Camrose who died there last week. Mr. Peter McCarthy of Camrose's pioneers and was well known and respected by all who knew her. Mrs. McCarthy leaves the Lepine family down in Camrose from here by the car and had to bush the winter's first storm all the way. The funeral was held at Camrose.

We will not talk of the weather. We've too much to think about, let a lone talk of; suffice to say that with less than five per cent threshed it is a devil of a job to get the crops, and get to a well known paper, just what the country DOESN'T need.

TOFIELD YOUNG PEOPLE TO HOLD THREE ACT PLAY

At the regular weekly meeting of the Young People's Society, it was decided to practise another three act play and to present it some time before Christmas. A number of plays were considered but at time of writ- ing no definite one had been chosen.

Miss Bell, Bert Swift, and Jack Cookson were appointed a committee to select the cast. Mr. Reeve was present and consented to direct the play.

Examiner Market Review

BEEF—During the first part of the week trading was fairly active at Edmonton, but heavier offerings as the week progressed, caused a somewhat bearish attitude to develop. Prices show little change. Choice heavy steers made $6.25@6.50; choice light $6.00@6.25; good $5@5.25; medium $4@5@4.75; common at $3.50@4.00; choice heifers made $5.25@5.50; good $5 @ $5.25; Choice cows sold at $4.50@4.75; good $4.25, medium $3.50@3.75; common $2.50@3.25; canners and cutters $1 @2.25. Choice bulls $5.75 @ $6; good bulls $4@5.50; canners from $1 up. Choice light calves $7.50@8.50, medium $6@7.50; heavy calves $5@6.

STOCKERS — Demand has been moderate and little difficulty experienced in turning over all offerings. For feeder steers sold at $6@6.50, stock steers $5.50@6.25, stock cows $3.50@4.50; stock cows $2.50@3.50.

HOGS

Edmonton reports 25c decline; hence $10.35, others $9.75; sows $6@6.50 fed and watered basis.

SHEEP

Edmonton prices practically unchanged. Yearlings $7.50@8.00; ewes $2.50@4.50; lambs $8@9.

GRAIN

Despite weak cables from Liverpool the market at Winnipeg made gains on Wednesday Reports of heavy snow in Alberta and Saskatchewan greatly h dped while pressure from noticeable export trade also helped. A few houses with foreign accounts were buyers.

CREAM — BUTTER — MILK CREAM.—Production holding up well with cooler weather. Most of the fall clean-up is over. Most creameries report that their receipts are heavier than during corresponding period in 1929. Prices steady. Special, 37@39c; first 35@36c; seconds, 32@33c.

CREAMERY BUTTER— Make showing slight reduction. Sales in prairie provinces good; few shipments being made to coast, where market reports show little change. Alberta prices holding steady levels: No. 1 pasteurized, 35; No. 1 prints, 34; No. 2, 33c. DAIRY BUTTER— Offerings easier during past week, but still heavy enough to keep stocks on hand. Demand good for dairy table at 30c, while No. 2 commands 29 @ 29c, No. 3, the but three grades are very slow in turning over. MILK — Receipts are steady and practically no surplus noticeable. Price on fat basis remains at 22 per 100 lbs. basis 3.6.

POULTRY — EGGS

POULTRY—Shipments from the country showing considerable increase now, and a few jobbers are being forced to store their supplies. Undertone of market not very strong, though only fair. Change in grading and prices effected during week. Prevailing quotations for this week are: Chickens No.1 over 5 lbs., 18c; No. 1, 4 to 5 lbs., 18c; under 4 lbs., 16c; No. 2, Fowl, No. 1, over 5 lbs., 14c; 4 to 5 lbs., 16c, under 4 lbs., 12c; Roosters, 9c.

EGGS—Further advance made in prices on Monday last. Some houses reported prices 8c above the Monday quotation but others the Tuesday's quotation. Demand and storage stocks moving into consumption reported that U. S. pullet offerings may shortly appear on Alberta market, as they are still at very favourable prices. Alberta quotations: Extras, 28@30c; firsts, 26@ 28c; seconds, 22@24c. Local dairy 24c.

HAY — OATS — GREENFEED

HAY—Offerings continue light due to weather conditions and harvesting not being completed. Demand fairly good for timothy. Improved trade expected with end of crop movement. Quotations on market weak, although prices unchanged, with upland at $11.50@$12. and Timothy $16 per ton at country points. Quotations on basis of cars, delivered at Edmonton or Calgary.

GREENFEED—A little more activity in this market during past week, with a small volume of orders. Quotations unchanged at $1@$1.01 per ton.

HIDES — WOOL

This market shows no change from previous week. Receipts from country points very light. Quality of shipments good. Prices unchanged. WOOL—Practically nothing being handled by jobbers. Reports indicate that only a few small lots being held in country points. Prices unchanged at 7@8c per pound.

Mrs. Swain and Mrs. Hetsler and Hoyt drove last Chico shoots first, Chico and Lorita ride off to a new start in Ida.

Hoyt embossing. Lorita embarrasses and warns him to flee

(Continued Next Week)

SYNOPSIS OF "THE ARIZONA KID".

The Arizona Kid in 1880 is a notorious outlaw. The commander of an army post receives a request for a picture of the outlaw from Sheriff Andrews of Kortsville. He sends a picture and a copy of the reward by stage.

The stage is held up. The highwayman is shot by a passenger, known as Chico Cabello, really the Kid.

Among the passengers are the Hobson Hosker and his manager. A bride is arranged with the local Mexican girl. Hosker wins control Rankhorte Pete. By a trick Chico escapes.

More desperate comes when Virginia and Nat Hoyt, posing as her brother, Lt. really her lover, arrive at Chico. Here three persons Hosker, the influence Lorita, a dance hall girl. She also moves in. Chico soon and departs after making love to Virginia in Lorita's presence. Chico returns laden with nuggets, Hoyt gambles. Chico discovers his great shooting, and lets him know of his discovery. Hoyt trails him to a rich mine.

After three leaves Hoyt kills one of two Mexicans working for Chico. The other badly wounded, reaches the saloon and gasps out his story. The Sheriff gathers a posse. Hoyt discovers Chico's identity and with Virginia, plans to capture him.

The posse and Chico reach the mine. Chico finds proof of the killer's identity, hiding it. The sheriff suspects that Chico is the Kid but determines to wait for the picture especially children. Only does not Meanwhile Lorita bears that the mourn the loss of a young dog for afternoon mail is due. She rides out very long, but a child—drivers, think it over and some down main street

TOWN GOSSIP

Walter Bellamy emerges as the hero of the week. On Monday night Mrs. Bellamy entertained the bach entrance [illegible] to-up store and Walter who arranges counters there was awakened by their footsteps on the platform. Walter tried to be quiet but forgot, unfortunately, the powder de- parted post haste.

* * * * * * *

Now, gentlemen prowlers have a heart! Last year knowing of the hard times of the workers, the editor purchased from Frank Rogers two perfectly good suits of worn on Saturday. They answered the purpose for a very short time, but even country editors underwear needs washing and the good spouse having done this, they were hung out to dry. The line is high, ten feet from the ground but in the morning, while other things were left the underwear was gone

* * * * * * *

You would have thought the would have taken a lesson but it did not. The pilferer having taken a liking to the brand came back for more and when the second suit went the low fee in his pocketbook driving the thief or thieves stole that also.

* * * * * * *

Now gentlemen, the editor is no chicken and cannot grow feathers, so have a heart. He only has, well not many suits and should you take them this year, what with the early cold weather, subscriptions slow coming in, advertising not what it once was, he knows always knows what will become of him.

* * * * * * *

This petty burglary and stealing from one night after year, should certainly in the fall. The gentleman or gentlemen are hard to catch but you know there is always a some one who. Some day or night old boy, some day or night.

* * * * * * *

It is a long time since skating was indulged in so early in the fall. On Sunday quite a large number were out but the earlier ones were over several days sooner The latter was understand has quite an area if not actually frozen over. There has not as been rain on the ice, but this is no wonder for ice sticks.

* * * * * * *

With Frank Wood as boss of the rink this year everyone is asking him when the rink will be opened. A little early yet of course, but some skating enough to last short.

* * * * * * *

And say, Mr. Editor, do the monkey said when it caught its tail in the door—it won't be long now

* * * * * * *

Oh yes, perhaps the would be a good place to say that the local branch of the Canadian Legion will have some poppies for sale in celebration of Armistice day.

* * * * * * *

These poppies are made by disabled soldiers to augment their incomes and we feel that no one should refuse to buy one, the opportunity coming as it does only once a year and the amount asked for them being very small.

* * * * * * *

We are living in dull business times undoubtedly It is very discouraging it's no use reviewed grain yet there is reason to be thankful that in the daily papers published today there is no lengthy lists of casualties to read. Buy a poppy.

* * * * * * *

Chez Wing came to and buy the other day. A car ran over his young dog. The accident was probably unavoidable and there is nothing to say regarding the speed of the car. But we are prompted to say something regarding the speed of cars on main streets.

* * * * * * *

All summer long, until the snow came occasionally cars would travel main street at a rate much faster than was safe for pedestrians especially children. Only does not mourn the loss of a young dog for very long, but a child—drivers, think it over and some down main street some speedily.

Seek Lower Rate On Cattle Shipments

Negotiation For Decrease In Transportation Charges On Exports To Britain

Hon. Robert Weir, Minister of Agriculture, is in negotiation with the Atlantic shipping companies and the railways in an effort to obtain a decrease in the transportation charges on cattle exported to Great Britain, which will open up this market to large scale shipments from western Canada.

The negotiations have not proceeded far enough to warrant any forecast of results. Mr. Weir, however, has got to the point where he is advocating an entirely new policy endeavoring to change the whole basis upon which rates have been imposed in the past.

In regard to the ocean rate, Mr. Weir is endeavoring to have the whole rate basis changed. He wants shipping companies to quote rates by the ton instead of by the head. Such an arrangement would give shippers advantages in shipping stock of various weights. A definite decision in this regard will be reached before long.

When Languid And Anaemic

When a girl is languid, dull and irritable, when her color fades you may be sure her blood is impoverished. When a girl's blood is poor her nerves are starved and there is serious danger of a decline. Rebuild the blood, strengthen the nerves and good health will follow.

Dr. Williams' Pink Pills are of untold value as a blood-builder. Concerning them Mrs. John Flute, Howlan Station, P.E.I., says: "My daughter was badly run down, pale, nervous and under weight. We decided to give her Dr. Williams' Pink Pills. After a few boxes she gained in weight, her appetite improved and color came to her cheeks. In fact she fully regained her former good health."

You can get these Pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For Underwater Safety

Invention Ensures Escape From Submarines At Great Depth

R. H. Davis has perfected an invention which will enable escape from submarines far under the sea. The invention consists of a breathing bag, which is supplied oxygen by a small cylinder of oxygen fixed below it. Poisonous carbonic acid gas of the exhaled breath is absorbed by a cartridge of soda lime. A special suit containing the breathing apparatus is donned in case of accident under the water. It has been tested at a great depth.

Health cannot be looked for in the child that is subject to worms because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed and satisfactory growth is assured.

New Aircraft Engine

A revolutionary type of aircraft has been developed in South Africa. The weight of the engine per horse power is said to be from a quarter to a third less than that of other engines. It is said to have no rods, crank-shaft, shaft reduction gear or timing gear, and that there are only one-sixth the usual number of parts.

Minard's Liniment aids tired feet.

A Garden Of Sorts

He had been to the manager's office to ask him for the day off so that he could dig up his garden.

"But, my good man," said the manager, "Jones told me only the other day that you hadn't got a garden."

"Well, someone must have taken it off the window-sill," was the calm reply.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Wanted To Be Polite

A few days ago, a gentleman called what he supposed to be the telephone number of a friend downtown, and asked to speak with him. "I'm sorry," a young lady's voice informed him, "we have no one of that name here. This," she continued, "is the office of Davis, Polk, Wardwell, Gardiner & Reed." This, it happens, is the name of a prominent law firm. The gentleman may or may not have realized this, but at any rate he was stunned by the lengthiness of the title. He made the first remark he could think of. "I — I hope they're all well," he ventured, and hung up.

Keep Highway Open In Winter

No. 1 Highway Between Winnipeg and Brandon May Be Open For Winter Travel

No. 1 highway between Winnipeg and Brandon may be kept open all winter for auto traffic it is stated. To combat the heavy snowfalls that faced the highway early in 1929-30 winter months, the department will probably use two large snow plows of new design, with one of the units stationed at the western end of the highway here and the other working west from Winnipeg. Should the task of keeping the highways not be overly heavy there is every probability of the Minnedosa-Brandon-Boissevain route being kept open too.

For some years now there has been an effort to secure snow-fighting units that would work effectively on the highways. The Retail Merchants Association and the Board of Trade co-operated for two winters in a work that kept roads into Brandon from neighboring districts open. Since that time the department has been approached to establish a more permanent force for winter road maintenance and plans are now shaping in that direction. In view of the importance and the amount of traffic over the Winnipeg-Brandon highway this route will get first attention in the new scheme for all-year-round traffic.

Relieves asthma At Little Expense. [illegible] of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

For Uniform Text Books

Elimination Of Foreign Produced School Text Books Greatly To Be Desired

Reporting intensive activity in the elimination of foreign produced school text books from the schools of the country, the education committee of the Toronto Chamber of Commerce expressed the opinion that there is an ever growing tendency on the part of both the education authorities and the Canadian public to favor wherever possible, text books edited and published by Canadian and British authors and houses.

From a special committee formed in Alberta, came the suggestion, that since the individual provinces have complete charge of education, the provincial ministers of education could probably participate in a round table conference for the purpose of reviewing the text books situation in Canada and of seeking as much uniformity as possible.

Persian Balm — the unrivalled toilet requisite. Essential to every dainty woman. Imparts rare charm and beauty to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Cools and refreshes. Relieves roughness. Ideal for true feminine distinction. Delicately fragrant. Swiftly absorbed into the tissues, leaving no stickiness. Persian Balm invariably creates a subtle elegance and charm.

Teacher: Now, in getting [illegible] meal, what is the first and most important thing?

Class (in chorus): Find the can-opener.

Russia, with a greater population than the United States, has only 9,000 automobiles.

Conquers Pain
The ideal rubbing liniment for muscles or joint pains; for swellings, sprains and rheumatism.
MINARD'S "KING OF PAIN" LINIMENT

Sat On Top Of World

Few Canadians Had This Experience During Eclipse Of Moon

Men who literally sat on top of the world for a moment are described by Dr. Willard J. Fisher of Harvard Observatory in a report just published on the 1927 moon's eclipse.

These men were a far-flung line of fur traders, trappers, missionaries and hunters in Northern Canada, and at the moment of total eclipse their shadows were exactly on top of the round, black shadow of the earth as it slipped over the face of the moon, 240,000 miles distant.

A 100-inch telescope might have shown there the rough outline of the hills around them cast in the upper edge of the shadow on the moon.

Astronomers wanted to know just how much sunlight passed over this top edge of the world horizontally through the earth's surface atmosphere. To figure this they needed weather, cloud and haze conditions along this rim. George A. Wendt, of the Canadian Westinghouse Company, Limited, established the KDKA short wave broadcast to reach the men on the "rim" by radio.

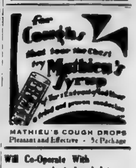
They were advised two months in advance what the astronomers wanted. Radio was the only way to reach them. Months after the eclipse Dr. Fisher received the report, and now after long computations, their astronomical value has proved up. They show that clouds shut out light horizontally across this top of the world to a height of 2,000 meters, more than a third of a mile. This cloudy layer was almost as opaque as solid earth, and had few breaks.

Commends Development In Transportation

Visitor To Canada Amazed At Railway Facilities In Dominion

Delighted with what he had already seen of Canada and expressing amazement at the developments which have taken place in transportation facilities in the Dominion, Gordon B. Roolph of "The Examiner" and the "Weekly Courier" of Launceston, Tasmania, left Montreal on "The International Limited" of the Canadian National Railways, for Toronto, en route to Vancouver to sail for home.

Radio and telephone connections to and from moving trains were an amazing development to him, Mr. Roolph stated, while the speed of "The International Limited," six hours for the 334 miles journey between Montreal and Toronto, was one at which he had never anticipated travelling over such a distance on any Canadian railway.



Will Co-Operate With Agricultural Interests

Trades and Labor Congress Anxious To Give Their Support

Unqualified support was given to the World's Grain Exhibition and Conference to be held in Regina, July 25th to August 6th, 1932, by 260 delegates attending the 46th annual convention of the Trades and Labor Congress of Canada at Regina recently. A resolution approving of the exhibition and conference carried unanimously, the delegates declaring their support to be an expression of their desire to co-operate with the agricultural interests of Canada in all great undertakings the objective of which is to strengthen the economic and industrial position of the Dominion among the nations of the world.

Athletes recommend Minard's Liniment.

"Pawgumow" In Cree

Conjuring Creek, the curious name of a northern Saskatchewan river, was first suggested by that of Wizard Lake from which it flows. The Cree name is "Pawgumow."

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:— "Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

MUNTER-MARTIN & CO., REGINA, SASK.

CONFERENCE AT LONDON STUDIES WHEAT QUESTION

London, England.—With the reply of the British Government to the preference proposals of Hon. R. B. Bennett, Prime Minister of Canada, expected soon, the heads of the Imperial Conference settled down to consideration of wheat and other Empire foodstuffs.

The expedients of bulk purchase of wheat and of import boards were considered in a general way and the whole subject was referred to an economic committee, under the president of the board of trade for consideration.

"It was not just a question of establishing import boards which would buy in the cheapest market, as for instance purchasing Russian wheat," said one British official recently. "On the contrary, the angle from which the delegates are approaching the problem is how best inter-Empire trade may be improved."

The same economic committee, under the Rt. Hon. Mr. Graham, has been authorized to take steps towards bringing together the British and Dominion manufacturers for a conference.

In considering the wheat problem and, with a wealth of information at its command, the committee could not even make an estimate in answer to the oft-heard question "how much wheat remains in Russia?" Increase of the growth of production by the great wheat-producing countries was reviewed.

The arbitration committee, under Hon. Maurice Dupre, Canadian solicitor general, studied proposed reservations in the general arbitration act prepared at Geneva. Under the main reservation the British nations would not submit their inter-Empire disputes to an international court.

N. Z. Butter Exporters

Are Anxious To Know If New Duty Is In Effect

Vancouver, B.C.—Cables from New Zealand stated that butter exporters there are eager to know if the new rates on butter from that country to Canada have come into effect, due to the fact that information received from London indicated that the old rate would remain until negotiations between Premier Bennett and Premier Forbes, now in London, has proceeded further.

It was ascertained from the office of the collector of customs at Vancouver that the new rates of 5 cents preferential rate are now operative. "So far as we are concerned," stated an official, "the old rates expired on October 12, when the extension of the Australian trade agreement was rescinded the new rates becoming immediately effective thereafter."

Armed Bandits Steal Payroll

Winnipeg, Man.—Armed robbers held up the office staff of the Canada Malting Company, on William Avenue, and escaped with the payroll, believed to be about $2,000. Two men entered the factory office a few minutes before the envelopes were to be distributed to employees. Clerks in the office were herded into a large vault while the robbers escaped with the payroll.

Held By Brigands

Peiping, China.—Frank P. Lockhart, United States consul-general, states that Bert N. Nelson, United States missionary of the Lutheran United Mission Home, Minneapolis, is held by brigands. His abductors belong to the so-called first Red Army. They captured him after the fall of Kwangshu, southeast Honan, to their forces on October 5. A large ransom has been demanded.

For a Federal Bank

Winnipeg, Man.—Reduced prices for farmers' necessities, cutting grain freight rates from 18 to 10 cents, and establishment of a federal bank which would make three per cent. loans to farmers were requested in resolutions passed by a meeting of 200 farmers at Valley River, Man. The resolutions have been forwarded to Dominion authorities.

Government Promises Help

Winnipeg, Man.—Government aid to farmers in purchasing bacon-type breeding sows raised by boys' and girls' clubs in Manitoba will be granted by the province, Hon. Albert Prefontaine, Minister of Agriculture states. The government will put up three-quarters of the cost, as a loan, in an effort to prevent sacrifice of valuable sows.

English Shareholders Angry

Shareholders Of Grand Trunk Stock Have Poor Opinion Of Canadian Politicians

London, England.—In an angry mood, holders of preference shares in the old Canadian Grand Trunk Railway met again to receive the report of their representative, R. C. Hawkin, on his recent visit to Canada. Finally they appointed a committee of seven to interview Premier R. B. Bennett and present their claims.

Hawkin told the claimants that when France had altered a French loan contract, Chancellor Philip Snowden had protested strongly. But Canada had gone much further than France ever did, in altering the Grand Trunk contract made in London and causing the obliteration of 100 per cent. of an investment. Surely this should come within the orbit of the Imperial conference, he said.

One stockholder spoke of a "damnably bad trick" and another said the expression was not strong enough. "If there is a lower form of human life than the Canadian politician I do not know it," exclaimed a third. "I know Canada, I have met politicians and farmers, and they are downright crooks. The only thing is to boycott goods."

Tells Of Slavery Conditions

Lady Simon Says Liberia Commission Report Will Reveal Abuses

London, England.—Lady Simon, wife of Sir John Simon, recently asserted that the forthcoming report of the commission of inquiry into Liberia would show that natives had been shipped overseas from the African coast "under conditions scarcely distinguishable from slave trading and slave raiding."

Lady Simon, addressing the members of the Conservative Women's Reform Association, said that these and other abuses had been committed not only by private persons, but also by Liberio-American negro officials, including those in highest positions.

She contended that there devolved upon the United States Government and to some extent upon the British and French governments responsibility for coming to the aid of the Liberia republic for the total abolition of the system under which abuses exist.

Free Transportation For Breeding Stock

Federal Minister Of Agriculture Makes Announcement To Western Farmers

Ottawa.—Hon. Robert Weir, Minister of Agriculture, announces that farmers or others desirous of increasing their present breeding herds or starting new herds of grade cattle, west of the Great Lakes, will be helped to the extent of having such additions to their breeding stock carried free of charge from the stockyards in Winnipeg, Moose Jaw, Saskatoon, Prince Albert, Calgary and Edmonton, to their home stations.

Conditions are that the heifers chosen shall not be over three years old and shall be selected with the approval of the Dominion government stock yard agents.

Want Superannuation Benefit

Saskatoon, Sask.—Caretakers of Saskatchewan schools will petition the provincial government shortly for a superannuation scheme, it was decided at a meeting here of the Saskatchewan Caretakers' and Maintenance Staff Association. Delegates were present from Saskatoon, Regina, Moose Jaw, Prince Albert, Young, Davidson and Rosthern.

Vancouver Shipments Increase

Vancouver, B.C. — Grain exports from Vancouver for the current crop year to date total 10,629,328 bushels, almost 6,000,000 bushels greater than the corresponding period a year ago. Of this season's shipments the Orient has taken approximately five times the amount shipped last year at this date.

Australians Deported

Vancouver, B.C.—Sixteen nationals of Australia and New Zealand were deported from Vancouver on the S.S. Niagara, which sailed recently. In all, 28 would-be immigrants were held up when the Niagara docked here. Six were allowed to land, and 22 were refused entry to Canada.

Ontario Liberal Convention

Toronto, Ont.—Date for the coming Liberal convention was set for December 16 and 17, at a committee meeting of Ontario Liberals. Hon. A. C. Hardy, president of the Ontario Liberal Association, presided and W. E. N. Sinclair, Ontario Liberal leader, was president.

BENNETT SUBMITS PLAN FOR EMPIRE CO-OPERATION

London, England.—"If this opportunity for closer economic relations is not seized it may not come again," declared Prime Minister R. B. Bennett when he spoke by trans-Atlantic broadcast to the citizens of Canada and mentioned the preference proposals which he placed, on behalf of the Dominion Government, before the Imperial Conference.

"I shall not refer to the reception our proposal has received," said Mr. Bennett. "In the near future it will either be accepted or rejected. We can only await the decision. It will be a momentous one, for I believe and believing, I consider it my duty to say, that if this opportunity for closer economic relations is not seized it may not come again.

"This, I need not tell you," pursued the Canadian prime minister "is in no sense intended as a threat. It is rather a prediction which, unhappily, I believe to be true. For we must all have regard for the basic changes in the conditions of world trade and realize that in this age of great industrialization and fierce competition the old rules, which in their time were good rules, may very well now be, if they are followed, sign-posts of commercial disaster."

As all the peoples of the Empire just now had their troubles, Mr. Bennett believed it would be the part of wisdom "that we should come together and search out means by which there may be won for us all a new and greater prosperity."

The prime minister spoke of the common traditions and principles of justice and fair dealing which bound the British nations together. He spoke of the great resources of Canada and recorded the resolve "to use these wisely, so that the happiness and welfare of the Canadian people may forever endure."

Mr. Bennett noted the will to economic co-operation in the Empire and he thought the Imperial conference would bring forth a plan to promote the prosperity of the whole. He cited the example of France which, after safeguarding its home markets, was in a better position to fight for foreign trade and he did not think increasing the Empire market for Empire goods would result in a decrease in the foreign market.

Mr. Bennett spoke of the wealth of Canada's resources. In its prairies, forests, mines, lakes and seas lay incalculable wealth. "It is our resolve also," Premier Bennett said, "to use it wisely, so that the happiness and welfare of the Canadian people may forever endure."

The problem was to determine what scheme of co-operation would be fair and lasting and of real account to all who joined in it. "Any agreement based on sentiment alone," he added, "cannot be a permanent one. If I ask this country to buy our Canadian wheat, which we must and will sell in the highest and most stable market, and give you nothing but thanks in exchange for this service, you would soon tire of it. Similarly, if Canada gave you preference for your goods in her market and got nothing but your acknowledgment of this preference in return, I fear it could not long continue.

"But if there is an agreement inspired by sentiment and buttressed by definite and lasting and mutual advantages, then it will not fail, for it will be our common wish and for the benefit of each and all to support and sustain it. Under that agreement each of us will be working primarily and properly in the interest of our respective countries, and that is the only way in which we may continue to promote the prosperity of the Empire as a whole. We would as an initial step safeguard our home markets, reduce to a minimum unemployment. We would then sell in the foreign markets the surplus of our products over home consumption. By increasing the Empire market for our goods we would not, in my opinion, in any way decrease the foreign market, for successful competition is closely related to the question of production, and speaking generally, the greater the production the cheaper is the cost of production."

FASCIST PARTY IN GERMANY

Adolphe Hitler, head of the Fascist party in Germany which made sensational gains in recent elections, against whom charges of high treason are being instituted, according to a dispatch.

Erecting Windowless Factory

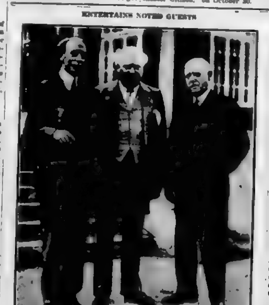
Large One-Story Building Will Have No Daylight

Cleveland, Ohio.—Award of a contract for industry's first windowless factory building, a $1,500,000 plant, entirely without daylight, and embodying radically advanced ideas for scientific creation of artificial lighting, ventilation and other working conditions, is announced by the Austin Company. The structure will be built for the Simonds Saw and Steel Co., at Fitchburg, Mass. It will occupy five acres and will be one storey in height.

Shipping Western Cattle

Ottawa, Ont.—The Dominion Department of Agriculture has arranged with a number of ranchers and breeders in the west for a shipment of cattle to Manchester, England. The whole boatload of 380 odd cattle has now been secured. The shipment will sail from Montreal on the "Manchester Citizen," on October 30.

ENTERTAINS NOTED GUESTS



The photograph reproduced above shows His Honor W. D. Ross with two noted guests of government house, Toronto, Ont., Gen. Sir Ian Hamilton (left), British war time hero and now champion of peace, and Sir Benjamin Robertson (right), noted Indian expert.

Accepts New Position

Hon. C. A. Dunning Appointed Vice-President Of Eastern Pleasure Resort

Montreal, Que.—Hon. C. A. Dunning, formerly minister of finance in the Dominion Government has accepted the position of vice-president and general manager of "Lucerne-in-Quebec," a new all year pleasure resort and hotel on the Ottawa River half way between Ottawa and Montreal. The appointment was announced by E. W. Beatty, K.C., president of the organization.

"The directors of Lucerne-in-Quebec make this announcement with a great deal of satisfaction," Mr. Beatty said.

The Lucerne-in-Quebec organization recently took over the old Papineau estate overlooking the Ottawa River and a hotel on the log chalet plan with numerous individual cottages are being erected. Summer and winter sports will be among the attractions and the project aims toward the development of a year around residential resort on a club membership plan.

Seek More Cargo Space

Australian Flour Millers Facing Difficult Problem

Melbourne, Australia.—Flour millers of Victoria are facing a difficult problem in getting cargo space for flour shipments to Egypt and Europe. If there is no relief in the present situation it is likely they will charter their own ships. General rationing of cargo space is in full swing with a shortage for cereals and flour. The reason for lack of space for these cargoes is that vessel owners are receiving plenty of cargoes paying a higher rate.

Carman Shrine Unveiled

Dead Poet Honored In Ceremony At Native City

Fredericton, N.B.—With leaders in public life in the province and Dominion taking part in the simple but [illegible] ceremony the unveiling of the granite shrine to Bliss Carman, first memorial to the dead poet, took place here in his native city on Saturday afternoon, October 18.

The family burial plot in Forest Hill cemetery where Carman's ashes were interred in a concrete tomb with state recognition in August, 1929, was the scene of the ceremony.

NEW TOWNSITE FOR CHURCHILL IS NOW POSSIBLE

Winnipeg, Man.—Settlement of the town of Churchill, Manitoba's seaport on Hudson Bay, will not be possible next spring as expected, according to a statement by Charles H. Attwood, deputy minister of Mines and natural resources. Water conditions on the filled-in area, where it was planned to build the business section, have created a serious engineering problem.

Location of the townsite may be altered, it is stated, and until the engineering difficulty has been obviated date for the site-opening cannot be set. Permanently frozen subsoil at the Bay port offers difficulties hitherto unencountered in municipal development, it is pointed out.

"The Dominion Government is busily engaged in building port facilities, railway terminals and, in transferring to the province the portion of Churchill townsite not required for the dock and railway facilities agreed to fill with gravel and sand the lower lying flats between the railway and the higher escarpment to the east," said Mr. Attwood.

The Dominion has fulfilled its agreement and in that part of the townsite selected as the business centre has already deposited some 40,000 yards of gravel with the object of preparing a site suitable for the business section of the town.

"During the summer plans for the townsite were prepared and recently the provincial government engineers have completed staking out this portion of the townsite but in so doing they now report that water conditions are such that make the filled in area unsuitable as a townsite until such times as some methods or means are devised to provide proper drainage in the perpetually frozen sub-soil through which there is no seepage.

"Until such time as further studies and investigations can be made to solve the problem peculiar to Port Churchill and to provide municipal utilities and services in the town, the province considers the interests of the public are best met by delaying the opening up of the townsite until these problems are solved."

IS OPTIMISTIC OVER FUTURE OF WORLD TRADE

London, England.—Rt. Hon. Philip Snowden, Laborite Chancellor of the Exchequer and avowed free trader, expressed at a banquet a feeling of optimism about the future of world trade in general and British trade in particular.

Despite the heavy burden of unemployment, which he said, was costing the nation about $500,000,000 annually, he prophesied a better conclusion for the financial year than had been predicted. He asked parliament to deal with the cost of unemployment by putting the insurance fund upon an insurable basis.

Mr. Snowden addressed a banquet at which there were present the governor and the directors of the Bank of England and leading bankers and merchants of the city of London.

"I look forward to the time which I am quite confident will come when not only the magnitude of the trade of this country but the magnitude of the trade of the world, will be of a volume which we are not able to conceive today."

Deprecating the spirit of pessimism in Britain, the chancellor said that it was a different spirit that triumphed in the past over difficulties as great as those with which the country is faced today.

"A hundred years ago things were quite as bad, or worse, as they are today. But things changed, and the next eighty years marked the greatest period of prosperity and the greatest advance in the history of this country.

"Times will change again. Undoubtedly we are now suffering less than some of the other great industrial countries of the world. During the past six months we have maintained a larger proportion of our production than Germany or the United States."

The cost of unemployment to the nation, Mr. Snowden said, was disturbing him almost beyond measure. He estimated from various sources the cost of unemployment at £100,000,000 sterling annually ($500,000,000), a necessary but at the same time unremunerative expenditure. "The exchequer expenditure has been raised, and I have to find this year £21,000,000 (about $105,000,000) in order to finance the large mass of unemployed persons who have no insurable qualifications.

"I think it is the duty of parliament to face this problem and to put the insurance fund upon an insurance basis."

Mr. Snowden said he intended to do everything possible to avoid the imposition of additional taxes. He prophesied that the ending of the financial year would be less disheartening than had been generally believed.

Starting Branch Line Work

C.P.R. Plans Hundred Miles Of Construction In Saskatchewan

Winnipeg, Man.—Immediate work on one hundred miles of new rail construction in Saskatchewan was foreshadowed by D. C. Coleman, vice-president, western lines, Canadian Pacific Railway, in announcing award of four grading contracts which form a portion of the company's advanced construction programme referred to by President E. W. Beatty, K.C., while on his western tour recently.

Advancement of this and other construction work now in process of planning has in mind the desirability of providing some relief to the agricultural industry by furnishing work for farmers and their draft animals and the absorption of as much as possible of the surplus labor in the towns and cities.

Honor Memory Of Virgil

All Italy Celebrated Anniversary Of Poet's Birth

Mantau, Italy.—All Italy celebrated the 2,000th anniversary of the birth of the poet Virgil. Manthua where he was born, Naples where he lived and wrote, Rome where he enjoyed the protection and friendship of the Emperor Augustus and Brindisi, where he died, all joined in rendering the celebration a fit tribute to the immortal memory of the [illegible].

His birthday was registered in the calendar as a Saint's Day and devotees worshipped at his tomb as at a shrine.

Work On Airship Stopped

London, England.—All recondition work on the great airship R-100, which visited Canada last August, has been halted pending the government's decision on the future of the airship development program.

We wish to thank our many friends and customers for their splendid patronage of last week. The weather was bad and at the request of very many customers we have decided to run this sale for three more days, Thursday, Friday and Saturday, October 23, 24, and 25th.

BY POPULAR REQUEST AND DUE TO LAST WEEK'S BAD WEATHER WE ARE REPEATING OUR

ONE CENT SALE

At A. A. Beirnes', The Rexall Drug Store

Thurs., Fri., Sat., Oct. 23-4-5

It is not often that a one cent sale is immediately repeated and this repeat is not because last week's sale was not a good one—it was. But so many people were prevented by bad weather from visiting out store, and so many asked us to repeat the sale that we decided to do so.

Anyone in the country who is unable to be in town to buy on the days of the sale, may 'phone in their orders and they will be taken care of.

THE TOFIELD MERCURY

W. Worton Publisher

A Weekly Newspaper Published At Tofield, Alberta

IS THE SMALL TOWN DOOMED?—

THERE IS a great deal written and said these days regarding the future of the small town. It is not a new topic. Ever since the first catalogue appeared at a country post office there has been a discussion going on somewhere on this continent with the future of the small town as its topic.

Buying by mail began to be popular as soon as the opportunities so offered and have developed steadily increasing. Late statistics seem to indicate that mail order buying reached its zenith a few years ago but is now declining. If there is any decline but yet to make any appreciable difference to country town trade. We are told by those who travel to and from the Unit[illegible] that the country towns in that country have suffered a steady decline during the past ten years. The obvious reason, there may be some reason that are not so obvious, is that the automobile and good roads, having given rural dwellers a faster cruising area so to speak, the rural dweller has the spirit of adventure and desire to gain, to go farther—always in the direction of a large town—than to feel his buying ability or luck, or both. Quite recently Premier Brownlee when speaking of natural resources of the province spoke of "the long view." The Long View" is not an original expression, but is a very effective one, and in the main means to forego immediate profit for greater profit and satisfaction. It appears to us that the small town dweller and the rural dweller who lives within a small town trading area should take the long view. It may seem both pleasant and profitable to drive to the city and buy, but while it may be pleasant it is questionable if in the long run it will be profitable. In the building up of a district, town or country the element of loyalty enters largely therein. It is necessary that it should be so. Between individuals, between communities, between towns, between nations, there is that ever-lasting grinding process, which both helps and injures, one against the other. Unless we, be submerged by stronger forces around us, it is absolutely necessary that we take the long view and look after our interests.

It might be argued that that buying out of town is what appears to be the cheapest market is looking after one's own interests, but is it? We are not so sure.

It would seem to us that a "live" town in close proximity to a farm is a valuable asset. A really good store is worth something. Then there is your theatre, bank, newspaper, sporting organizations and all the community endeavors which are part of life. Regarding the theatre. It is impossible to have a really well stocked store unless the merchants can count on your business. The farmer and wage earner in the immediate vicinity of the store are the only people he can expect to do business with, if these fail, there is an inevitable dropping of stocks both as to variety and quantity. Just as an example the other day a customer tried to buy two young boys' suits in Tofield. They could not be procured in one store and it is very unlikely that they could have been secured in town. Yet a few years ago boys suits could have been procured in any one of three stores. If country town and rural residents continue to send the greater part of their money away, in the final counting they will be left holding the bag. There will be a minimum population and maximum taxes. They will educate the growing population only to have them go off elsewhere to use the education the small town paid for, for the benefit of some other centre. Churches will lag, theatres close, sports decline, and in the end the very thing they sought when they sent their money away, viz: gain, they will miss. A successful and prosperous community is built up from within. First the family, then the district, then the town, then the city, then the province, then the country, then the empire. Life with these things kept in their proper order would be more pleasant and we believe more profitable to all of us.

It will be noted we have said nothing regarding the merchants. This is another story and one which must be left until another occasion.

ALBERTA RICH IN VARIED RESOURCES

A visit to the Peace River Country and then to Turner Valley impressed me forcibly with the tremendous resources of Alberta, and lead one to believe that the future of the country is very bright, according to E. Crosman, passenger traffic manager of the Canadian National Railways, Winnipeg, who made a business trip through Alberta this month.

Mr. Crossman expressed surprise at the development at the oilfield since his previous visit a year ago.

One of the many interesting things Mr. Crossman witnessed in the Peace River country was the extraordinary interest being taken in turkey raising by the farmers of that district. The climate conditions generally are ideal for raising turkeys and he saw large flocks of healthy, fine looking birds almost everywhere he went.

They are an optimistic people and they have the right spirit. They have an excellent grain crop and there is very little evidence of business depression, as seen by Mr. Crossman.

SEVEN CHILDREN START ON LONG JOURNEY TO SCOTLAND

Because their mother died, seven young children from Crooked River, Sask., ranging in age from two to thirteen years, are on their way to Scotland. They are travelling unaccompanied, all the way to Edinburgh, where they will be met by relatives who will take them into their homes.

The rail trip was made over the Canadian National Railways. Last Friday, they sailed on the Canadian Athenia" from Montreal.

T. W. Wilson is the father of this family, has been a resident in Canada for the past 18 years. Mrs. Wilson died last winter.

B. C. FRUIT MOVEMENT SHOWS AN INCREASE

A very substantial increase in the number of cars of fruit moved from British Columbia, as compared with the 1929 movement, is announced by the Canadian Pacific Railways. Seventy-five per cent of this year's fruit moved from the Okanagan Valley was delivered in 23 points in the prairie provinces. While B. C. fruit is marketed pretty well all over Canada, this year a number of cars were delivered by the Canadian National to the states of Minneapolis, Illinois, Michigan Ohio, New Jersey and New York.

ARMSTRONG BOYS WIN CHAMPIONSHIP

For the third time in succession a team from Armstrong, B. C. has won the Swiss Club Judging championship of British Columbia.

Keen competition among several thousand boys and girls throughout British Columbia has been in progress since spring. The two Armstrong boys, in addition to winning the provincial honors, will be sent to Toronto as guests of the Canadian National Railways, to take part in the Canadian championships at the Royal Winter Fair. Provincial winners from all parts of Canada will also take part and the Dominion champions will hold the Robb Championship Trophy which was presented by W. D. Robb, Vice President of the Canadian National Railways.

R. B. BENNETT HEARD OVER RADIO

The Right Hon. R. B. Bennett, Prime Minister of Canada, spoke from London to thousands of his fellow countrymen at home in Canada on October 16th, by means of the radio. The broadcast was made by permission of the British Post Office, and carried across the Atlantic by Marconi and then from one end of the Dominion to the other by the Canadian National chain, which links Halifax, C.N.R.H., with Vancouver, C.N. R.Y. Other stations which are frequently linked in on Canadian National Transcontinental broadcasts, were included as well.

PREPARING TURKEYS FOR WINTER TRADE

(Experimental Farms Note)

Turkeys which have been held over from the Thanksgiving Festival with the intent of preparing them for the Christmas trade should be put on a fattening ration about the middle of November. Birds which have been on open range during the growing season should not be confined to pens during the fattening period. When properly fed they will take no more exercise than is necessary for good digestion, whereas if they are confined in pens there is great danger of the birds going off their feed, developing digestive disorders with accompanying loss of flesh, and quite frequently the loss of a number of birds.

Where the weather is cold the birds will not flesh as rapidly as earlier in the autumn, and at least five week's feeding will be necessary to get them ready for Christmas. As it will take one week to dress and ship them to market, fattening should commence at least six weeks before Christmas. If the birds are to be over-ripe a longer period may be required to flesh them properly.

Feeding should be started gradually, in fact the birds should be fed regulated twice daily from the middle of September. The birds should be fed only what they will clean up slowly with two feedings daily, morning and early evening during the third week in November. After that time feed three times daily until killing time.

The feeds should consist largely of mashes and whole grains. Feed mashes morning and mid-day and whole grains in the evening. The birds can digest more feed when it is fed in the form of a mash but the feeding of whole grains in the evening will prevent them from becoming very hungry before morning as grains are assimilated much more slowly than mashes.

A good mash can be made by a mixture of equal parts ground oats, barley meal, cornmeal and wheat bran. Ground buckwheat is also good, and can be used instead of cornmeal or barley meal if necessary. To this mixture add about 10 per cent beef meal and 5 per cent ground charcoal. Mix thoroughly before moistening. Fattening mashes should be fed in a moist condition but only sufficient should be moistened for one feeding. It is a good practice to have the

(Continued on back page)

Vast Sodium Sulphate Deposits Located In Saskatchewan One Of Richest In The World

A survey conducted by Dominion Government experts has revealed that Saskatchewan possesses one of the greatest deposits of sodium sulphate in the world, according to a bulletin issued by the provincial bureau of publications. It is further stated that exploration of these deposits by new and advanced and present methods now that they are a potential source of wealth to the province.

It was stated by an official of the bureau of publications that the company engaged in the preparation of the sodium sulphate found in Horseshoe Lake is employing local labor almost exclusively. The payroll of the firm amounts to $7,000 each month. It was said, and this amount is distributed in an area where the crops for the past two seasons have been extremely light.

The statement as issued by the bureau of publications is as follows:

"The sodium sulphate of commerce, which in days gone by were only considered as 'salt lakes' for cattle are unquestionably designed to be a source of considerable wealth to the province in the near future.

"For many years these deposits were referred to under the misnomer of 'alkali lakes,' and were considered worthy of investigation. As a matter of fact, did not flourish in their vicinity, and their only rentable were the 'salt lakes' which, urged by some primitive instinct, came to lick the crystals, which science now declares to possess considerable veterinary virtue.

"During the war years an impetus to search was being conducted for minerals, these deposits came under the expert eyes of science, and it was discovered that some of them contained vast quantities of sodium sulphate of remarkable quality.

"A survey of some of these Western beds, conducted by the Geological Survey of Canada, and that Saskatchewan possessed a considerable portion of the world's supply, and for the first time in the history of the province definite information was obtained in respect to this valuable natural resource.

Sodium sulphate deposits occur in the beds of lakes that in the past have been designated as 'alkali.' Sometimes these lakes are practically dry, and sometimes there is a surface of water, seldom deep and varying according to the season, covering the material. The water condition is by evaporation, rainfall and early summer, which dissipates in the autumn, when there is evaporation, and incorporation with the sodium sulphate. When there is no water present, the sulphate presents the appearance of glare ice, less in much closer texture.

"To a stranger approaching one of these lakes during the summer season condition he witnesses may well make him doubt the evidence of his senses. There is a lake during the warmest portion of the year apparently frozen and the remarkable part of the similitude, that it requires a close examination to dispell the illusion. In certain places and over some lakes dark, evil smelling springs well up from the subsoil and cool it to a popularly accepted theory that they contain the chemical that forms the sodium sulphate.

"The beds of this material may be shallow or of great depth. In one instance deposit the crystal deposit has a depth of nearly 100 feet. In some cases there may be slight layers of vegetable deposit, but on the whole it is remarkably clean.

"Under normal conditions the sulphate deposit costs on a large percentage of the moisture and resulting sand, and in the past the chief problem facing these desirous of obtaining the product was to evolve a process of dehydrating it economically and in commercial quantities.

"Sodium sulphate is an essential in certain industries, and a valuable adjunct in others. It is an essential in the manufacture of kraft paper from pulp wood, and is regarded as the ideal dispersant in all kinds of pulp manufacture. It is used extensively in dye works, textile manufacture, leather glass, in the plastic compounds, and in the manufacture of many veterinary remedies. Lately it has been found that sodium sulphate is a valuable agent in the relieving of sciatic, and it is contended that there may be a considerable demand for it in connection with other medical processes.

"To the west most of the sodium sulphate used in Canada, chiefly in connection with the kraft paper industry, has been a synthetic product made from the by-products of hydrochloric and sulphuric acid. This synthetic sodium sulphate was manufactured under American chemical centres such as Pittsburgh, Charleston and Philadelphia and imported into Canada free of duty. Owing to the short railway haul and other favorable conditions in the past, the natural product of Saskatchewan was unable to compete with it.

"Recently, however, a complete change has taken place that is bound to benefit the sodium sulphate industry in Saskatchewan. A new duty has been put into use in connection with the manufacture of this product, and has resulted in the commercial manufacture of synthetic sodium sulphate has, almost overnight, become a thing of the past. Chemical engineers declare that it is doubtful if there is not many of the mere cake used as a base for the synthetic product to be had nearer than Chile in South America. Furthermore the demand for sodium sulphate for the treatment of arm can hardly fail to exercise a stimulating effect upon the industry.

"The problem of economically drying, or dehydrating the material has been completely solved. A new mining company, which during the last year has erected a large plant at Ormiston, in this province, is drying it at the rate of about 100 tons per day. This concern has already shipped about 1,000 tons to the great kraft works near Sudbury, Ont., where they have apparently found it an economical to follow operations that they are at present taking their total output. Another company operating at Dundurn, also in southern Saskatchewan, is drying and shipping in considerable quantity. A large demand seems to be springing up, and there is little doubt that the industry will have the effect of adding materially to the wealth of the province."

Ontario Wabasta Bad

Kent County Pensions For High Grade Products

For walnuts, Kent County, Ontario, long famous for a variety of high grade farm and orchard products, claims to be in the front rank This was particularly evident at the Fall Growers' Conference held at Cedar Rapids, where walnuts were delivered in Japanese crates by Harold English, whose farm is close to Chatham, was declared by many to be the finest in attendance at the Conference. Large size, good cracking extraction quality, and fine flavour were the points on which the experts based their decision. The tree from which these fine nuts came is a beautiful specimen and has made very rapid growth. It is only six years old and has taken fine good range.

Helped With Problem

Canadian Farmers Receive Many Publications and Circulars Free Of Charge

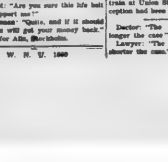
The Department of Agriculture at Ottawa through its Publications Branch has further distributed to farmers all over Canada free of charge over 4,281,270 pamphlets, bulletins, circulars and reports. In addition to these material 270 press articles and 180 magazine features were supplied. This is one of the ways in which the farmer is helped with his problems and kept in close touch with the conditions of his markets and important new developments in agriculture.

Made Trip In Style

Planning the railway, at Memphis, Tenn., a negro representing himself as the assistant superintendent of the Pullman Company, secured a car in the attached to a certain train going to St. Louis. It was to be hooked and a porter would go too. The car was coupled with the train. A negro who represented himself as a porter got aboard, rode to St. Louis and left the train at Union Station before his deception had been discovered

Doctor: "The more sneezes the longer the case"

Lawyer: "The more doctors the shorter the case."



Client: "Are you sure this life will support me?"

Salesman "Quite, and if it should flat you will get your money back."—Alit for Alls, Stockholm.

Debt Adjusting Plan

Saskatchewan Sheriffs Will Co-Operate With Committees

Letters have been sent to each of the 194 governing bodies of the rural municipalities of Saskatchewan advising them that the sheriffs of the province will co-operate with the debt adjusting committees in enforcing all cases in which arbitration between debtors and creditors is asked for, by the committees. It was stated by Gordon Howard McConnell, Minister of Municipal Affairs.

It was further indicated that the co-operation had been asked to support all cases needing this assistance in the sheriff.

This action has arisen out of the meeting of the special committee of creditors and debtors, which was held recently at the parliament buildings, Regina. Following the meeting, at which representatives of various social bodies, financial institutions, the United Farmers of Canada, Saskatchewan section, and the wheat pool were present, it was generally agreed that the sheriffs be asked to assist in matters of debt adjustment.

The special committee was called as result of representations to the government by the Dunlop Farmers' Union and the creditor protective committees, in many cases, pressing unduly for payment of debts, and causing financial stress entailed among the farmers of the province.

Soybeans Becoming a Valuable Product

When Oil Is Extracted Residue Makes Valuable Stock Feed

A chemical analysis of soybean varieties being developed and tested by the experimental farms of the Dominion Department of Agriculture show a very close relation between protein and fat content in the soybean. The correlation is fairly constant. The greater the amount of fat or oil in the bean the lower the protein content and vice versa.

This is a development of special interest at the present time, in view of the fact that the commercial value of the soybean crop depends directly on the market prices obtained for the oil or protein respectively. In tests of some twenty-five varieties grown at Ottawa, and eighteen grown at Harrow, Ontario, protein content ranges from 40.62 per cent. to 46.06 per cent. with the fat content ranging from 20.12 per cent. to 15.15 per cent, respectively are reported.

The soybean has two commercial uses, the production of soybean oil, and the use of the residue in the form of soybean meal or cake which because of its high protein content makes a valuable live stock feed.

Wm Farmer By Good Nature

A smiling negro farmer of Memphis, Tenn., was arraigned before the court charged with the cheerful spirit with which the youth performed service for his friends.

"Did you steal this hog?" asked the judge.

"Yes, suh, I did," was the reply.

"Why did you steal it?"

"Well, suh, I was walkin' along de road an' dis hog he come up to me an' he say, 'Sam, I'se mighty glad to see you. Ah'm mighty glad to see you. Ah'm mighty glad to see you. Ah'm mighty glad to see you.' An' I say, 'Hog, I'se mighty glad to see you, too.' An' I'se mighty glad to see you, too.' An' I'se mighty glad to see you, too.' An'

Make dresses bright as new!

DIAMOND DYES are easy to use, go on smoothly and evenly; NEW. Never a trace of that re-dyed look when Diamond Dyes are used. Just true, even, new colors that hold their own through the hardest wear and washing.

Diamond Dyes owe their superiority to the abundance of pure anilines they contain. Cost more to make. Surely. But you pay no more for them. All drug stores—15c.

Diamond Dyes

Highest Quality for 50 Years

WORLD HAPPENINGS BRIEFLY TOLD

Alexander Harrison of Philadelphia, one of the most noted United States painters died recently after a long illness in his Paris studio. He was 67 years old.

The U.S. weather bureau will issue fire warnings from a radio station near Madison, Wis. during the hazard season. It has been announced by the state department of agriculture.

Medicine Hat statistics show that only 210 dwellings in the municipality are occupied by tenants, the balance all being owned by occupants, thus establishing most unique Canadian record.

Plans to hold a reunion of the families and descendants of all former Presidents of the United States at the capital is being fostered in connection with the 1932 Washington bi-centennial programme.

Canada will produce 45,200,000 hundredweight of potatoes this year according to a forecast made by the Dominion Bureau of Statistics. Last year Canada's crop was 39,938,000 cwt.

Prohibition of advertising of hard liquor in Manitoba has been ordered by the Manitoba liquor control commission. In future, no advertisements will be approved by the board. The ban has been in effect since the beginning of October.

The association of South African Chambers of Commerce, in their annual congress, urged the government of South Africa to pursue a policy of intensive development of trade with the countries of the British Commonwealth.

Discovery of a Socialist bomb plot against the life of Marshal Joseph Pilsudski, premier of Poland, was announced by the semi-official Iskra Agency, and eight members of the Polish Socialist Party were arrested at Warsaw and accused of preparing the plot.

Two Catholic priests and a pilot were killed at Kotzebue Alaska, when the mission plane Marquette crashed. The dead are Ralph Wien, noted Alaska aviator, Father Philip I. Delon head of Jesuit Missions in Alaska, and Father Walsh of the Kotzebue Mission.

Samuel E. McColl, of McColl Brothers Surveying Company was named director of surveys by the Manitoba Government. He will head a new engineering division operating under the Department of Mines and Natural Resources, formed in connection with the transfer of resources from the Dominion.

Build Big Bridge

Structure Over One Thousand Feet In Length Being Erected At Brosseau, Alberta

Work on the steel [illegible] of the new traffic bridge across the Saskatchewan River at Brosseau, Alberta, which is being built by the Department of Public Works, has begun. The bridge is the largest that the department has built for several years and will be one of the largest in the province, running to something over a thousand feet in length.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and [illegible] nature's machinery to be [illegible].

A purely vegetable laxative such as Carter's Little Liver Pills gently touches the liver, bile starts to flow, the bowels move gently, the stomach and bowels are thoroughly cleansed and the constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

Advertising Is Good Business

And Is Especially Necessary In Times Of Depression

It is a curious fact that the art of advertising at home is on as high a plane as in any country in the world but manufacturers and merchants do not seem to have developed the faculty of showing the rest of the world how really good their products are. British traders are inclined, when bad times prevail, to reduce costs by cutting down advertising, a procedure which has been proved time and again to be against all the principles of good business. As was mentioned in a recent article contributed to our columns by a local advertising specialist: "Among experienced advertisers today, it has become an established policy to redouble efforts in bad times, because of the actual results which have been derived in so many instances from the adoption of this policy."—Hong Kong Press.

World's Grain Exhibition

Managing Director Now Touring European Countries To Create Interest In Show

For the purpose of interesting ministers of agriculture and producers' organizations in a number of European countries in the World's Grain Exhibition and Conference to be held in Regina in 1932, John A. Mooney, managing director, is now on a tour of the continent. His itinerary includes the countries of Czecho-Slovakia, Jugo-Slavia, Bulgaria, Roumania, Turkey, Greece, Italy, Spain, Portugal, France, Switzerland, Belgium and Holland, and he expects to be back in Canada by the middle of November.

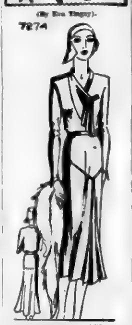
Fashion

(By Era Tingey).

7274



PRETTILY DRAPED

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Delightful draped effects mark many of the new bodice and skirt effects giving almost Greek grace to the voguish dresses.

The model illustrated for today's pattern has a new and charming collar. It forms a pretty drape on one side and is caught with a modern brooch or a button, preferably a jeweled one if the material is rich like satin, crepe-de-chine, marocain, chiffon velvet, etc. The model would also cut charmingly in a faconne velvet of which some lovely new designs are to be seen.

To be in keeping with the bodice trim, the skirt drapes prettily on one side where the weight of the fulness of stuff just causes the merest dip at the point. The belt is narrow and of self tissue.

This pattern may be obtained in sizes 14 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Quick Relief for CONSTIPATION BILIOUSNESS BLOATING, ETC.

Cascarets 10c "THEY WORK WHILE YOU SLEEP"

Should Check Up Unemployed

Some May Not Be Deserving Of Government Relief

Unemployment figures in urban centres are augmented each winter through the migration of men who work steadily on farms in the summer and rather than accept a smaller wage for the winter months or perhaps merely comfortable board they journeyed cityward in the hope of sharing in the jobs handed out by benevolent city councils. Urban municipalities should keep a close check on these migrants and refuse to increase the burden upon their municipalities and the country at large by maintaining these men in semi-idleness for five months out of the year.

It will be grossly unfair to taxpayers everywhere if part of the twenty million dollars appropriated by the Dominion Government and the [illegible] of dollars [illegible] are added to it by the provinces and municipalities is used to maintain the migratory class of laborer who has been offered winter employment and turns it down in order to share in the millions voted for unemployment relief.—Farmer's Advocate.

Recipes For This Week

(By Betty Barclay)

SCALLOPED TOMATOES

Drain one can tomatoes from some of their liquor. Season with salt, pepper, a few drops of onion juice, and 2 teaspoons sugar. Cover the bottom of a buttered baking dish with buttered bread crumbs, cover with tomatoes, and sprinkle top thickly with buttered crumbs. Bake in a hot oven until crumbs are brown.

LEMON TAPIOCA SHERBET WITHOUT FREEZING

½ cup quick-cooking tapioca.
1 cup sugar.
2 cups water.
Juice 2 lemons.
2 egg whites.

Put tapioca, sugar and water into double boiler, and cook, stirring often, until clear. Three minutes before removing from fire, add lemon juice. When cool and beginning to thicken, add the stiffly-beaten egg whites and beat well. Serve with boiled custard or heavy cream.

Advocates Clothing Reform

College Professor Thinks Men Should Wear Dresses

Men should wear dresses, Prof. Albert Bachem, of the University of Illinois College of Medicine, advises.

For health and comfort the ideal garment for men would be loose and flowing, without binding collar or belt, he told the American Physician Therapy Association recently.

"We men, under our garments," he said, "are practically always living in a tropical climate. Women's clothing is much more reasonable.

"There are two ways I would suggest to improve our clothing. Either it could be made more porous and consist possibly of one layer, or it could be worn very loosely."

Yukon Big Game

Yukon Territory, Canada, is the paradise of big game hunters and no place on the North American continent today offers greater inducements both for the variety of big game and for the dimensions of the trophies to be secured. Mountain sheep, moose, goat, caribou, and bear are numerous. The moose are of the "giant" species, and bear includes black, brown and grizzly.

Manitoba Stone For Edmonton

The final shipment of Tyndall stone, from the Tyndall quarries in Manitoba, to Edmonton in connection with the $250,000 contract for the Alberta Provincial Buildings at Edmonton, has been made ahead of schedule.

SUNDAY SCHOOL LESSON

OCTOBER 26

WORLD'S TEMPERANCE SUNDAY—SPIRITUAL WEAPONS IN A WORLD WAR

Golden Text: "Every man that striveth in the games exerciseth self-control in all things."—Corinthians 9:25.

Lesson: Galatians 5:13-26.

Devotional Reading: Romans 14. 13-21.

Explanations and Comments

Christian Freedom, verse 13.—"Brethren," wrote Paul to the Galatians, "you are free from the Law, but Christian freedom does not mean that you can do as you please." Liberty and license are not synonymous. Do not use your freedom as a license for indulging your lower impulses, but serve one another in love. "Flesh" is used here for "that element of man's nature which is opposed to goodness and makes for evil. It signifies the entire potency of sin."

The Christian Love, verses 14, 15. Through loving service for [illegible] you fulfil the whole [illegible] law, [illegible] is, "Thou shalt love thy neighbor as thyself." Paul here quotes Leviticus 19:18. Then, recalling the fact that the Galatians were prone to quarrel, Paul adds, "But if ye bite and devour one another (act toward one another like dogs or wild beasts), beware lest you destroy one another."

Antagonistic Spirits, verses 16-18. Submit to the guidance of the Holy Spirit in all your acts, Paul counsels, and then you will not fulfil the desire of your evil nature, for the evil nature and the Holy Spirit are antagonistic. The Spirit strives to prevent your obeying your evil nature, and your evil nature strives to hinder you from obeying the Spirit, for they are at warfare one with the other, and prevent your doing what you would. "Paul's theory seems to be this: Man's glory lies in his will. In him, however, are two hostile forces. The flesh seeks ascendency, urging him to choose the things he likes. The Spirit urges him to unite himself with God and things divine, to use his will to govern his life according to spiritual motives."

The Final Counsel, verses 25, 26. If we live by the Spirit, by the Spirit let us walk. Walking by the Spirit is the effect of living by the Spirit. If the Divine Spirit has control of our spirit, then we are living righteously.

Less Crime In Britain

Several Prisons Are Closed For Lack Of Occupants

Crime in Great Britain has deteriorated so much that prisons are operating far below capacity, and several have actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool, who arrived in New York recently.

He attributed the decrease in crime to the system of swift justice, strict laws, requiring the closing of saloons at certain hours, and to the fact that a prisoner or a person fined for an offence is kept under close surveillance after his release or payment of the fine.

There was great excitement aboard the liner.

"Man overboard!" was the cry.

"Gentleman overboard, if you please," said Mrs. De Snobbe. "That's my husband."

World production of sulphuric acid now is 22,550,000 tons a year.

CANADIAN PACIFIC STEAMSHIPS

Finds Use For Muskeg

May Establish Industry To Produce Insulating Material

An American company with headquarters at Minneapolis, is investigating commercial uses for the northern muskegs with a view of establishing an industry to produce insulation material. While the prospect of using muskeg as an insulating material is something new to the majority of citizens of Canada, it is an old trick of the veteran prospectors in this area.

But hundreds of log cabins of trappers and prospectors in the northern areas of Manitoba and Saskatchewan have been packed with the bog material for years, keeping out both the freezing blasts of the northern winds and the burning sun of northern Manitoba to the entire satisfaction of the owner of the cabin.

No local information can be obtained regarding the investigations by the American firm of the industrial use of muskeg, but early in the spring a substantial shipment of the muskeg left here for the south.

Started In Small Way

The dahlia began its spectacular career most modestly in 1779 when a few seeds were sent from Mexico to Madrid. By 1841 some 1,200 varieties had sprung from this little packet of seeds (not bulbs—"a truly remarkable example," says Dr. Howe "of a plant's capacity for variation when aided by man." Today more than 8,000 varieties are in cultivation, thousands have been discarded and there is a dahlia society in every state.

Lawyer (handing cheque for $100 to client who had been awarded $500): There's the balance after deducting my fee. What are you thinking of, aren't you satisfied?

Client—I was just wondering who got hit by the car, you or me?

Starts Mystery Flight

Great Secrecy Surrounds Destination Of British Woman Aviator

Mrs. Victor Bruce, British woman aviator, has started from Heston, Middlesex, air park, on a mystery flight in her single-seater Bluebird aeroplane.

The greatest secrecy [illegible] her destination. One report credited her with the intention of flying east across Europe to Persia, India, China, and Japan. Another said that she was flying to Alexandria and then down to Cape Town.

There was still another report that said she was flying around the world and would be gone three years.

When coffee was introduced into Europe as a novelty, it was said to be an effective remedy against hysteria and toothache.

USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home duties [illegible] belong to attend to. At the Change of Life, I became nervous and run-down. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines." Mrs. Richard Chamberlain, Birchtown, Quebec.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

THE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms, such as headaches, gas, heartburn, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips' and the word genuine in red.

THE DUSTY HIGHWAY

Copyright 1929

CHAPTER II Continued

Considering all it meant it was over in an incredibly few minutes, but during the entire time Gay did not look at Nick. She looked at Lincoln, not alone because his familiar visage steadied her, but because if she kept her eyes upon him she couldn't see [illegible].

Somehow she found herself shaking hands with the owner of the board, and nodding dazedly to the clerk and the stenographer. Somehow, with the help of Nick's firm hand, she got down the dark stairway, and into the blinding sunshine of the spring day.

Still she didn't meet Nick's eyes. The whole performance had been a nightmare, a hideous travesty of sacred things. She was hurt and quivering. She glanced down at the gold band on her fourth finger, wondered vaguely where Nick had got it, and realized at its sight that she was married—married without the touch of her husband's lips. The thought that not once during the whole day had Nick been anything but brotherly, suddenly scorched her. Surely, had he loved her ever so little, he would have kissed her! And to let her be married in that dreadful place.

Gay didn't know that her quick breathing was almost audible. She hardly knew that they were in the car again and had left the highway for a secluded street. She didn't notice that the car had stopped, but she heard Nick say, a trifle hoarsely, "Gay darling—if I'd known—"

And just then a voice broke in upon them, a high shrill, old-man voice. "By gorry! If ain't Nick Hastings!"

They both stared, to behold a little man in baggy trousers and a wide-brimmed hat. He was carrying a huge umbrella, and looked to Gay like a character from Dickens; but Nick, beaming, stretched out a cordial hand.

"Why, hello, Mr. Bartlett! Aren't you a good way from home?"

"I be and I ben't," was the enigmatic answer. "Truth is, I've moved since last you come. Couldn't stand the noise from that darn railroad, but no place is ever goin' to seem home to me but the house where I lived with my old woman. This your lady, Nick?"

Nick grinned, and turned to Gay with the familiar light in his blue eyes again.

"Gay, I want you to know Mr. Bartlett, a good friend of mine. This is my wife, Mr. Bartlett. I've been married since last you saw me. We—we're taking a little trip."

The old man lowered his umbrella and squinted up out of near-sighted eyes.

"Well, well. Pleasant time to be startin'. Some like fall, but I say, give me spring every time: spring an' apple blossoms. Ain't nothin' prettier. Where you aimin' to put up over night?"

"We haven't made any plans. That is, we—we started rather suddenly and—"

"I see, I see," interrupted Mr. Bartlett. "That's the way to do. That's the way we'd start out forty year ago, me and my old woman; only we went behind an old white horse. Say, why not use my camp?"

Nick stared a minute. "You mean that bully little cabin on the hillside? The place I found you when I brought over that mortgage for you to sign?"

His voice was eager, and the old man beamed.

"That's it. Awful pretty place to stop. I was there yesterday—cleaned her up—laid the fires—took up a lot o' canned goods, thinkin' maybe I'd be goin' to stay a day or so. May need a mite o' dustin,' but gorry! so does the Central House! You're welcome to stay long as you want to, Nick, that is, if your wife'd like it."

"You would, wouldn't you, Gay?" asked Nick eagerly. "It's the snuggest little place you ever saw, with a glorious view of the White Mountains from the porch. Of course, if you'd rather go to a hotel—" he added doubtfully, but Gay, who had regained her composure during this conversation, reassured him.

"It sounds beautiful. I'd like it much better than a hotel, and—"

"Well, that settles it!" interrupted the old man quickly. "Now if you'll take my umbrella (I had a sunstroke once, ma'am, and never travel without it), I'll hang onto the runnin' board and you can carry me back to the house third from the corner, Nick, the white one, and I'll give you the key. No, ma'am, don't move. I like ridin' on the runnin' board. Makes me feel like a boy. It's lucky I went up yesterday and aired her out. The bed's all made, ma'am, and they's extry blankets in the chest. I'll [illegible] you a jar o' milk and some eggs."

He continued to rattle on, planning for them as happily as if they had been his children. It was, perhaps, the best thing that could have happened to them at just that moment. It brought them back to a sane and normal world, after that torturing ceremony in the office of the Justice of the Peace. When they left, Mr. Bartlett waving a vigorous farewell from his front porch, they were themselves again.

"That old man does a lot of business with the bank," Nick explained when they turned a corner. "Rich as mud, he is, and quite a character. Mr. Maxwell used to send me over to get his signature, and for some [illegible] the old codger took a fancy to me. Don't know why, except that I used to jolly him. Once I spent a whole day with him at his camp. Oh, Gay! I hope you'll like it the way I did! It may alone—"

He stopped abruptly, and drew her attention to some budding violets. A silence fell upon them, but it was a silence of understanding, not constraint. Once, indeed, Nick lifted the hand that wore his ring, slipping it beneath his own upon the steering wheel and the act brought Gay a sense of security and well-being.

But they were children again when they explored the cabin. Nick declared that it was even more delightful than he remembered it, and insisted, with an ardent glance that brought color to Gay's cheeks, that the added charm was due to present circumstances.

"It's perfect," she agreed.

They had finished their supper and stood together in the doorway, looking down through the pines that guarded their hearthstone, to where green woodlands bordered on greener meadows where quiet lakes gleamed dully in the twilight, and mountains, blue and majestic, were silhouetted against the sky. The silence deepened. A star shone out—and then another. . . . Gay drew a tremulous breath.

"I feel like a bird in its nest."

Nick's arm went round her shoulders, drawing her closer.

"'A bird in its nest,'" he echoed. "Well—" He dropped the protecting arm, and faced her suddenly. "Gay—what have you thought of me all day? It came to me there in that abominable office, when—when you wouldn't look at me, that I hadn't behaved the way I should have. I suppose I was teasing myself a little. I didn't realize that I was teasing you as well. Do you remember when we were kids, Gay, and my mother'd sometimes take us on a picnic, how I always saved the choicest morsels for the last? I think, dear, it was that quality in my make-up, which kept me from kissing you today when I was tempted. I thought: 'I'll wait. Our first kiss shall be part of our wedding ceremony.' 'Ceremony! In that horrible place! Oh, Gay, don't you know that it hurts me as much as ever it hurt you? I thought: 'If only she'll look into my eyes I'll make her understand.' But you didn't look, dear, and—and of course I couldn't kiss you there! And when we got outside it was hard to speak. I was scared, honestly, scared of what you must be thinking. Gay—dearest—let's forget it, and—and—."

"Forget—our wedding?"

"Yes, if you call that miserable affair a wedding. I don't. I think it takes something more than a slovenly Justice of the Peace, and the signature of a gum-chewing girl and a vulgar little clerk, to make a marriage. God's a good enough witness for me, Gay; and I promise you now that I'll love you—and honour you—and be true to you, dear, 'until death us do part.'"

His eyes met hers in a long and steadfast look.

Mutely, she stretched out her hands, and holding them in a warm clasp against his heart, Nick kissed [illegible].

CHAPTER III.

A week later they were on their way, though strangely, it was Nick who protested at a change when Gay suggested that they had accepted Mr. Bartlett's hospitality long enough. She was seated on the ground beneath a pine tree, while the boy lay at her feet, idly running the brown needles through his fingers.

"But I could stay here forever!" he exclaimed, and his regret at leaving "The Bird's Nest," as Gay had christened their first stopping place among the trees, was so apparent that the girl smiled.

"Forever?" she queried. "And what's to become of the ends of the earth you were seeking?"

He straightened up, looking at her with what she secretly called his "new look"—not the comrade-look she had grown up with, but something dearer.

"It sounds rather far away—the ends of the earth," he admitted. "I won't say that it doesn't call me, but in the last week I've discovered qualities I didn't know that I possessed. Perhaps I'm becoming tamed! If I'd had the sense to discover you before, Gay, we'd be living contentedly in my late uncle's house on Elm Street, and you'd be kissing me good-bye each morning at eight-fifteen, when I started for the bank."

(To Be Continued).

Potatoes For Drouth Area

Through the generosity of North Battleford branch of the Canadian Legion, members of the Assiniboia branch who, through drouth are hard hit and in need, will receive assistance in the gift of a car load of potatoes, that have already been shipped from the northern city for distribution in the district.

CHILDREN CRY FOR IT—

Children [illegible] as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the [illegible] always bears Chas. H. Fletcher's signature.

Holds Unusual Degree

Canadian Girl Is Master Of Science In Aeronautical Engineering

Miss Elsie Gregory MacGill of Vancouver, can now write the letters M.S.E. after her name besides the more familiar B.A., and B.Sc., for she graduated not long ago from the University of Michigan in Ann Arbour, with the degree of master of science in aeronautical engineering.

When Miss MacGill entered the graduate school of Michigan, she already had the degree of bachelor of science from the University of British Columbia, and another degree in engineering from the University of Toronto.

Toronto fellow graduates will recall her as the only girl student at the school of practical science and when she graduated in engineering, a specially small iron ring had to be made for her finger, as none of the regulation pattern were of any use in this emergency. It was Miss MacGill's intention to be an electrical engineer, but later this young British Columbian turned to aeronautics.

Professor Felix Pawlowski, who holds the chair in aeronautical engineering in the University of Michigan, says that during her course at Ann Arbour Miss MacGill displayed not only admirable qualities of character, but also "rather an unusual ability for engineering in general." Her work was of such high standing and she was so generally appreciated by her professors that in spite of the fact that her health broke down a month before the end of her scholastic year, thus interfering with some of the duties assigned to her, "everybody, nevertheless was satisfied that she receive the degree."

Miss MacGill is particularly interested in design of aeroplanes, having already had a certain amount of experience in this direction which she acquired before going to Ann Arbour, and she is planning to continue this line of work with the aeronautical industries as soon as her health permits renewed activities.

The most interesting fact in connection with the brilliant Canadian girl is that she is the first woman on this continent to hold a degree in aeronautical engineering, "and very likely," says Professor Pawlowski, "the only one in the world at the present time." According to my knowledge, the professor adds, "there are only two women with proper theoretical training in Europe—one in England and the other in Poland—engaged in aero-dynamic research of rather mathematical character. These two women, however, have no degrees in aeronautical engineering."

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

Innovation On Liner

Passengers Can Talk Direct To Europe Or America

Direct conversation by wireless telephony from passengers' bedsides to Europe or to the North American continent whilst en route will be one of the principal features of the "Empress of Britain," gigantic Canadian liner to be completed June, 1931, according to W. H. Annable, assistant steamship passenger traffic manager, Canadian Pacific Railway.

It is expected that the 42,000-ton giantess will occupy only five days on the regular Southampton-Quebec run, and is scheduled for a cruise of the world next year.

Canadian Egg-Laying Contest

The pen of Barred Plymouth Rocks entered by Mrs. W. J. Thompson, of Birch Hill, Saskatchewan, continues to lead in the 11th Canadian Egg Laying Contest at the Dominion Experimental Farm in Ottawa, with a score of 1,770.1 points. The pen lead is now 66.9 points ahead of the nearest competitor, with only a few points separating the second and [illegible].

Visitor—"You seem to have been very lucky in your shipwrecks."

[illegible] would you believe it, I was once marooned on a desert island with a case of whiskey an' a chap 'oo was a staunch teetotaler."

Minard's Liniment For Chest Congestion.

New Paving Material

City Of Calgary Experimenting With Bituminous Sands

An experiment with bituminous sands from the Fort McMurray district in Northern Alberta was being tried in the city of Calgary public works, it was stated recently by Commissioner A. G. Graves, following a visit from a representative of the company which is exploiting the sands.

About 30 tons had been ordered, he said, and some of it was already in use for crossings, sidewalks, and so forth. It had been found necessary to mix it with sand and gravel according to a formulae decided upon by city chemists, but even with the added labor of mixing the product was very economical for the use to which it had been put. Commissioner Graves was not prepared to say anything just yet about the lasting qualities of the material, but said that it appeared to be giving satisfaction. Further experiments would have to be made before it was decided to extend the use of it to roads.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine healthy children, to whom when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels, banish constipation and indigestion, break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Riot Caused By Umbrellas

Indian Low Castes Carried Them For a Day

A job lot of western umbrellas and shoes caused a riot on the Laccadive Islands, 150 miles off the Malabar coast. The Koyas, or aristocracy of the islands, long ago decreed that they alone might go shod and carry umbrellas but when the western shipment came in the Malumis, or sailor caste and the Melacheris, who pick cocoanuts, decided to try dressing up. They picked 11 Melacheris and nine Malumis to defy the old edict and it was a gala day for the strutting low castes until the Koyas' chief heard about it and ordered out his spearmen. After the fight the mannequins found themselves in jail.

Minard's Liniment has a hundred uses.

There weren't so many complaints about hard times when a man didn't consider it a disgrace to go around with a patch on his pants.

"What steps ought to be taken," asks a writer, "to reduce the number of street accidents?" We suggest long, quick ones.

DEPRESSION

"I'm a different woman"

"Two years ago I began to be depressed, and everything was [illegible] much trouble for me. I [illegible] to myself and everyone [illegible]. I was advised to take Kruschen Salts by my friends who said it was the same as Kruschen but it did me no good, so at last my husband got me a bottle of Kruschen and no one would realize the different woman I am. I have been taking Kruschen now constantly for two years. My daughter also would not be without it. I have got my neighbour to take Kruschen as well and she has found its worth as she feels a different woman."

(Mrs. G. A. K.)

The commonest cause of depression is partial constipation, an insidious complaint because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirits, sap the nervous strength and lower the whole vitality.

Kruschen Salts make constipation [illegible]. If you keep to Kruschen you need never know the meaning of melancholy; never feel "nervy" or depressed.

Little Helps For This Week

"Whatsoever thy hand findeth to do, do it with thy might." Ecclesiastes 9: 10.

So the work that's nearest
Though it's dull at whiles
Helping when we meet them
Lame dogs over stiles.
—Charles Kingsley

Few are needed to do the out-of-the-way tasks which startle the world, and one may be most useful just doing common-place duties, and leaving the issue with God. And when it is all over and our feet will run no more, and our hands are helpless, and we have scarcely strength to murmur a last prayer then we shall see that instead of needing a larger field we have left untilled many corners of our single acre, and that none of it is fit for our Master's eye were it not for the softening shadow of the Cross.—George Macdonald

An Oil Of Merit. — Dr. Thomas' Eclectric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Up-Keep Is Expensive

Costs More To Run New York City Than Canada

The 1931 budget of New York City will amount to a new high record of at least $632,460,000 a survey of New York's expenses, past, present and future, indicated.

This would amount to $67,626,273 more than the budget for the current year and would be the greatest increase in the history of any city anywhere.

The entire governmental expense [illegible] was about $381,400,000 in round figures below the city budget that is expected in 1931.

Motorist: "That garage man says we're carrying entirely too heavy a load."

[illegible]: "Couldn't you throw out the clutch, dear?"

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm. Isn't it foolish to suffer any needless pain? It may be only a simple headache, or it may be neuralgia or neuritis. Rheumatism. Lumbago. Aspirin is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are always to be relied on for breaking up colds.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.

ANOTHER ONE CENT SALE FOR THE LAST THREE DAYS OF THIS WEEK

The one cent sale conducted by A. A. Beirnes at the local drug store was a great success, the volume of sales being larger than in a similar event last year. This was despite the exceptionally bad weather which prevailed last week. On account of the weather many people were unable to get into the sale, and because of very many requests to repeat the sale this week, Mr Beirnes is doing so. It is not often that these sale events are repeated and there will no doubt be a generous response to the opportunity to buy two for one plus one cent. This is a splendid chance to save money on standard remedies as well as on hundreds of other articles.

Imperial Conference Delegates Sail

The Canadian Pacific liner Empress of Australia might almost have served as a Cabinet Council room during its last voyage to England with the Prime Minister of Canada and several members of his cabinet as passengers. There was so great a crowd at the pier bee that photographers had to go to Father Point to get pictures of the party.

Above are several groups made while the ship was on her way. I. The Premier and his sister Miss Mildred Bennett shake hands with Captain R. G. Latta, commander of the Empress of Australia. II. Prime Minister G. Howard Ferguson of Ontario and Mrs. Ferguson. Mr. Ferguson said that while he was not attending the Imperial Conference he "hoped to listen at the keyhole." He will open the Ontario Building in London during his visit. III. Hon. H. H. Stevens, Minister of Trade and Commerce, who is an official delegate. IV. Hon. Hugh Guthrie, Minister of Justice, also a delegate.

PREPARING TURKEYS FOR WINTER TRADE

(Continued from page [illegible])

[illegible] warming feed moistened [illegible] so that it will be [illegible] swollen before feeding. [illegible] practice [illegible] a few hours before feeding [illegible] many digestive disorders [illegible] overcome. Water or sour milk can be used for moistening the mash and at feeding time it should be fairly solid, not sloppy or watery.

Feed all mashes in V-shaped troughs which should be thoroughly clean. Remove any feed from the troughs, which may be left over after the birds have satisfied their appetites.

[illegible] corn which has been properly ripened is about the best grain for fattening purposes at this season of the year. It is palatable and turkeys take kindly to it. New corn which is not ripe should be fed sparingly. Give the birds all they will clean up nicely before going to roost. Fresh water, grit and oyster shell should be kept where the birds can help themselves.

Where the turkeys can be induced to eat a mixture of whole barley and buckwheat with a little corn added at the evening meal the cost of the ration can be considerably reduced. Home grown grains should be used wherever possible.

Turkeys for the Christmas trade should be sent to market dressed. Starve the birds for twenty-four hours before killing, during which time they should be given all the fresh water they will drink. The water aids in cleaning out the intestinal tract and also aids in improving the quality of the flesh.

Bleeding is done by sticking in the mouth. Hang a can on the lower part of the beak to catch the blood. By passing the knife up through the roof of the mouth and giving it one turn thereby piercing the brain, plucking is made much easier. The bird may be cleaned of feathers, or in some cases the flight wing feathers and the main tail feathers may be left on. Plucking should be done as soon as possible after killing. The head and feet are left on, and the birds left undrawn.

The birds should be thoroughly cooled before being packed for shipment. Packing may be done in barrels or boxes, the birds being arranged closely together so as to prevent moving in transit.

The Anglican W.A. will meet on November 5th, at the home of Mrs. Giffen at 2.30.

Mr. and Mrs. Carlson and Son visited at Mr. and Mrs. Ed. Hicks over the week end.

Mrs. McLaughlin was a visitor to the city last Thursday.

Mr. and Mrs. Daily of Little Jem, near Chinook, were visiting Mr. Snell over the week end. Mrs. Daily being Mrs. Snell's sister.

Mrs. Emery and Mrs. W. Chapman are visiting the city this week.

Miss Hazel Ellis, who has been staying with her aunt, Mrs. Imler, returned to her home in the city last Tuesday evening.

Paul Thompson visited his home in the city last week end.

Bowling at the Calvert bowling alleys continue to be popular. Next week we expect to publish a table of [illegible]

A very enjoyable Hallowe'en party was held by the Tofield Young People's Association on Tuesday evening last. The basement of the United Church where the event was held was gaily decorated for the occasion. Games were played and a good time spent by all present. A first rate lunch was partaken of.

Fatten your poultry for the "Community Kill" on November 13th and 14th.

The Mercury installed a new job press this week. It was a little larger than we expected and there was a little delay in getting it through the doorways. However with the help of Fred Griswold and Sam Johnson who had to take off some of the parts, it was safely placed in position in the shop. The press is a high grade small cylinder press, and weighs 3600 lbs. Placing it in the office have made us late with the paper this week, and to make matters worse, on Wednesday afternoon the cooling tank on the engine sprang a leak, further delaying us. Mr. Coombes patched the tank and here we are.

Don't forget that the Tofield branch of the British Legion will have some Vetcraft poppies for sale on Armistice day. These poppies are made by disabled veterans and the proceeds go help their meagre incomes. It is both a duty and privilege to buy one of these sacred emblems of the great war.

MATTHEW McCAULEY, EDMONTON'S FIRST MAYOR, DIES AT SEXSMITH, ALTA.

Father of A. J. H. McCauley of Tofield

Succumbing to an illness of many months' duration, Matthew McCauley, age 80, first mayor of the town of Edmonton and one of the best known pioneers of Alberta, died at Sexsmith in the Peace River country early Saturday morning.

Mr. McCauley first came to Edmonton in 1879 and during his lifetime in northern Alberta was a member of the first Alberta legislature, mayor of Edmonton town, for the years 1892, 93, and 94, member of the school board for nineteen years, prominent in public affairs here for a quarter of a century or more and during the years immediately prior to his retirement, about 1912, warden of the Alberta penitentiary.

Mr. McCauley is survived by his widow, the second Mrs. McCauley resident at Sexsmith and by eleven children. They are: A. J. H., at Tofield, Frank at Aklavik; George and Jack at Sexsmith, Mrs. W. R. Howey and Mrs. A. Norquay of Edmonton, Mrs. M. Thompson of Moosejaw, Mrs. George Scott, Mrs. J. Stevenson of Quebec, Mrs. A. Poole at Sexsmith and Miss Maud McCauley at Hollywood at California.

Matthew McCauley was born on July 11th, 1850, at Owen Sound in County Grey, Ontario, the son of Alexander and Eleanor McCauley. He received his education at the public school in Owen Sound. Afterwards he became a farmer. Following that occupation, he remained in Owen Sound neighborhood until 1871.

In May of that year, he came west to Winnipeg, (then called Fort Gary,) and worked as a laborer until 1874, when he engaged in "teaming" for himself.

Later, he became operator of a draying and hack business, bringing the first hack to Fort Gary. He sold out his interest in 1907 and drove to Fort Saskatchewan, where he again engaged in farming, about a mile and a half below the Fort.

In 1881, he became a contractor and livery man in Edmonton, this business grew into the Edmonton cartage company which he sold in 1902.

In that year, he bought one thousand acres of land at Tofield and cultivated it for four years, after which he became warden of the Edmonton penitentiary.

Prior to this, he was a member of the first legislature of the province for the district of Vermilion.

Mr. McCauley first received public appointment in 1882, when he was made captain of the vigilance committee of Edmonton. This committee, acting against the "claimjumpers" hurled two shacks over the ravine near the town.

In the same year, he was one of the first to start the agitation for an Edmonton public school, and after a hard fight succeeded in bringing about the establishment of such an institution.

Mr. McCauley was a trustee of the school board for eighteen years.

During the rebellion of 1885, he served as a scout, doing much valuable work. He was also instrumental in the organization of the Edmonton home guard at this period.

In 1892, the town of Edmonton was incorporated, and Mr. McCauley's valuable public service was recognized in his election as its first mayor. He served in this capacity for three years. In 1863, he went to Ottawa and secured the first charter for a municipal street railway ever granted in the northwest territories.

He was a member of the assembly for the territories at Regina for seven years, his term expiring in 1902.

While there, in 1897, he introduced the single tax bill which was later universally adopted.

Out of his efforts in conjunction of those of Premier (now Sir Frederick) Haultain, has grown perhaps the most perfect school system on the north American continent.

Mr. McCauley was for 16 years either president or director of the Edmonton agricultural association. He retired from the wardenship of the penitentiary in 1912.

Mr. McCauley was first married in 1875 to Miss Matilda Benson, of County Grey, Ontario, his first wife died in 1896 and in 1902 he married Miss Annie Cookson of Manchester, England, who survives him.

In recognition of his valuable contribution to educational services in the city, McCauley public school was named after him. He was present at the school's seventeenth anniversary in March 1928.

Bardo

Born—To Mr. and Mrs. Per Bjornson on October 16th a daughter. Congratulations.

Mr. Bartness, of Pablo, W[illegible], is visiting with friends here.

Mr. and Mrs. D. Yoder were Edmonton visitors on Friday.

Bardo ladies aid met at the home of Mrs. A. Haukedahl on Wednesday last. A large crowd was present. Owing to the delay in threshing it was decided to postpone the Lutefisk dinner from November 10th to Thursday, November 27th.

Miss Borghild Fausbaug left for Vermilion on Thursday morning. She will remain there for some time.

Everybody is in the best of humor now that they have been able to commence threshing again.

Last Tuesday evening, October 21st, Mrs. Barbara Brenneman was pleasantly surprised when a number of friends called, the occasion being her birthday. An enjoyable evening was spent.

COMMUNITY POULTRY KILL

A "Community Kill" of poultry of all kinds, excepting turkeys will be held in Tofield on Thursday and Friday, November 13th and 14th. Birds will be killed dressed graded and paid for here. Grades will depend on the condition of birds and producers are urged to pen or crate fatten them preparation.

Full instructions for the successful fattening of poultry are being issued by the Department of Agriculture and those who have not already received them may do so by applying to Wm. Abernethy, Mrs. J. L. [illegible], Ben Anderson or Mrs. Baptist who will also be glad to give any further information available.

[illegible] your poultry for the community kill. The marketing of turkeys will be arranged for later.

ELECTRIC LIGHT FOR TOFIELD SOON

The [illegible] of men stringing the electric light wire have been busy in town during the past week and it will only [illegible] before the stores [illegible] residences who are going to use electric current will have the current turned on. At the present moment there are not so very many places [illegible] electric light but it is expected that in the course of time there will be a gradual increase in the [illegible] of users. Quite a few residents are signing up for current [illegible] able to [illegible] washing machines, electric radios and other household appliances. The garages are using electricity for power and for charging radio and car batteries.

Ketchamoot Items

Once again we are on deck with a few items, while news is scarce, work is going on normal again. Threshing started up again on Thursday after a week's delay. While the weather does not look very promising threshing is going on, no stop, for Sunday.

[illegible] Law and Nurse Wood made final innoculation trip to the [illegible] house on Tuesday.

Mrs. George Lawson returned home Tuesday evening after spending a few days with her daughter in Camrose.

Mr. and Mrs. Campbell who have been living in Jason Henderson's [illegible] moved into the Wildman house [illegible] week. They having the farm [illegible]

Mrs. Ardley motored to Camrose [illegible] afternoon, Mrs. W. A. Mo[illegible] accompanied her as far as [illegible]

Mr. and Mrs. J. R. Ingram and [illegible] were Sunday dinner guests [illegible] and Mrs. G. W. Sears.

Mrs. Sheppard came on Saturday [illegible] visit with her daughter Mrs. [illegible] Whillans.

[illegible] Molme and family were [illegible] of Mr. and Mrs. C. A. Ingram [illegible] day of last week. They were [illegible] way to Lacombe where [illegible] Astrid and Olaf remained to attend school.

The William Lee family motored to Edmonton on Wednesday. Mrs. Ray Lee accompanied them home after a two weeks' illness in an Edmonton hospital.

The monthly meeting of the M.A.S. will be held next Wednesday, November 5th at the home of Mrs. J. Apperty. A cordial invitation is extended to all.

U.F.W.A. NOTES

The U.F.W.A. held their annual birthday party at the home of Mrs. A. Dodds on October 21st. The entertainment which consisted of guessing contests etc. was enjoyed by all. A very delicious lunch was served by the ladies who were in charge of the refreshments.

The next meeting will be on November 13th at the home of Mrs. C. Baptist. Roll call is to be answered by "How to spend our winter evenings?" The paper is to be given by Mrs. Jas. Second and Mrs. D. W. Warner will speak about her recent trip to Australia and New Zealand.

Fatten your poultry for the "Community Kill" on November 13th and 14th.

What Does Your Work Mean To You?

In the current issue of a well known magazine there is an article bearing the title "Do You Ever Get Off On the Wrong Foot?" which discusses the problems of people who at some stage in their career come to the conclusion that they are square pegs in round holes. In a word, that they do not fit; that they have made a mistake in the choice of their business occupation or professional calling, and, as a result, are not making the progress they feel they should make and their abilities entitle them to make.

On the other hand, a daily newspaper is at present running a series of short sketches of men who in their boyhood or early manhood had ambitions along certain lines, but circumstances, environment, fate, call it what you will, decided otherwise, and instead of being what in those other days they "wanted to be," they have achieved success in radically different walks of life.

In this present period of world-wide depression, a temporary period when we are for the first time feeling and suffering the real aftermath of the Great War, doubtless many people are asking themselves the question, Have I got off on the wrong foot? Am I a square peg in a round hole? Should I make a change, abandon the business, trade or profession in which I am or have been engaged and try something new and different?

Possibly at this time farmers particularly may be inclined to indulge in such questioning as they contemplate the many vicissitudes which agriculture has undergone during the past two years as a result of climatic conditions, marketing difficulties and a selling price for their products below the actual cost of production. The present outlook may not look promising to them any more than it does to the city wage-earner. The question, however, which both classes must consider is whether, after all, any change would be better.

For example, if the man engaged in agriculture really likes farming and a rural life, and that degree of independence resulting from the fact that he is his own boss, preferring them to the limitations of a salaried position in town or city, the paid servant of others, and breathing the air of congested centres of population, then he has not made a mistake; he is not a misfit. Nor is the city man in the wrong place if on his part the open air life and activities of the farm and the less strenuous life of rural communities makes no appeal to him.

Possibly in both city and country and with men in all occupations and callings in life, some part at least of their dissatisfaction with their own condition is to be found in their failure to fully grasp all the opportunities of their present vocation.

In the magazine article to which reference has already been made, the story is told of a man in middle life who, dissatisfied with his position and the progress he was making, came to the parting of the ways. An orphan, forced to make his way at the age of thirteen, he took a humble position in a food commission warehouse. In course of time he became a salesman, acquired a family and a house worth four thousand dollars, and at forty-two was working long hours every day for forty dollars a week. An opportunity presented itself to become produce manager in a newly organized business at fifty dollars a week, but he was required to invest two thousand in the business. [illegible]

FALLING OFF IN MIGRATION FROM BRITISH ISLES

London, England.—There has been a pronounced decline in the number of assisted migrants who have left the shores of Britain for the Dominions in the last four years, according to figures submitted to the overseas settlement committee of the Imperial Conference. The less attractive economic conditions to be found in the Dominions in the last year or so was largely blamed for the drop.

State-aided migration to Canada in 1927 totalled 27,815 persons, while 20,136 went to Australia and 4,446 to New Zealand. Last year 21,815 migrants went to Canada, 11,565 to Australia and 1,869 to New Zealand. Of the three countries, it will be seen that Canada suffered least by the drop. It is explained further, that 27,000 additional persons went to Canada in 1929 under the ten-pound fare rate, which really reveals an acceleration rather than a decrease in the Canada-ward trek.

Today saw the Imperial Conference committees approaching the end of their task. A number of them are now entering the draft report stage and have cleared away routine work. The arbitration and disarmament committee, under Hon. Maurice Dupre, Solicitor-General of Canada, concluded its discussion of the British draft disarmament treaty submitted to the preparatory disarmament commission of the League of Nations.

It was mentioned recently that Prime Minister Ramsay MacDonald, of Great Britain, was holding informal personal conversations with the prime ministers of the Dominions separately in an endeavor [illegible]

Lake Winnipeg Tragedy

Two Fishermen Drown When They Leaped From Burning Tug Boat

Winnipeg, Man.—From the blazing deck of the tug "Magnus," four fishermen leaped into the chill waters of Lake Winnipeg, near Gimli. Two were drowned, and the other pair were dragged, half-dead, from the icy water by another tug which rushed to the rescue. The "Magnus" sank after a gasoline explosion shattered the craft from stem to stern.

The dead:

Captain William Bjarnson.

Engineer Joe Bell.

The rescue tug "Goldfish," summoned by frenzied blasts from the ill-fated "Magnus'" siren, saved Martin Johnson and Ole Kardell, surviving members of the crew. Bodies of Captain Bjarnson and Engineer Bell have not been recovered. The tiny gasoline-propelled launch-tug had caught fire below deck soon after it left Gimli on October 22, but the blaze was not discovered for some time, until it was too late to halt progress of the flames.

The "Magnus," owned by the Armstrong Gimli Fisheries Company, was northbound for the fishing waters at the far end of Lake Winnipeg. The tug, laden with fishing supplies for the winter, will be a total loss.

Embargo On War Munitions

President Hoover Will Not Permit Shipment Of Arms To Brazilian Rebels

Washington, D.C.—President Hoover has issued a proclamation placing an embargo on the shipment of munitions of war to Brazil except for the Federal Government at Rio De Janeiro. In taking this step, the president acted upon the request of S. Gurgel Do Amaral, Brazilian ambassador, and lined up the United States Government definitely against the [illegible]

THE TOFIELD MERCURY

W. Worton Publisher

A Weekly Newspaper Published At Tofield, Alberta

AUTOCRAT OF THE LIVERY STABLE—

THERE is being celebrated this year the three hundreth anniversary of Thomas Hobson. He lived at Cambridge and gave to the English language the phrase "Hobson's choice". The words have passed into our common speech, because, to be faced with "Hobson's choice" was common practice. Thomas Hobson was a livery stable man who let out horses to the young bloods of Cambridge University. When they came for horses this cute stableman allowed them no picking or choosing. Take the first horse in the rank or go without. It was Hobson's choice.

The Hobson choice attitude has its advantages and its drawbacks.

One of the delights of buying, whether of a gift for a friend or a necessity for one's self is the pleasure of choosing. What a thrill we had as children when we stood before some array of sweets or toys and were told that we might choose one! Of what pleasure we should have been robbed had it been Hobson's choice!

Yet the positive taken up by the dour Thomas Hobson of Cambridge 300 years ago has something to commend it. The "strong, silent man" may be more a creature of fiction than of fact, and in any case overrated. But a touch of the "firm mouth and strong immobile jaw" is often a valuable asset. Now and then within the velvet glove it is necessary to use, with wisdom, in the affairs both of nations and men, that iron quality which was the trait of that stableman at Cambridge. The lively young men of the varsity soon recognised that Tom Hobson was no man to be trifled with. They might look longingly at the glossy chestnut colt in the middle, or the spirited black steed at the side, or the smart cleaned-legged bay horse in the further stall. But no; it was Hobson's choice. They could take it or leave it, and no doubt they took it and rode blithely away.

EXTRA SLICES—

Some mathematician has figured that one needs to eat only three extra slices of bread each day, to do his bit toward taking up the slack in the production of wheat. Thus simply a great economic problem is solved. Overproduction would be eliminated by overconsumption. How much more attractive is the concrete proposition to eat three extra slices of bread a day than the somewhat abstract proposal of creating a larger demand, although, of course, one is increasing the demand when he asks the host of the table to "please pass the bread" for three extra servings.

But what is going to happen when the cabbage crop shows a surprisingly large overproduction? Are the people of the country to be called upon to eat a couple of extra cabbages a day, or are they to be urged to have a New England boiled dinner every day for a month? There are times, too, when the onion crop may be more than enough for the optimum consumption of the people. Think of pressing a proposal of "an onion a meal" and its effect upon the nation. Supposing several crops are overproduced in the same season and one is called upon to insert between his "regular meals" each day an extra luncheon of two slices of bread, two boiled onions, a cabbage and a couple of yellow turnips?

WINTER FEEDING OF DAIRY HEIFERS

(Experimental Farms Note)

The feeding and management of the growing heifer determine to no small extent the future value of the cow. The dairy heifer must have a well fed and care in order to grow and to develop properly. A heifer that is under nourished and possibly stunted cannot develop into as profitable a dairy cow as one that has been grown and developed under the same method of feeding and management. Heifers fed on a liberal ration will mature earlier than if fed on a scanty ration and will make larger cows hence the reason for small cows in our herds usually is scanty rations when young. Heifers make better producers than those which have been neglected.

Here pastures and short milk are not cold unit common feed for calves, nor is it good business in herd development to expect the young cattle to winter on straw and straw. The winter ration of the dairy heifer should be both at least as by the time she reaches one succulent feed, and grass. The cheapest, surest and most satisfactory way to provide succulent feed for winter use, is by means of silage.

At the Dominion experimental station, Lacombe, Alta., it is the aim to grow the heifer rather than fatten her right up till she commences to freshen. Accordingly, a liberal ration of all of the parts of oat hay, oat straw, turnips, one pound barley chop, with a small handful of oil-cake meal at each feed is fed to the dairy heifer during the winter months. The roughage for the most part consists of oat straw and timothy hay, with a few turnips. Sweet clover, and western rye grass hay, occasionally take the place of timothy hay or oat straw. Succulent feed are fed in addition to give a little variety, stimulating palate work, and also to keep the digestive organs in good condition. The heifer's appetite and grass all-round in such a manner as to keep the heifer growing steadily. Salt is fed regularly and fresh water is available in bowls at all times.

For exercise the heifers are turned out on a paddock in the morning, excepting during stormy and unusually severe weather and at night are stabled in a well ventilated, well lighted and moderately warm stable.

By following this general practice Hobson two-year-old heifers when ready to calve will weigh normally 27 to 30 months of age usually weigh from 1000 to 1050 pounds. The result for raising a heifer to two years of age, at the Lacombe Experimental Station, Lacombe, is around $65.00.

SOMETHING NEW IN INDUSTRIALISM

Employment Service Council plans to solve unemployment difficulties by stimulating public works construction may bring temporary relief but permanent relief can come only through concerted action of all around industry to regularize production.

This is the opinion of Stanley I. Shaler, superintendent of the Hamilton, Ontario, plant of the Provincial Gamble Company. He is administrator of the Procter and Gamble plan of guaranteed employment which has kept its force steadily at work despite so-called economic depression.

The soap company has scheduled its production to maintain a steady year round force of workers in its 14 families and dependents. This gives employees a guarantee of at least forty-eight full-pay weeks a year in Hamilton and the other plants, without fear of lay-off due to recession.

The plan has had seven years testing, says Colonel William Cooper Procter, president of the company announced in August, 1931, that for the first time in industrial history a large corporation could assure its thousands of employees steady work regardless of seasonable fluctuations which in so many instances cause periodical shut-downs.

The basis of the plan is simple. Probable production for the coming year is estimated on the basis of the past year's demands together with a study of factors which are likely to affect consumption. Production is then regulated to meet the estimated consumption. Errors of estimate have so far with the Procter and Gamble Company been negligible. Variations between demand and supply are compensated for by means of warehousing and controlled deliveries to dealers.

An employee becomes eligible for the guaranteed plan at the end of six months. Under this system, the hourly turnover at the Hamilton plant was less than seven per cent. Of this, the greater part represented the workers who had been there less than six months.

From the points of view of management and employees this regularization of production and employment has succeeded, according to Mr. Shaler, who points out also that the greater and Gamble industrial relations program is perhaps the most complete in the world because in addition to guaranteed employment there is a profit sharing, insurance and sick benefit plan, and employee representation on the company's board of directors.

Colonel Procter, originator of the plan, has said "greater efficiency, elimination of waste, lower unit costs, and increased effectiveness and loyalty of workers have resulted. While the advantage earned be solid dollars and cents a financial item effected. I think there is peculiar in the soap business that makes such a plan more adaptable to it than many more industries. I believe that on the very great variety of industries this arrangement would be approximately the same, without much fluctuation from year to year, and that the problem of providing for distribution and warehousing is not a difficult one to work out if study is centred upon the special industry."

PUNNYISMS

UNDER CONTROL OR NO CONTROL?

UNDER CONTROL: with beer being sold by reputable licensed hotels under government supervision.

NO CONTROL: with bootleggers running rampant as in the old prohibition days.

REASONS WHY YOU SHOULD NOT SIGN THE PROHIBITION PETITION URGING THE GOVERNMENT TO ABOLISH THE SALE OF BEER BY THE GLASS OR BOTTLE, THUS DOING AWAY WITH THE BEER ROOMS, CLUBS AND CANTEENS.

1. The proposal to disturb the act comes from a small body of people whose social theories have not withstood the test of actual experience.

2. The Trades and Labor Congress are on record as being in favor of the sale of beer-by-the-glass.

3. By virtue of the local option provisions of the act, communities may extinguish a license when a majority of public opinion so expresses itself.

4. No license has been withdrawn as a result of a local option vote either in 1929 or 1930, though licenses attacked were at points where conditions appeared to the prohibitionists, as favorable to a dry result.

5. In a total of 58 local option votes taken since the act came into force only four licenses have been cancelled as a result of votes; and these licenses were, in every case, adversely affected by peculiar local influence.

6. Absence of criticism at the last two provincial elections.

7. Hotel accommodation, particularly at country points, has improved as a direct result of the act, to a standard unequalled in any other province.

8. The general endorsation of the act by the travelling public and the willingness of the public generally to assist in enforcing the act by giving information regarding infractions and intensifying those needing protection from their own weakness.

9. Bootlegging and moonshining have been eliminated as remunerative pursuits. This, together with strict government control, has placed all intoxicating liquor beyond the reach of minors; fewer cases of intoxication in the police courts, in spite of a considerable increase in population. Leave the police of the province free to perform their natural functions, that of protecting the people, not taking up their time trying to enforce what has proved to be unenforceable legislation. Remember you cannot legislate men's minds, because they will never obey a law they do not respect. This was proven in prohibition days.

10. The operation of the act provides a large public revenue ($4 cents of every 10c. expended) this has helped to increase the general revenue of the province and prevents increased taxation. Formerly such revenue went to the bootleggers and moonshiners.

11. Official reports commend the act as eminently practical. They contain no important criticism of the act's clauses. Police reports indicate a continuous improvement in the general state of law and order.

12. The real motive prompting the petition is to render the act unworkable by eliminating the retail sale of beer-by-the-glass or bottle; the ultimate aim being a return to total prohibition.

IF THE BEER ROOMS AND CLUBS ARE ABOLISHED WHAT DOES THE PROHIBITION PARTY SUGGEST TO TAKE THEIR PLACE? IS IT TO BE LIQUOR FOR THE WEALTHY AND PROHIBITION FOR THE WORKER?

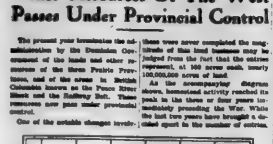
THE MODERATION LEAGUE OF ALBERTA

W. N. U. 1931

Administration Of Lands And Other Resources Of The West Passes Under Provincial Control

The formal transfer of the administration by the Dominion Government of the lands and other resources of the three Prairie Provinces, and of the areas in British Columbia known as the Peace River Block and the Railway Belt, Peace River Block and the Railway Belt, Peace River, to the provincial governments now goes under provincial control.

One of the notable changes involved is that the historic Dominion homes stead policy will give way to a much less generous one than has been found in the several provinces concerned. For nearly sixty years the homestead regulations has played a cardinal role in the disposal of what have been known as "Dominion Lands," and in the advance of Canadian development. Since 1908 nearly 40,000,000 acres of land have been made, and while many of these were unoccupied with a residence, the homestead regulations have been the most liberal ever framed by any country. For example, the pre-War period, generally speaking, has witnessed only a moderate degree of homesteading activity. The rise and fall of homestead entries is comparable to Liverpool or anywhere else, as some people have seemed to fear. This year's Dominion crop is considerably larger than last year and it is of a particularly high quality. This will undoubtedly have a very beneficial effect upon other things being equal and prices should be per bushel. Canada's wheat should take the lead on all buying markets, owing to its fine quality. All things considered, therefore, there seems to be every reason for hoping that a fair organization to adapt the land to the world's main wheat, supporting more wheat and wheat flour than any other nation on earth. Toronto Mail and Empire.



A New Yorker On Canada

Points Out Several Points Of Superiority Over U.S.

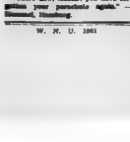
Charles Johnston, who is one of the most scholarly of New York reviewers, contributes an article to the New York Times Book Review on the Cambridge history volumes on Canada and Newfoundland. He gathers from "this authoritative study" that the Canadian view of America as an adjunct has a certain definite atmosphere, which may perhaps be described as modest superiority. Not that there is any boasting. The points of superiority simply emerge in passing. For example, we are told some place by the year 1492, numbering its signatures by an annual holiday. The Canadian date is 1473, when John Scalp the Dane reached Canadian territory in the region of Labrador. We commemorate the founding of Jamestown in 1607, and of the Pilgrim State in 1620. But the year 1534 marks "the birth of Canada." Again we celebrate July 4, but here also, Canada outstrips us, for July 2 is the birthday of Quebec, in the year 1608. Finally the fact stops out that the area of Canada is greater and may thus that of the United States including its dependency Alaska. Incidentally it may be added that greater than Brazil, the third largest country in the Western Hemisphere.

Canadian "Paper"

Small Fresh Water Lakes Found Above Coast Of Arctic Ocean

Plague are conical sand or gravel hills which rise sometimes as high as 100 feet above the swampy ground skirting the shore of the Arctic Ocean, particularly that part of the coast contoured from the Mackenzie River to Cape Bathurst in the North West territories of Canada. The scientific are believed out like a crater, and always contain a small lake of fresh water. As all the lakes in the vicinity are more or less brackish the natives have been known to walk long distance to get their drinking water from the pingos. The origin of these hills remains an unsolved puzzle.

A recent wild-life census indicates that more than a million game animals live in the national forests of this country.



Absent-Minded Professor Of Textiles: "There now, Arabel, you have forgotten your parasol again."—Punch, Hamburg

Disturbing Nature's Balance

Minutemen Results Often Follow the Introduction Of Insects Or Animals From Foreign Climes

A scientist of the Academy of Natural Sciences of Philadelphia brings to light "the world-wide menace of nature." Members, the offspring of animals supposed to have been liberated by sailors or slave traders many years ago, and the mongoose, brought from India in hope with an excess of rats and snakes, are both said to have proved to be such an asset to the birds and their nests that certain species of the birds have been virtually exterminated or driven to other localities.

One of the best known instances of the disastrous results of the "artificial spread of the balance of nature is found in the rabbit pest in Australia and New Zealand. These animals, introduced originally for food or for sport, have increased to such an extent that great areas have been spent in a vain effort to exterminate them. Such occurrences justify the skepticism that is always voiced when insects or animals are brought from distant climes to cope with pests. There is always the peril of creating a new and more serious pest.—New York Evening Post.

New Machinery Needed

Development Of Flax and Hemp Making Machinery Offers Opportunity

In handling crops such as flax and hemp where so much labour is involved, the need of new machinery that will lower the cost of production can not be overemphasized, observes the Fibre Specialist of the Dominion Department of Agriculture, in his annual report. Special attention is now being given to the processing of flax and hemp at the present time, and it is expected that some way of speeding up production in scutching and rotting will soon be found. The development of flax and hemp working machinery provides one of the greatest opportunities to Canadian enterprise at the present time.

Good Business

Seeing a sign in a window reading "Ice Cream," young Gosling went in and laid the coin behind the cash fountain of the soda-parlor. "Has anyone told you of it before?" Gosling asked.

"Hundreds," replied the clerk. "But whenever they stop in to tell us, they always spend something. What'll you have today?"

Conscience Wakes Up

It is not only evaders of income tax who sometimes become conscience stricken and make restitution after the lapse of a long period of time. At a recent meeting of the Vancouver public library board, the librarian reported that 24 books which had been stolen from the library in 1926, had recently been returned.

The oyster may be dumb in some ways, but it has some enough to get a four months' vacation.

Conference For Wheat Growers Of Canada

Ex-Canada Will Participate Says Visit Informed Bank Official

There is reasonable cause for Canadian wheat growers and, therefore, for the whole of Canada in the revival of world market conditions given to the French Head and Empire by Mr. E. P. Alley, assistant general manager of the Canadian Bank of Commerce. Mr. Alley has charge of the bank's business throughout western Canada, and on his return, consequently to speedily well-informed regarding the wheat export trade, his remarks upon the existing situation may be accepted as authoritative. Without presuming to speak dogmatically, he points out several influential factors in the marketing developments of recent months. One of these factors is that the high prices which prevailed for wheat not so long ago induced an over-production of that commodity throughout the world. It brought into the field countries where the cost of production is high, and which could not profitably produce wheat for sale at normal quotations. Another thing is that in spite of prices so high that they discourage consumers, Canada last year sold more than the year's entire crop. Marketing purposes have improved in the importing countries of Europe and also in Japan and China. Nor is Canada wholly sorry to be so important a competitor in Liverpool or anywhere else, as some people have seemed to fear. This year's Canadian crop is considerably larger than last year and it is of a particularly high quality. This will undoubtedly have a very beneficial effect upon other things being equal and prices should be per bushel. Canada's wheat should take the lead on all buying markets, owing to its fine quality. All things considered, therefore, there seems to be every reason for hoping that a fair organization to adapt the land to the world's main wheat, supporting more wheat and wheat flour than any other nation on earth. Toronto Mail and Empire.

Horse Standard Improving

Better Class Of Hunters and Sweepers Being Bred

Both in number and in quality the situation in Canada as regards breeding pure-bred horses is improving, it was stated by Lieut.-Col. Frank Moss Toronto, secretary of the Canadian Horse Buddle and Light Horse Improvement Society, who spoke on the work of his organization to delegates of the Canadian Cavalry Association in annual convention at Ottawa.

Colonel Moss said the society, with the aid of government grants, was generally making progress in its aim to improve the class of pure-bred stock in the breeding of hunters. Practically 50 per cent. of all hunters bred on farms were suited for cavalry work, he said.

New Style Railway Coach

A railway coach, shaped like a Zeppelin, with a 300-horsepower aeroplane motor and driven by a propeller, was tested on a five-mile stretch of rails near Hanover, Germany. Carrying 20 passengers, it attained a speed of 95 miles an hour within a couple of minutes after starting. Machines of this type may be used on regular rail lines for fast passenger travel.

"Your long bus blocker been interried?"

"For twenty novel years."

Highway Expenditure

Saskatchewan's Appropriation Of Two Millions For the Year 1930 Now Spent

Saskatchewan's 1930 highway appropriation of $10 000 000 originally has been suspended as the programme submitted and passed through the legislature by Hon. A. C. Stewart, Minister of Highways, means completion of the $2,000,000 voted by the House at the last session. $9,377,- 000 has been expended to date and the remainder will be used on work to be done this fall, according to a statement issued by Mr. Stewart. In the amount expended is $300,000 for new bridges, $250,000 for tourism, and $370,980 in connection with relief road camps.

Sun Will Light Him

Next Summer Will Be Used To Warm Visitor's Home

A suggestion that the heat made from the rollers of the World's Grain Exhibition and Conference of the co-operators by the Duke of Devon- shire to the invitation to participate in the world's grand show to be held at the time of the 1932 world-wide event.

The exhibit will take the form of a display of varieties of Home bred race and gluttonous rice. In addition it is highly probable that an officer of the agricultural ministry will visit Regina in charge of the exhibit. The question is now under consideration by the ministry, according to Mr Bulter's communication.

With the acceptance by Sasan of the invitation to take part in the world's grain show in 1932, the total number of countries already accepting the invitation of the organization reaches ten.

Eire, which will form the exhibit of the Slam Kingdom at the Geneva grain exhibition and conference in 1932. Forms the chief product of the country, being the national food and staple article of export. Over $75,000,000 worth of rice was exported from Slam last year to different parts of the world some 30,000,000 acres of land being given to rice cultivation.

Number Of Farms Reduced

United States Census Bureau Records Decrease Of 54 For Year, Since 1920

A reduction in five years of 71,703, or 1.2 per cent, in the number of farms in the United States was reported by the census bureau on the basis of complete returns from the 48 states and the District of Columbia.

The farms, which, under the census bureau classification, include all tracts of land used for agricultural purposes with annual sales of more than $250 or producing crops valued at $250 or more, totaled 6,247,077 as compared with 6,371,640 in 1925, when the last census of farms was taken.

There was a decrease of 2.1 per cent. in the number of farms since 1920, when the total was 6,446,343.

Canada Is Anxious For Penny Post Re-Establishment Throughout The Empire

Victory In Sight

Postal Rate a General Use Troubles Boys Bolt-Snapout In England

It is to the splendid advertisement of a form of (by a stronger commodity), map manufacturers that we owe the sudden general awakening to the worldwide significance of many Toad advertisements brought to our notice a fact of the utmost value hitherto overlooked. The fact was the Soap teachers boys and support Even though it not entirely referred only to one kind of soap, I find it impossible to exaggerate the immediate and salutary effect the announcement had upon the national attitude. Crabby boys throughout the country were sternly commanded to wash, boys who had already washed were sent to wash again. A wave of self-respect began to sweep over the youth of England. Legions of astounded but appreciative accountants and dears and recorded, in letters to the manufacturers concerned, their grateful assessment of the way in which not only self-respect, but integrity stirring words, purity, benevolence, sport-mentality, kindness to animals and extraordinary mathematical ability began to show themselves in lads as soon as they began to wash with soap.—From G. K's Weekly

BECOMING FOR MATRONS

All Tingey models are created and fitted in Paris and the patterns are made in New York.

Some of the prevailing fashions and favored lines are very adaptable for the large and portly figure. There is a real slenderness about many of these models and quite a number of jaunty, lively, giving and slimming touches. Today we show you three models, slenderizing a variety of ways. One of them is a double pointed and jaunt effect which the average full figure will find becoming.

You can carry the model out in crepe-de-chine, mousseline de crepe, georgette, very supple chiffon velvet, ribbon velvet, moire, georgette brocaded with velvet weaves or satin. The model can be plain or patterned according to one's fancy. If a woolen dress is selected, then wool georgette which has a mat surface will be found satisfactory and flattering to the heavier figure.

Pattern 7270 may be obtained in sizes 14 to 20 and 36 to 46. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) in Canadian Pattern Service, Winnipeg and pattern your name and full address, the number of the pattern and the size you want.

Rent Control

Fifth Of Section Of Studies In Plant Diseases

One of the most useful publications which has been published by the Federal Department of Agriculture recently is the fifth in the series of studies in plant diseases being carried out under the direction of the Dominion Botanist. This study deals with "Control methods for diseases of cereal forage and fibre crops" It contains the latest findings of the Dominion Research Laboratories of plant pathology at Winnipeg Saskatoon and Ottawa. The subjects dealt with include not only general rules useful in the control and eradication of cereal diseases, but specific recommendations for the treatment of a wide variety of specific cereal diseases. The crops dealt with include wheat, oats, barley, corn, millet, flax, sunflowers, alfalfa, sweet clover and common clover. This circular, No. 123 New Series is available without charge on application to the Publication Branch of the Department at Ottawa.

Agricultural Saskatchewan

30,000,000 Acres Of Land Under Cultivation in the Province

Recent reports show that the Province of Saskatchewan has grown from 50,000 farms in operation with 2,500,000 acres in crop when the province was organized in 1905 to 114,000 farms with 30,000,000 acres under cultivation at the present time. Also the province is now organized along agricultural lines, has a good having 50,000 members while several other co-operative societies are operating to the benefit of the producers.

A Labor-Saving Device

Canada is making a bid for the re-establishment of penny-post throughout the Empire Representatives have been submitted to the communications committee of the Imperial Conference on behalf of Canada, it is understood, urging

(1) Re-establishment throughout the Empire of the penny post

(2) Establishment throughout the Empire of a uniform rate for air mail

(3) Reduced rate on parcel post throughout the Empire

Canada already grants penny post on letters sent from Canada to all parts of the Empire but the other Empire units have so far failed to reciprocate the action. While the letter rate from Canada to Great Britain is two cents, the rate from Britain to Canada remains at three cents.

When Canada returned to the penny post some years ago there were strong protests from British commercial interests that the British post office should follow suit. The reply was then made that in view of the financial situation of the post office it would not be in a position to meet the estimated loss in revenue.

In regard to uniform air mail rates in the League of Nations reduced parcel post rates the Canadian representatives are understood to have expressed a willingness to co-operate with Britain and the other dominions in bringing this possible to pass by the use of air mail. There it is felt like a great field which Canada is rapidly developing for the faster transit of mails. It is further urged that reduction of parcel post rates within the Empire would do much to stimulate Empire buying.

A MILLION FAT FOLKS CAN'T BE WRONG

And that's a low estimate of the number taking Kruschen to keep down superfluous fat.

When you take vitalizing Kruschen Salts for a few days that old indolent, worn-out feeling deserts you — it doesn't matter how fat you are — the urge for activity has got you and you're stepping lively.

And best of all you like that activity — you walk a couple of miles and enjoy it — you thought you'd never dance again, but you find you're getting as spry as ever — the old tingling, active feeling reaches even your feet.

Kruschen is a combination of the six salts Nature has already put into your body to keep you alive — if it were not for these vital salts you could not live.

One bottle is enough to prove to you that Kruschen will make you feel younger, spryer, more energetic — you'll enjoy life every minute of it.

A half teaspoonful in a glass of hot water every morning is all you need to keep healthy, keep your stomach, liver, bowels and kidneys in splendid condition, free your system from harmful toxins and acids.

WORLD HAPPENINGS BRIEFLY TOLD

Forty nations have agreed to send delegates to the first International Air Security Congress in Paris, December 10 to 23.

The British Government has announced that the official census of population, taken every ten years, will be made on Sunday, April 26, next.

The prospect is held out that there may be a reduction in the United States tariff rate in the Canadian delicacy maple sugar before the sap begins to run next spring.

A woman Miss L. R. Purser, Maidenhead, England, has won the King's silver cup for the best cultivation of root crops, at the East Berkshire Agricultural Show for the first time in 90 years.

Relief Activities

Hon. Howard McConnell Reviews Relief Work In Saskatchewan Drought Areas

Details of relief activities in the dried-out areas of Saskatchewan undertaken by the Provincial Government and by the municipalities affected, with governmental aid are given in a statement issued for publication by Hon. Howard McConnell, Provincial Treasurer and Minister of Municipal Affairs in the Saskatchewan Government. Text of the statement follows:

"In connection with relief given to farmers in the dried-out areas of our province last year the Provincial Government distributed $919,000. This was made up as follows:

1	Freight paid by province on fodder shipped to such areas	$450,000
2	Relief roads built by province in such areas	$350,000
3	Relief provided by Government for flour, fuel and fodder together with seed grain in Local Improvement Districts in such areas	$119,000
	Total	$919,000

The rural municipalities in such areas contributed $1,984,000 for the relief of farmers in such areas, particulars of which are as follows:

1	Sums advanced by municipalities to farmers within their borders for relief purposes to purchase flour, fuel and fodder	$1,710,000
2	Sums advanced by municipalities to farmers resident within their borders for seed grain	$ 204,000
	Total	$1,984,000

"Urban municipalities received from the Government for unemployment relief, $30,000. The Provincial Government guaranteed the repayment to the banks of all loans made by the banks to such municipalities to enable them to dispense such relief.

"This year again, the major portion of the municipalities suffering drought last year, are again experiencing adverse conditions. The position of a great many of the people residing in such areas is serious. To assist the farmers in these areas this coming fall and winter, the Government ...

SIMON PETER—FROM WEAKNESS TO STRENGTH

Golden Text: "Now when they beheld the boldness of Peter and John, and had perceived that they were unlearned and ignorant men, they marvelled; and they took knowledge of them, that they had been with Jesus."—Acts 4.13.

Lesson: Mark 8.27-30; Luke 22.31-34; John 18.25-27, 21.15-17.

Devotional Reading: Philippians 2.1-11.

Explanations and Comments

Peter's Great Avowal, Mark 8.27-29.—"Who do men say that I am?" Jesus suddenly asked His disciples when on their way to Caesarea Philippi. "John the Baptist," they answered, as Herod the tetrarch had said, Matthew 14.2; "and others, Elijah (Matthew 7.10; Mal. 4.5, 6); but others, One of the prophets." "But who say ye that I am?" Jesus next questioned. "A photographer makes his sensitive plate, exposes it to just the rays of light that he chooses, dips it into the proper solutions, and holds it up to the light to see if his picture is there. What else did this Great Teacher do on that day but hold up these souls to the light to find out if the reflection of the Son of God were fastened there?"—J. M. Stifler. And Peter answered for all the disciples, "Thou are the Christ."

Peter's Over-Confidence, Luke 22.31-34. "Simon, Simon," Jesus solemnly said, "behold Satan asked to have you, that he might sift you as wheat." And then Jesus assured Peter that He had prayed for him that his faith [illegible] not fail. "And do thou, when [illegible] thou hast turned again (recovered from thy failure), establish (encourage) thy brethren."

"Then Jesus sadly foretold Peter's yielding to the temptation awaiting him: before the crowing of the cock, before the dawn of day, Peter would three times deny that he knew his Lord.

Peter's Sin, John 18.25-27.—After the arrest of Jesus, Peter followed Him to the palace of the high priest and was standing in the inner quadrangle before a brazier of coals warming himself when he was asked if he were not one of Jesus' disciples, and he denied that he was. One of the servants of the high priest, a kinsman of the one whose ear Peter had cut off at the arrest in the Garden of Gethsemane (Matthew 26.51), said to him: "Did I not see thee in the Garden with Him?" Again Peter denied, and immediately he heard the cock crow. "In that moment Simon Peter was etched into an everlasting picture." F. W. Norwood.

"Alone and crushed, his enemies close by,

With hasty speech Peter denied ...

CHAPTER III.—Continued.

"Thank goodness then, that you didn't discover me before!"

"Is it so awful—kissing me?" asked Nick.

"It would be awful kissing you good-bye," answered his wife demurely.

"For that," he said, putting his arm about her, "you shall have another!"

"Gay," he continued with mock severity, "we're downright piggy. I wouldn't have believed we could behave so. And I suppose you're right. We've sponged on Mr. Bartlett long enough. Say, let's ask the old man up to supper. It would tickle him to death ...

... so it's my advice for you to go straight home and make it up. I——"

"You needn't worry a minute about that," Nick interrupted, and Mr. Bartlett brightened perceptibly.

"'Tain't a good thing to quarrel with yer folks," he continued, sinking back comfortably in his chair. "I wouldn't advise it ever, though they's times when families act awful persnickity. But it's no way to begin life—runnin' off an' gettin' married secret like. 'Tain't a good thing to remember. You got to think o' that, boy. Everything you do now—every darn mean thoughtless little act'll come back to you when your work's done, and you got time to set down and think it over. Once when I wa'nt more than six year old I cheated at an egg race. 'Twas at a Sunday School picnic. I didn't hardly know I was cheatin' till afterward; but I took the prize (it was a whistle, ma'am, hung on a red silk cord), and I ain't never been able to forget it. Well, I'm glad you ain't quarreled with yer folks."

"We have none to quarrel with," said Nick.

... you might say, always bein' sure o' my old woman, and signin' the pledge at twelve year old. Do I smell chowder, ma'am?"

"That sounds," laughed Gay, "like a gentle hint for supper. Shall we have it here on the porch?"

"That would suit me fine, ma'am. Me and my old woman used to set here summer evenin's. Sometimes the hermit thrushes would sing for us. We called 'em our orchestry, and a darn sight prettier music it was than what comes out o' the brass band over to Miller's Falls."

"We'll agree on that," said Nick. "They sang the night we came here. I told Gay it was a bridal chorus, sung specially for us."

"And I don't doubt it was, sonny," said the old man gently. "You run along now and help your missus dish up supper. You don't need to make company o' me, and I ain't one that b'lieves a man's place is on the front porch while his wife is rastlin' with the kitchen stove or the dish pan."

"Nor am I," said Nick, rising to obey. "You can ask Gay if I'm not a champion dish-washer."

It was a festive little supper, and Simeon Bartlett pronounced his hostess a "first class cook," a tribute that brought the happy color into Gay's cheeks, and a proud light to her husband's eyes. Later when the world was drenched in moonlight, they escorted Mr. Bartlett home.

"I've had a real good time," he said in parting. "Don't know as I've enjoyed anything so much since my old woman went away. Stay as long as ever you're a mind to, but not a minute longer. I know how 'tis. Once I had that longin' to see new things myself; but it's long years now since home seemed the best place of all. Gorry! if it wa'n't for all the things I've got to remember, I'd a'most envy you, startin' out with the whole o' life before you. Goodnight, youngsters; and don't you go forgettin' the good advice I give you."

He chuckled, but Nick said soberly: "I shan't forget, sir."

"Nor shall I," Gay promised. She laid a gentle hand on the old man's. "If I don't make Nick happy it won't be because I forget your warnings, and—I thank you."

Matrimonial Ad In Japanese Paper Is Very Tempting

The matrimonial advertisement has recently been introduced into Japan, and we have just seen the translation of a quaint specimen. It runs:

"I am a beautiful woman. My curly hair is like a gentle wave. My figure is supple as a reed, and my skin soft as silk. I possess a large enough fortune to go safely through life at the side of my beloved. If it were my good fortune to meet an honorable man, well-bred and intelligent, I would remain always kind and obedient to him, and would happily share with him eternal repose in a tomb of rose colored marble."

All very tempting even to the offer of the rose-colored marble tomb which would appeal to the Japanese rather than to the British mentality.

A Satisfactory Arrangement

Michigan Barbers Accept Wheat In Pay For Haircut

The barbers of Sparta, Michigan, have agreed to cut hair for wheat. For one bushel of wheat any farmer living in these parts can obtain an artistic hair cut and 27 cents cash [illegible].

The decision to accept wheat instead of money was reached at a meeting of all Spartan tonsorial artists at which the present plight of the agricultural industry was discussed. Wheat is selling here for 67 cents a bushel and a trim is valued at 40 cents.

Chickens belonging to Sparta barbers will benefit by the offer.

MANITOBA PREMIER ADMITS GOVERNMENT MAY LOSE ON POOL GUARANTEES

Winnipeg, October 30th.—Unless a price of wheat improves the losses to the western governments in the wheat pool guarantees may exceed $10,000,000, according to Premier John Bracken of Manitoba, who returned today from Edmonton, where he had attended an interprovincial conference.

The governments of Manitoba, Saskatchewan and Alberta guaranteed payments by the banks to the pool in financing the 1929 crop.

Premier Bracken made his declaration when questioned concerning a speech emanating from Winnipeg on Saturday, which said that the wheat pool guarantees loans for the three provincial governments might reach $10,000,000. He was asked if the figure quoted were approximately correct. His reply was:

"The amount may possibly total [illegible] sum. Unless, however, the prices improve, the losses possibly will be greater than the figure quoted.

"And we above everything else is insisted on handling the wheat marketing situation, and the province asserted that harmful propaganda is being circulated.

Mr. Bracken said the subject of the wheat pool guarantees was fully reviewed at the Edmonton conference. "Regret was expressed," added the premier "that there is no much progress made in connection with the Pool of the wheat market, which tends to lower confidence in the marketing situation. Confidence is the thing most needed today."

If a loss is suffered under the guarantees given the banks, Saskatchewan would bear between 50 and 60 per cent, while Manitoba's share would be about 20 per cent, which on an estimate of $10,000,000 would make the province liable for about two million. On the same basis, Alberta would be behind a similar amount.

Regina, October 28th.—"In the first place the statement is not correct," declared premier Anderson when confronted with a statement attributed to Premier Bracken of Manitoba, "at unless wheat prices improve the losses to the western provinces involved by wheat pool guarantees would exceed $10,000,000. Premier Anderson is of the opinion that the Manitoba premier had made no such statement.—Edmonton Journal.

EXCELLENCE

The Brewing Industry is an important factor in the industrial life of this Province.

It is hardly necessary to emphasize the millions of dollars which have been invested throughout Alberta in this Industry.

Hundreds of Albertans enjoy steady employment throughout the year in the brewing, storing, transporting, of the products of the five great modern breweries of Alberta.

Alberta Brewery Products are served by the bottle or glass at hotels. Sold by the barrel or case from our warehouses.

Where beer by the glass is available, most men are satisfied to forego the full bottle of more potent liquor.

Local and Personal

Mr. Will Chapman was a visitor to the city over the week end.

Mr. John Chapman was a visitor at the home of his son George in Edmonton over the week end, returning Sunday morning.

Mrs. Letourneau was a visitor to the capital city on Monday.

We are pleased to report that Mr. R. W. Pierce is doing nicely. He is at present in Edmonton where he is under medical care. It is expected that he will be home shortly.

Mr. Bell was in Tofield last Friday on business.

Mr. and Mrs. Rook on Wednesday, October 29th, a son.

An enjoyable Hallowe'en party was held at the home of Mrs. E. Wilson on Friday night last. Quite a number of young folks were there and the evening was spent playing games and enjoying plenty of fun. During the evening delicious lunch was served and all report an enjoyable time.

Carl Weise of the Co-op store spent the week end at his home in Edmonton.

A young boys Hallowe'en party was held at the Wasten home on Friday night last. The rooms were decorated in Hallowe'en style and the arrangements cut down to lowly to a beautiful table lighted by hallowe'en illumination. Games were played and a royal time enjoyed by all. Winnie Wasten and Pat Barnett had charge of the decorations and lunch.

On Friday night the Tofield high school went on a hike into the country where they enjoyed skating for some time. Plentifully supplied with apples and weiners by the high school teaching staff, a splendid time was enjoyed by all.

Mr. H. Dunbos of Bardsland, formerly of the Ross Creek district, visited among his former neighbors this week. Mr. Poulton was one of the early settlers in the Ross Creek district and was well known in that district.

Firstly, that road built by the department in West half of sec 18-51-21, w 4, was not built on private property thereof as it is on a private road.

Secondly, I was not found upon examination of road allowance running north and east between sec 16-51-21 and sec. 17-51-21 as I would contend I least about to build the same as piece of road that was built on private property, which is about 50 rods east of regular government road allowance and the latter will provide quite as properly obtain on said road. The road I built was 165.00 and Lakeview Ltd agreed to pay for said road at their own expense.

Thirdly, The Council has not any knowledge of any bill having been signed on the road. Lakeview Ltd. did try to collect the 25c per rod for breaking space and took the privilege of collecting the amount of the contract of road gravel into Lakeview Ltd., but this proceedure was discontinued after a week or so.

Fourthly, when Lakeview Ltd. have completed their original plans, the council agree to reimburse them for the original cost of gravelling and by deducting one fifth of said cost each year from Lakeview Ltd. municipal tax.

Fifthly, that the Council do not see any apology to Minnith U.F.A. local No. 286 for any transaction with Lakeview Ltd.

LAKEHORE

The two teachers of the McKenzie school, Miss Buttler and Miss Walker put on a most enjoyable dance at the Community Hall on Friday evening. The failure of the arrival of the orchestra which was supposed to have come from Edmonton threatened to spoil the affair but the Tenderwaists, George Sauer and Charlie Lemke saved the day (or night) and a very pleasant evening was spent.

Mr. Frank Sauers and two sons, William and Charlie Lemke started for Athabaska on Saturday morning where they have taken up homesteads. Mr. Sauer expects to move his family there this month.

Mr. and Mrs. R. C. Phillips were visitors at the J. H. Johnston home on Sunday afternoon.

H. Hoppood called on friends in the district on Sunday.

HOLY TRINITY CHURCH
(Anglican)

Special Armistice Service on Sunday, November 9th at 3 p.m. when the returned men from Tofield and district will parade from the Town and already much interest has been shown in the operation of the new scheme.

MINNITH U.F.A. OBJECTS TO ROAD TOLL CHARGES

Sends Letter to Municipal District About It

Following objection to the action of the Lakeview owners system of roads for 25c. for something or other which the Minnith Association considers no road tolls, the association forwarded the following letter to the council, it being considered at the meeting held on November 1st

Minnith U.F.A. Local, No. 286
October 28th, 1930

To the Tofield Municipal Council.
Tofield, Alberta.

Gentlemen:—

Whereas we the members of the Minnith Local (286) wish to call the attention of the Municipal Council to the following irregular action of the Lakeview Pleasure Resort.

Private road located on west [illegible] 21 west of the 4th, has been built on the road allowance, and the property making same is the road.

Whereas the road allowance [illegible] quite easily constructed although [illegible] of the road has been built for other property owners on the west side of [illegible] of Minnith.

Whereas ratepayers are not able to owners charging toll [illegible] the public.

Whereas the Council be engaged in [illegible] expenditure for gravelling especially when said [illegible] private property and of no [illegible] ratepayers.

—Carried.

When considering he [illegible] sympathy to the Minnith farmers in the loss of Mortimer Metcalfe. The late Mr. Metcalfe lived a useful and active life as a citizen and was held in high esteem by all who knew him. As a pioneer, through many hardships and privations he was always willing to help the settlers in the district. The foundations of what is now being the capital of the province and by [illegible] he has done his part in helping to make it so. The sympathy of the district will go out to the bereaved family in their sad loss.

NOTICE

Will the boys who turned over the toilet back of the Institute room, on Hallowe'en, please come and put it up again? Come at night, boys, after the same fashion that you pushed it down. You might have thought it funny, but it's not funny at all to the ladies on the committee who are trying to keep the Institute clean, and you don't want to show your worth and repair the damage. We don't have to mention the names, we'd like it done without resorting to that.

W.I. HOUSE COMMITTEE.

Have you joined the local library? New members are joining each week now—why not you? With a minimum of work and a worm fire (very cozy, but this proceedure was discontinued after a week or so.

Fourthly, when Lakeview Ltd. have completed their original plans, the council agree to reimburse them for the original cost of gravelling and by deducting one fifth of said each year from Lakeview Ltd. municipal tax.

Fifthly, that the Council do not see any apology to Minnith U.F.A. local No. 286 for any transaction with Lakeview Ltd.

LAKEHORE

The two teachers of the McKenzie school, Miss Buttler and Miss Walker put on a most enjoyable dance at the Community Hall on Friday evening. The failure of the arrival of the orchestra which was supposed to have come from Edmonton threatened to spoil the affair but the Tenderwaists, George Sauer and Charlie Lemke saved the day (or night) and a very pleasant evening was spent.

Mr. Frank Sauers and two sons, William and Charlie Lemke started for Athabaska on Saturday morning where they have taken up homesteads. Mr. Sauer expects to move his family there this month.

Mr. and Mrs. R. C. Phillips were visitors at the J. H. Johnston home on Sunday afternoon.

Special Armistice Service on Sunday, November 9th at 3 p.m. when the returned men from Tofield and district will parade from the Town and already much interest has been shown in the operation of the new scheme.

T. W. TEAPE.

LAKEHORE

It accidentally omitted last week that Melvin Walker returned from Edmonton on Thursday, where he was in attendance as a delegate for a few days with a certain case of trouble. We are pleased to be in much improved [illegible]

On Thursday evening a big crowd gathered to give Mr. and Mrs. Ver. Moss, the newly weds a rousing welcome. As usual comedelic [illegible] pans and other [illegible] instruments played an important part. After the [illegible] had continued for some time, Mr. and Mrs. Moss hospitably opened their doors and a most enjoyable evening was spent at games and [illegible] to which a bountiful lunch was served. The wedding took place in Edmonton on October 15th. The best wishes of the community are extended to them for a long and happy wedded life.

Mrs. and Mrs. E. Phillips and family [illegible] visited at the H. Eaton home from Friday until Sunday.

Miss Ethel Baines visited at the T. W. Ferguson home on Thursday evening.

Many people of this district heard the deep regret of the passing of Mr. Matthew McLeod on Saturday and attended to members of the family to express sympathy.

The Tofield Agricultural Society [illegible] for several years [illegible] represented. We were in receipt of a letter from Mr. Tory which should not. It is quite true to farmers' government assisted the agricultural societies [illegible] and society assisted by taking away the grant. Which only goes to show that farmer governments are not inferior and do and can make [illegible]

And another point is [illegible] possible that a farmer government [illegible] by a man of Mr. Warnes experience might consider [illegible] a mistake. Why not?

Every effort or calling should have [illegible] more than mere common sense, which is nothing more than desire for gain. It should have interest and a desire for improvement for the sake of everybody. It is problematical how much of the present [illegible] is due to straight grain growing and how much the epidemic of straight grain growing is due to the lack of [illegible] farming on the part of the farmer government. But it is [illegible] to say that had the government sought or ten years ago set out to improve the small rural [illegible] and [illegible] that there would be fewer votes on tractors today and more [illegible] in the country and all-round [illegible] and the latter will provide quite as properly obtain on said road. The road I built was 165.00 and Lakeview Ltd agreed to pay for said road at their own expense.

Thirdly, The Council has not any knowledge of any bill having been signed on the road. Lakeview Ltd. did try to collect the 25c per rod for breaking space and took the privilege of collecting the amount of the contract of road gravel into Lakeview Ltd., but this proceedure was discontinued after a week or so.

LOCAL GOSSIP

[illegible] and friend recently at the home of Mr. D. W. Warner. Mr. Warner has been a valuable [illegible] for many years and [illegible] knowledge of Mr. Warner's work [illegible] our pre Tofield days. [illegible] the wood from Edmonton to Tofield. Plans where he attended a meeting of the Stones Plain Agricultural society, and gave [illegible] very valuable advice to what was a struggling infant society. One of Mr. remarks at that time "this meeting reminds me very much of the early meetings of the [illegible] agricultural society, which [illegible] Warner was [illegible] pre 1912

[illegible] heads [illegible] to believe along with some others [illegible] of the [illegible] Stones Plain [illegible] has the agricultural society and is [illegible] to excellent fair [illegible] each year [illegible] held at Moscale which is [illegible] near Barrhead. The [illegible] right in the event of Mr. T. [illegible] an elderly English [illegible] who [illegible] [illegible] and good [illegible] agricultural [illegible]

The Tofield Agricultural Society [illegible] for several years [illegible] represented. We were in receipt of a letter from Mr. Tory which should not. It is quite true to farmers' government assisted the agricultural societies [illegible] and society assisted by taking away the grant. Which only goes to show that farmer governments are not inferior and do and can make [illegible]

And another point is [illegible] possible that a farmer government [illegible] by a man of Mr. Warnes experience might consider [illegible] a mistake. Why not?

Every effort or calling should have [illegible] more than mere common sense, which is nothing more than desire for gain. It should have interest and a desire for improvement for the sake of everybody. It is problematical how much of the present [illegible] is due to straight grain growing and how much the epidemic of straight grain growing is due to the lack of [illegible] farming on the part of the farmer government. But it is [illegible] to say that had the government sought or ten years ago set out to improve the small rural [illegible] and [illegible] that there would be fewer votes on tractors today and more [illegible] in the country and all-round [illegible] and the latter will provide quite as properly obtain on said road. The road I built was 165.00 and Lakeview Ltd agreed to pay for said road at their own expense.

Thirdly, The Council has not any knowledge of any bill having been signed on the road. Lakeview Ltd. did try to collect the 25c per rod for breaking space and took the privilege of collecting the amount of the contract of road gravel into Lakeview Ltd., but this proceedure was discontinued after a week or so.

Fourthly, when Lakeview Ltd. have completed their original plans, the council agree to reimburse them for the original cost of gravelling and by deducting one fifth of said each year from Lakeview Ltd. municipal tax.

Fifthly, that the Council do not see any apology to Minnith U.F.A. local No. 286 for any transaction with Lakeview Ltd.

Northern Indians Need Help

Federal Government To Take Steps To Relieve Distress

Hon. T. G. Murphy, Minister of Interior, is taking immediate steps to relieve distress among Indians who have neither money nor food to carry them through the winter. Discussing the conditions of these wards of the state, Mr Murphy said that the Indians on the southern reserves, where agriculture is the main source of livelihood, are in fair shape for the winter months, and it is not expected that federal assistance will be needed.

On the northern reserves, where trapping is the only occupation, the Indians, in many cases, have had a bad year and are in urgent need of succor. The problem, he intimated, was not a purely unseasonal or extraordinary one. It is a matter of fact that the fur-bearing animals in these areas are rapidly disappearing as a result of operations of white trappers.

The Indians on these northern reserves are unable to catch enough fur within the limits of the reservation to make a living, and they have been accustomed to trap over contiguous territory. These non-reserve areas belong to the provinces. The federal government has no control over them.

The Indian, said Mr Murphy, is a fur farmer, and does not exterminate wild life. But the white trappers who have gone into these areas, under provincial licenses, have had no regard for the preservation of wild life and have seriously depleted the numbers of fur-bearing animals. For this reason, many of the northern tribes are now in distress.

The Indian affairs branch of the interior department, under instruction from Mr. Murphy, is making a rapid survey of the situation and relief will be given at an early date.

A Secondary Attraction

Boy Quite Sure King's Absence Would Not Disappoint His Parents

When the King was in Yorkshire on one occasion he promised to review a boys' brigade. At the last minute, however, His Majesty was forced to cancel the engagement, and a local notability was hastily substituted, but the managers of the affair thought it only right to notify ticket purchasers that Royalty would not be present. Presently a small boy, who was to take part in the parade, came along with a request for two tickets for his parents. He was told of the disappointment in store for them. "Oh," said the lad, "they'll not be disappointed! It's not the King that father and mother are coming to see —it's me!"

Wild Life Valuable

Canada realizes quite a revenue each year from its wild life. According to Dr H F Lewis, of the Department of the Interior, this wild life has a capital valuation of one billion dollars and a yearly business turnover of about $45,000,000. This valuation includes the fur harvest, game fish, and their influence on sales of sporting goods.

Worms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and mal-nutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutriment of the child is assured and development in every way encouraged.

Dependable Canadian Eggs

Where eggs were anything but a dependable article of diet twelve or fifteen years ago, today Canadian eggs of the higher grades are looked upon as quite safe to offer anyone for breakfast and need not be broken before coming to the table. The result of grading is that production and consumption have more than doubled during the past ten years.

Douglas' Egyptian Liniment is unrivalled for speedy relief of muscular rheumatism, lame back, inflammation, burns and felons.

Western Canadian Crop

The Government estimate of the wheat crop of Western Canada is 362,000,000 bushels, whereas the total crop of all Canada last year was only 304,520,000 bushels.

CHRONIC THROAT ILLS

have been relieved by Minard's time and again. It also relieves strains, wrenched muscles, proud flesh, burns or scalds.

MINARD'S "KING OF PAIN" LINIMENT

W. N. U. 1862

ARE YOU USING UP YOUR NERVOUS ENERGY?

Do you feel tired? Are you troubled with headaches, a poor appetite, irritability and a lack of ambition? If so, it is probable you have been using up too much nervous energy — you have been going full steam ahead without feeding the nerves.

Nerves that have become weakened and shattered through over-work or worry need nourishment, the nourishment gained through rich, red blood. Good blood feeds the nerves and gives them greater vigour and vitality.

No other medicine has been so successful in treating nervous disorders as have Dr. Williams' Pink Pills. Their sole duty is to enrich and renew the blood. That is why they are the ideal nerve tonic. They are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

More Cigarettes Used

Report Shows People In United States Consuming More

The people of the United States are smoking more and more cigarettes. Last year they consumed about 1,000 per man, woman and child, but the reports for the first eight months of this year show an excess over those of the same period for last year of 390,000,000. Benjamin D. Hill, chief of the tobacco division of the Department of Commerce, assumes that the increase will continue until the end of the year.

In times of business depression or periods of great stress, it has been the experience of the tobacco industry, that consumption of cigarettes increases.

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr J D Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are warded off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Facts About Canadian Airways

Regular airplane services in Canada are maintained over nearly 7,000 miles of modern airways, according to a recent survey of conditions in the Dominion. There are 22 flying clubs in Canada, 279 private pilots, 370 commercial pilots, 311 air engineers, 467 aircraft, and 71 airports.

Persian Balm quickly relieves chapping, windburn and all roughness caused by weather conditions. Keeps the complexion clear and lovely. Completely absorbed by gentle rubbing. IN MUTUAL TRUST LIES THE WAY TO SOLUTION OF WAR

London, England.—The Prince of Wales told delegates to the Imperial Conference that in the establishment of international habits of co-operation and mutual trust lies the way to the solution of war. He spoke at a banquet to the delegates in the Guildhall, his words coming clearly to thousands of Canadians by means of radio broadcast.

"Britain and her Dominions," he said, "have solved the problem of disarmament among themselves and relegated war to the scrap heap. Is it too much to hope that the other three-quarters of the world, despite difference in language, ancient enmities and mistrusts, may tread the same path?"

The approach of Armistice Day, he asserted, "recalls that awful period when the British Empire demonstrated to the world its own complete solidarity as the greatest brotherhood the world has ever known, and its readiness to help in the creation of a similar brotherhood among all nations.

"There remain those who profess a disbelief in the ability of the League of Nations to prevent war, but what," he asked, "have they to offer as an alternative for the establishment of peace and the rebuilding of world prosperity?"

B.C. Bandits Escape

Four Evade Guards But Part Of Booty Was Recovered

Vancouver, B.C.—Shooting their way through a guard established on the Fraser River bridge by two Westminster constables, four safe-crackers who obtained $10,000 in stocks and bonds and $300 cash from a store at Murrayville, escaped into Queen's Park and eluded all efforts of police posse to surround them.

The $10,000 loot, apparently dropped by the robbers in their dash towards the woods of Queen's Park, was recovered. It was found on the grounds of the mental hospital, reposing safely in a small drawer which had been removed from the safe.

May Establish Branch Factories In Canada

Several British Manufacturing Firms Are Considering the Matter

London, England.—Hon. H. Stevens, Canadian Minister of Trade and Commerce, has received information that several British industrial firms are considering the establishment of branch factories in Canada. One textile concern is reported to have decided on a site in the Quebec area.

Krupps, famous German steel firm, is also said to be sending a representative to Canada to survey the ground with a view to establishment of a Canadian plant.

Will Form Water Board

New Western Body To Regulate Lakes and Streams Of Western Provinces

Ottawa, Ont.—Confirmation of the proposal to form a western provinces water board for the regulation of waters in lakes and streams of the prairie provinces and the North West Territories was made recently by Hon. Thomas G. Murphy, Minister of the Interior. "The despatch from Winnipeg is substantially correct," Mr Murphy stated.

J. T. Johnson, director of the Dominion water power and hydrometric service, the minister said, would be chairman of the new body.

Penalties For Butter Adulteration

Pledge Not Kept

British Government Protests Against Continuance Of Soviet Propaganda

London, England. — The British Government has made representations to Soviet Russia that the Moscow Government has not been observing its pledge against propaganda exchange between the two countries on the resumption of relations.

Rt. Hon. Arthur Henderson, foreign secretary, divulged in the House of Commons that this representation had been made as a result of inquiry into propaganda carried on by the Third Internationale in Great Britain and other parts of the Empire.

"I asked the ambassador to impress seriously on his government that continuation of this propaganda would be calculated to endanger relations between the two countries. The ambassador," continued Mr Henderson, "said that the Soviet government would continue to observe the pledge but could not control the activities of the Third Internationale."

Loud Conservative cries greeted this statement, but the matter was allowed to drop.

Prospectors Drown In Northern Manitoba Lake

News Of Tragedy Reveals Tale Of Heroism

The Pas, Man.—Lakes of Northern Manitoba took their first human toll of the season when two prospectors, Charles Stabback and Fred Miller, drowned. They crashed through thin ice while travelling across Herb Lake. Details reaching The Pas from the north, indicate a typical northern tale of heroism lies behind the tragedy.

The men were travelling by dog team with a canoe on the sled. One prospector fell in while the other was able to save himself. He ran to the shore, not far away, obtaining a long pole and attempted to save his companion. Blundering through raging snow storm that swept the Herb Lake area, he met death with his companion. The pole was floating on the surface of the water to mark the tragedy for searchers. The bodies were recovered.

Brandon Entry Wins Egg Laying Contest

Race For Honors Was Between Saskatchewan and Manitoba Birds

Brandon, Man.—The white leghorn entry of John R. Beer, Brandon, won the eleventh Manitoba egg laying contest conducted at Brandon experimental farm. The closing weeks of the contest were exceedingly interesting as the final outcome was in doubt until the last few days. During the summer months there were several pens with an equal chance of winning the contest, but during the final month the race for premier honors was between the barred rock entry of W. C. Wroth's Sunton poultry farm, Welwyn, Sask., and the white leghorns entered by J. R. Beer.

At the close of the contest Mr. Beer's pen had a total of 2,270 eggs and 2,297 points, and the barred rocks owned by W. C. Wroth had a total of 2,207 eggs and 2,271 points.

Not Asked To Testify

Friedrichshafen, Germany. — Dr. Hugo Eckener, master of the Graf Zeppelin, denied that he had been invited by the British Government to testify in its inquiry into the R-101 catastrophe. He added that he had no intention of going to England for the inquiry, since he was not an eye-witness to the disaster.

Ban Reparations Talk

Berlin, Germany.—The foreign affairs committee of the Reichstag rejected all motions to raise the question of reparations revision in this session. At the same time it called for an end to the situation wherein a "disarmed Germany is surrounded by ever increasing preparations for war."

Date Set For Atlantic Flight

Friedrichshafen, Germany. — The start of the huge passenger 'plane DO-X on its trans-oceanic flight to the United States has been tentatively set for November 12, from Lisbon. Under this arrangement, the DO-X left for Amsterdam en route to Lisbon November 2.

Was World's Oldest Clergyman

Magilligan, Northern Ireland.—The Rev Hugh Butler, so far as known here, is the world's oldest clergyman in point of service and years of life, is dead, aged 104. He had been minister of the Magilligan Presbyterian Church nearly 79 years.

France's daily toll of injured on streets and highways is 300.

Recover Part Of Money Only

Winnipeg Police Succeed In Locating Only Part Of Loot Of Bank Robbers

Winnipeg, Man.—Detectives of central police headquarters made records in the fast round-up of alleged bandits in the Transcona Bank of Toronto robbery on October 1, but they have had little success, despite diligent search, in locating the majority of the $12,000 loot.

Ten persons were arrested in connection with the robbery, one is now under sentence of three years in the penitentiary, three others have been committed for trial, and charges are pending against the others. Only $3,000 of the $12,000 secured by the bandits has been recovered, and a "mystery man" is believed to have escaped with the missing $9,000.

EMPIRE RADIO STATIONS MAY BE ESTABLISHED

London, England.—At the Imperial Conference, the committee on communications, which has been considering the erection of an Empire broadcasting station, encountered both financial and technical difficulties. The cost of the central station, which would be built in England, is estimated at 40,000 pounds, or about $194,000 a year for the first five years. How the cost would be allocated has still to be determined.

Relaying stations would have to be constructed at a number of points to ensure proper reception. The idea would be to broadcast a regular radio program, including news bulletins, throughout the Empire. According to the aforementioned plan already submitted there would be four separate hours of broadcasting, and Canada, owing to the difference in time between the Dominion and the Old Country, would have devoted to it the early morning hours, so that the program would arrive before Canadian radio listeners had gone to bed.

The Sankey committee, headed by the Lord Chancellor, will soon have its draft report ready for the Imperial Conference. The report, dealing largely with constitutional issues, covers three main grounds: the channels of communications to be adopted as between Britain and the Dominions, the advisability of extending in practice the machinery of Dominion autonomy as recognized in the Balfour report of 1926 and the establishment of an Empire tribunal for the hearing of disputes between different units of the Empire.

The appointment of governor-general is understood to come under review. The British Government, it is learned, holds that advice on a proposed appointment given by a Dominion Government to the King should continue to pass through United Kingdom channels.

The constitutional committee members were so intent on their work recently that they did not adjourn for luncheon, being content to discuss the political status between sandwich munches.

One economic sub-committee worked on the application of a quota scheme to British purchases of canned fruit, fish and dairy products.

The Canadian Prime Minister, Rt. Hon. R. B. Bennett, has entirely recovered from his recent indisposition.

YOUNG CANADIAN POET

Pool Guarantees

Information In Connection With Wheat Pool Loans Will Be Given In January

Winnipeg, Man.—At about the end of January, "losses" to the Prairie Provinces in connection with their backing of Wheat Pool loans, will be definitely known, according to the statement of Premier John Bracken of Manitoba. Mr Bracken, who says that the prairies may lose more than $10,000,000 unless wheat prices improve, considers that the position of the provinces will not be determined until the unsold 1929 grain is disposed of, namely he says, in about three months.

No ultimate loss will accrue to Alberta in any case, states Premier J. E. Brownlee, who claims that "it will all be taken care of by the Wheat Pool." He states that the prairie governments are not being pressed to meet the guarantees they offered to the lending banks and characterizes crop-loss talk as "a matter of speculation." No stand on the question has been taken by Saskatchewan's premier, Dr. J. T. M. Anderson, beyond saying that when the governments deem a statement necessary it will be made.

Premier Bracken at a luncheon described the $10,000,000 loss figure as "somebody's guess."

May Accompany Wilkins

Milwaukee, Wis.—Sir Hubert Wilkins has invited Lincoln Ellsworth, United States explorer, to accompany him on the proposed submarine trip to the North Pole. Sir Hubert plans to start the 2,100-mile journey under the sea to the pole next June.

SWINE CLUB COMPETITION

Ernest Haughton and Hilbert de Leeuq, 14 year old Kamloops boys, who recently outmatched all competitors in the annual Canadian Pacific Railway British Columbia Swine Club Competitions. These lads will later compete against the prairie club winners, at Toronto, for the Dominion championship. Seen in the picture left to right, George Baillie, assistant superintendent British Columbia District, Canadian Pacific, who presented the trophy and medals to the lucky lads, Ernest and Hilbert, who, in addition, receive a free trip to the Royal Winter Fair at Toronto.

Changes In B.C. Cabinet

Reorganization Completed With Swearing In Of New Officers

Victoria, B.C.—Reorganization of the cabinet of Premier S. F. Tolmie was completed with the swearing in of the re-arranged slate before the Lieutenant-Governor, Hon. R. R. Bruce.

Hon. F. P. Burden retires from the government and his place as Minister of Lands is taken by Hon. N. S. Lougheed, former Minister of Public Works.

Hon. R. W. Bruhn, former president of the council, takes the portfolio of Public Works.

Hon. W. C. Shelly, former Minister of Finance, becomes President of the Council.

Hon. J. W. Jones, former speaker of the Legislature, becomes Minister of Finance.

Mr Burden will go to London as agent-general for the province, succeeding F. A. Pauline.

Home Government Will Not Interfere

Dominions May Choose Governor-Generals For Appointment By King

London, England.—The Daily Herald says one of the most important results of the Imperial Conference would be elimination of interference of the home government in selecting for governor-generals for the dominions.

The paper said a method of procedure had been worked out in committee, and that in the future each governor-general would be appointed by the King solely in consultation with and on the advice of the dominion government.

SUGGEST BONUS TO ASSIST THE WHEAT FARMER

Ottawa, Ont.—A proposal that the Dominion Government grant a bonus to western wheat farmers whose wheat crops were caught in the rain and snow storms this fall is being given serious consideration by the Department of Agriculture. It costs three cents a bushel to dry tough wheat and five cents a bushel to dry damp wheat.

The proposal which the department has under consideration is said to be that the Dominion offer to pay one and a half cents a bushel on the grain caught in the storms if the province would pay a like amount. Should Hon. Robert Weir, Minister of Agriculture, decide to recommend to his colleagues that the government make such an offer it would be accompanied by the provision that it would only apply to a limited number of bushels for each farmer.

The misfortune of having the crops injured by rains has made more acute the situation of the prairie farmers, already serious because of the low price grain is bringing. It is known that Mr. Weir has been studying every suggestion to cope with the difficulty regardless of from where the suggestions emanated.

Hon. George Hoadley, Alberta Minister of Agriculture, suggested that the Dominion Government provide free drying facilities at the terminal elevators. This has been studied by the Federal Department and it is understood many obstacles presented themselves, one was the vast amount of bookkeeping that would be necessary to differentiate between the wheat entitled to free drying and that which would be paid for. Often in drying wheat becomes bleached, and suffers loss of a grade. The question would arise whether the government, in case of free drying would be liable for loss caused by such improper drying. Experts estimate that much of the wheat caught in the rains would maintain 20 per cent. moisture. The point has been raised whether it would be economical to transport all this wheat to terminal elevators, whether it would not be much more profitable to feed it as it is.

One problem of course which applies both to a bonus and free drying would be that the farmers with big crops would reap the greatest benefit whereas the people most in need of assistance are the small farmers. For this reason it has been suggested that the number of bushels on which a bonus be paid to any one farmer would be limited. Should a bonus be decided upon it would not be taken out of the $20,000,000 voted to deal with unemployment, but from some other vote.

Feed grain to livestock is looked upon as the most logical way of alleviating the western situation, but many cannot buy the livestock and in a number of districts shortage of water supply makes livestock farming difficult.

FREIGHT RATES ON ALBERTA COAL ARE REDUCED

Ottawa, Ont.—Hon. W. A. Gordon, Minister of Mines, has announced that as a special measure to assist unemployment conditions prevailing in the coal fields of Alberta, the Board of Railway Commissioners had authorized the movement of Alberta coal to Ontario at a freight rate of $4.75 per ton, to be effective from October 25 to December 1 of this year.

The government had received from the Canadian coal committee and other coal interests in Alberta appeals for the assistance now being granted with a view of alleviating reductions in mine output by sending supplies to the Ontario market. Placed before the Board of Railway Commissioners and the railways these representations said Mr. Gordon had met with sympathetic response.

The coal will move under the provisions of Order-in-Council P.C. 439, which has for its object test rates for the movement of Alberta coals to Ontario and the encouragement of inter-provincial coal movements. The Order-in-Council specifies a reduced freight rate of $6.75 per ton to be effective for not less than three months in each year during the time of its operation, which was first named to cover the period from March 16, 1928, to March 15, 1931, but by a later Order-in-Council was extended for another year to March 15, 1932.

The minister explained that while the railway board's present order is a special measure to provide the coal movement to take place wholly as an aid to the unemployment situation, he had the assurance of the Board of Railway Commissioners that before the period expires the board will issue another order making effective the $6.75 freight rate from December 1, 1930, to July 31, 1931, as a regular movement under the Order-in-Council. This means that from October 25 of the present year to July 31 of next year there will be continuous shipments under the reduced freight rate.

Reduce Initial Payment

Wheat Pool Makes Reduction On Initial Payment On Barley

Winnipeg, Man.—A five-cent-per-bushel reduction in the initial payment on barley was announced by the central selling agency of the Canadian Wheat Pool. Initial payment on the basis of No. 3 C.W. barley at Fort William will thus amount to 20 cents a bushel.

The reduction applies to all the malting grades and No. 3 C.W. Payment spreads on the lower grades have been narrowed somewhat, and are as follows: No. 4 C.W., initial payment, 17 cents; No. 5 C.W., 16 cents; No. 6 C.W., 14 cents, with a minimum payment of 12 cents a bushel on lower grades.

The Pool's initial payment was appreciably higher than the street prices paid by the trade for barley, it is pointed out by the coarse grains committee of the central board in explaining the reduction. Since the recent slump in barley prices, prices quoted have been particularly lower on the higher grades produced in Manitoba. This, and "increasing deliveries of barley to the Pool made it absolutely necessary to reduce the initial payment," the Pool announcement said.

Earthquakes In Italy

Three Shocks Take Toll Of 15 Lives and Injure Several Hundred People

Senigallia, Italy.—Three earthquake shocks struck numerous cities along the upper Adriatic coast, taking at least 15 lives and injuring several hundred persons.

Property damage was enormous, but it was considered remarkable that the toll of lives was not greater. For scarcely a building in the cities of Ancona and Senigallia escaped damage and the 'quake struck terror to a score of towns and villages across 1,000 square miles of northeastern Italy.

Casualty figures were made available by the ministry of the interior, and though it was almost certain they would increase as additional information was received, it was thought unlikely that more than 35 or 40 had been killed in all the 'quake zone.

Guests Of King George

London, England.—The entire Canadian Delegation to the Imperial Conference were guests of His Majesty at a reception at the Buckingham Palace, October 29.

THE TOFIELD MERCURY

W. Worton Publisher

A Weekly Newspaper Published At Tofield, Alberta

THANKSGIVING—

ON MONDAY next all Canada will celebrate Thanksgiving. It would seem that with so much "hard times," unfavorable weather and poor business there is something in the celebration that does not ring true. But it is not so. It is quite true that the last two seasons have been the poorest agricultural season for a long time, that the man with high priced obligations so pay with returns from low priced products has a task on his hands that is well nigh insurmountable, that tumbling prices and mounting interest charges, would leave little to be thankful for. But of course there is another side to life besides business. One may not be forging ahead financially, but if one has a home, enough to eat, and has health and strength, there is much to be thankful for. Then in addition to Thanksgiving there is Armistice day. On this day particularly, we will be reminded that men are not being killed by thousands and wounded by tens of thousands. We will be reminded also that families who twelve years ago were separated through war are now united. Those who paid the supreme sacrifice and did not return will not be forgotten, neither will those who having gone returned broken in health and perhaps spirit. Wherever the British flag is flown, men and women will do honor to their memory.

At Tofield, the local branch of the British Legion will on Sunday hold a church parade, and will on the previous Saturday sell remembrance poppies.

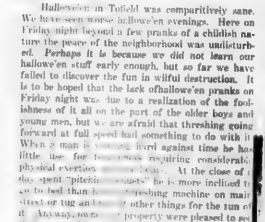
In spite of business depression and kindred disheartening occurrences, we in Canada have much to be thankful for.

HALLOWE'EN

Hallowe'en in Tofield was comparitively sane. We have seen worse hallowe'en evenings. Here on Friday night beyond a few pranks of a childish nature the peace of the neighborhood was undisturbed. *Perhaps it is because we did not learn our hallowe'en stuff early enough*, but so far we have failed to discover the fun in wilful destruction. It is to be hoped that the lack ofhallowe'en pranks on Friday night was due to a realization of the foolishness of it all on the part of the older boys and young men, but we are afraid that threshing going forward at full speed had something to do with it. When a man is running hard against time he has little use for boisterousness requiring considerable physical exertion.

Tofield Board of Trade. At the close of the usual "pitchin-in-supper" he is more inclined to go to bed than to the threshing machine on main street or tug and belt or other things for the sum of it. Anyway, now that property were pleased to see that comparitively little damage was done and while they are sorry enough for delayed threshing season again they hope that future hallowe'ens will be no more disorderly than the one just past.

Unique Christening at Banff



A ceremony unique in the history of the Canadian Rockies occurred recently at the Banff Springs Hotel when Hilda Banff Rocky Mountain Goat, 36 hour-old Rocky Indian papoose (baby) was christened in the courtyard of the hotel in the presence of around 500 guests and with A. H. Dewdney, manager of the hotel, and Mrs. Dewdney, acting as Godfather and Godmother. Left to right the group shows Noah Rocky Mountain Goat father, Mrs. Dewdney, holding papoose; Mrs. Noah Rocky Mountain Goat, mother; and A. H. Dewdney.

TOLERATION TOWARDS THE POOR.

President of the Canadian Chamber of Commerce Says Farmers' Hearts Are With Their Poor Organization.

Hon. Lt. Col. J. H. Woods, of Calgary, president of the Canadian Chamber of Commerce, in the course of an address delivered at Toronto, made the following statement:

I do not hesitate to speak in behalf of the good system of marketing. I have no brief for the pool, nor any other explanation to offer for any errors that it may or may not have made. Concerning these, I am not sufficiently expert to be a judge, but it is my firm conviction that the wheat pool is the greatest stabilizer of the morale of the farmers of the West that exists to-day.

"To it in great measure the farmers have passed their confidence and their pride as masters of their own commercial destiny and, in my belief, the deterioration of that confidence the lowering of that pride and morality follow upon an abandonment or even a partial abandonment of that system that they themselves have created, would be an unsafe and hazardous calculation.

"My information from home is that membership of the wheat pool has never been more loyal to it than now, in these conditions of stress. Bootlegging of wheat there always has been, and will be, but never to any more than in the days of high prices and easy markets. Mistakes have doubtless been made. Whoever heard of an out an enterprise being started and conducted without mistakes?

"Pardon these references to what might be considered a controversial topic but my appeal is nevertheless rather than material. We can not afford to criticize one another in the extent of condemnation for errors that are no greater than we commit ourselves and therefore I urge that we extend in greater measure charity of thought and tolerance of judgment to one another in all branches of our commercial and financial life and look forward to the future that lies before us rather than to the past with its faces to the troubles that lie behind."

SAFETY FIRST AUTUMN ARE STRESSED

The various problems centering into the Safety First movement with regard to railroads in particular, were dealt with by W. A. Book, of Montreal, Safety Engineer, Canadian National Railways, in an address delivered recently. He emphasized the need for greater precautions being taken by motorists and others at highway crossings, stating that the railways were doing everything in their power to reduce the accident hazard to a minimum, but it required the co-operation of motorists and others to materialize a success. Every year the number of motor crossing accidents is increasing and Mr Booth expressed the opinion that automobile associations and every person connected with motor traffic should co-operate in an endeavor to reduce them. He referred to the work which is being done among school children in advocating the principles of Safety First, and in this way, a safety consciousness is being laid in the minds of the coming generation of motorists and others. Speaking with regard to the Canadian National Railways, Mr. Booth remarked upon the efforts being put forth by the system to lessen the number of accidents, both among the men employees and others, and some very remarkable results have been achieved, demonstrating that the Safety First has and is accomplishing its object, namely, the reduction of accidents. The speaker advocated a more wide-spread teaching of Safety First rules among school children, which is particularly necessary in the mechanical age.

TENDERS WANTED

Sealed tenders will be received up to noon Saturday, December 6th, for the S.W. qr., sec. 4, tp. 51, rge. 21, wd. These submitting tenders should specify the total amount, the terms of the first payment and the terms required

Tenders will be submitted at the December meeting of Council and successful tenderer, if any, will be notified to communicate with the secretary. Highest or any tender not necessarily accepted.

J. G. A. LETHURNEAU,
Secretary-Treasurer, Cornhill Municipal District, No. 497, Tofield.

GOOD ADVERTISING IS INFORMATION—EVERY MERCHANT HAS SOMETHING TO TELL HIS CUSTOMERS

"Princess Helene" is a Princess Indeed

The new "Princess Helene" which has just entered the service of the Canadian Pacific Railway Company running between Saint John, N.B., and Digby, N.S., is worthy of her title in every way. She is the latest word in speed and comfort, and by accommodation is closer by the above pictures than she can easily with their class stops. L. A. boat-room combining luxury and accommodation. 2. The fancy running between Saint John, N.B., and Digby, room, with comfortable chairs and spacious tables and settees. 3. The graceful "Princess Helene" sliding down the lane between ports. 4. The dining saloon, just a roomy and up-to-date as any ocean liner and reminds you of one. 5. The smoking room and resort.

Championship Fish from Ontario Waters

Results are out for the three major fishing competitions held in Ontario each year at French River, Nipigon River and Devil's Gap Bungalow Camps, all three contests being financed and trophies awarded by the Canadian Pacific Railway Company.

They were: a 42½ inch muskallonge taken from the French River by F. R. Spence, Toronto, Ont., weight, 34 pounds, seven ounces; girth, 23 inches. The test nearly three-quarters of an hour to land this beauty. A 42½ pound speckled trout from the Nipigon River caught by Edward Pakiman, of East St. Louis, Ill., 23½ inches long and 14 inches in girth. A black bass from the Devil's Gap Bungalow Camp, Lake of the Woods, four pounds, 1¼ ounces in weight, just over 21 inches long and 19½ inches in girth. This is the rod of J. C. Jones, of St. Louis, Mo. Each winner was awarded a framed certificate signed by the judges of the contest and were also given gold lapel buttons. Fishing was exceptionally good this year in these sections and the winners were up against the stiffest kind of competition.

Lay-out shows, centre top, J. C. Jones, winner of Devil's gap contest; left, top, Lake of the Woods Black Bass specimen; right top, Nipigon River speckled trout specimen; lower centre, record haul of muskallonge taken at Devil's Gap.

Advancement Made In Canada For Providing Indian Population With High Standard of Education

(By Russell T. Fairley, Superintendent of Education.)

Great advancement has been made in Canada, particularly of late years, in providing our Indian population with a high standard of educational and vocational training. Through the aid of increased appropriations by Parliament during that time, the Department of Indian Affairs has been enabled to build, rebuild, refurnish and construct more modern and fireproof schools whilst higher salaries and grants have attracted better qualified teachers and instructors.

There are now 76 residential schools and 272 day schools, making a total of 350 centres of Indian educational activity. The total number of pupils is now 16,744, the average attendance being 11,279, constituting an increase during the past ten years of 25 per cent in enrolment and 46 per cent in attendance, ample evidence of the success of the policy of preparing Indian children to become independent and self-supporting citizens of the Dominion.

The residential schools are conducted by the Anglican, Roman Catholic Presbyterian, and United churches, and high tribute must be paid to the zeal and self-sacrifice of those engaged in the work. The Department has had the closest co-operation of religious denominations in the education of the Indians, and this work-out-standing success is demonstrated beyond all question of doubt the efficiency of the system.

The formal opening of the modern residential school at Brandon, Manitoba, on April 1, 1930, takes second place in the fine system of Indian educational institutions throughout the Dominion. It will be administered by the United Church of Canada and will have as its principal the Reverend J. A. Doyle D.D., who succeeds Dr. Orchard, who succeeded the Reverend Thomas Crosby.

This school which replaces the residential school built on the same site in 1894, is one of the finest of its kind in Canada. Built of tapestry brick with trim of Manitoba limestone and terrazzo floors, it is fireproof throughout. Some idea of the accommodation afforded may be gleaned from the fact that it has a fine large assembly hall, four dormitories, four class-rooms, a large study room, recreation rooms for both girls and boys, sewing room, modern hospital ward with nurses' quarters, also a laundry equipped with the most modern hygienic appliances.

Adjacent to the school are a number of brick-clad farm buildings, one of which, the cow-barn, is one of the finest in Manitoba. There are, also, four residences for the use of the principal and married members of the staff.

The institution has a landscape gallery which gives one a pen with view of the finest schools and surroundings of the older provinces.

This school forms an ample from a wide radius, owing to the scattered position of the reserves. Residential schools are required because many of the Indians are engaged in occupations such as lumbering, trapping, freighting, and trapping, which take them away from their homes, and even the farms of those engaged in agriculture are not in solid blocks as in white settlements, but are scattered along rivers and lakes, thus making it impossible to provide day school accommodation for the major portion of children.

The curriculum provides academic instruction equivalent to the second year in high school. In addition the girls are given a thorough training in domestic science, and the boys, a course in agriculture, together with elementary training in carpentry, blacksmithing and the operation of internal combustion engines, sufficient to enable them to apply it in a practical manner in modern farm life.

While every possible effort is made to impart a sound academic and industrial education, special attention is given to the health of the pupils. During the years spent in the residential schools medical treatment is provided, which, with a balancing diet, and supervised recreation, results in the building up of a robust constitution.

Under the new and tutelage of the Department of Indian Affairs the pupils Indian has now become a successful agriculturist. The official records for 1928 show that 68,104 acres in the Prairie Provinces alone were sown in grain, from which were harvested 68,104 bushels. In addition, 971 acres were planted to root crops from which 61,645 bushels were harvested; and 67,764 tons of hay and other fodder crops produced.

Daylight and Twilight

Hours of Day and Night Nearly Equal on the Equator

In the tropics, near the equator nearly equal hours of day and night obtain the year round. The extremely short twilight which comes in this locality is proverbial. Kipling's fine picture the dawn coming up like thunder; but generally speaking, in the temperate zones there is nearly an hour from the actual time of something until it begins to appear. Twilight, the transition period between daylight and darkness, increases in length as one goes north or south of the equator. It has been stated that of the 8,766 hours which make up a year, there are at the equator 4,467 hours daylight, 864 twilight and 3,435 night, while at the poles the proportion changes to 4,383 hours daylight, 2,466 twilight and 1,917 night.—Christian Science Monitor.

Egg Laying Contest

Mirrowich Canadian Honored in Concluded at Ottawa Experimental Farm

Championship of the 11th Canadian egg laying contest which has just concluded at the central experimental farm at Ottawa, goes to a pen of white leghorns here entered by Blackwood Green, of Farringdon Park, Preston, England. Second place honors went to Miss E. W. F. Thompson, of Birch Hills, Sask., with a pen of barred Plymouth Rocks, while third honors were taken by a pen of Rhode Island Reds, entered by the University of British Columbia. The contest was held over a fifty-two week period.

The best laying individual bird in the contest was a Rhode Island Red "S.P.-594," entered by Lloyd Bryant, New Westminster, B.C. It completed a total score of 997.5 points for 365 eggs.

Second individual honors went to a barred Plymouth Rock hen, No. 584, entered by Fruit Experimental Farm, Morden, Man., with a total score of 304.5 points for 365 eggs. Third place went to Miss Thompson's entry, "No. 534," and owned by J. H. Draper, Cobblehill, B.C., total score 303.5 points for 365 eggs.

Scores of the leading pens in the contests are as follows: Richard Green, Farrington Park, England, pen No. 30, scored 2,176 points for 1,904 eggs; Miss E. F. Thompson, pen No. 13 (second), 2,174.5 points for 2,076 eggs; University of B.C., pen No. 33, 2,165.5 points for 2,174 eggs.

The fact that the English pen won the championship although the second and third honors both had a better total laying performance than the winning pen emphasizes the high value of the contest under which the size and weight of the eggs figure in the points scored.

Out of a total of 600 scoring entries in the 30 pens which finally left the contest, only 142 qualified for official registration during the year.

Pure Bred Stock

Four Ayrshire Heifer Calves On Th Experimental Station At Windermere, B.C.

Four Ayrshire heifer calves which were purchased by Capt. Dan Wilson of Pixley, B.C., at the recent dispersale of Ayrshires at the University of British Columbia, have been offered to and accepted by Dr. E. S. Archibald, Director of Experiments of Farms on behalf of the Dominion Experimental Station at Windermere, B.C. These heifers Auchenbrain Minstrel's Pixie, Mumering Valentine's Polly, Motherhall Lovely Maiden and Motherwrig Majestic Mary were all imported in dam and are of exceptionally good breeding.

Great Ayrshire Cow

High Record Of 305th Production From Cow At Indian Head Experimental Farm

The R.O.P. report of Witchgrassin Dorothy (82210), owned by the Experimental Farms at Indian Head shows this Ayrshire to have given 16,621 pounds of milk, 695 pounds of fat in 305 days on three milkings a day in the mature class, honor roll division. This is the highest record so far this year in this class and is Dorothy's third consecutive record

Have Excessive Language

Obliged to find most of their conversationship among their own sex, the women of India have developed a real terminology of sex, so that in certain parts of India there even exists a woman's language which men cannot understand.

Canadian Hay Crop

Ample Supply To Right In Most Of the Provinces

The final branch of the Dominion Department of Agriculture reports the total hay yield in Canada for this year is likely to be slightly less than in 1929. They had, however, that an ample supply is in sight in most of the provinces and a considerable exportable surplus is promised. The quality of most of the 1930 crop is said above average, particularly with respect to color.

The hay yield in the Maritime Provinces is expected to exceed last year's, owing to large acreages in timothy and clover and dyke hay. Prince Edward Island cut a good crop and the excess supplies of the Maritime Provinces is placed at 81,000 tons.

The Quebec hay acreage was about the same as in 1929, but the yield per acre was greater. There will be about 200,000 tons available for consumption.

The hay crop in eastern and northern Ontario was a big gain with about 70,000 tons over local requirements. Western Ontario had only a fair crop, and the total exportable surplus of alfalfa will be limited to about 5 hay tons.

In western Canada, Manitoba and Saskatchewan will put up 20 per cent more hay than last year, sufficient to take care of the home demand. The Pas district has large quantities of slough hay, which will be available to the drought areas of Saskatchewan. In Saskatchewan the hay situation is even more difficult than in 1929, but prospects in Alberta timothy and alfalfa were a good crop. Most districts in western Alberta will have about 2,750 cars of hay for sale. The British Columbia crop is below last estimate to be sufficient to take care of most of the districts of the province.

Detailed information with respect to the hay crop which finally will be issued by writing to the Markets Division of the Seed Branch, Department of Agriculture Ottawa.

Apples and Potatoes

Revised Estimate Of Apple and Potato Production Throughout Canada

The final revised estimate on apple and potato production throughout Canada, prepared by the statistical division of the Fruit Branch of the Dominion Department of Agriculture, places the apple crop this year at a total of 2,105,324 barrels. This is well up to the five-year average while nearly 750,000 barrels below last year's crop. British Columbia shows an estimated increase in production of about 450,000 barrels, while Nova Scotia's crop is about 200,000 barrels, below last year

Canada's potato crop is estimated at 67,382,000 cwt., an increase of approximately 7,000,000 cwt., or ten per cent. over last year.

The cotton crop in British Columbia is reported to have matured very well but is be considerably lacking in size. The estimated yield is placed at from 200 tons. The Ontario onion crop estimated at 1,000,000 bushels is also under favorable conditions and is 20 5 per cent greater than in 1929

Confessed Criminals

Dr. Sheldon Glueck, assistant professor of criminology at Harvard law school, has reported that results of a recent survey lead to show that four-fifths of the prisoners at the Massachusetts state reformatory fail back into crime at least once within five years of their parole. The report covered the records of 500 prisoners released between 1911 and 1923.

Open New C.P.R. Offices

Handsome new offices of the Canadian Pacific Railway have just been opened at Confetta Avenue and Chambers Street, Windsor, Ont. Above top—at above the location of these offices, the opening of which was made the occasion of a large gathering of C.P.R. men from every department of the company's activities as well as of representative citizens from Windsor. Inset shows Mr. Cecil B. Jackson, Mayor of Windsor, who cut the ribbon that served to tie the front entrance of the building.

Says Security Of Our Future Depends On The Courage Of Farmers Of Western Canada

Screening Feeds Officially Graded

Low Prices Should Make Them Popular For The Summer

Canadian farmers will be particularly interested in the following statement issued by the seed branch of the Dominion Department of Agriculture:

Screenings shipped for feed from terminal elevators are now being sold under grade certificates under the new grade standards and designations provided by the Canada Grain Act or regulations thereunder

Standard reclaned screenings, containing essentially of broken wheat and wild buckwheat, are now being issued "No. 1 Feed Screenings"

A second quality of these screenings, in addition to the wheat and wild buckwheat may carry appreciable quantities of wild oats and grasses grains, is designated "No. 2 Feed Screenings." This grade also allows a slightly greater tolerance of dockage than No. 1 grade, and would be more generally suitable for feeding sheep

The product formerly known as "fall screenings" and consisting mainly of wild oats, but with small percentages of domestic oats and barley, is designated "Mixed Feed Oats"

Terminal elevators, merchants and storage of wheat, are carrying substantial quantities of these grain by-products which are, in consequence, being offered at much lower than the usual prices. Minimum of barley and wild oats, finely ground are available at 40 cents per cwt sacks included, delivered at Montreal, Fort William and Quebec.

Any danger from the presence of weed seeds in these nutritious grain by-products would be corrected reasonably well by fine grinding with high power hammer grinders, and this fact together with the low prices at which they are now available should render them profitable to the Canadian feeder, even at the present low prices for oatmeal products

Soil Improvement Train

Campaign In Quebec For Securing Greater Yields

A soil improvement train has just completed its three weeks' itinerary through southeastern Quebec, having started at Coaticook on September 15th and finished at Yercheres on October 4th.

The train was organized by the Dominion Department of Agriculture in co-operation with the Agricultural Societies in the province, the seed branch of the Dominion Department of Agriculture, and the C.N.R., and was part of a campaign now under way in Quebec for securing greater yields from a more intelligent and more general use of agricultural lime and commercial fertilizers.

Of the four coaches which made up the train the first was used as a lecture room where samples of soil brought in by visiting farmers, were tested for acidity and recommendations given as to the approximate quantities of lime required according to the results of the acidity tests.

The second car was devoted to demonstrating the advantages from the proper use of agricultural lime and the third those of commercial fertilizers, while the fourth was the kitchen car in which lectures were given by the officials in charge on the use of agricultural lime and commercial fertilizers.

Upwards of 16,000 farmers visited the train in the course of its tour and about 5,000 soil samples were tested.

Cheaper Port Opened For Cattle Shipments

Rate Is $15.00 Per Head From Canadian Atlantic Ports

Two important developments in the cattle export trade occurred when Hon Robert Weir, Minister of Agriculture announced that the steamship companies had agreed to open a service from Canadian Atlantic ports to Glasgow at a rate of $15 per head.

Heretofore, the cattle boats have gone to Liverpool. Mr. Weir has got the shipping companies to fall into line on ocean rates, at a level of $15 per head One of them had been charging $20

He regards the opening of the Glasgow port, centre of a large feeding area, as of importance. The Scottish cattlemen, he said recently, are more interested in buying feeder stock while the Liverpool trade deems fat cattle ready for killing

Cattle Losses

A total of 18,869,972 telegrams was transmitted and received in Canada in 1929 an increase of 1,173,762 over 1928 There are 260,883 miles of telegraph lines in Canada.

Says Security Of Our Future Depends On The Courage Of Farmers Of Western Canada

Urging the people of eastern Canada to lend their moral support to the citizens of western Canada during these present trying period R. H. Ramsay chief commissioner of the Canadian Board of Grain Commissioners addressing the Canadian club at Toronto, recently, declared that upon the courage of western farmers to keep to their land and maintain production lies security in the future.

Farmers must be encouraged to continue to produce until conditions get right is advice Ramsay pointed out.

Western Canada today is well up against it," Mr Ramsay said "There is no doubt about that They have had two unprofitable crops on their hands. The first due to its short production and the second to very low price

Continuing, the speaker declared that if eastern peoples were in need of help "I do not mean to say help," he said, "for the west will always pay its debts as it has done in the past But it needs the moral help of every man and woman in Canada to tide over its present difficulties. The thing of prime importance now is to keep the western farmer in full production until consumptive increases to take care of it."

"I have noticed that those who have expressed views on the matter of late say the same things after they start," Mr Ramsay said. "I don't think anyone knows anything about it.

We are doing a good export business in Canada. If this keeps up the better customers from near your own doors will be lost.

"Another year it was the failure to blame conditions on the wheat pool This year it is Russia. I don't think either has had much to do with it It was just one of those periods of hopeless it that happened from time to time

Ramsay were he noted to understand the stability of western prices were he declared.

"There are a great many statements flying around in the press and on the streets which mean, I believe, to credit the western farmer with little common sense or gumption in the mud. "My own experience is that the western farmer is a very fine type of business man.

"He is not going to be conquered and he is not going to abandon his farm. I have always thought that the biggest difficulty the western farmer has is to understand the stability of his tenure on the land. In other words that he won't end up going towards the building up of his home

"He doesn't want to have to move. There is a saying in the west that two moves on a farm is as bad as a fire, that money will be lost

"It is a fact that he holds to his own power a great deal of stability to have the trust of production He can live off the land and will do that before he will leave his farm."

Mackinnon and farming to introduce large-scale operation in western Canada would mean social disaster. In Mr Ramsay's opinion

"I think that there is a real place on the farm for some mechanical assistance" he said "but I think it would be a national calamity if the farm home gave way to mechanized farming

"We need that population on the province. The big difficulty this country has had is to keep those people on the land until conditions remedy themselves."

Fresh Lovers

Thousands of births were broken in England since January 1, 1930, the office marriages certificates reveals Figures from this office show that more than 2,300 licenses were returned for fetch brides and bridegrooms since that date

"Darling listen to my plea."
"But you are too old for me. I will think over it until tomorrow."
"But I shall be older tomorrow."—Humorist.

HEADACHES

Ended by Kruschen

"I was a martyr to headaches, with frequent attacks of dizziness affecting my vision. My occupation is a very sedentary one—a printer's reader. I gave Kruschen Salts a good trial, and from then onwards I seemed quite another person. The headaches disappeared and the dizziness, and the most wonderful thing to me is that I have gone back to weaker glasses, a lens which I had discarded some years ago as not being strong enough. I also suffered from bad circulation during the early mornings of winter. Now at 58 I can enjoy cold baths all the year round, enjoy and am eager for my food and am what I consider very fit—the sort of fitness that makes living a pleasure."

Headaches can nearly always be traced to a disordered stomach or to partial constipation—a complaint many sedentary workers suffer from without ever suspecting it.

Kruschen Salts go right down to the root of the trouble and remove the cause by gently persuading the organs of elimination to function exactly as Nature intended they should.

WORLD HAPPENINGS BRIEFLY TOLD

France's newest submarine, the Prometheo, a long-distance cruiser of 1,500 tons, has been launched successfully. The ship is 295 feet long.

A flight from Montreal to Paris in the spring of 1931 is the hope of Rudolph Page, French-Canadian private and commercial pilot of Montreal.

The end of the present season will find the air operations department of the Ontario forestry branch with a new record of over 14,000 hours flown during the year.

Edmund A. Galison, 17-year-old American youth, won the fifth International Oratorical contest held at Washington. Paul Ledoc, 17-year-old French-Canadian, was second. Youths of eight nations competed.

General V. I. Karpoff, one time commander of the Chinese military forces at Tientsin, under the late Marshal Chang Tso-Lin, has abandoned his military career to become a monk.

W. B. Lambie, the British Government's assistant deputy trade commissioner in New Zealand, has been transferred to Canada, and will take up his duties in Winnipeg in December.

Empire delegates to the Imperial conference saw 37 different types of British aircraft in action at Croydon Airport, England. Prime Minister Ramsay MacDonald witnessed the air performance, executed in honor of the overseas visitors.

Question of more severe penalties for the adulteration of butter is under the consideration of Hon. Robert Weir, Minister of Agriculture. A request for such action was recently made to Major Weir by the Montreal Produce Association.

No decision has been reached to conduct an investigation into the cost of constructing the new Montreal bridge states Sir George Perley, acting prime minister. Sir George was asked in respect to rumors that the government proposed to institute such an inquiry.

Keeping Down Weeds

Good Work Carried On In Alberta This Year In Connection With Weed Eradication

Good work was done in Alberta this year in the keeping of soil free from weeds, it was reported at a meeting of the advisory weed board at the Parliament Buildings at Edmonton. The activities of sixteen supervisors were reviewed under the direction of E. L. Gray, field crops commissioner. Recommendations from the board will go to the Department of Agriculture as to next year's work, for which some important undertakings will be suggested.

CORNS RELIEVED instantly! PUTNAM'S CORN EXTRACTOR

Reverse Only Temporary

Britain Not Likely To Abandon Imperial Air Program

In its stunning effect upon the public consciousness, the disaster to the R-101 may be likened to that which overtook the "Titanic" before the war. But the loss of the largest, finest and fastest trans-Atlantic liner that had been built up to that time has not prevented the British from continuing to produce great ocean-going vessels. In fact liners now on the stocks or projected exceed in size, speed and superb furnishings anything ever before contemplated. The terrible mishap to the R-101 will doubtless delay Britain's dream of an all-embracing Empire air service, if only for the reason that so many of her air experts have been lost. But it may be taken for granted that the British will not abandon the Imperial air programme of which we heard so much on the recent visit of the R-100 to this country. All down through her history the Mother Country has displayed a genius for converting failure into success—for turning temporary reverses into lasting triumphs.—Toronto Mail and Empire.

Tenth Anniversary Of Radio Broadcasting

Although Opportunities Were Restricted Development Has Been Rapid

The tenth anniversary of radio broadcasting, which gave the industry its greatest impetus, was celebrated a few weeks ago. The first program went on the air [illegible] a Pittsburgh station in 1920, and some weeks later this same station introduced radio to politics by [illegible] ing returns of the [illegible] election. Crystal-detector sets were then the last word in reception, and it was necessary for members of the family to take turns at wearing the earphones. Restricted as were its opportunities, however, broadcasting developed so rapidly that within a few years the air was overcrowded and the Government was seeking some form of regulation.

The substitution of electrified vacuum-tube sets for those with crystal detectors and the replacement of earphones with loud speakers, together with other improvements, greatly increased the range and quality of reception. Television today is scarcely more of a novelty than broadcasting was in 1920.

These developments have created great industries.

Recipes For This Week

(By Betty Barclay)

WAFFLES

2 cups flour.
4 teaspoons baking powder.
1 teaspoon salt.
1½ cups milk.
3 eggs.
6 tablespoons butter.

Beat yolks well; add milk and sifted dry ingredients quickly. Add melted butter. Fold in stiffly beaten egg whites last. This recipe makes six large waffles.

Honey Syrup

½ cup melted butter.
3 cups honey.
Heat honey and add melted butter.

SCALLOPED SWEET POTATOES AND APPLES

2 cups cold boiled sweet potatoes cut in ½ inch slices.
½ cup sugar.
1½ cups thinly sliced sour apples.
4 tablespoons butter.
Salt.

Put one-half the potatoes in buttered baking dish, cover with one-half the apples, sprinkle with one-half the sugar, dot over with one-half the butter and sprinkle with one-half the salt. Repeat. Bake in a moderate oven one hour.

First Compound Steam Engine

The first compound steam engine was invented in Canada by Benjamin Tibbits, who used it in the steamship "Reindeer" which he designed and built at St. John, N.B. This invention, by reducing the amount of fuel required, revolutionized marine transportation.

Canada's Wooden Ships

The building of wooden ships in Canada reached its maximum development in 1865, although in 1852 Quebec alone had 25 shipyards, and eight floating docks, giving employment to 5,000 workers.

At 20 years of age we know; at 30 we think we know; at 40 we are uncertain, and at 50 we give it up.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills. [illegible] All Druggists 25c and 75c red pkgs.

Brilliant Triumph Scored By Kingsford-Smith

Australian Has Proved Himself One Of World's Greatest Aviators

If the British Empire suffered any loss in aviation prestige through the recent disaster that befell Great Britain's great airship the R-101, that prestige would seem to be restored by two outstanding later achievements. These were the flight of a Canadian aviator, Captain Errol Boyd, from Newfoundland to England, and now the brilliant triumph of Wing-Commander Kingsford-Smith of Australia in flying from England to his own country with such speed as to clip more than five days from the previous record. Kingsford-Smith completed this 10,000-mile flight in the remarkable time of nine days, 22½ hours as against the 15½ days it took Bert Hinkler, the previous record-holder, to make this trip in 1928. Kingsford-Smith's time is the more [illegible] in view of his impaired physical condition of late. Shortly before his flight he had undergone [illegible] operations and had experienced [illegible] illnesses, and was advised by his doctor [illegible] to make the flight.

The view is expressed that [illegible] Australian aviator's [illegible] of a more impressive nature even than those of Col. Lindbergh, the American, whose great [illegible] flight from New York to Paris and whose achievements in the air at home and in neighboring countries since that time have stamped him as perhaps the world's premier peace-time ace. Certainly Kingsford-Smith's achievements, in crossing the Pacific, then the Atlantic, and now in making this 10,000-mile hop across the vast sea and terrain of the southern world, warrant his being regarded as one of the greatest aviators the world has known. He has distinctly scored in behalf of his country and the British community of nations as a whole. He has written high the name of the British Empire upon the scroll of daring and achievement in the skies. —Regina (Evening) Leader-Post.

WHEN FOOD SOURS . . .

Sweeten the Stomach instantly

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless liquid; pleasant, efficient and harmless. But it kills excess acids. It has remained the standard with physicians for more than 50 years.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for over fifty years in correcting excess acids. 50c bottle—any drugstore. The genuine is always a liquid—never made in tablet form. Look for the name Phillips' on wrapper and bottle.

SUNDAY SCHOOL LESSON

NOVEMBER 9

THOMAS—THE HONEST DOUBTER

Golden Text: "Thomas answered and said unto Him, 'My Lord and My God.'"—John 20.28.

Lesson: John 11.14-16; 14.5-8; 20.24-29; 21.1, 2.

Devotional Reading: Proverbs 3.13-20.

Explanations and Comments

Thomas the Pessimist, John 11.14-16. Read John 11.1-13.—When Jesus told the disciples that Lazarus was fallen asleep, they took his words literally, and He had to tell them plainly that Lazarus was dead. And then Jesus added words that at first sight seemed strange: "And I am glad for your sakes that I was not there, to the intent ye may believe." When He had first heard of the sickness of Lazarus, He said, "This sickness is not unto death, but for the glory of God, that the Son of God may be glorified thereby." It was for Jesus a great opportunity to render service and inspire faith.

"Let us go unto him," then Jesus announced His intention of going to Bethany. Thomas who is called Didymus ("Didymus" means twin) was [illegible] death would be the fate of Jesus if He were seen at Bethany, but loyally he said to the other disciples, "Let us also go, that we may die with Him."

Thomas the Practical, 14.5-8. Read John 14.1-4.—In His last discourse with His disciples Jesus told that He was going to prepare a place for them in His Father's house. When He said, "And whither I go, ye know the way," Thomas voiced his failure to understand the words: "Lord, we know not whither Thou goest; how know we the way?" Thomas was still expecting Jesus to establish an earthly kingdom, and this obsession prevented his mind from grasping the meaning of his Master's words. "I am the Way, the Truth, and the Life," Jesus answered. "The Kingdom which I have come to reveal, is not an earthly one; the mansions of which I have spoken are in heaven, not on earth. To share in my Kingdom is to share that state of exalted and blissful communion with the Father, which is not possible on earth. I depart to heaven, to enter that state of bliss. [illegible]

Has Faith In Sub Trip

Stefansson Believes Wilkins' Voyage To Pole Will Be a Success

Vilhjalmur Stefansson, who has spent most of his life in the Arctic circles, is firmly convinced that Sir Hubert Wilkins' voyage to the North Pole in a submarine will be a success. Sir Hubert was second in command during Stefansson's 1913-1916 Arctic expedition.

"If I were an insurance agency," he said, "and were to write a policy on Wilkins and his party, I would insure them for less in a submarine trip than I would in a polar flight in an airplane.

"The reason I believe the experiment will work out is that there are no icebergs within 600 miles of the North Pole. There are ice floes, but these floes are of no great depth and a submarine might easily pass under them.

"Many people think the Arctic seas are infested with icebergs. This is not the case. If it were true, then such an undertaking as Wilkins suggests would be impracticable, for icebergs have a depth of a thousand feet or more."

Caramel Pudding

One of the most delicious desserts one can serve, and it is one especially loved by children, can be said practically to make itself. It is called Caramel Pudding. Here it is:

"Place an unopened can of Borden's Eagle Brand Condensed Milk in a kettle of boiling water and simmer for two and a half hours, being careful not to let the kettle boil dry. Remove can, cool and chill. Remove top of can, cutting along the side of can—not the top—so that the contents may be removed whole; place on a serving dish and garnish with broken nut meats and whipped cream. Or serve individually, cut in slices, garnish with nut meats, and whipped cream—or use plain unsweetened cream, with or without [illegible]

CHAPTER III.—Continued

"But that's it," she said with sudden courage. "Did you hear what that dear old man said to me to-night? He said 'Give him plenty of rope to run on.' And you'd be freer without me, Nick, on this wonderful trip—a thousand times freer. You've given me the happiest week of my whole life. Only—only I should want you to come back to me again."

Nick looked at her. The moon was so bright that he saw distinctly the sweet curve of her lips, and the soft, dark hair above her brow. Something in her nearness made him curiously inarticulate, and she misconstrued his silence.

"I could go back," she hesitated, "and—and when you got tired of roaming—(and I suppose even the most confirmed vagabond has such moments), why—I'd be waiting, and—and glad to see you. . . ."

She could no longer control the tremble in her voice, and the sound awakened Nick from the trance her words had brought upon him.

"So that's your problem?" he said quietly. "Well, my precious little wife, I'm relieved to hear that you'd be glad to see me! For just a moment I wondered if you were weary of your bargain. As for myself, Gay, I don't care for that long rope, if it's so long that I can't see you at the other end. I don't want my freedom without you to share it. I know I'm a kid in lots of ways, dear—too much of a kid to know how dearly I loved you, even a week ago. But I know now. That answers your problem, doesn't it?"

He would have kissed her, but she moved from him a space, and said, her voice still trembling: "Oh, Nick! you are always so sure. Are you never [illegible] of—Life?"

"No," Nick answered. He sat quite [illegible]

though the [illegible] hadn't told her, she knew it was the end. I knew it, too, though I was only fourteen that day. Talk of being afraid of life! I was afraid then. The thought of losing my precious mother, and of living in my uncle's house without her to defend me, was pretty bleak. She knew that, and I suppose she wanted to give me something to hold onto."

Nick paused a moment, his eyes big and dreamy.

"I can see her now lying there with her two beautiful braids falling over her shoulders. The window was open, and the breeze that blew across the lamp made little flickering shadows on the pillow. She was pale, but, boy as I was, I was conscious of an unearthly beauty in her face. She said (I have never forgotten one word), 'If I don't get better, sonny, there's something I want you to remember. Life won't be easy for you without me. [illegible] uncle's a hard man, dear. He won't understand you, or help you to do the things you'll want to do. The next few years may not be happy years, but you must remember that life is a highway—a long, long highway that we must travel whether we will or no. If your life's like most lives, Nick, you'll find weary stretches of dusty road that seem to go on forever, and ever, and ever. But usually, when the way seems hardest, and your endurance is almost at an end, the road will lead into a cool woodland. You'll smell the ferns—you'll hear a brook rippling across the stones, and the song of a bird. Or, after a heartbreaking effort to keep your feet in the straight and narrow path that they must tread, son, if you're to know real happiness, you'll reach a hill-top, and see 'the earth and the fullness thereof' stretched out before you; and the sight will make everything worth while.

"'And as you look back on your journey, Nick, you'll forget those weary, hot, interminable miles. You'll remember only the brooks, and the birds, and the [illegible] along the way. [illegible] the [illegible] that one remembers at the journey's end. Life is a highway, but you can make it a happy highway. Promise me that you will try.'"

Nick drew a quivering breath, as if [illegible]

Says India Will Remain Loyal

[illegible]

His reference to India was made while touching upon the contribution made by the dominions in wartime, and of the present esprit de corps of the land, sea and air forces of Canada. India, too, had made sacrifices during the war, sending a million men to various fronts.

"One of the most important and critical conferences ever held," was his excellency's view of the Imperial conference.

Touching on the general situation in Canada the governor-general said he was perfectly confident the present depression would soon pass away. "If I know anything of the spirit of the Canadian people I know that this dominion will soon go on with that sound and solid progress that has brought about the great development of this country.

Wartime Memories

British Foreign Office Would Discourage Perpetuation of Memories Of War

The British foreign office, wishing to discourage the perpetuation of memories of wartime antagonisms, has proposed to all European governments that henceforth memorial wreaths should not be laid on cenotaphs or tombs of [illegible] during official visits.

The Labor Government has issued no formal announcement of the step, but it is confirmed by the department officials. The government feels that in [illegible] international [illegible] the less emphasis on war the better.

An Oil For All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To ease pain, [illegible] wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

Still Entitled To Pensions

Settlers Abroad May Keep Up [illegible] In Britain

The British Ministry of Health has issued a notification, reminding settlers, who have left Great Britain or Northern Ireland, within the last year or two, that under the British Pensions Act, which came into force at the beginning of the year, they may be entitled equally with those, who have recently gone overseas, to revive or [illegible] insurance for the purpose of securing pensions and benefits for themselves and their dependents.

If, however, they left the country before January 2, 1930, they must apply to the Ministry of Health, London, England, before the end of this year. The full facts of their case should be set forth in writing in order that the ministry may [illegible]

Text Book Controversy

U.S. Text Book Used In Australia Described As Insulting

A United States text book—Hayes and Moon's Modern History—adopted as a standard book in the state of Victoria, Australia, has become the centre of a controversy.

The Australian Natives' Association, a national organization of Australian-born citizens, has protested against the book, describing it as biased, untrue, and insulting. State Minister of Education, Lemmon, is threatened with opposition at the next elections if he does not withdraw the book.

In particular the Australian Natives' Association say the following two statements are falsification of the truth and an insult to Britain and Australian troops:

"The British collected a motley army, composed chiefly of colonial troops, and landed it on the tip of Gallipoli Peninsular, close to the Dardanelles."

"The United States was the only great power that fought in the war without demanding or even desiring territorial gains for herself. She should be credited with a loftiness of purpose and unselfishness that could hardly be matched in all history."

The Japanese Method

Government Makes Law Which May Reduce Grade Crossing Accidents

Japan is having trouble with grade crossings. More accidents are being caused by motorists attempting to beat trains across intersections. The court of that country, however, is determined to aid in reducing grade crossing accidents. In the future the motorist who races trains to crossings will do so at his own risk. His heirs will have no claim on any railway company, public or private. The new ruling recognizes that the country will be benefited more by faster train schedules than by preserving the lives of those who are incautious enough to attempt to beat the locomotive.

Crying Babies Are Sickly Babies

The well child does not cry. He is laughing and happy all the time. Baby's cry of distress is the only means he has of telling the mother or nurse he is ill. Mothers, you can keep your little ones well and happy by giving them Baby's Own Tablets—the [illegible] remedy for all childhood ailments.

Baby's Own Tablets are a mild but thorough laxative. They sweeten the stomach; regulate the bowels and thus banish constipation and indigestion; break up colds and simple fevers and [illegible] the irritation accompanying the cutting of teeth. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

British Empire Trade Building

In connection with the proposed chain of British Empire trade buildings designed to promote trade between the different parts of the Empire, tentative plans have been presented for the Winnipeg building, which will cost between $1,500,000 and $2,000,000.

LADIES' CURLING CLUB TO MEET WEDNESDAY

A meeting of the Tofield Ladies' Curling Club will be held at the Curling rink on Wednesday evening, November 5th at eight p.m. All lady curlers and all those interested are invited to attend.

GRIPPING STORY OF THE RIO GRANDE BORDER COMING TO VARIETY THEATRE FOR SATURDAY

Heralded as a gripping drama of the west, "Romance of Rio Grande", a Fox production, with Warner Baxter, Mary Duncan and Antonio Moreno featured, comes to the Variety Theatre for Saturday.

Taken from a widely read novel, "Conquistador," by Katherine Fullerton Gerould, the action unfolds a[illegible] and a youth, estranged by a wealthy grandfather, and forced to go his own way in dangerous [illegible].

"Romance of Rio Grande" seethes with the stormy skirmish with a band of outlaws and a crew of railroad workmen to the battle to the death between Baxter and Moreno.

This picture, which was directed by Alfred Santell contains the elements of entertainment that hails a new type of western drama.

This production is packed with action and it was while acting for this picture that Antonio Moreno received injuries which indirectly led to his death.

CHURCH PARADE

Members of the Tofield Branch of the Canadian Legion and returned men of the Great War and other campaigns will parade to the Anglican church for divine service on the Sunday preceding Armistice day. Service will commence at three o'clock and the parade will start from the Town Hall at 2.45. All ex-service men are invited to parade. Medals will be worn.

Rev. R. J. Symes, who was a resident clergyman of the local Anglican Church in 1929, visited in Tofield on Friday and Saturday, October 31st and November 1st. Mr. Symes was on his way to England, where he anticipates securing a chaplain's position in the naval service.

CURLING CLUB MEETING

A meeting of the Tofield Curling Club will be held in the waiting room of the curling rink on Friday evening, November 7th at eight o'clock. All curlers and prospective curlers are requested to attend, as it is desirous of ascertaining what the total membership is likely to be for the coming season.

Local and Personal

Geo. Agnew has moved his office from the Royal Alexandra building to Main Street and is now located in the Co-op. block.

Mr. and Mrs. Geo. Bissett visited friends at Tofield over the week-end.

Mr. and Mrs. Calvert visited the city on Friday.

Mrs. Stevenson of Lennoxville, Quebec, and Miss McCauley of Hollywood, California, visited their brother, Mr. A. J. H. McCauley, this week.

Miss L. Gray is visiting in the city for a few days.

Mrs. Walk is visiting friends in Winnipeg and will be gone about three weeks.

Miss Clara Abbott visited her home here over the week end.

Miss Forester, teacher of the primary department of the Tofield school, spent the Thanksgiving holiday with her people at Calgary.

Mr. and Mrs. Bullock and Miss Dorothy Baptiste motored to Fort Saskatchewan on Friday evening.

Mesdames Clutterham, Lee, Galloway, Cory and Jobb motored to the city on Tuesday last.

Don't forget the dance in the Variety Theatre on Wednesday, November 19th. Martin's orchestra of Edmonton has been engaged.

Mr. and Mrs. Lewis of Edgerton were visiting Mrs. Lewis' mother, Mrs. W. Bowick over the week end.

Mrs. Paul of Edmonton was visiting her sister, Mrs. Barden, this week.

Bob Hopgood was a visitor to the city for Thanksgiving.

Miss Thelma Jobb spent Thanksgiving at home.

Gordon Jobb, who is now on the staff of the Bank of Montreal at Red Deer, was home for the Thanksgiving holidays.

Ulalf Swinton who is working at Clyde, Alta., was home for Thanksgiving.

Vernon Martin who is teaching school at Paradise Valley, was home for Thanksgiving.

Hon. V. Smith, minister of Railways and Telephones, and Mr. Bradburn, were on a shooting trip in the Tofield district on Friday last. While here they were guests at the Royal Alexandra hotel.

Miss Muriel Malcolm who is attending business college at Edmonton, spent the holidays with her parents here. She was accompained by Miss McGraw and Miss Benson.

Among the week-end visitors to Tofield Mr. and Mrs. Cory entertained Mr. and Mrs. H. Law of Cheadle, Alta., Mr. and Mrs. D. Law, of Edmonton; Mrs. Fenwick of Moose Jaw, Sask., and Mr. and Mrs. Geo. McCargar of Warspite, Alta.

CORNHILL MUNICIPALITY MAY APPOINT SALARIED MUNICIPAL DOCTOR

At the November meeting of the Cornhill Municipal District Council the question of the appointment of a permanent salaried doctor for the ratepayers of the municipality was discussed at some length. The general feeling of the council was strongly in favor of such a procedure.

Consequently a prepared bylaw was read a first and second time. The by-law, when it is read a third time at the December meeting of council will be ready to be put before the people by advertising in the local paper and in the Alberta Gazette.

The present plan is to have a medical man stationed at Tofield. The far corner of the municipality in the Hay Lakes district will, quite likely, not be included, but it is the intention of the Council to approach the Council of the Beaver Lake Municipality to ascertain if a portion of the territory adjacent to Tofield, but in that municipality, can be included.

Under the plan proposed medical attention will be given to ratepayers free. For office consultation there will be no charge whatever but there will be a mileage driving rate for housecalls.

Should a visit to the hospital be necessary a saving to the ratepayer would be effected, but the passing of the bylaw would not effect the hospital or operation fees.

The cost per quarter section would be governed by assessment and is not at present known, but it is expected it would be between five and six dollars per quarter section.

Bardo

Mr. and Mrs. S. T. Foshaug were pleasantly surprised on Sunday, November 2nd, when a crowd of over 170 people gathered there to help them celebrate their silver wedding.

A sumptious lunch was served, after which short talks were given by Rev. Bjolde and P. B. Anderson. Albin Anderson and Per Bjornson then sang each a song that had been composed for the occasion by Martin Eide.

Mr. and Mrs. Foshaug were presented with a tray of silverware from their friends, and a silver casserole and flowers from their children. The best wishes of the entire community are extended to the bride and groom of twenty-five years.

Following is one of the songs composed by Mr. Eide.

Foshaug from Norway came
Out here to look for land and chance
Adventure and advance
And others did the same.
Soon on this mighty plains were found
Homesteaders all around!
Homesteaders all around!

He went to work with will
He built his home, he broke his lands
He used his head and hands
And did his work with skill.
He strove in weather good or bad,
And soon a home he had, and soon a home he had.

But to make a home takes two
To be alone for man is bad
It was in Eden said
It always will be true
His was a life of work and stress
But worse was loneliness, but worse was loneliness.

Now nobody can him blame,
How can it well be otherwise?
Of yore in Paradise,
Old Adam felt the same.
Since women then were not in trade,
A wife for him was made, a wife for him was made.

Now Foshaug thought: let's see
If Adam in the years long gone
Found one when there was none,
There should be one for me.
When girls are swarming all around,
One should be easy found, one should be easy found

He had not far to go
I think it was about a mile
The trips were worth the while—
And he spoke to Alma so,
I am sick and tired of bachelor life
Now will you be my wife, now will you be my wife.

I did not see, but yet
I bet she got a little red
"It's so sudden this," she said
And then she said "You bet."
Yes, I will be your faithful wife
And stay with you for life, and stay with you for life.

To Anderson he went
And said, we have our license got,
We'll marry, tie the knot
We have Pinseth's consent
Then kindly said the grand old man
I'll tie the best I can, I'll tie the best I can.

You may believe he did
He tied the knot so tight and smart
They will not come apart.
On that a bet I had
He was an expert in this trade,
And sure a knot he made, and sure a knot he made.

For five-and-twenty years
The knot he tied has stood the test
I'll quit, you know the rest.
Now let us join in cheers.

LAKESHORE

Mrs. Will Abernethy has been indisposed with rheumatism for the past week or so.

Miss Edith Riley came from Drumheller last week to spend Thanksgiving with her parents and brothers.

Mr. and Mrs. Theodore Wanck of Golden Spike visited at the Henry Tiedeman home last week.

Mrs. L. H. Graham and Miss Baines entrained for Edmonton last Wednesday evening. Miss Baines to attend the Teacher's Convention in the city and Mrs. Graham to go to Ashmont for a short visit with friends.

Mr. and Mrs. Ward and Mr. and Mrs. Noland and Thelma were Sunday visitors at the J. H. Johnston home.

Miss Alma Tiedeman left on Tuesday to visit her sister Mrs. Wanck at Golden Spike.

TOFIELD CURLING CLUB MEET—SKIPS APPOINTED

A general meeting of the Tofield Curling Club was held in the rink waiting room on Friday evening, November 7th. Skips were elected and arrangements for the coming season were made. The following are the skips: John Lee, J. W. Chapman, Geo. Agnew, G. McLaughlin, J. G. [illegible], A. J. H. McCauley, W. C. Swift, M. C. Hammond, T. L. Malcolm and G. H. Rowe.

It was also decided that any other curler who could get up a rink would be allowed to do so, and would be added to the list of skips already elected.

Dr. F. F. Law is the president of the club for the present year; Geo. Agnew, vice-president and J. W. Chapman, secretary. Mr. Claude [illegible] is the hon-president.

PORTABLE POULTRY PLANT INTRODUCED

For the first time the Edmonton plant of the Alberta poultry pool is sending out a portable killing plant. The plant which commenced operations at Killam will visit Tofield on November 13th and 14th. At Killam over one thousand chickens were killed and packed daily.

Town Gossip

One or two conversations we have taken part in since the last issue of the Mercury, gives me the impression that some readers interpreted the remarks re agricultural societies appearing last week to mean, firstly, an "attack" on the government. Secondly that the present depression is due to the non-existence of the Tofield and other agricultural societies.

• • • • • • •

Nothing could be further from the truth and both interpretations have their element of humor. It matters little to the Mercury what government is in power and I am quite sure that it matters little to the government at this time what the Mercury says about it.

• • • • • • •

Agricultural Societies in every town and hamlet could not possibly have prevented the world financial crisis.

• • • • • • •

It has for years been our belief that agricultural societies should have been encouraged and improved by the government, and the right circumstance occurring, we said so.

• • • • • • •

Of course, this should be said, that some agricultural societies have maintained their existence, grant or no grant.

• • • • • • •

Carl Weise of the Co-op. store was rather unlucky this week. He left Tofield on Friday evening for his home in Edmonton where he spent the week end, returning on Monday evening.

• • • • • • •

Storing his car, an Overland six, in the Tofield Garage as usual, he was informed on Tuesday morning that it had been stolen.

• • • • • • •

Hold-ups, robberies and kindred troubles have the police of Edmonton almost distracted. They no sooner get started investigating one major robbery than another one occurs. The citizens are thoroughly alarmed and many who walked unconcernedly anywhere at any time, now stay indoors after dark.

• • • • • • •

Some hold-up artist is going to get caught one of these nights and while, perhaps, he will not have been responsible for all hold-ups, it is more than likely that, public opinion, being incensed as it is, he will receive a stiff enough sentence to make him think he was.

• • • • • • •

The gossip column add its congratulations to the many received by Mr. and Mrs. Foshaug on the occasion of their silver wedding.

• • • • • • •

To many the song written by Mr. Eide in honor of the event may not [illegible] a great deal, but to those accustomed with old time customs it will be of much interest.

• • • • • • •

Among those people living close to the north sea, unusual and important events were almost invariably the topic of a song. Storms, shipwrecks, bumper harvests of land and sea, launching of vessels, weddings, silver weddings, golden weddings, coronations, in fact anything unusual caused a song to be composed and sung.

• • • • • • •

Not all, of course, were good poetry, they were never intended to be. The narrative strain being more dominant than that of rhyming, though of course rhyming as far as possible was attempted.

• • • • • • •

One feature, peculiar according to modern day standards was the repeating of the last line, presumably for purposes of emphasis. This we recognised immediately, and even if the linotype kept on working, in our minds eye we saw Norwegian barques loaded with "pitch pine", being towed to their moorings. Saw the stevedores unload. Saw the crew on Sunday when they had tea and cake. Saw them with their accordeons, music and song.

• • • • • • •

We have not the pleasure of knowing Mr. Eide but we'll bet a bundle of green feed all of his poetical inspiration did not originate amid Canadian literature and that his "style" would lead one back into days in other lands, days long before the prairie west was visited by white men.

What Have You Learned About Life?

A world-wide organization of men recently conducted a contest, requesting letters on the subject "What Have I Learned About Life." Numerous replies were received and the writer of this column feels that he cannot do better this week than pass on one of the prize winning essays. It is brief, and to the point, and reads:

I used to drive my father's car on the country roads. While bouncing along over the rough ruts on the right side, the left part of the road always appeared more inviting, but once on that side I inevitably found it just as rough or worse.

This is the first lesson I have learned about the roadway of life. The other side is deceiving. The boy longs to be a man, and the old man glorifies the golden days of his youth. The poor yearn to be rich, while a larger income consistently calls for more expense. But the successes and gains of life are not in the future or the past, nor in the other man's back yard. They lie within our own reach at the present time and in the present conditions. Life has lined us up for an even start.

The second thing I have learned about life is that God hasn't finished the job. We rejoice in the accomplishments of science, religion and social relationships, but yet in the crowded ways of life we find vile strife, unbrotherliness, political corruption and the curse of a maladjusted industrial order. Civilization is in its infancy, and its growth will depend on us of the present generation. There are still new worlds for men to conquer.

It doesn't take long for one to learn that there is no getting by in the long run of life. Being born into the world with this or that fortune or pedigree does not guarantee that one shall have a sturdy character and a personality that shines like the morning sun. Regardless of where a man starts in life those things of lasting value, education, religion, business power, a strong and virile physique and a happy home life are obtained only by long hours of patient and arduous toil and self-discipline which alone are the harbingers of a radiant and masterful personality. There are no sales and charge accounts in the market places of life. The price of the best is constant.

Finally I have learned that there is enough happiness in life to go around. No man is cut off from his heritage of happiness even though it be interspersed with hardships and sorrows. To be able to see the vision of life's task in spite of the cramped quarters of a small job, to find outlet of soul and character in stooping to help a brother while persecuted by others, to rejoice in the exaltation of personality while crushed in the wheels of industrialism, and to be happy in a great and thrilling quest with the fresh dawn of each immortal day—this is the major lesson of life.

Shipping Asbestos To Japan

About Eighty Per Cent. Used Is Produced In Canada

The market in Japan for asbestos in lump, powder and fibre as well as in packing and other forms is increasing year by year owing to the expansion of industrial plants using this material and to the great variety of uses to which asbestos products are being put in everyday life, according to James A. Langley, commercial secretary to the Canadian Legation at Tokyo, Japan, in an article in the [illegible] issue of the Commercial Intelligence Journal.

About 80 per cent. of the asbestos used in Japan comes direct from Canada, a small percentage from Russia and the balance through one or two [illegible] in the African asbestos deposits. The demand for asbestos powder and fibre runs to about 12,000 tons.

Will Teach First Aid

Art To Be Taught At Balfour Technical School In Regina

The art of first aid is to be taught in specially established classes at Balfour Technical School in Regina. The school is co-operating in this work with the St. John Ambulance Association and a statement issued at Ottawa by the association said this new departure illustrated the increased recognition being given the necessity for knowledge of first aid in industry.

The step is being taken by Balfour school with a view to enabling employers in Saskatchewan to comply with the regulations of the Workmen's Compensation Board which requires that employers having 25 or more persons on their pay rolls maintain a first aid room in charge of a competent student of the art.

Making Trial Shipment Of Western Cattle

Prominent Ranchers Send High Class Animals To Old Country

Jack Byers, Sr., livestock promoter attached to the Dominion Department of Agriculture has taken a trainload of range steers, two, three and four years olds which were contributed by a number of prominent ranchers of Saskatchewan and Alberta, as a trial shipment of high-class cattle to the Old Country markets.

The shipment is being supervised by the Federal Department of Agriculture from loading to market. Mr. Byers sailed from Montreal to Manchester on October 30.

Veteran Government Worker

Walter Todd Has Served In Civil Service For More Than Half a Century

Walter Todd, for more than half a century clerk of committees and private bills for the House of Commons, died at Ottawa recently in his 74th year. His illness had been of brief duration.

The 57 years Mr. Todd spent as a [illegible] him, in point of continuous service, one of the oldest members of the civil service. He succeeded his father to the position of clerk of committees in 1874.

In addition to the coincidence that father and son gave many years to the same post in the service of their country, one other peculiar incident stood out similarly in both their lives. In 1849 when the Parliament buildings then situated in Montreal, were fired by an angry mob during the agitation which followed introduction of the Rebellion Losses' Bill, Mr. Todd's father cut the portrait of Queen Victoria from its frame while the structure about him was in flames.

In 1916 when the Parliament buildings at Ottawa again went up in flames Walter Todd cut the same portrait of her late majesty from its frame and once again the canvas was saved by a Todd.

Newspaper Convention

Provincial Meeting In B.C. Of Journalists On Daily and Weekly Publications

A provincial convention of the men and women who are engaged in the editorial departments of the daily and weekly press of British Columbia, the first of its kind in Canada, is planned for a late week-end in February, preliminary arrangements having been made at a meeting of the provincial executive committee of the B.C. Institute of Journalists, held in Vancouver.

The convention will coincide with the annual dinner of the Vancouver branch, which will act as host to the out of town members who are expected to assemble from all parts of the province.

Woman's Fortitude

Forces Herself To Smile Through Pain

"I never seem to find time to rest," says many an overworked housewife. Under smiles and forced cheerfulness she conceals weariness and nervous depression; headaches and backaches. Often she is in real pain, but still refuses to give up. This very fortitude is apt to be her undoing. If she continues to neglect the signals of distress she will sooner or later suffer a serious breakdown.

A noted doctor has stated that nine-tenths of the ills of womanhood are due to poor blood. That anaemia is the cause of the low spirits, the poor appetite and palpitation that make life a burden for so many.

There is no need, however, for women to suffer in this way. All the miseries of anaemia can be banished by taking Dr. Williams Pink Pills. These Pills create an abundance of new, rich, red blood and this new blood will bring strength and vitality to nervous, overtired women. The Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Industry May Develop

Horse meat has never been considered a delicacy among Canadians, but frequent inquiries have come from Europe as to Canada's ability to provide such food. Already a temporary abattoir has been provided in Calgary. If the demand, which comes from Rotterdam, continues it is expected that permanent plants will be built and an effort made to completely supply it.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

Before a man can wake up and find himself famous he must first wake up and find himself.

Chest Colds

Minard's Liniment is recommended in cases of bronchial irregularity. Rub it on the affected parts, or inhale it as necessity dictates.

Would Cancel War Debts

President Beatty Of the C.P.R. Tells People Of U.S. That Cancellation Would Bring Back Prosperity

"It is not for me or any other citizen of the British Empire to discuss either publicly or privately the propriety or otherwise of war debt cancellations," E. W. Beatty, K.C., president of the Canadian Pacific Railway Company, said in a speech at Pinehurst, N.C. "But it is not surprising that men of great vision in the United States have reached the conclusion that if they were removed, industry would be stimulated, trade would expand and prosperity would return."

The railway president was addressing a banquet of the eighth annual convention of the American Institute of Steel Construction. He surveyed the amity existing between the United States and Canada, outlined the importance of railroading to the two countries and spoke of business depression and the reason for that situation in Canada. The interruption to the marketing of Canadian grain; the direct and indirect results of the stock market collapse of last fall and the somewhat unsatisfactory present conditions respecting the newsprint industry, were the principal contributing causes to Canada's present depression, Mr. Beatty felt.

The United States, Mr. Beatty said, had reached a population of 75,000,000 before its export business equalled the amount of that of Canada in 1927. "It speaks well for a country's progress when with less than 170,000,000 people it can produce this result," he said.

Alberta Gas Contains Very Little Helium

Report States Extraction Is Not Considered Economically Feasible

Alberta gas contains an element of helium but evidently not of such quantity as would make its extraction economically feasible it has been stated at the Interior Department.

About 1917, during the war, some interesting experiments were conducted at Calgary by Prof. J. C. McLennan, of Toronto University. It was found that whereas, in the Texas gas, there is a content of 1 per cent helium, the Alberta content did not exceed a third of that figure. No commercial helium was extracted at all.

The problem was one of economic feasibility, and as stated this was not demonstrated. Soon afterwards the war closed and the experiments ceased though the results were made available to the research council, and to some extent the possible developments are still being explored.

Uses Of Volcanic Dust

Volcanic dust is mainly used in the manufacture of cleansers, scouring powders, and abrasive soaps but latterly, outside Canada, there has been an increasing demand for its use as an admixture in cement, and plaster. Volcanic dust beds up to thirty feet thick are being worked near Swift Current, Saskatchewan. There are other beds in British Columbia.

[illegible]

A fussy old woman inquired of a black porter the time of the train to Chicago. She then went to a white man and asked him. The negro went to the white man afterwards, and said with a smile, "Perhaps she will believe it now she has got it in black and white."

The finest diamonds come from the neighborhood of fresh-water rivers.

Dairy Production Increases

Increasing Demand For Dairy Stock In Prairie Provinces

"Statistics of dairy production at the present time indicate that there is an appreciable increase in milk and cream production all over Canada at the present time," observes Dr. J. A. Ruddick, Dairy Commissioner of the Dominion Department of Agriculture. With respect to butter production Ontario and Alberta show a 15 per cent. increase for the first six months of the production year. Cheese production, of which 97 per cent is centered in Ontario and Quebec, was 20,000 boxes behind last year as at October 11. One of the interesting features in the dairy industry at the present time is the increasing demand for dairy stock in the Prairie Provinces.

Two Sections In Grain Show

Growers should bear in mind that there are really two sections in the wheat classes of the World's Grain Show, Regina, in 1932. One section of five classes, calls for an exhibit of fifty pounds, the other for an exhibit of ten bushels. The smaller exhibit will, of course, admit of much more careful selection than will the larger. The ten-bushel sample may be prepared with cleaning machine, but, this should be done very thoroughly.

Postage Stamp Changes

New Color To Be Adopted In Printing New Issue

Fall styles in postage stamps will show a radical change in color scheme. Within a month, or sooner, if present stocks are exhausted, a new issue of stamps up to the eight cent denomination will be released by Canada's Post Office Department. Basic colors will be changed in conformity with regulations of the Universal Postal Union, of which Canada is a member.

The one cent stamp will change its "dress" from orange to green; the two cent stamp will be red in place of green as at present; the mauve five cent stamp will make way for one of blue and the eight cent postal carrier will give up its blue color for a modish orange.

New System Of Lighting

Dummy or imitation "windows" are providing a superior kind of illumination for new office buildings in London, England. Concealed electric bulbs that simulate daylight are in the windows, which are constructed so as to resemble real windows in size and shape. Tests have proved that work is easier under this light than in the light provided by the customary indirect glow from overhead bowls.

Price 50c. a box

Felt Tired Out All Day
Could Not Sleep at Night

Mrs. Aldamond Lalonde, 2481 St. James St., Montreal, Que., writes: "After a spell of the grippe I was left very nervous, and felt drowsy and tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills and after taking four boxes I was completely relieved of my trouble, and can recommend your Pills to everyone."

EXPENDITURES FOR RELIEF ARE GIVEN APPROVAL

Ottawa, Ont.—Expenditures totalling more than $37,000,000 for public works and undertakings throughout the Dominion to relieve unemployment have been given final approval. Announcement to this effect was made by Hon. Gideon D. Robertson, Minister of Labor.

Work proposals put forward by various municipalities and provinces, which the Dominion Government has endorsed, aggregate approximately $14,000,000. A number of these undertakings are already under way. Construction and improvement programs for the Canadian Pacific and Canadian National Railways total $22,-683,000. Expenditure through the grade crossing fund is authorized to the amount of $500,000.

Expenditures approved for the different provinces are as follows:

Ontario	$10,069,067
British Columbia	1,037,550
Saskatchewan	1,292,000
New Brunswick	496,300
Manitoba	254,675
Prince Edward Island	180,000
Nova Scotia	160,100
Yukon	3,000
C. P. R.	11,514,000
C. N. R. (Approx.)	11,120,000
Grade Crossing Fund	3,000,000
Total	$37,125,842

Proposed works and undertakings for Quebec and Alberta, with estimated expenditures, are expected to be received from these provinces and their municipalities shortly, Senator Robertson declared.

Upon their receipt they will be placed before cabinet council for approval as has been done in the case of other provinces. Other proposed expenditures in Ontario, British Columbia, Saskatchewan, New Brunswick, Manitoba, Prince Edward Island, Nova Scotia and the Yukon Territory will be submitted from time to time for Dominion approval, and announcement of these undertakings will follow.

"The prime minister's promise to the Canadian people that prompt action to relieve unemployment would follow the general election in July last has been implemented since Mr. Bennett took office on August 7," Senator Robertson declared. After a survey of accomplishments in this regard to date, the minister expressed warm appreciation of the manner in which all interested had heartily co-operated in hastening the creation of employment opportunities as rapidly as could reasonably be expected.

"Steps are being taken," Senator Robertson stated, "to encourage employers to make use of the employment service offices so that unemployed workmen registered therein may be promptly made available for and acquainted with works going forward. A complete list of localities and extent of expenditures for relief works thereunder in every part of Canada will be given to the public press from time to time so that the public and particularly unemployed men will have knowledge of where and when opportunities may be found. In every agreement with every province the Federal Government's fair-wage and eight-hour-day policies have been inserted, so that exploitation of labor through working unnecessarily long hours is prevented and the maintenance of current reasonable rates are provided for."

Wheat Shows High Protein

Calgary, Alberta.—The earlier threshed grain from the southern part of Alberta showed remarkably high protein, according to tests made from many points, it is reported by the Alberta Wheat Pool. Samples for Hesketh and Iddesleigh, showed a protein content of 19 per cent., while many other points supplied samples of wheat which tested from 15 to 18 protein content.

Pays Tribute To Grenfell

London, England.—The Prince of Wales paid a tribute to the work of Sir Wilfred Grenfell in a letter which was read by the Lord Mayor of London recently at a meeting of the Grenfell Association. The letter read: "There is no doubt that Sir Wilfred is carrying on splendid work in a territory rapidly becoming an economic unit of great potential value to Newfoundland and the Empire."

Manitoba Birds For Eastern Show

Brandon, Man.—A poultry exhibit of considerable size will be sent to the Toronto Royal Show this month by the province of Manitoba. John Windover of this city stated that more than 50 birds would be shipped east and that turkeys will comprise a large portion of the exhibit.

Freemen Of City Of London

Prime Ministers Of Canada, Australia and New Zealand Are Honored

London, England.—In the old Guildhall, with its five centuries of stirring history, the Prime Ministers of Canada, Australia and New Zealand became freemen of the City of London. Premiers R. B. Bennett, J. H. Scullin, and G. W. Forbes, were declared in the ancient formula to be "men of good name and fame."

"They do not desire the freedom of the city whereby they will defraud the King or this city of any of its rights, customs and privileges," so ran the declaration of the compurgators, "they will pay their scot, bear their lot, and so they all say."

Sir Adrian Pollock, city chamberlain, introduced the new freemen. He said Premier R. B. Bennett "has not belied his reputation for plain speaking and anxiety to get things done—which admirable attributes are the more conspicuous on account of his well-known hereditary and passionate loyalty to the empire."

Premier Bennett declared he felt the honor was conferred not upon himself personally, but as an honor to the Dominion of Canada. "I shall tell my fellow-Canadians, when I return, of the high regard you hold for them in this old city and of the deep concern ever manifested in their progress and prosperity," Premier Bennett said.

Premier Bennett referred to the Imperial Conference. "Of this great conference in which we are now engaged," he continued, "I can only say that every delegate, whether from the homeland or the overseas dominions, is actuated by an earnest desire to promote the well-being and prosperity of this great empire, this commonwealth of nations of which we are trustees."

Not Exempt From Taxation

C.N.R. Pays Over Eighteen Million In Three Years

Toronto, Ont.—Replying to the statement that the Canadian National Railway fed on the public exchequer and was exempt from taxation, Sir Henry Thornton, chairman and president of the system, told members of the Toronto Board of Trade Club, that from 1926 to 1929 the railway had paid in federal, provincial and municipal taxes $18,706,000. This amount, he said, was only $3,-000,000 less than paid out by the Canadian Pacific Railway.

The $3,000,000 less can be explained by the fact that Maritime railways are under a different arrangement.

Carried Out Father's Wish

Kingsford-Smith Scatters Ashes Of His Father Over Waters Of Pacific

Sydney, N.S.W.—Wing Commander Charles Kingsford-Smith, using the aeroplane in which he made his last memorable flight from England to Australia, scattered the ashes of his father over the waters of the Pacific Ocean, which had witnessed his first notable triumph in the air.

On his death bed, William Kingsford-Smith, father of the aviator, expressed a wish that his ashes be cast to the winds over the Pacific, and his famous son thus performed his last sad duty to his dead sire. The elder Kingsford-Smith died November 2.

Shock Causes Death

Southsea, England.—Major David Thomson, 60, only brother of Lord Thomson, the air minister who lost his life in the R-101 disaster, died November 2. Physicians attributed his death to shock as a result of the tragedy.

May Visit French Capital

London, England.—Premier R. B. Bennett, of Canada, will probably visit Paris, after the Imperial Conference has concluded, to discuss trade matters with the French government.

Labor Secures Majority

Premier Ramsay MacDonald Wins Through First Division

London, England.—A majority of only 31 votes carried the Labor Government of Premier Ramsay MacDonald safely through the first important division of the current parliamentary session.

This was regarded a crucial test, for the balloting was only on a motion by the Conservative party to amend the Speech in reply to the Address from the Throne. The amendment was defeated by 281 votes to 250.

The Speech from the Throne has been under bitter attack for two days, the Conservatives regretting the failure of the Laborites to propose any adequate measures to deal with the crisis in the industrial, agricultural and commercial fields or to check the growth of unemployment.

Liberals decided to abstain from voting on the amendment. As a matter of fact, five Liberals, including Sir John Simon, voted against the government, but they were almost counter-balanced by four members of the same party who stood by the administration.

The left wing Laborites [illegible] by Premier MacDonald.

DOMINION-WIDE AIR SERVICE TO BE INAUGURATED

Winnipeg, Man.—Negotiations are nearing completion for the formation of the Dominion-wide air service, in which the Canadian National and Canadian Pacific Railways will participate, according to word received here recently. Preliminary plans for an all-Canada service were discussed some months ago, and since that time negotiations, now nearing completion, have been under way with the railways and eastern aerial companies.

James A. Richardson, of Winnipeg, financier, and president of the Western Canada Airways, who will be the majority stockholder in the organization, to be known as the Aviation Corporation of Canada, is at present in the east completing negotiations for the new air development.

The Aviation Corporation of Canada will have under its control the Western Canada Airways, the Canadian Transcontinental Airways, the Canadian Airways and other companies, providing an air service from coast to coast. The railways will both be financially interested in the organization, which it is stated, has the sanction of the Federal Government, although it will have no financial stake in the concern.

Development of train and air schedules to provide speedy transcontinental service across the Dominion is forecast.

There will be no public financing of the corporation in the immediate future, it is understood.

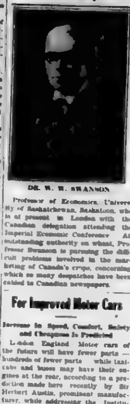
Franco-Italian Naval Difference

United States Ambassador Is Optimistic After Conference With Italy

Rome, Italy.—Hugh S. Gibson, United States ambassador to Belgium, has returned to Geneva apparently optimistic after a series of conferences with Italian government heads looking toward a settlement of the Franco-Italian naval difference.

He did not talk for publication about his conversations with Premier Mussolini and Foreign Minister Grandi, but he left behind an impression that negotiations between France and Italy will be undertaken at the League of Nations preparatory disarmament commission sessions with more likelihood of success than would have been the case before his visit to Rome.

Wheat Expert



DR. W. W. SWANSON

Professor of Economics, University of Saskatchewan, Saskatoon, who is at present in London with the Canadian delegation attending the Imperial Economic Conference. An outstanding authority on wheat, Professor Swanson is pursuing the difficult problems involved in the marketing of Canada's crops, concerning which so many despatches have been cabled to Canadian newspapers.

For Improved Motor Cars

Increase In Speed, Comfort, Safety and Cheapness Is Predicted

London, England.—Motor cars of the future will have fewer parts—hundreds of fewer parts—while taxicabs and buses may have their engines at the rear, according to a prediction made here recently by Sir Herbert Austin, prominent manufacturer, while addressing the Institution of Automobile Engineers. He added that all transport would increase in speed, comfort, safety and cheapness.

"Why we put up with the present archaic type of vehicle in London streets," Sir Herbert said, "is difficult to understand." The weight of road vehicles could be reduced with advantage, Sir Herbert declared, and a design was wanted for a 15 horse power closed car to weigh not more than 14 hundred weight.

Investigate Indian Conditions

Minister Of the Interior To Study Situation In the West

Ottawa, Ont.—In order to examine at first hand conditions on Indian reserves in the prairie provinces, Hon. T. G. Murphy, Minister of Interior and Indian Affairs, will journey to the west the end of this week. While the minister's plans have not been completed, visits are contemplated to a number of reserves in the neighborhood of Regina, Sask., and Calgary, Alberta.

According to officials of the department, reports from Indian agents throughout the country indicate the plight of Indians is serious.

With winter coming on, every effort is being made to find ways to relieve the distress which is considered inevitable.

Planning Two Great 'Planes

Berlin, Germany.—The aeroplane that startled and surprised the world, the Dornier DO-X, is to have two sister ships if information received through aviation circles proves correct. It is reported that the Dornier Company is at work building two new 'planes the size of the DO-X and that they are expected to be completed in May, 1931.

Aviator Receives Decoration

Copenhagen, Denmark.—Captain Wolfgang Von Gronau, the German trans-Atlantic flyer, received from King Christian a decoration in recognition of his crossing the Atlantic to New York by way of Greenland. The flyer said the route will be the main highway of trans-Atlantic traffic in the future.

Helium Gas For Airships

Dr. Hugo Eckener Will Use Helium Gas and Crude Oil Motors In New Zeppelin

Berlin, Germany.—Dr. Hugo Eckener surprised the annual dinner of the American Chamber of Commerce here by announcing that as a result of the recent disaster to the British dirigible R-101 he had changed the plans for Zeppelins now under construction so as to provide for helium gas and crude oil motors.

He said he had received word from the United States that helium gas which is non-inflammable and non-explosive would be available to inflate his airships in whatever quantities desired.

Dr. Eckener, who is world famous as commander of the Graf Zeppelin, declared that had it not been for an explosion the crash of the R-101 in France several weeks ago would have resulted in minimum damages. As it was the great airship burned to almost nothing and 48 British lives were lost.

Brazil Establishes Provisional Government

Reforms and Democratic Elections Promised By Brazilians

Rio De Janeiro.—The Brazilian Government, of which Dr. Getulio Vargas has become the head as the victor in a brief revolution, plans to step out as soon as it has effected reforms and democratic elections will then be conducted.

This was the assurance of Dr. Oswaldo Aranha, associate of Vargas and just named Minister of the Interior and Justice in the temporary government, who told the Associated Press that the new administration will represent the will of the Brazilian people.

"We have established a provisional government similar to that when the republic was proclaimed in 1889," he continued. "We shall shape our programme with the idea of making a real representative government and bringing honest administration into all departments."

Earnings Forty Millions Less

C.N.R. Has Deficit This Year Of Ten Million

Toronto, Ont.—Gross earnings of the Canadian National Railways system will be $40,000,000 less this year than in 1929, but drastic economies in all departments of operation and in capital expenditure will offset this to the extent of about $30,000,000, it was revealed here by Sir Henry Thornton, president of the system.

The large savings effected, he indicated, were largely achieved by putting off construction work and other new operations not immediately essential.

While no improvement or indication of immediate improvement in C.N.R. earnings was visible, Sir Henry was encouraged at what he thought was a "better feeling" by most people and business men. The extreme and unwarranted pessimism induced by the depression, he thought, was passing rapidly, which was a good sign.

NATIONAL FARM POLICY MAY NOW BE FORMULATED

Ottawa, Ont.—New departures in Canadian methods of agriculture are expected to develop from a conference to be held here November 17 and 18 between Hon. Robert Weir, Minister of Agriculture, and Ministers of Agriculture of the various provinces. The conference has been called in the hope of formulating a national agricultural policy.

Not only will the views of the provincial ministers be presented at the conference, but suggestions from the various agricultural colleges will also be put forward. Major Weir has already been in communication with deans of colleges throughout Canada, inviting them to express their opinions.

The discouragement suffered by farmers in attempting to market their crops at reasonable prices has confirmed the minister in his determination to evolve an effective national agricultural policy, according to department officials. While the most crucial phases of the problem are present in the western provinces the conference will not concentrate on the wheat situation alone, it is understood, but will endeavor to bring forth a policy of benefit to the country as a whole.

Major Weir has not made an expression of his own views, but is believed to favor a gradual increase in cattle-raising in the western provinces.

BOUND FOR EASTERN TRADE

[illegible] trucks of shortbread and more coming up to complete the carload which left Winnipeg for Toronto's [illegible]. It required 845 cases, 12,800 toothsome cakes, to fill the car with the western manufactured product bound for eastern trade—a special order completed this month.

MIGHT WEAKEN ONE OF THE FEW LINKS OF EMPIRE

London, England.—The Times recently discussed appointment of governors-general, one of the matters which has received consideration at the Imperial Conference, and concluded that one of the few remaining formal links binding the Empire would be severed or at least weakened if governors-general were to become merely nominees of the reigning governments in the dominions.

"It is not easy to see how such a nominee could adequately discharge the function of the office as set forth in the report of the 1926 Imperial Conference," the Times said. "Nothing could be more erroneous than the apparent impression in some dominions that the governor-general is merely a lay figure. If the governor-general is to represent His Majesty adequately then His Majesty's part in the appointment must be real and not merely nominal. This is all the more necessary since the governor-general is now exclusively the representative of His Majesty.

"At the same time it does not follow that a dominion government should surrender the voice in selection which they have had for a good many years."

Concerning the discussion on whether a governor-general should be a citizen of the dominion in which he holds highest office, the Times said it did not see why any class should be ruled out from the area of choice. But other things being equal, a governor-general would find it easier to discharge his duties if he came from another part of the Empire free from local associations and prepossessions. The whole matter, concluded the Times, is one for informal consultation and general agreement, not for any pedantic formula.

Grade Crossing Fund

Half a Million Dollars Are Appropriated For This Purpose

Ottawa, Ont.—Transfer of $500,000 from the government unemployment fund to the grade crossing fund has been authorized by order-in-council. The latter fund is administered by the Railway Commission. The transfer is made by the government with a view to assisting in projects for establishment of necessary grade separations at a time when employment is urgently needed.

The government makes a regular annual contribution to the grade crossing fund, but the amount transferred is in addition to that annual grant.

Will Investigate Deportations

All Future Cases Will Be Carefully Considered On Merits

Blind River, Ont.—Further deportations to their native lands of patients confined to mental institutions in the province will not be authorized until every case has been carefully considered on its merits and passed upon following a thorough examination by a competent physician.

This policy will be followed by the Ontario Government in dealing with such cases in future, according to Hon. J. M. Robb, provincial minister of health, in discussing the cases of three women recently to come under the deportation order.

Alberta Cattle For Britain

Second Consignment Has Been Shipped From Calgary To Manchester, England

Calgary, Alberta.—A shipment of two, three and four-year-old steers, numbering 2[illegible] head, have left here for Montreal, from which port they are billed for Manchester, England. The consignment, second of its kind to leave the west during the past few weeks, was collected and is being shipped under supervision of the Dominion Department of Agriculture. It will serve to further prove the possibilities of the British market for western ranchers.

Section Foreman Awarded Prize

Winnipeg, Man.—E. Swanson, section foreman in charge of one of the British Columbia boundary subdivisions at Eholt, B.C., has been awarded the prize donated by W. M. Neal, Winnipeg, general manager western lines Canadian Pacific Railway, for the best maintained section of track on the company's western lines during 1930.

Shanghai, China, plans to spend nearly $4,000,000 on new municipal buildings.

LEAVE THE LIQUOR ACT ALONE BEWARE OF THE CAMPAIGN OF MISREPRESENTATION

Beer is a moderate drink. Prohibitionists, in attempting to force their views on the people, try to class it as a heavy alcoholic beverage. IT IS NOT.

The present Liquor Act allows beer to contain up to 4½ per cent alcohol.

Alberta Breweries keep well under this. Their beers range from 3.6 per cent to 4 per cent in alcoholic content.

BEER IS PALATABLE and an EXCEEDINGLY MODERATE DRINK

Compare this with whisky or brandy, ten times the strength of beer. Draw your own conclusions.

DO NOT SIGN THE PROHIBITION PETITION. IT MEANS CANCELLING LICENSES OF ALL CLUBS AND BEER ROOMS.

Leave the Act alone. We don't want the bootlegger back again.

Moderation League of Alberta, Inc.

Marble Pool on Palatial Liner

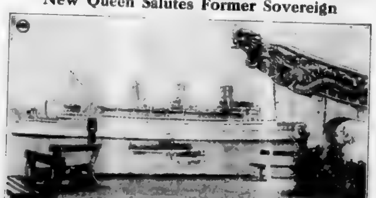
The cautious miss in the corner (left) who evidently does not believe the assurances of the two already in the tank that the water is warm need not test it for one of the features of the 26,000 ton liner is that the golden dolphin seen in the background spouts warm or cool water as desired. One hundred and sixty tons of water are needed to fill the tank.

Surrounded by dressing rooms, showers, and electric baths, the swimming pool has its own cafe with rubber-cushioned chairs where attendants serve warming drinks with Oriental impassivity.

Above or below decks there is lots of fun on the Canadian Pacific's new record-breaking Empress of Japan, largest, fastest and finest ship on the Pacific, recently arrived passengers said at Vancouver.

One favourite meeting place is the white and green marble swimming pool, shown above with a happy group enjoying its spacious tank.

New Queen Salutes Former Sovereign



When the new Empress of Japan, latest pride of the Canadian Pacific steamships fleet and holder of three new trans-Pacific speed records, steamed into Vancouver harbor from the Far East recently she dipped her ensign in homage to the dragon-carved figurehead of the old Empress of Japan, queen of the Pacific from 1890 to 1922 during which she cruised a total of 2,500,000 miles in [illegible] round voyages from Vancouver and Victoria to Manila Bay. The gallant old ship, on which most of the senior officers of the new Empress of Japan, including Capt. Samuel Robinson, C.B.E., R.D., R.N.R., once served, was broken up and scrapped in Vancouver eight years ago, ending the career of a ship which made history on the Pacific. Public-spirited efforts by the Vancouver Daily Province resulted in the figurehead (right) being preserved in Stanley Park, Vancouver, between Prospect Point and Brockton Light.

"A French-Canadian Wedding in 1830"

A hundred years ago when our great-great-grand fathers and grandmothers were marrying and giving in marriage, the French-Canadians made the occasion one of the most colorful and joyous in their lives. Re-construction of such a wedding with the utmost fidelity to costume and custom has been done by Alderic Bourgeois, Montreal newspaperman and revue writer, who has written a sketch with the above title for the Quebec Festival to be held at the Chateau Frontenac, October 16-18. Musical settings will be by Oscar O'Brien, Montreal composer and song writer.

One of the old customs was the arrival of uninvited guests attracted by the good cheer and general gaiety, who paid their scot with songs and dances. These will be represented in the sketch by Lionel Daunais, Miville Belleau, Emile Boucher and Fortunat Champagne, of the Bytown Troubadours, who will keep things moving with true French-Canadian verve, singing in all 15 old wedding songs harmonized by Mr. O'Brien. There will be choruses of men and women's voices, a quartette of young girls, fiddlers and folk dancers.

Marketing Grain Through Livestock Production Will Solve Problem Of Western Farmer

Whether to sell grains through livestock or for cash has been a question much discussed in the past. The question of the effect of concentrating production on the sale of grains for cash has now been pretty well settled. What about selling them through livestock? Particularly attractive features about selling grains for cash have been the relatively low amount of labor and skill involved and the rapidity with which the cash could be secured. But this latter advantage has disappeared and now it is a question of whether we shall do the work and learn the skill.

Attaining skill costs money, but it should not be charged into costs of producing, say, hogs. It is an investment which will always return big interest. It is largely a matter of will and intelligence.

Many farmers can feed considerable numbers of livestock without increasing the amount of money [illegible] cost of hogs should not exceed 500 lb. to each 100 lb. of hog produced. Under reasonably good management the quantity should not exceed 450 lb. Where, as in the East, milk supplements are available, 100 pounds of hog are being produced by many farmers with the equal, including the milk, of 400 lb. of grain, while some men with very good breeding stock and skilful feeding are using even less. This is where one (but only one) of the big features of cost of production comes in. Such results are the reward of a steady policy persistently carried out over the years.

The farmer who has steadily added to his equipment and skill is this year not worrying about the low price of grains. Rather he is benefiting by it. Even in the years of the highest priced grains he still has averaged a fair margin over grain prices. Sometimes it is necessary to feed hogs for returns that do not exceed the cash [illegible]

[illegible]

Grain Values When Fed to Hogs

In the table below is shown the value of a bushel of wheat, barley, and oats when fed to hogs at the rates of 500 lb., 450 lb., 400 lb., and 375 lb., to produce 100 lb. of hog when the selling price of hogs ranges from $10 to $6 per 100 lb. For instance, in the first line of the table it will be seen that when hogs are selling at $10 per 100 lb., wheat fed in the ratio of 5 lb. to make a pound of hog would have a resultant value to the farmer of $1.20 a bushel, barley a value of 96 cents, and oats a value of 68 cents. The tables form a sort of conversion table or ready reckoner of values and are to be read in that manner.

When 500 lb. of Food are used to produce 100 lb. of Hog. — When 400 lb. of Food are used to produce 100 lb. of Hog. — When 450 lb. of Food are used to produce 100 lb. of Hog. — When 375 lb. of Food are used to produce 100 lb. of Hog.

SCHOOL GIRL SMARTNESS EXPRESSED IN NEW CREPY WOOLLEN WITH BECOMING FLARE

It's one of the most effective interpretations of the season in Patou's dark green crepy woollen in a shadow check pattern.

A narrow belt with green enamel buckle places emphasis on the natural waistline.

The scalloped hipline is smart, agreeing with the scalloped line of the shoulder yoke. The skirt is circular with just enough fulness to make it gracefully comfortable for school days.

Style No. 907 is designed for the sizes of 8, 10, 12 and 14 years.

Brown and white tweed of lightweight texture is very fashionable in a tiny checked pattern.

Wool challis prints, wool jersey, rayon novelties, covert cloth, linen, cotton broadcloth prints and tweed-like cottons are very smart for classrooms and sturdy as well.

Size 8 requires $2\frac{1}{4}$ yards 39-inch.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your full name and address, the number of the pattern and the size you want.

Fifth Biennial Conference Of British Empire Service League To Be Held In Canada In 1931

Representatives of all the returned soldier organizations of the Empire will meet in Canada next August, when the fifth biennial conference of the British Empire Service League will be held, it was announced at Ottawa by Lieut.-Col. L. R. LaFleche, Dominion president of the Canadian Legion.

Led by Earl Jellicoe, admiral of the fleet and presiding officer of the league, delegates will come from the British Isles, South Africa, Australia, New Zealand, and from every corner of the far-flung Empire.

In making the announcement, Col. LaFleche said the only definite plan was that the meetings would be held at such a time and in such cities as to permit the whole delegation taking part in the Warrior Day celebration of the Canadian National Exhibition at Toronto.

When the last biennial conference of the British Empire Service League was held in London, England in 1929, Canada sought the next gathering. There was competition for this honor from other Dominions and a decision was withheld. Col. LaFleche has now received a cablegram announcing Canada's invitation had been accepted. Earl Jellicoe presided at the meeting in London, England which made the decision.

At the London conference 23 countries in the Empire were represented and it is expected there will be at least that number that will send delegates to next year's gathering. The British Empire Service League is an organization of returned veterans, branches of which are in every part of the Empire. [illegible]

Growth Of Prairie Provinces

Alberta and Saskatchewan Have Made Great Strides Since Provinces Were Created In 1905

It is just 25 years since the provinces of Alberta and Saskatchewan were created. At that time the population of Alberta was 185,000. It is now about 650,000. Saskatchewan in 1905 had a population of 195,000; now it is about 867,000. The total area under cultivation in Alberta 25 years ago was 600,000 acres; in Saskatchewan 2,000,000 acres. In 1930 Alberta had 11,000,000 under crop and Saskatchewan 20,000,000 acres. The dairy production of Alberta has advanced in value from $2,000,000 in 1905 to over $20,000,000 this year. Similar progress in dairying has been made in Saskatchewan.

Progress has been equally as notable in a number of other directions in each of the two provinces. In 1905 there was comparatively no manufacturing in either Alberta or Saskatchewan; now the value of the annual industrial output is over $150,000,000, of which Alberta accounts for $100,000,000 and Saskatchewan $50,000,000. Each of the two provinces has a well equipped university, several high schools and many hundreds of public schools. From mere frontier towns of 25 years ago, Calgary, Edmonton, Lethbridge, Medicine Hat, Regina, Saskatoon, Moose Jaw and other places have grown into well established and beautiful cities, with every advantage found in any of the older cities of the new or old world.

These two provinces, the youngest of the nine that form the Dominion of Canada, [illegible]

Let these 6 vital Salts rid you of PIMPLES

Would you like quickly to free yourself of those hideous pimples—those unsightly blackheads—and have that smooth and soft skin perfection you've always craved?

Do you want to have eyes as dazzling and bright as water dancing in a summer's sun?

Would you like to enjoy glorious health with plenty of energy and pep?

Then take a quarter teaspoonful of Kruschen Salts in a glass of hot water every morning before breakfast!

Kruschen is a combination of the six vital salts which your nerves, glands and body organs ought daily to receive from food if they are to function correctly and which are impossible to obtain in these days of modern cooking.

Kruschen will clean your blood of those harmful acids which cause your skin to erupt and will possess a skin like velvet and a health perfection you didn't think possible!

Parallel Drawn In Two Tragic Deaths

Thomson Perished With R-101, Huskisson Killed By First Train

A curious parallel is being spoken of in London between the death of Lord Thomson, Air Minister, who perished in the R-101 disaster, and that of the last Cabinet minister to be killed in an accident, William Huskisson, who met death almost exactly 100 years ago.

Huskisson who was president of the Board of Trade, was knocked over by a train when he was attending in his official capacity the opening of the Manchester and Liverpool line.

His death caused a great outcry at the time against the new means of transportation.

The moral does not need to be pointed out. British observers say.

Offer $500 For a Slogan

Competition To Be Held In Connection With World's Grain Show At Regina

Official notification has been received from the Italian Government by the management of the World Grain Exhibition and Conference to be held at Regina, July 20 to August 6, 1932, that Italy will be represented at the event. The acceptance of Italy makes the ninth country to accept the invitation to be represented at the World's Grain Exhibition and Conference. The other eight countries are:— New Zealand, Belgium, Netherlands, Czecho-Slovakia, Peru, Yugo-Slavia, Poland and Guatemala.

Preparations for the Exhibition and Conference at which over $200,000 will be awarded in cash prizes are proceeding apace. The management is offering a prize of $500 for the best slogan, the conditions governing the award of this prize being outlined as follows:

The slogan submitted shall not be more than ten words in length. There is no entry fee and the contest is open to the world. Not more than three suggestions are to be submitted by any one person. These must be written or typed plainly on one side of the paper containing the contestant's name and address and must reach the office on or before January 31, 1931. Address Slogan Contest, World's Grain Exhibition and Conference, Imperial Bank Chambers, Regina, Canada.

First Metal Base Highway

Has Just Been Completed For Test In Springfield, Illinois

WORLD HAPPENINGS BRIEFLY TOLD

Sir James M. Barrie has been installed as chancellor of Edinburgh University, his alma mater, in succession to the late Lord Balfour.

Dr. Frank B. Jewett, president of the Bell Telephone Laboratories says plans are being made to lay telephone cable under the Atlantic from Newfoundland to Ireland.

The French Government has decided to erect a stone memorial to the victims of the British airship R-101 on the field where the dirigible met disaster.

Though lower in value, Canada's catch of sea fish and shell fish for the first nine months of this year was larger in volume than for the same period of 1929.

The Nobel prize in medicine for 1930 was awarded to Dr. Karl Landsteiner, of New York, connected with the Rockefeller Institute of Medical Research.

Death of William Kingsford-Smith, father of Charles Kingsford-Smith, conqueror of both the Pacific and Atlantic oceans, was announced Nov. 2, at Sydney, New South Wales.

CHAPTER IV.—Continued.

"I believe," he said, turning with mock severity to Gay, "that you've been telling on me."

Simeon Bartlett chuckled as he replied. "She ain't told nothin' I didn't know beforehand, boy. You've got a sort o' conquerin' way about you. If you hadn't, do you b'lieve this little gal would ha' picked up her duds and started off at a minute's notice?"

"It was thirty minutes," Nick corrected, "and she didn't keep me waiting either! Well, we must be off. A thousand thanks, Mr. Bartlett, for this happy week."

"Good luck!" called Simeon Bartlett as they strode away.

And good luck had followed them. Through the whole summer, rain came during the night. With few exceptions their days were bright and sparkling. They struck off through picturesque New Hampshire, sleeping at farms when the chance came; often spending their nights beneath the stars and once accepting the hospitality of a Gypsy camp.

September found them in Maine, revelling in those first beautiful days that only at night give a hint of the colder days to come. They had climbed what their hostess of the night before had called "a mountain," which, though hardly deserving the name, showed them a wonderful, wide stretch of creaming waves.

...

Nick I——" Then so softly he had to bend to hear "Nick dear—I can't go on."

"Can't go on! Have I tired you out, or—or—Oh, Gay!"

He knew, then. The knowledge came with a blinding sense of chaos. Wonder and dismay went hand in hand. New-stirring fatherly pride fought savagely with a sense of dull defeat. Then love triumphed over self, and he thought only of Gay—fear for her—terror for what she was to go through. . . . . . Was she glad, or . . . . . His clasped hands tightened, and he pulled himself together to hear her say:

"You mustn't feel too bad about it, dear old boy. I—I've thought out everything. I'm going back, but you are to go on. No! don't speak. I can't go back to Bakersville alone, Nick. That would be too hard. But I can stay with Mr. Bartlett. He'd like to have me—somehow I know I could give him pleasure. It—it won't be till spring, Nick, and perhaps by then you ——Oh, my dear," she broke off suddenly, "I should be so happy if I felt that you were happy! But you won't be satisfied unless you're free, Nick, and——"

"Free!" Nick tossed the word aside as impulsively as he had tossed his stick and bundle on that bright May morning. "Free! and you back there with that old man!" He put his arms about her. "What sort of freedom would it be, Gay, darling? What do you take me for? Do you think I haven't any natural instincts that I can't be happy over this as well as you? What a goose you are! Have you been losing sleep because you were afraid to tell me that our wanderings are at an end?"

He kissed her with a tenderness that brought her tears, even as she protested: "But it mustn't be the end for you, dear. There's no reason..."

...

Bakersville, ... the stately portals of the First ... we have the cabin, Mr. Bartlett?"

"It ain't for rent, not at no price whatever, but you're welcome to use it long as you see fit. But first you got to visit with me a spell, and tell me all about your travels. I ain't had a thing interestin' happen since you left. Many's the evenin', ma'am, that I've set here thinkin' of that chowder, and the good time you give me, to say nothin' of all them postcards ... sent ..., an' letters, too. I saved 'em all. They're in the lacquer box my great-uncle Ebenezer Bartlett brought from Japan. Don't hardly see how you got a chance to write 'em, ma'am."

"We usually manage to do the things we want to ...," Gay answered, "and I wanted you to know what a wonderful time we were having."

"Don't regret your hasty bargain, then?" chuckled the old man.

"Not yet," said Gay, with a sweet, upward glance at Nick that was not lost upon their host.

"And Nick?" queried Simeon, his eyes twinkling. "Sorry you ain't wadin' in the Pacific, boy—or be you satisfied to come back to old New England?"

"I've never set foot out of New England yet," laughed Nick, "and some day I shall wade in the Pacific. As for being satisfied—you ask Gay if she's heard any complaints on my part."

(To Be Continued).

Guard the Children From Autumn Colds

The Fall is the most severe season of the year for colds—one day is warm, the next cold and wet, and unless the mother is on her guard, the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mothers' best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose of the Tablets will prevent colds, or if it does come on suddenly their prompt use will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

H. B. ROGERS

Tofield Co-op. Clarion

Published by the Tofield Co-op. Store

We changed our news heading because it is good news we have for our customers at this time.

We are putting on a GENUINE SALE of practically everything in the store, starting Monday, November 17th and running for two weeks. This is the largest sale ever put on by a country store and not many city sales equal it. Look over the city ads and see for yourself.

The Editor of the Tofield Mercury said he was proud of his job and so is the store management proud to be able to offer the people the opportunity to stock up at this particular time, when money is scarce. We do not expect to lose any money on this sale, for the simple reason we expect to do a volume of business that will take care of the cut in prices. Just for example, W.G. red back 9 oz. overalls at $1.95. You have not heard of a price like that for years. Better buy two pairs while you can at the price. Be sure and get one of our bills and study it. You will see plenty of good buys. Things will be arranged on tables so you can look them over.

Now, we are going to be very busy. Help us all you can, pick what you want. In Britain Co-operative Stores thrive on hard times. People learn the lesson of better buying and saving when money is scarce. That lesson can also be learned in the Tofield district.

Discouragement and disappointment rests heavily on many farm homes just now. The prospect is not a happy one. But nothing was ever accomplished by simply grumbling and doing nothing. The world's progress has been possible because some people never succumbed to events but met and overcame difficulties.

The sooner Western Canadian Farmers establish themselves on a cash basis the better for them. Of course this can only be done gradually, but the curse of over-extended credit is very apparent now.

The Tofield Co-op. store has a splendid future ahead of it provided the members extend it the support they can and should give. We simply must progress. Now is the time for everyone to put his or her shoulder to the wheel.

Local and Personal

Born.—To Mr. and Mrs. T. Nebraska on Thursday, November 13th, a son.

Born.—To Mr. and Mrs. H. Hicks, on Saturday, November 15th, a son.

Miss Mabel Thompson assisted Mrs. F. Pearson during threshing last week.

Mr. Oliver Letourneau and Wm. Thompson are attending the Municipal Convention held in Calgary this week.

Mr. and Mrs. McLaughlin were visitors to the city on Monday.

Mr. and Mrs. Bud Hannon have gone to Camrose for the winter to stay with Mr. and Mrs. J. D. Hannon.

Mr. Hannon sr., is staying at the Royal Alexandra Hotel at Tofield for some time.

Nova and Frank Wood and Orton McGuire were Edmonton visitors on Monday.

Visitors to the city on Sunday were Mr. and Mrs. Carr, Mr. and Mrs. Forestal and Mr. Wood.

Rev. and Mrs. Gordon visited the city last week.

Mr. A. Drysdale from Stettler has made preparations to open up a butcher shop in the building formerly occupied by S. Stauffer. The shop will open for business on Thursday.

On Monday evening last the Young People's Society held a skating party to which they invited the Tuxis Boys, Trail Rangers and C.G.I.T. Girls. A lovely time was enjoyed by all.

The W.A. will hold their next meeting on Wednesday, November 26th at 2:30 p.m. at the home of Mrs. McCarthey. Please note change of date.

Service will be held at the Holy Trinity Church on Sunday next, November 23rd. Mr. Tempe of Edmonton will conduct the service.

The C.W.L. of St. Francis' Church will hold their annual bazaar and sale of home cooking at the Institute Rooms on Saturday, November 22nd.

The Tofield Local of the U.F.A. are holding their first meeting of the season on Saturday, the 22nd, inst., in the Town hall at 2:30 p.m. The matter of a suitable program for the winter meetings will be taken up, and there will also be a discussion of Wheat Pool matters and other business. All members are requested to attend that the season may get away to a good start.

On Friday last the men working on the road west of town quit work for the season and to celebrate the event staged an elaborate dance at the Variety Theatre. A first class city orchestra was engaged and the hall gaily decorated. There was no charge for the event which included supper. The event was advertised as "The Dirt Movers Ball" and in response to the invitation, the hall was crowded. The men working on the road have been in and out of Tofield all summer and during that time have made many friends, who with the grand finale of the "Dirt Movers Ball" to remember them by, will wish them every success and hope that circumstances will combine so that they may be back again next summer.

U.F.W.A. NOTES

The U.F.W.A. met at the home of Mrs Burchard last Thursday. Mrs. Secord read a paper on "Armistice and what it means," in memory of the day and Mrs. D. W. Warner gave an interesting account of their trip to Australia, New Zealand and Tasmania in connection with the British Empire Farmers' Union. Lunch was served by Mesdames Secord, Dodds, Bigland and Munro.

The next meeting will be at Mrs. Baptiste's on November 27th. We are collecting quilt blocks, of any material, size 18in. x 22 in. for the Red Cross Society; also we will collect and distribute suitable cast off clothing all winter.

Ephriam: "What yo' all doin' wif dat papah, Mose?"

Mose: "Ise writin' mah gal a lettah."

Ephriam: "Go 'way, niggah, yo' kaint write."

Mose: "At's all right, Smoke, mah gal kaint read."

Ketchamoot Items

Threshing is just drawing to a close after two weeks of steady work. Sutton Bros. have pulled their outfit home. Mr. Lee will finish at Williams on Monday. Mr. Carlisle will finish on Monday. Mr. Barnes the middle of the week and Mr. McGlukie has finished all but some stacks.

Mrs. Wm. Lee, daughter Viola and son Howard motored to Edmonton on Wednesday, returning home the same day.

Mrs. Erwin Plants of Woodlawn has been assisting Mrs. Henry Sutton this fall with her house work.

It was with much regret that we heard the sad news of Mr. Haugen of Lulu Island, Vancouver, passing away on November 12th. Mr. Haugen was a highly respected resident of Bardo for many years. We understand they will bring the body back to Bardo for burial. Mrs. Horte of Kingman and Mrs. Ness of Edmonton, two daughters, left on Friday for Vancouver.

Mr. and Mrs. C. A. Ingram, Mr. and Mrs. C. J. Whillans and Mrs G. W. Sears, from our neighborhood attended Mr. and Mrs. Fosbaug's silver wedding. Mrs. Sears and Mr. Ingram were present at their wedding twenty-five years ago.

Mr. and Mrs. J. H. Ingram, Mrs. E. McMullen, Mr Coombes and family were guests of Mr. and Mrs. Archie Brown of Bawlf on Thanksgiving Sunday.

Mrs. Earl Carlisle, Miss Lillian Carlisle and Robert Barrecloth visited at the Riley home at Lakeshore on Sunday.

Miss Mildred Ingram stayed with her sister Mrs. T. D. Ferguson while Mr. Ferguson was away on a hunting trip.

Mrs. D. McCowan, Woodlawn school teacher and Mrs. Ardley, Ketchamoot teacher, attended the teachers' convention in Camrose.

Miss Mabel Lawson spent Thanksgiving holidays at the parental home.

Miss Lillian Carlisle spent last week with her friend Mrs. Joe Stauffer of Bardo.

Friends of the Owen family were pleasantly surprised to hear of the marriage of their youngest son, Percy, to Miss Betty Henderson of Holden on November 5th, at Vilna. Congratulations and best wishes for their future happiness.

PROPOSE FARMERS CARRY PROPORTION OF HAIL LIABILITY

Recommendations are being made by the provincial insurance department that amendments to the Alberta insurance act, with respect to hail insurance, be introduced at the next session of the legislature. The changes asked for are along the line of legalizing some form of deductable policy, whereby the farmer himself will carry a portion of his liability.

Action of this kind is regarded as necessary because of the unsatisfactory condition in which the hail insurance business is finding itself at the present time. The season of 1930 has been, it seems, a specially unfortunate one, with an unusual number of storms that swept over large areas of the province and destroyed much of the crop.

As a result, the companies doing hail insurance business have been hard hit, with losses of more than a million dollars. The municipal and mutual insurance systems have, it is understood, been similarly affected.

Notwithstanding high rates of insurance imposed, running from 10 to 20 per cent of the coverage in surcharged areas, the companies revenue from premiums has not been sufficient to pay the losses. The percentage of loss has been 111.24, to which must be added the cost of doing business.

Farmers insured with the associated companies have received indemnities, it is stated, of approximately $10.29 for every $9.25 they have paid in rates.

Henry Bruce, provincial superintendent of insurance, says the question was fully discussed at a meeting of the executive of the Canadian Hail Underwriters' association in Regina, which he attended and at which the companies' representatives reported frankly that while they do not wish to pull out of the prairie provinces they cannot continue to do business without some further protection.

The farmers on the other hand, are said to be finding it increasingly difficult, because of the high rates for hail insurance and the low prices for grain, to finance proper and adequate coverage for themselves, and no relief is looked for in the direction of decreased rates or increased volume of business.

The only remedy that the underwriters regard as practicable is a change in the form of policy by which the farmers will have a certain percentage of their crop losses deducted from the insurance payments made to them by the companies, and legislation to this effect is being recommended for government consideration.

UNITED FARMERS OF MANITOBA MAY SEEK FIXED WHEAT PRICE

At a time of crisis on the farm lands of the prairies members of the United Farmers' of Manitoba gathered for an important four day convention today. Matters of outstanding moment, not only to the Manitoba agrarian body but to the quarter million farmers on the prairie, are to be placed before the annual meeting for decision. Undoubtedly, the question of stabilization of wheat prices by government intervention will be discussed. The topic will come before the farmers with wheat values at about one half the quotations prevailing when prairie governments rushed to back the wheat pool nine months ago. Meanwhile, Premiers of Manitoba, Saskatchewan and Alberta are in the east to talk pool financing with the banks and price stabilization with the dominion government.

If the accredited farm organization of Manitoba stands behind the request for some means of fixing wheat values, all the prairie bodies will have given the move their support. Already the United Farmers of Alberta have presented to Ottawa authorities a request for a fixed wheat price control by the dominion government. United Farmers of Canada, Saskatchewan section, are avowedly anxious for a fixed value for wheat.

At the Portage convention will be made the decision whether the Manitoba body is to be represented at a tri-partite farm parley at Saskatoon next week, with consideration of the grave western prices as its object. H. E. G. H. Scholefield, vice-president of the Alberta farm organization is to be present at the session, called by Geo. H. Williams, president of the Saskatchewan unit. Mr. Williams is expected to be at Portage to urge that Manitoba send a representative.

Members of the Manitoba farm body will be called to express their opinion concerning the one hundred per cent pool by legislation. A proposal already approved by a ballot among members of the Saskatchewan body. It is stated that assurance has been given that a primary proposal will be passed in the next Saskatchewan legislature, committing a referendum among pool and non-pool farmers of the province. Manitoba's interest is heightened by the fact that delegates to the recent pool session asked an educational campaign regarding the compulsory pool be started with a ballot to be taken at a later date.

Requests for the relaxation of pressure in collection of taxes may be made by local representatives at the meeting, though it is expected that recent appointment of a Manitoba debt adjustment bureau by the government will be considered an important move in that direction. Resolutions forwarded by Locals cover cover wide areas, some asking government probes into the conduct of business of Winnipeg Grain Exchange, prohibition of short selling on the exchange, evolution of a system of co-operative banks in the dominion and the elimination of the protective principle from tariffs.

It is not expected that the first day of the convention will provide any drastic steps on the part of the delegates. This morning is to be given over to registration, addresses of welcome and reading of the minutes of the last annual meeting of the United Farmers of Manitoba, and of the Women's section. Reports of poultry, livestock, farm products and on the extension program for rural women will be delivered in the afternoon. Possibly important speeches may be made by fraternal delegates from other farm bodies at the next session.

On Tuesday morning presidents of the men's and women's sections deliver their addresses and the auditors report is presented. First discussion on resolutions is slated for Wednesday afternoon.

"Is your wife having any success in learning to drive the car?"

"Well, the road is beginning to turn when she does."

"Well," said the visitor to the little son of the famous motorist, "and how are you getting on at school?"

"Fine," said the little chap, "I'm now learning words of five cylinders."

The Gossip—"I hear your store was robbed last night. Lose much?"

The Optimist—"Some. But it would have been worse if the yeggs had got in the night before. You see, yesterday I just finished marking down everything 20 per cent."

MEAGRE RESULTS OBTAINED FROM IMPERIAL PARLEY

London, Eng.—Right Hon. Philip Snowden's victory over the Imperial conference is now clear. He may give way to the extent of allowing a stabilization period of three years for the present preferences because he needs the revenue, but that is the best the Dominions can hope for.

It is admitted that [illegible] vital point of his economic [illegible] will be shelved until a further conference, presumably the Imperial Economic Conference to be held in Ottawa.

This, apparently is acceptable to Premier R. B. Bennett, because he knows the political feeling of the British people, which anticipates that the Conservatives will be back in power by then and will be able to do something towards reciprocal tariffs.

The Dominions are dis[illegible] at the meagre results of the conference and are turning to one another for the creation of a series of treaties between themselves, based on the principle of reciprocal tariffs.

MUNICIPAL MEDICAL ATTENDANCE

As announced in our news columns last week the council of Cornhill Municipality are contemplating putting in force a bylaw, the passing of which will empower the Council to engage a permanent salaried municipal doctor. The matter was discussed at some length at the last meeting of council and was looked upon favorably by the council as a whole.

Any outline of the plan proposed must necessarily be subject to revision before finally and legally adopted, therefore anything we might say here, though true enough in a broad general sense, might be altered as to details before the actual bylaw is passed.

The plan is for the Municipality to engage a doctor at a fixed salary per year, the doctor giving free service to ratepayers. Owing to the location, division 2, which includes Hay Lakes and the territory adjacent thereto, it is proposed to omit this territory and approach the Council of the Municipality of Beaver Lake so as to take in a part of the territory lying adjacent to Tofield. By this plan the doctor would have a full (or nearly so) municipality to cover, all within driving distance of home.

The cost to ratepayers and their families for medical attention would be nil. If they called on the doctor at his office there would be no charge whatever, but for house calls there would be a mileage charge to the ratepayer. This would give the ratepayer close in a slight advantage but as costs will be included in municipal taxes and these are according to assessment and as a general rule assessments are higher near town than farther out, the difference in medical driving charges will to a large extent be automatically adjusted. Exactly what the cost will be per quarter section is not known at this time. It is however, expected that the cost will be between five and six dollars a quarter section per year.

Like all new inovations, especially those which increase taxes, there will no doubt be some opposition. However, on the whole we believe the plan will be looked upon with favor and that the bylaw will pass. It divides the burden of heavy doctor bills among many, and thereby may prevent the financial crippling for years of a few families, yet make very little difference in the yearly net income of the whole.

The only criticism we can make regarding the plan is that it does not go far enough. We believe if the idea of group medical attention is a worthy one, the more complete it is the better it is. Therefore the plan should include medicine, hospital and operation fees.

The plan is already sufficiently advanced in council for a bylaw to be prepared and read twice. The reading of the bylaw a third time and the receipt of further information from the department and then the bylaw will be ready to advertise and if the ratepayers demand it, a vote taken upon it.

RELIABLE HOTEL KEEPERS FRIENDLY DECENT CLUBS

OR

A BOOTLEGGERS' PARADISE?

Why cancel the beer licenses of Hotels and Clubs when our past experience has shown that it opens the way for bootleggers to ply their sinister trade among old and young?

Destroying the privilege of beer by the glass means restoring the custom of hard liquor by the bottle. Which do you prefer?

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION

Most undesirable things have at least one or two points in their favor. The comfort, or pacifier, has not one redeeming feature which may be put forward to balance the many bad and undesirable qualities which it possesses.

To begin with, it does not even do what its name pretends. It does not comfort or pacify the baby. Crying is stopped for a time, because the baby always stops crying when he gets what he wants, and he does want his comfort if he has been used to having one.

Some parents may think that because the baby crys for the comfort, it should be given to him, as he apparently knows what he wants. But do they give him everything he cries and reaches for, or do they discriminate in what they give him because they know more than the baby does about what is good for him?

The constant sucking of the comfort makes the child irritable and tends to upset him. It quiets him for a few minutes, because he gets what he wants, but after that it only irritates him.

A serious result of the use of the comfort is the deformity of the mouth that results if the habit is continued. The bones of the baby's body are comparitively soft and rather easily moulded. The continued sucking of the comfort forces the bones around the mouth into into an abnormal shape. Projecting teeth are among the mouth deformities that follow.

The most serious conditions that result from the use of the comfort are due to the introduction of disease germs into the mouth of the child. It is impossible to keep a comfort clean. To do so would mean that it should be boiled every time it is used. The comfort is moist, and as it hangs from the child's neck, it comes into contact with many articles; the result is that it is soiled by the many things which it touches.

The use of the comfort is simply a bad habit which may do the child permanent harm by deforming the mouth, and one which is, no doubt, a real factor in the spread of disease.

There is no reason why a baby should be constantly sucking at something. The comfort does not help to keep the baby healthy. If the child is irritable, there is something wrong which should be properly dealt with, and most certainly the proper way to relieve him is not by sticking something into his mouth.

Not so many years ago, every baby was rocked in a cradle and put into long clothes that prevented him from kicking out his legs and having the exercise he needed. The rocking cradle and the long clothes have passed into disuse, and the sooner the comfort goes the same way, the better it will be for the baby.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

CHANGING SEED GRAIN
(Experimental Farms Note.)

Person's who have new varieties to introduce and seeds to sell have always been strong advocates of seed exchange, saying, in effect, that it is a good principle of farm management often to vary the strain of seed grain to be sown. It is also a common belief of grain growers that there is a necessity for frequent change of seed, because of actual deterioration due to continuous culture upon the same soil or under the same climatic conditions.

Farmers are continually changing seed grain. He on the black land must have the seed from the heavy soil regions. So, also with the questions of latitude, seed grain is often shipped long distances north and south very much at random as to reason but usually with the hope that some good will come in increased yield because of the change.

Undoubtedly seed may become of but little value because of injury arising from disease, improper cultivation and a great number of causes which mitigate against the production of a normal type of kernal. Various types of plants will undoubtedly be produced from a given type of seed depending upon the character of the soil upon which each has grown. The Dominion Experimental Farms system composed as it is of numerous widely separated branch farms, has given a particularly good opportunity to study this problem. However it has not been demonstrated that such variations will in any way have an effect upon the next season's crop upon using this seed.

In considering the supply of good seed the farmer should take into account the suitability of his own stock. Is it the best variety available for his conditions? Is it relatively free from other varieties, other kinds of grain, and weed seeds? Has it strong vitality? Can it be cleaned into first class seed? If these questions cannot all be answered in the affirmative it is advisable to secure seed of suitable quality and purity elsewhere. Registered seed is the farmers protection and should be considered if possible for at least a portion of the crop. Seed requirements should be filled as early as possible, before the supply of suitable grain is exhausted.

TENDERS WANTED

Sealed tenders will be received up to noon Saturday, December 6th, for the N.W. qr., sec. 4, tp. 51, rg. 21, w4. Those submitting tenders should specify the total amount, the amount of the first payment and the terms required.

Tenders will be submitted at the December meeting of Council and successful tenderer, if any, will be notified to communicate with the secretary. Highest or any tender not necessarily accepted.

Army Of Enumerators Will Be Employed In Taking The Decennial Census Of Canada

Fourteen thousand enumerators, 265 commissioners to direct their work, and a considerable number of others, will find employment next year in the taking of the decennial census of Canada.

The commissioners — one for each electoral district will be appointed right after New Year, while the enumerators will be chosen in March or April, to permit of study and instruction prior to the actual date of the census, which will be on June 1st. The census taking, of course, will require considerable time, varying in accordance with the area covered and the density of population. But what is to be put down are all the facts and figures as they may be on June 1st, regardless of what changes may occur later, before the census is published. It is necessary to fix on some arbitrary date.

Awaiting the approval of the Government just now and to be promulgated as soon as this sanction is forthcoming are the [illegible] the census of Canada. There are several new features. Each successive census being more elaborate, past experience not only here but in other countries will be availed of. The Bureau of Statistics is constantly exchanging ideas with the international statistical organization. In the new schedules, complete as they have been heretofore, there will be further details of agriculture and industry, and the point over which some contention has arisen as to Canadian nationality will be covered. A person who says he is simply a Canadian will be put down as such, although it is denied that in the past it was impossible to make such distinctions.

The census must also take into account some seeming anomalies in the law.

For example, under the immigration act, even a Britisher must be in Canada for five years before he can acquire Canadian domicile, and yet if he has been here only six months he can vote or even be eligible for election to Parliament. The schedules will be so numerous as to set forth all the facts concerning the individual and his origin from away back.

One of the entirely new features this time will be the use of aeroplanes in the northern regions, which, 10 years ago, had to be covered on foot or by canoe or dog train. Incidentally, the tabulation was delayed until these returns came in. Next year, they will be as prompt as the rest.

While the census is taken completely only every 10 years, [illegible]

Encourage Swine Industry

Saskatchewan Government Arranges For Easy Purchase Of Breeding Stock

Encouragement of the swine industry in Saskatchewan is promised under a new arrangement, according to Hon. W. C. Buckle, Minister of Agriculture. Under this arrangement, farmers will be enabled to purchase sows for breeding purposes through the Department of Agriculture upon making a payment of 25 per cent. of the cost and giving notes for the balance.

"In recent years, while we had a 50 per cent. cash option for the purchase of swine," Mr. Buckle said, "most farmers preferred to pay cash. This year on account of the scarcity of money, we are inaugurating this new plan."

HEAVY WINTER TRAVEL IS PREDICTED

Here in picture are some of the reasons advanced by Canadian Pacific Railway and Steamship officials for a prediction of heavy winter travel on the prairies this year. Lower left, a scene at the Empress annual midwinter golf tournament in Victoria, to be held this winter from February 23 to 28, with, top right, a drawing of the E. W. Beatty challenge cup, the principal emblem. Top left, the Canadian Pacific steamship "Duchess of Bedford," with other ships of the line, will take thousands of holiday makers to the Old Country for Christmas. Lower right, a scene at the annual Banff Carnival, to be held after New Years at the mountain resort.

Study Of The Whole Field Of Federal And Provincial Taxation Is Thought Necessary

The ever widening problem of raising revenue for administration purposes and public undertakings by both provincial and the federal governments, has reached a stage that calls for thorough examination of the whole field of taxation, according to views advanced at the convention in Toronto, of the Canadian tax conference and the Canadian civil service research conference.

With delegates in attendance from widely separated parts of the Dominion, the conference applied itself to the study of the country's tax structure and offered suggested remedies in meeting some of the more outstanding problems.

Duplication and lack of uniformity in taxes levied in the various provinces, should invite tax reformers into action, declared A. E. Crysler, of Toronto Board of Trade. Lack of uniformity, he said, proved a baffling problem for business interests operating over a large section of the country, while overlapping arising in connection with the income tax was often considered "unfair."

In a paper submitted by Prof. H. R. Kemp, Department of [illegible] University of Toronto, two primary problems were set forth: How to secure increase of revenue, needed to meet the commitments of the Dominion, and how to improve present arrangements for obtaining revenue.

The Federal Government, he said, faced a deficit of about $40,000,000 while the provinces and municipalities were also confronted with the need of augmented revenues to meet obligations and undertakings. As means of meeting these needs he suggested excise duties might be levied on certain low-priced commodities, citing sugar as an example. This suggestion, however, met with disfavor in the subsequent round-table discussion. Prof. Kemp believed there were other channels of revenue that might be explored, with the federal income tax probably slightly raised.

As a remedy for some of the existing tax evils, Prof. Kemp advised a thorough investigation into the double taxation of corporation incomes; periodical conferences between provincial authorities, and a general study by everybody interested of the whole subject of public debts [illegible].

Alluding to taxation in relation to the country's net production, Mr. Crysler declared that in 1926 the increase in taxation revenues had been more rapid than the increase in the total net production. In that development he detected a dangerous portent. "We may soon have the heaviest taxation of all imposed on the citizen in the leanest of all years," he said.

A paper by J. G. May, Commissioner of Taxation in Winnipeg, dealing with assessment of urban land for taxation purposes, provoked general discussion.

Mr. Crysler, reviewing taxation changes in 1930, stated the present trend was to extend the gasoline tax and relieve income tax payers. It was recognized, he said, the income tax was unpopular because of its tendency to penalize the honest to the advantage of the dishonest. He forecast a "lively legislative interest" and a "progressive softening" of the income tax.

A one-cent-per-pound tax on sugar said Prof. Kemp, would raise at least $9,000,000 a year for the Dominion. "Sugar," he argued, "is now selling at a price no higher than that prevailing before the war, and at less than the cost of production. Such a tax, though retrogressive, would perhaps not be unduly burdensome to consumers who have paid over 25 cents a pound for sugar in the past."

Two prominent Toronto business men, William C. Coulter and George Brigden, led the general attack on the proposed [illegible] Brigden asserted the governments of the world received an all time lesson against excise taxes on such necessities when Britain lost the American [illegible] tax.

It was also suggested by Prof. Kemp that collection of municipal income taxes be made by the federal authorities, who would then turn the amount over to the municipal authorities. This, he said, would increase the net revenue from the tax. "Various public utilities also could yield large revenue in case of necessity," he added.

How Women Lose Fat In England

How would you like to lose unhealthy fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you care to lose your double chin and your too prominent abdomen, and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes work a pleasure and also gain in ambition and keenness of mind?

Let on the scales today and see how much you weigh, then get a bottle of Kruschen Salts. Take one-half teaspoonful every morning in a glass of hot water and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat and you'll also know that the six vitalizing salts of Kruschen have presented you with glorious health.

That's the way Englishwomen keep slim—why not you?

WORLD HAPPENINGS BRIEFLY TOLD

A small sheet of the first commercial zinc produced in Manitoba was sent Mayor Webb by officials of the Hudson Bay Mining and Smelter Company at Flin Flon.

Toronto's first and only woman bank bandit, 17-year-old Kathleen Boyle of Buffalo, N.Y., sentenced last April to two years in reformatory, has been released on parole.

A stump hurled through the roof of the camp building during blasting operations killed the infant daughter of Mr. and Mrs. William Schuster, Sugar Lake, B.C.

With the immediate object of putting the Canadian fishing industry on its feet, Hon. E. N. Rhodes has arranged for an exhaustive survey of marketing catches at every stage from the fisherman to the consumer.

Canada could aid in the economic recovery of Australia by buying more Australian goods, Lord Stonehaven, former governor-general, said in an address to the Canadian Club at Victoria.

[illegible]

The Deadly Monoxide

Four Points Motorists Should Remember About This Poison Gas

Every motorist who is tempted on cold mornings to start his car in the garage and allow the engine to warm up with the doors and windows of the building closed, should remember these four points about the deadly carbon monoxide gas:

You can't see it!

You can't smell it!

You can't taste it!

But it is deadly!

Keep the doors and windows of your garage open when you have the motor running, or better still, don't let it warm up until you are in the driveway.

Don't run your motor in a closed garage. Statistics show that the hazard of carbon monoxide poisoning, while not very prevalent when compared with other accident dangers, is gaining rapidly. Last year there were more than twice as many deaths from this cause as in 1924. In 1928 and 1929 death rates from carbon monoxide poisoning showed a steady increase.

Many physicians claim there is no antidote for it. The first thing to do is to get the victim out into the air as quickly as possible, endeavour to bring him back to consciousness by means of artificial respiration and, possibly, use oxygen.

For SORE THROAT BUCKLEY'S

Some Mighty Midgets

Many Small Creatures Stronger In Comparison Than Large Ones

It has been proved that the common snail can draw a load which is fifty times heavier than itself. If an elephant were as strong, in proportion to size, it would have to move nearly 270 tons.

That is only one specimen from Nature's collection of "mighty midgets" that perform in secret on land and in the sea.

Even the strongest man find it difficult to lift more than their own weight. Yet, a bluebottle fly can lift more than 20 times its own weight while it can draw a load that is 150 times heavier than itself.

Objects which are about forty times heavier than themselves are often carried by the mason wasps.

You have seen those ear-splitting powerful drills which are used to tear up the road. Well, there is a mollusc known as the piddock or pholas dactylus, which can rival their power, and is a superior worker, as it makes no noise.

Silently, but none the less efficiently, the piddock bores through the hardest rock as casually as if it were soap.

H. E. ROGERS

Tofield Co-op. Store News

We got away to a good start with our sale and of course the reason is we are trying to meet the price of wheat, oats, and barley, and the people are realizing the fact that our sale is a genuine one and that we are not trying to deceive the people, which there are many ways of doing. For example there are 3 different weights of crate apples on the market at the present time, 32 lbs., 42 lbs. and 48 lbs., and we have found that the heavy crate costs more money but is the cheapest because you get more and better fruit.

Then there are two brands of salt on the market, the Ontario salt and the California salt, we handle only one kind, the best Ontario salt, and we could not sell at the price we are doing, only we got in a car straight from Ontario.

Since our sale bills were printed, Flour took another drop in price. We immediately passed it on to our customers. **Apple Blossom Flour is now $2.65.**

We also got in on a carload of sugar and got a price which now allows us to sell a 20 lb. sack at $1.15.

We have added two more choice quality
CORN. Special .... **7 Tins for $1.00**
Choice Quality Peas, Size 5 ..... **9 Tins for $1.00**

RED HEAD ANTIFREEZE for Cars. Why worry and drain your car all the time when you can save yourself and car for **$1.65 PER GALLON**

Light Weight Motor Oil, one of the best on the Market at $1.00 Per Gallon

FROM 10 to 20 PER CENT REDUCTION ON ALL GOODS NOW IN THE STORE NOT MENTIONED IN SALE BILL.

LINDBROOK

At last, in spite of the weather threshing is finished up around here, or nearly so; now if the price was any good, things wouldn't look so bad, but as it is, oh why dwell on it.

We've been hearing lots about mixed farming, etc., well this is a mixed farming district and we note that of late neither cattle, sheep, hogs or cream have been leaving here as plentiful as in former years and taking this place as being similar to others we draw the conclusion that there aren't the cattle etc., in the country that there used to be, besides mixed farming means outlay for buildings, water, supply etc., and what of future prices?

There has been no hold-ups in Lindbrook yet, the reason being no one has got enough to take a chance on that and the cheque system of payment.

Miss Anna Spoude the Lindbrook teacher gave a Novelty dance last Wednesday at the school in aid of the children's Xmas tree and party. The school was prettily decorated and quite a crowd attended. The music was supplied by A. E. Silversides assisted by some volunteers. The usual supper was served and dancing resumed. We hope the financial returns were as good as the dance for we don't want to let the kiddies down on Xmas, even if the times are hard. Xmas is the children's day and they're only small once.

The road gang quit last week, the frost being against them. We congratulate them on the splendid job that they've made of the road and also their dance at Tofield last Friday, a fitting end to a job well done.

A car of sheep left here last week Messrs. Glenn and Pointer being the shipper, so we hear.

Mrs. A. E. Silversides returned home last week after a visit to relatives at Holden.

Mr. and Mrs. H. M. Jones and sons Ernest and Robert accompanied by Mr. Claude Wilder spent the Thanksgiving holiday at the Hooper Holland farm here.

Mr. Chas. Kortzman is back on the job again as jolly as ever, we're glad to say.

Mrs. McCaw left last week to live with her son Bert in Edmonton. Mr. McCaw is staying here for the present.

We hear Mr. L. Pointer is in bed with flu, we hope he will soon be O.K. again, in the meantime Mr. Sullivan is in charge of his sheep and stock at Lindbrook.

THOSE THAT CAME WERE
Well Pleased With Their Crushing

The new Massey-Harris HAMMER MILL CRUSHER has during the past week given great satisfaction. We have crushed oats, barley and screenings for customers and they are all well pleased. The Hammer Mill will crush anything needed for feed on the farm. Bring in some grain, greenfeed bundles or anything you may desire pulverized, and see for yourself, the result.

Local and Personal

Born.—To Mr. and Mrs. Chas. Kallal, on November 21st, a daughter.

Born.—To Mr. and Mrs. Harold Hanson, on November 20th, a son.

Born.—To Mr. and Mrs. W. Bednar, in the Lacombe hospital, on November 22nd, a daughter. Mrs. Bednar was formerly Miss Elsie Kendall.

The local branch of the Canadian Red Cross Society will hold a tag day at Tofield on Saturday, November 29th. Times are hard and money is scarce, we know, but a little help given the Red Cross is not missed and is instrumental in doing much good.

A quilting bee was held at the Kendall home on Friday afternoon. Nine ladies were present and both a useful and social time was spent. The hostess served tea during the afternoon.

The Ladies' Aid of the United Church will hold their Annual Bazaar on Saturday, November 29th, in the Institute Rooms.

Mrs. Weeks returned from Winnipeg where she has been visiting for a couple of weeks.

Mr. and Mrs. A. E. Calvert motored to Edmonton last week, returning the same day.

Mr. and Mrs T. Malcolm are attending the hotel men's convention being held in Calgary this week.

Mr. and Mrs. Hewson, Mrs. Bert Ross & Mr. H. Skitch visited Mr. and Mrs. F. S. Skitch on Sunday.

Mr. George Bissett went through here on his way to Dawson Creek where he'll operate an elevator for the Gillespie Grain Co.

Mrs. B. Hannan is visiting her mother for a few days.

Mr. Dud Hannan is staying at the local hotel for the winter.

Miss Helen Carson and Nettie Neal are visiting Mrs. Seale for a few days.

The Anglican W.A. will hold their bazaar on Saturday, December 6th.

A small fire in Mr. Imler's garage gave the fire fighting apparatus a run on Sunday afternoon. The floor in the garage had become ignited but little damage was done.

At the Young People's Society regular meeting on Monday of this week, Mrs. Bullock gave a very interesting paper on "The Development of the Modern Newspaper." The full text of the paper will be published next week.

Reeve Thompson and Secretary Letourneau attended the Municipal convention held at Calgary last week.

Mrs. A. Young and son Johnnie visited Edgerton over the week end.

Mr. J. Ferguson visited the city on Tuesday of this week.

HIGH WIND ON SATURDAY CAUSE SOME DAMAGE HERE

On Saturday a very high wind swept over this district, almost reaching the proportions of a tornado. In the country several barns were moved off their foundations while that of B. Anderson was completely wrecked. Fire added to the cause for anxiety, there being a prairie fire north of town in the Ross Creek area and one in the Tofield Fair Grounds. Fortunately no great amount of damage arose from these conflagrations.

In town, the chimney on the United Church was blown down and two chimneys on the house occupied by Mr. and Mrs. W. C. Swift.

The lumber yard suffered badly, lumber being blown indiscriminately about. The wind also took the lumber yard fence down completely. Quite a little other damage was done around town such as blowing off storm windows, upsetting small sheds, toilets, etc. Fortunately no one was hurt.

At Jimmy's home town a number of earthquakes had occurred; so Jimmy was sent to his uncle who lived many miles away, for safety.

Not many days later Uncle Jerry returned Jimmy to his home with a note saying, "Jimmy is returned herewith—Please send us the Earthquake."

Ketchamoot Items

Considerable damage was done in our community by the tornado on on Saturday evening. Small buildings were blown over, roofs lifted off of larger buildings, etc. Mrs. Nemeland had four turkeys killed and others had their legs broken. Most of the telephones are still out of order (Monday) and still the wind blows, we are hoping there will not be another one very soon.

The regular monthly meeting of the M.A.S. will be held next Wednesday, December 3rd, at the home of Mrs. Chas. Whillans. A cordial invitation is extended to all.

Mrs. J. W. Warner and mother, Mrs Dodds and Mrs. Sherlock of Lakeshore and Mrs. Henderson visited Mrs. W. A. Mitchell at her home on Friday afternoon.

Mrs. Ross and daughter, Mrs. McFadden, Mr. and Mrs. Campbell and family, Mr. and Mrs. Coombes and family spent Wednesday evening at the home of Mrs. E. McMullen.

Several old time friends and neighbors of the Haugen family attended the funeral of the late Mr. Haugen at Bardo on Sunday. Our sincere sympathy is extended to the family.

Mrs. Ardley was the guest of Mrs. J. Appleby on Wednesday night.

The young people of the community held a skating party on the slough of Albert Sear's farm on Wednesday evening. After skating, coffee, sandwiches and cake were served.

Mr. and Mrs. D. H. Mitchell, Mrs. J. Younie, and Mr. Olaf Bonese motored down from Edmonton on Sunday to attend the funeral of the late Mr Haugen an old time friend and neighbor.

Mr. Henry McGinitie is away on a hunting trip.

Mrs. J. Appleby entertained the M.A.S. at her home Wednesday afternoon. While ther was not a large crowd present, those that were able to attend report a pleasant afternoon spent with Mrs. Appleby. After the regular routine of business and devotional services, a social hour was spent while the hostess served a delicious lunchh.

Bardo

Arthur Moen is quite ill with pneumonia. We hope for a speedy recovery. Nurse Woods is taking care of him.

Mabel Jevning spent several days in Edmonton last week.

Olive Johansen, a grade seven pupil of Anderson school, was successful in winning the prize for the most prizes at the school fair entered from the Anderson school.

The storm on Saturday evening created quite a bit of excitement around these parts. The barns of B. Anderson and Mrs. Jevning were blown down. Fortunately through the speedy arrival of help all the stock was saved. Garages and other small buildings at different places were blown over.

OBITUARY

Halvor Haugen was born at Bardo, Norway, January 20th, 1862. Emigrated to U.S.A. in 1883, came to Bardo, Alberta, 1894, where he lived till 1924, when they sold their place and moved to Lulu Island B.C. There he died on November 13th, 1930. He leaves to mourn his loss his wife, one son Peter Haugen, Grande Prairie, three daughters, Mrs John Ness, Edmonton, Mrs. Geo. Qualley, Hughenden, Mrs. Thor Horte, Kingman; two brothers, Mr. Haugseth of Bardo and Mr. Peter Haugen of Saskatchewan; two sisters, Mrs. Fosmo, Bellingham, Wash., and Mrs. Forseth, Grande Prairie; also four grand children. The funeral was conducted from the Bardo Church on Sunday, November 23rd, 1930. Interment at Bardo cemetery.

Mr. and Mrs. Peter Haugen and Florence and Mrs. L. Johnson came tend the funeral of Mr. H. Haugen.

CARD OF THANKS

We wish to extend our heartfelt thanks to the many kind friends for their expressions of sympathy during our recent and bereavement. To those who attended the funeral of our loved one and to those who sent flowers, we are especially grateful.
MRS. H. P. HAUGEN and Family.

Lake Shore

Word was received on Monday that Mr. Jas. Murray of Waterloo, Iowa, had passed away that morning. Mr Murray had recently celebrated his 80th birthday and although he was somewhat frail, owing to his advanced age, had been in good health until a few days ago, when word was received that he was suffering from an attack of pneumonia to which he succumbed. He leaves to mourn his loss a widow and nine children, one of whom is T. R. Murray of this district.

It will be remembered that Mr Murray and his wife were residents of this community for several years some ten years ago and made many friends who will learn of his passing with sincere regret.

Miss Alma Tiedeman returned a few days ago from Golden Spike where she has been visiting her sister.

A most enjoyable bridge party was held on Friday evening at the T. A. Jones' home. Seven tables played and Mrs. Billman and Glenn won the honors, while Mrs. Wood and Joe Jones captured the consolation. Lunch was served at mid-night.

Fortune has alternately frowned and smiled on Mr. T. E. Seale in the past few days. On Friday of last week while engaged in the exciting sport of chasing a coyote on the ice of Beaver Lake with his car, he struck a rotton spot in the ice and the car broke through. Owing to the continued warm weather it has been impossible to raise the car. But as a sort of counterbalance to this misfortune, on Monday Mr. Seale received a letter with a cheque for $500 stating that he had won in a contest sponsored by the "Family Herald." We did not ascertain exactly what the contest was but understand that it was for the best article or suggestions for farm relief in the present depression. Congratulations to Mr. Seale.

Mr. and Mrs. L. H. Graham and Miss Barnes visited at the Tiedeman home on Sunday afternoon.

Miss Nettie Neal of Edmonton has been visiting her sister, Mrs. Seale.

The Sauer family left for Athabasca last week where they will make their future home.

Mr. and Mrs. J. H. Johnston visited friends at Kingman on Sunday.

Lutheran church services were held at the Tiedeman home on Sunday, a minister from Camrose officiating.

Mr. and Mrs. T. A. Jones motored to Edmonton on Thursday.

Amisk Creek

Born.—To Mr. and Mrs. Chas. Kallal, a daughter. Congratulations.

Born.—To Mr. and Mrs. H. Hilier on November 17th, a son. Congratulations.

Most of the people from around here attended the big meeting held in the Ryley Lutheran Congregation last week.

Rev. O. Haugen from Grande Prairie was a visitor at the P. O. Berg and P. O. Flaaten homes last week. He conducted a service held at the P. O. Flaaten home last Monday evening.

Professor C. Ronning and family from Camrose, Mr. and Mrs. Rovem from Bardo were guests at the I. C. Olson home on Sunday.

Mrs. Slago and children left on Monday night for the coast. Mr Slago will remain here for awhile.

Ole Hagen left for the fishing on the Great Lakes last week.

Mrs. L. Fuglgard and son Paul and Mr. J. Anderson from Daysland, visited at the R. O. Berg and P. O. Flaaten home last week.

Mr. A. Erickson and Carl motored to the city last Saturday returning in the evening.

Ruby Berg spent Sunday at her parental home, returning to Mundare the same evening.

CALGARY POWER NOW BEING USED HERE

Electric current from the Calgary Power Company's lines is now being used in Tofield. At the present time there are no meters being used but it is expected that the regular service to patrons will commence very soon.

The streets are lighted by the company several additional streets now being illuminated. So far the lights and service is fully up to standard, even the storm of Saturday night did not cause any interruption of service.

Last week, Mr Armitage was in town and gave a demonstration of various electrical appliances, including washing machines, electric irons, toasters, heaters, curlers, radio etc.

The demand for current is steadily increasing, and it is expected that it will only be a question of time before the majority will be using electricity for light and other appliances.

The Big Event of the Clothing Season!

Here is something you cannot afford to miss! On DECEMBER 6th MR. WILLIAM LOWDEN head office representative of the Tip Top Tailors, Limited, will be at our store and will personally measure every man ordering a suit, top coat or overcoat that day. He will also give you expert advice on choice of fabrics and on styles.

This is an exceptional opportunity for every man in Tofield to secure extraordinary high quality personal service along with the great value which Tip Top Clothes offer at all times.

YOUR FALL SUIT OR OVERCOAT TAILORED TO YOUR INDIVIDUAL MEASUREMENT FOR ONLY

ONE PRICE TO MEASURE **$27** UNRIVALLED VALUE UNRIVALLED SERVICE

One Day Only Dec. 6th

Not Good Publicity

Stunt Flying Does Not Help Aviation In Any Way

In the Preakness, N.J., airport on a recent Sunday, 5,000 people were watching the marvels of skill in flight when an airplane driven by veteran Alden H. Russell, went into a tail spin and crashed, injuring Russell seriously and his one passenger fatally. More than these two men were endangered; the crash came within 200 feet of the massed spectators. In Toronto at about the same time a pilot and two women passengers were burned to death in a low crash after stunting.

The friends of commercial aviation in view of the number of such fatalities, may well ask themselves what kind of publicity will most benefit their young industry, the plaudits of the crowd gathered to risk their own lives in seeing reckless pilots risk theirs, or the story of the really remarkable advance that is being made in aviation with a purpose. For, almost unnoticed along with all this dangerous stunting the carrying of air mails and passengers goes on with comparative safety, which should be, if attention were not constantly diverted from it by fatal accidents in exhibitions, most encouraging.

It ought not to take a major accident with a hundred people killed by a 'plane out of control to open the eyes of aviation authorities to the necessity of curbing the practice of recklessly showing off what wonderful things can be done in the air with luck, which does not always attend the venture.

A Mother's Anxiety

About Her Delicate Daughter

"She seems to be fading away," said an anxious mother recently about her daughter. Thousands of mothers could say the same thing. Their daughters endure a trying life robbed of all vitality and brightness. Their cheeks are pale, their eyes dull, their step languid and every movement tells of shattered health. If neglected their suffering grows more acute till decline sets in.

If your daughter complains of weariness, pains in the side; weakness, headache or backache; her appetite is uncertain and her spirits low, anaemia is the cause. She needs new blood. Give her Dr. Williams' Pink Pills at once for these pills actually renew and enrich the blood. They make sickly girls well and happy; improve the appetite and bring back all the charm and brightness of perfect health.

Dr. Williams' Pink Pills are sold by all dealers in medicine or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Pioneer Passes

Death Of One Of the First White Women Born In Western Canada

The death has taken place of Mrs. Elizabeth Adelaide Mary McKinnon, 77, one of the first white women born in western Canada. A native of Fort Garry, daughter of Philip MacQuire, of the Hudson's Bay Company, she went through the Indian rebellion at Fort Garry, and the 1885 Louis Riel rising, when she was living at Qu'Appelle. She was the widow of John McKinnon, contractor, Winnipeg.

A resident of British Columbia for 20 years, she was a pioneer of Prince Rupert and had lived here for 13 years.

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Germany Holds Strange Fair

One of the strangest fairs in the world is to be held at Frankfort, Germany. It is an insect fair at which collectors from all parts of the world gather to display their rare butterflies, moths, beetles, grasshoppers, flies, crickets and other insects. Huge sums of money are exchanged in sales of these insects between various collectors.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Exterminator will relieve them and restore health.

Canada and Empire Reforestation

Canada is yearly playing a bigger part in Empire reforestation. Fifty-three per cent. of the tree seed exported has gone to Great Britain, forty per cent. to New Zealand, and the remainder to Australia, Ireland, and other parts of the Empire. During the past ten years the British Forestry Commission has planted 160,000 acres of softwoods, the greater part of the seed used coming from Canada.

Marvels Yet To Come

Inventor Responsible For Train Telephone Has Great Vision For Future

Forecasting the future always is an interesting occupation. While in this respect the chief interest of the public is in the weather for tomorrow, other unusual prognostications attract attention. An article in MacLean's Magazine dealing with the genius of Mr. John C. Burkholder, who is responsible for the "train telephone" in operation on the Canadian National Railways, sets forth other ideas in the mind of this inventor.

Among the marvels that are to come, he sees the time when newspapers may publish in different cities by transmitting the whole edition, page by page, illustrations and all, by telegraph, with only a matter of minutes until the presses are running. City streets are to be three-deckers, and moving sidewalks will do away with street cars. Television and radio will bring from London and New York the greatest stage presentation and "the wheel of industry may be turned by the power contained in a glass of water and its plants lighted by rays captured from the sun."

Perhaps. A few decades ago Bellamy had such a vision and a great deal of it came true. The world is not slowing down, and possibly the most vivid imagination cannot foresee the marvels that are yet to come.

A Deadly New Rifle

Works Like Machine Gun Even Under [illegible]

The possibility of making every infantryman a machine gunner was demonstrated at Bisley in the presence of representatives of the War Office, the Royal Air Force and the Admiralty, when a series of tests were made of the Vickers-Berthier land service rifle and the Pedersen self-loading rifle.

The machine rifle was subjected to a severe ordeal. It was buried deep in the sandy soil. Then it was resurrected, and in the hands of a capable demonstrator it ticked out single shots, and afterwards spurted out lead at the rate of 420 rounds a minute.

An even more severe test was to submerge the machine rifle in a tank of mud and water of mortar-like consistency. It survived, with its mechanical efficiency and accuracy unimpaired. The weapon was taken into a heap of its component parts in 10 seconds. It was quickly reassembled and ready for action. One thousand rounds rapid were fired on the 100 yards range, that being the average period of its burst of fire.

Western Canada Sugar Production

About 24,000,000 pounds of sugar will be produced this year from sugar beets grown in Southern Alberta. About 14,000 acres of beets were under crop this year. The centre of the industry is at Raymond.

Has it ever occurred to you that there is no last number? The process of counting cannot conceivably be terminated, Dr. Dantzig points out. Every number has a successor. There is an infinity of numbers.

Requisite On the Farm. Every farmer and stock raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

"I wish you could pay a little attention to what I am saying," roared the exasperated barrister to a stubborn witness. "Well," was the reply, "I'm paying as little as I can."

Chapped Skin
Wind, snow and sleet bruise unprotected skin surfaces. Minard's heals the raw skin tissues and affords full protection.

Drug Ring Smashed

United States Federal Agents Make Thirty Arrests

Thirty arrests in seven [illegible] and seizure of drugs valued at $35,000, were reported by United States federal officers who for six weeks have worked under cover in an effort to smash what they described as an "international drug ring—one of the biggest and most powerful in the United States."

The secret government agents caused the arrests in Syracuse, Buffalo, N.Y., Utica, Albany, Troy and Schenectady. The coup was said to have been engineered by narcotic officials at Washington and New York.

Three were [illegible] into [illegible] in Syracuse Saturday night, Nov. 1, after undercover men, who had gained the confidence of several of the men, said by them to be members of the ring, were lured to Syracuse with invitations to a "wild party."

Instructions For Poultry Breeders

Course Is Announced For Young Breeders Of Poultry By Calgary Poultry Association

A course of instruction for young poultry breeders is announced by Dr. D. F. Macnab, president of the Calgary Poultry Association, extending from November to February 6th. A matinee poultry show, when each student will be asked to judge a section of the show, after which competent judges will comment on the awards, will conclude the course.

Persian Balm is unrivalled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawlessly white. Especially recommended to soothe and relieve roughness or chafing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet requisite for the woman who cares for charm and elegance.

New Railway Construction

C.P.R. To Commence Work At Once On Saskatchewan Branch Lines

Immediate work on a hundred miles of new rail construction in Saskatchewan is foreshadowed by D. C. Coleman, vice-president of western lines, Canadian Pacific Railway, in announcing the award of four grading contracts which form a portion of the company's advanced construction programme recently referred to by E. W. Beatty, K.C., chairman and president of the company. The contracts are for the completion of the line from Nipawin to Henribourg, 20 miles; Rosetown to Gunnworth, 20 miles, Medstead to Meadow Lake, 35 miles, and from Hamlin, northeasterly, 25 miles.

CARRY-OVER OF WHEAT FOR 1931 MAY BE LESS

Ottawa, Ont.—Canada had a surplus of 313,000,000 bushels of wheat on Oct. 31, according to an estimate in the review of wheat conditions issued by the Dominion Bureau of Statistics. If the present sales policy is continued, the carry-over at the end of the present season (July 31, 1931), will be less than last July. The review states:

"The carry-over of wheat in Canada at July 31, 1930, was 112,000,000 bushels and the total 1930 wheat crop is now estimated at 396,000,000 bushels. Allowing 110,000,000 bushels for seed, home consumption and unmerchantable grain, and adding 86,000,000 bushels exported in the period up to October 31, accounts for a total of 196,000,000 bushels.

On the basis of the official estimates of carry-over and production, a surplus of about 313,000,000 bushels existed at October 31, and it is seen that a continuation of present sales policy will result in a reduced carry-over in 1931. A great deal depends upon economic conditions as well as economic policy in the United Kingdom and Europe. The reduction of Northern American supplies to normal before the 1931-32 season will be an important factor.

The 1931-32 season will be an important factor in future price levels. The fall movement of grain from the head of the lakes assures adequate stocks in ready positions for winter export. The fortunate distribution of the Canadian wheat crop according to quality will also be a helpful factor.

The high quality wheat for eastern shipment and the low quality wheat suitable for the Orient are in the most favorable situations for export movement, the former being centred in Manitoba and Southern Saskatchewan, while the latter covers the northern and central regions of Alberta and Western Saskatchewan."

"After a slack period during most of October, daily deliveries of wheat began to exceed those of the same date last year on October 20, and since that date the cumulative total for the 1930 crop has continually widened the increase over the 1929 total.

In the crop season up to November 11 the total wheat marketed in 1930 was 196,868,000 bushels compared to 180,000,000 bushels in 1929. The provisional estimate of the 1930 wheat crop of the west was made on November 13, and forecasted a crop of 374,000,000 bushels. Of this amount, about 42,000,000 bushels will be retained for seed in the west and at least 15,000,000 bushels will be unmerchantable or lost in cleaning on the farms.

Estimates will be made later of the amount fed on farms and custom milled by country mills for consumption on western farms. On the basis of the provisional estimate, with reasonable deductions for valid items, probably 110-115 million bushels of wheat were still held by western farmers on November 11th.

No Change Likely

Tariff At Churchill To Be Same As Other Canadian Ports

Ottawa, Ont.—It may be taken for granted that the present government is not contemplating a tariff schedule on goods coming into Canada at Churchill that would be different from the tariff on goods coming at any other Canadian port. This was the opinion expressed in government circles here in reference to the proposal by Hon. R. A. Hoey, acting premier of Manitoba, that Churchill be made a free port of entry for British goods coming to Canada.

A number of ports in Europe are known as "free ports." Goods may be shipped into storage in such ports without any customs restrictions and [illegible] sold. However such imports have to meet the tariffs of the countries to which they are ultimately consigned.

Mexico In Market For Wheat

Chicago.—Reports were received at the Chicago Board of Trade from Mexico City to the effect that the Mexican Government had arranged for the purchase of 200,000 bushels of Canadian wheat from the Canadian pool.

Might Help Unemployment

London, England.—The Labor Government is considering a "back to the farm" solution for the nation's unemployment problem. It is working on a bill to provide garden plots and small farms for jobless men.

To Stabilize Wheat Prices

Advocate Measure To Restore Confidence and Ameliorate Western Conditions

Portage la Prairie, Man.—Organized agriculture of the prairies stands four square back of the premiers' pilgrimage to the east to seek Dominion government aid for the west. In annual convention here, United Farmers of Manitoba gave their endorsation to the premiers' mission to gain Dominion assistance in restoring confidence and in ameliorating conditions in the west.

Already United Farmers of Alberta and United Farmers of Canada, Saskatchewan section, have taken a stand in favor of fixed prices for wheat by means of Dominion intervention, admittedly the object of the prairie premiers' journey to Ottawa. The Manitoba body, however, erased all mention of price fixing from the resolution which it approved unanimously.

Though Manitoba farmers adopted no policy on "pegged" wheat prices, as advocated by George H. Williams, president of the Saskatchewan body, they decided to send a representative to the interprovincial conference in Saskatoon. At this meeting, the matter of stabilized grain prices by government intervention will be considered.

The Manitoba delegation will be bound to no specific move with regard to steps to be taken at the meeting.

In the course of open debate on the question, Mr. Williams stated that United Farmers of Ontario and the Canadian Council of Agriculture would be represented at the meeting, as well as prairie farm body delegates. The Manitoba convention approved the action of its directors in deciding to send a delegation to the Saskatoon parley, scheduled November 26 to 28.

Exhibit Of Choicest Products

Varied Display Seen At Royal Winter Fair In Toronto

Toronto, Ont.—The choicest of Canada's agricultural products and the bluebloods of her cattle, domestic animals and poultry were on display here, when, without any ceremony or speech-making, the gates of the Royal Winter Fair were opened to the public. Housed in the buildings at the Canadian National Exhibition Grounds were hundreds of horses, livestock, poultry, foxes, and cats and dogs, seeking glory in their respective classes, while in other buildings were aisles and aisles of fruit, flowers, dairy products, seed grains—the best Canada and the United States has to offer.

Perhaps the most varied show was the great display of apples, entered for competition by farmers and associations from Prince [illegible] to British Columbia. The displays consist of boxes of apples packed for shipment and placed one box beside the other, 10 crates high and 30 crates wide, forming a great glittering sea of red and green.

The show was officially opened by Sir Robert Borden, when the former premier addressed the throng in the huge Coliseum.

Wheat Acreage Should Not Be Reduced

Would Be Economic Fallacy In Opinion Of H. S. Fry

Toronto, Ont.—Reduction of acreage seeded to wheat by farmers of western Canada, in an effort to cut down production and thus limit the exportable surplus of stocks, would be an economic fallacy, in the opinion of Harold S. Fry, of Regina, chairman of the general publicity committee of the World's Grain Exhibition and Conference, which will be held in Saskatchewan's capital in 1932. Mr. Fry is also publicity director of the Saskatchewan Wheat Pool.

According to Mr. Fry, Canada produces in largest quantities the world's best hard spring wheat and ranks as the world's greatest exporter of wheat. He held it paramount that Canada maintain this supremacy. Either by finding new markets for wheat, lessening the cost of production, finding new uses for wheat—or a combination of all three.

Advocates Free Port

Portage la Prairie, Man.—Proposal that Churchill, the West's sea harbor on Hudson Bay, be declared a free port of entry for British goods, was made by Hon. R. A. Hoey, acting premier of Manitoba, at the annual convention of the United Farmers of Manitoba. He considered that such a move would tend measurably towards the establishment of the West's agriculture on a permanently profitable basis.

Rapid Telegraphy

Telegraph Transmission At a Speed of 9,120 Words a Minute

London, Ont.—Addressing the London branch of the Engineering Institute of Canada here, R. B. Steele, assistant chief engineer of the Canadian National Telegraphs, announced telegraph transmission at the speed of 9,120 words a minute would be made possible shortly by further extension of the carrier current system.

In 1927, Mr. Steele said, the C.N. Telegraph increased by means of carrier current the capacity of a pair of wires from 600 words a minute to 4,120 words a minute for a single pair of wires. Further development of the system now made possible the transmission of 9,120 words a minute for a single pair of wires.

MORE FUNDS ARE SET ASIDE FOR RELIEF PURPOSES

Ottawa, Ont.—A new list of expenditures approved by Hon. Gideon Robertson, Minister of Labor, brings the amounts of joint total expenditures of Dominion, provincial and municipal governments, for unemployment relief and relief works, up to $48,000,705. Additional sums approved for Nova Scotia and Manitoba augmented the previous total by $1,038,755.42, of which the eastern province's share is $916,205.42, and that of Manitoba $122,550.

The grand total is now distributed as follows: Nova Scotia, $1,025,205; Prince Edward Island, $144,800; New Brunswick, $408,300; Quebec, $3,301,000; Ontario, $10,733,168; Manitoba, $363,740; Saskatchewan, $1,476,941; Alberta, $2,067,536; British Columbia, $1,225,687; Yukon, $3,000; Canadian Pacific Railway, $11,814,000; Canadian National Railway, $11,765,400; grade crossing fund, $30,000.

The program of construction which will be engaged in by the Canadian National Railways, under the arrangement whereby interest on necessary borrowings is paid by the government, was announced here recently. The arrangement is made so as to speed up construction, etc., in order to give employment as soon as possible. The total estimated amount for the various projects, according to the program, is $9,048,868, of which $6,654,748 constitutes the proportion to be paid by the railway. The remaining sum will be met out of the grade crossing fund and other sources. The amount of contributions to be determined by the Board of Railway Commissioners.

In addition to the total sum mentioned there is a further amount of $5,110,750 for rails and ties.

This list of works includes:

Freight storage shed, Fort William, Ont., total cost $132,000; railway proportion, $132,000.

Subway, Saskatoon, total cost $300,000; railway proportion, $40,000.

Diversion railway line, Westfort, Ont., total cost $560,000; railway proportion, $560,000.

Relay 100 miles main line with new heavier rails at a total cost of $1,108,084, to be borne by the railway.

Lay track on approximately 142 miles new branch lines, total cost to the railway, $1,540,000.

Photograph above shows Queen of Spain and her two daughters, Infantas Beatrice and Maria Christiana, leaving Westminster Palace, London, England, upon her 43rd birthday.

Col. C. W. Peck of Prince Rupert, B.C., only member of parliament to hold the Victoria Cross, who was one of the many holders of this medal to attend the V.C. dinner held November 9 in Toronto, Ont.

No Interference

Sir Henry Thornton Says C.N.R. Has No Complaint Regarding Treatment By Present Government

Ottawa, Ont.—Interviewed here Sir Henry Thornton, chairman and president of the Canadian National Railways, said:

"I have no particular comment to make upon recent rumors and reports relating to the Canadian National Railways other than to say that the administration has not the slightest complaint regarding its treatment by the present government and has no apprehensions with respect to the future. We have good steady jobs minding our own business and trying to operate the railway. There does not seem to be any immediate reason for undue excitement."

Sir Henry spent some time in conference with Hon. Dr. R. J. Manion, Minister of Railways, who returned this week after a tour of the Maritimes. Only routine matters were under discussion, it was stated afterwards.

Decrease In Fall Grain

Interesting Report Issued By Dominion Bureau Of Statistics

Ottawa, Ont.—The area sown to fall wheat in Canada for the season 1931 as of Oct. 31, 1930, is estimated at 894,000 acres in a report issued by the Dominion Bureau of Statistics. This represents a decrease of 148,000 acres, when compared with the total of 1,042,000 acres sown last year.

The condition of fall wheat on October 31, is reported as 96 per cent. of the ten-year average, against 86 per cent. on the same date in 1929.

The report also deals with fall rye, showing that 944,000 acres have been sown to this grain. A decrease of 19 per cent. from the total of 1,316,000 acres sown in 1929. The condition of fall rye was reported on October 31, as 93 per cent. of the ten-year average. The condition on the same date last year, was 90 per cent.

Soviets Establish Child Clinics

Moscow, Russia.—Special clinics for crippled children are being established by the Soviet Union. The health department estimates from incomplete data that there are 750,000 crippled children in the nation.

Independence For India

Voice Of Islam Heard At Round Table Conference In London

London, England.—India's round-table conference heard a voice from Islam in a demand for complete independence.

"I do not come to ask for Dominion status," exclaimed Muhammed Ali, one of the famous Ali brothers and a leader of the all-India Moslem League. "I do not believe in the attainment of Dominion status. The one thing to which I am committed is complete independence."

The Hindus and the Moslems alike challenged the Conservative view, expressed by Lord Peel, when the former secretary of state for India declared Dominion status had not been promised as an immediate gift, but had merely been pointed as a goal by the present Viceroy of India, Lord Irwin.

"I want to go back to my own country," Muhammed Ali declared, "only if I can go back with the substance of freedom in my hand. Otherwise I will not go back to the slave country. You will have to give me a grave here."

"We will be satisfied with nothing less than full responsible government," insisted Dr. B. S. Moonje, head of the Hindu Mahasabha, or protection society.

A NEW FARM POLICY PROPOSED BY GOVERNMENT

Toronto, Ont.—A Dominion agricultural policy is proclaimed by Hon. Robert Weir, Dominion Minister of Agriculture. On the occasion of the opening of the Royal Winter Fair, the minister enunciated important policies, adopted after three days' deliberation of the provincial ministers of agriculture and to be known as the "national agricultural policy."

Declaring that at the present period of depression new and drastic steps in the right direction should be taken, and insisting on the necessity of co-operation throughout agricultural Canada, the minister introduced four measures designed to remedy the situation and bolster "Canada's chief industry." They are:

1. The introduction of better blood in herds.
2. The scientific use of home grown products for herd feeding purposes.
3. Careful study of the science of marketing.
4. The prevention of implantation and spread of poultry diseases.

One of his ambitions and reiterated policies said Mr. Weir, was to find some machinery by which every farmer throughout the country could be made aware of the changes in agricultural methods and of the improvement in farming conditions. This he had discovered, he said, as the result of the conference with provincial agricultural leaders.

"It has been agreed that the provincial departments of agriculture and all the machinery at their service, will transmit and interpret to the farmers of Canada every possible advance or policy which the Dominion Department of Agriculture, after consideration and consultation, will consider beneficial to the farming population as a whole. This, of course, with the least possible delay and at the lowest cost."

Decrease in the cost of production and scientific production that is the production of market requirements were two fundamental principles that had not been lost sight of.

The minister made a brief analysis of his four major propositions. Considering the difficulty the average farmer experiences in procuring a first class sire, whereby he might improve the blood of his cattle and the general usefulness of his stock, Mr. Weir undertook to supply free of cost to any group of energetic and deserving farmers a sire to be used during a period of two years. This, he thought, would eliminate expense and a useless waste of time and energy and encourage one of the more necessary and wholesome steps in the raising of profitable and sound stock.

Because of present conditions, the minister foresaw a very definite increase in pork production during the next few years. This he did not advise, but felt that because of the inevitable trend, steps should be taken to direct that increased production. In his opinion this would be best done by supplying farmers with breed sows of the fine bacon type at cost and at half transportation price. This would eventually mean that the right quality of bacon could be procured for home consumption and exportation with substantial remuneration for the farmer.

UNEMPLOYMENT INSURANCE PLAN WAITS ON CENSUS

Toronto, Ont.—The Dominion government awaits the completion of the 1931 census before it will apply itself to the question of national unemployment insurance, Senator Robertson, Federal Minister of Labor, intimated in an address to the Ontario community welfare council.

Senator Robertson said from six to ten of the questions to be asked for all citizens in the census next June will deal with employment and unemployment. It was hoped he said in this way to gain a complete picture of the situation at a more normal season of the year than now.

Senator Robertson believed that with the end of Soviet Russia's attempt to disorganize the markets of the world economic conditions would begin improving almost overnight.

"As soon as it is evident," he said, "that this latest attempt to [illegible] the world has failed, then almost overnight you will see a revival of trade, a restoration of confidence. With confidence restored, credit conditions will improve and more credit means more business, and more business means more employment."

The speaker gave a detailed account of the Federal Government's $20,000,000 unemployment relief plan. So far with the provinces and the municipalities co-operating, there was $46,000,000 worth of government or municipal work under way or being started to relieve unemployment and $22,000,000 worth more under way or being started by the railways.

Hon. Dr. J. D. Monteith, Minister of Labor and Public Works for Ontario, was most optimistic about the return of prosperity. "There will be a restoration next spring or summer," he said. "You would be surprised how the expenditures of the various governments on public works have improved the morale of the people. The province as a whole has greatly improved. The depression has lifted and we are looking forward to a restoration of better times."

Will Be Shipped To England

Alberta Bred Mare From Prince Of Wales Ranch Sold To Yorkshire Man

Toronto, Ont.—Owned by the Prince of Wales, and born on his ranch at Pekisko, Alberta, a six-year-old Percheron mare and her foal now at the Royal Winter Fair, are going to make history in Canadian horsedom. "Princeton Carman," winner of many ribbons in the Percheron class throughout the west, and her colt, "Princeton June," have been sold to Lord Middleton for an undisclosed sum and will sail Tuesday, Nov. 25 from Montreal for his farm at Malton, in Yorkshire, England. W. L. Carlyle, manager of the E.P. ranch, said recently.

Thousands of purebred horses have been shipped to Canada from England, to improve Canadian stock, but Mr. Carlyle believes that this is the first instance of blooded Canadian horses being sent to England, the home of fine Percherons.

Premiers Visit Edinburgh

Edinburgh, Scotland.—Three Empire prime ministers, Rt. Hon. R. B. Bennett, of Canada, Rt. Hon. James Scullin, of Australia, and Rt. Hon. G. S. Forbes, of New Zealand, spent a day in Edinburgh. After a visit to the Scottish National War Memorial in Edinburgh Castle, where each laid wreaths, they received the freedom of the city at Usher Hall.

Would Conscript High Incomes

Vancouver, B.C.—Conscription of all incomes in excess of $50,000 a year, as a solution for the nation's unemployment problem was urged by delegates to the regular meeting of the Vancouver, New Westminster and districts Trades and Labor Council, in a resolution addressed to the Federal and Provincial Governments.

Heavier Imports Of Salmon

London, England.—Imports of canned salmon from Canada during the first ten months of the year were higher than in 1929 while salmon imports from Russia declined heavily in the same period, Rt. Hon. William Graham, president of the Board of Trade, told the House of Commons.

West Is Optimistic

Ottawa, Ont.—Returning from a trip to the Pacific coast, Hon. Alfred Duranleau, Minister of Marine expressed sentiments of great confidence in the future of the west, particularly of British Columbia. The west was optimistic despite the present depression, he said.

FINDS PEARL WHILE EATING OYSTERS ON C.N.R. TRAIN

Experimental Farms Note

Apples to be kept for use during the winter months should be picked fully matured but before they are dead ripe. Fully matured apples will keep much longer and are much less subject to scald and other storage troubles. The McIntosh Northern Spy and Baldwin should be picked from the middle to the end of September.

All stored fruit or vegetables should be looked over and rotten specimens removed at frequent intervals.

Pears should be picked when they are mature but before they are ripe. They should be stored in a cool place and allowed to ripen in a warm room.

Grapes should be picked when fully ripe and stored in shallow containers in a cool place.

Vegetables should be stored in a cool place but should be protected from freezing.

Health Service
OF THE
Canadian Medical Association
Issued by
GRANT FLEMING, C.B. — ASSOCIATE DIRECTOR

The death of a mother is the greatest tragedy that can occur. The loss of the mother brings in its train so many social difficulties that it is beyond our power to estimate them. Probably no one factor is so far reaching results into a safe.

Infant mortality, such tragedies are not as common. In this country, all mother loss their lives for every true thousand children born. The percentage is appalling, being about three deaths in that many. of these need not occur, not as it is possible to prevent them.

To the woman herself and to her family it may appear as if she had been struck down by a bolt from the sky. While it has actually happened in fact that a definite cause, but given time to understand actual serious symptoms may manifest themselves.

When the expectant mother is under the regular supervision of her doctor, there is very abnormal condition from the start, and he can, by proper treatment prevent the development of any serious condition. the mother is under regular for them to consult a specialist only when there is a difficulty, for many cases which have potential the are so serious as to endanger pregnancy from the earliest months, should be carefully looked after the regular intervals one a month at period and twice a month during the months.

Previous to the expectant care do the doctor must be familiar with the history of average normal collar, with a bearing by proper treatment prevent the development of any serious condition, the mother is under regular for them to consult a specialist only when there is a difficulty, for many cases which have potential the are so serious as to endanger pregnancy from the earliest months, should be carefully looked after the regular intervals one a month at period and twice a month during the months.

Further concerning Health, address to the Canadian Medical Association, 184, College Street, Toronto. To be answered personally by

ALLEGED MURDERER OF EX-NEST MIDWINTER ARRESTED

Following the untangling of a cold and seemingly hopeless trail with only a few vague clue to work on, a particular "hully" found at the scene of the crime, Commissioner W. C. Bryan of the Alberta Provincial Police, announced on Friday his belief that with the arrest of Albert E. Aller, former Edmonton taxi driver, near Seattle, the mystery surrounding the murder of Ernest Midwinter, Calgary taxi driver had been solved.

Aller was arrested at Carnation, thirty miles from Seattle on November 16th, by Detective G. Harvey of the Alberta Provincial Police, and brought back to Calgary on Saturday night. It is expected that he will be formerly charged with the crime next Monday. Before leaving Seattle Aller made a full and voluntary statement.

According with Aller's arrest, the police of the Alberta Provincial Police claim a head of the Leavenworth penitentiary, and carried Mike Radko as a second member of the party of men who are alleged to be responsible for the murder.

Radko is said to drive on the Calgary-Edmonton road south of Calgary on the night of August 16th. Radko was traced by the A.P.P. as through the labyrinths of the Chicago underworld.

Efforts are now well under way between Commissioner Bryan of the A.P.P. Department of Justice for the return of Radko to Alberta to face the Midwinter murder charge.

The story of the work of the Alberta Provincial Police in this case rivals any working man to whom no clue was forced by hardships and who unflinchingly refused to quit the trail they had started.

The first real "break" in the case was when the A.P.P. is connected through the press, Commissioner Bryan explained on Friday.

Aller Midwinter's body of peculiar "hully" was discovered. This instrument, apparently used by Midwinter's assailants to beat him into unconsciousness, aroused the interest of Commissioner Bryan, who had it photographed and gave a description of it to the press with an offer of $25 reward to anyone giving any information as to the ownership of the weapon.

"Within a few hours after the story appeared in the Edmonton papers a merchant came to my office and positively identified the weapon as his own work," Commissioner Bryan explained. "He stated that he had made it for his own protection in the days when a taxi had been stolen from him. He had a good idea of who had stolen it and had gone to their real haul. It was then up to the police to locate the suspects from the description which the merchant gave us.

From Calgary the suspects were traced and laboriously traced to Macleod, then to Lethbridge, where the party broke up, disappearing into the underworld of the big city. Working on this clue, Allen was traced from the point to where he was arrested, while Radko was finally located in Leavenworth penitentiary, serving a term for robbery.

Radko is said by the police to have a criminal record to both Saskatchewan and Alberta. The Royal Canadian Mounted Police, who police authorities have also been working for Radko for some months in connection with a story relayed to Shanavon, but the Alberta Provincial Police beat them to him.

Radko was serving his term in Leavesworth under the name of Jack to the roadside.

Commissioner Bryan refused to make public the name of the man in Edmonton who made the "hully" which led to the arrest of Aller.

Detective F. K. Russell of the Alberta provincial police also worked with Detective Harvey on the unravelling of the case.

FIRST RATE HOTELS or POOR STOPPING PLACES

Under the present Liquor Act of Alberta there is the closest supervision of all licensed hotels and a plan of continued improvement of the operation of Hotels is possible only under the Act as it now stands.

The Commissioner says who shall run the licensed hotels and the Liquor Board inspectors exercise the closest supervision, demanding as the licensee's funds permit, better equipment and better service to the public.

What a difference when compared with Prohibition days! No supervision, poor furnishings, poor table. No control whatsoever.

NOW IT'S ALL CHANGED

DO NOT SIGN THE PROHIBITION PETITION. IT MEANS CLOSING CLUBS AS WELL AS BEER ROOMS

Leave the Act alone. We don't want the bootlegger back again.

Better Times Than Ever Loom Just Ahead If Experience Of History Can Be Relied Upon

A "cheer up" cry, with reasons for it which are as applicable today as when they were written, appears in an article by Maconday, contributed to "The Edinburgh Review" of January, 1830. He points out that in almost every part of the annals of mankind, the industry of individuals, struggling up against wars, famines, famines, conflagrations, misinformed prohibitions, crushes faster than governments can squander, and repairs whatever invaders can destroy.

The time in which the historian wrote was admittedly one of great distress, and he adds: "If we were to prophesy that in the year 1830 A population of 50,000,000, better fed, clad and lodged than the English of our time, will cover these islands—that cultivation, rich as that of a flower garden, will be carried up to the very tops of Ben Nevis and Helvellyn—that machines, constructed on principles yet undiscovered, will be in every house—that there will be no highways but railroads, no travelling but by steam—that our debt, vast as it seems to us, will appear to our great-grandchildren a trifling encumbrance, which may easily be paid off in a year or two—many persons would think us insane." Such a prophecy, if made, would have come remarkably close to the truth. Compared with that of British Isles is a little less than 50,000,000, but the people are probably better fed, clad, and lodged than they were a century ago, and the debt of these days would be considered a trifle now.

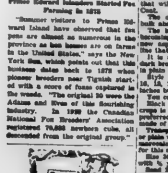
But the historian wisely distrusted any intention to prophesy, and made his appeal to the general principles of history. To almost all men, he says, the state of things in which they have been used to live seems to be the necessary state of things, and change is apt to seem unnatural. Everybody knows that up to his time progressive improvement has been taking place, nobody seems to reckon on any improvement during the next generation. It seemed to absolutely proved that these are in error who say that society has reached the turning point, that the days of Anne have been seen; but no said till who came before or with just as much apparent reason. "On what principle is it that if we see this hut improvement behind us, we are to expect nothing but deterioration before us?" Manifestly declares that rulers will best promote the improvement of the people by strictly confining themselves to their own legitimate duties by leaving capital to find its own level, commerce, commodities their fair price, industry and manufacture their natural reward. Steam and fully their natural command, by maintaining peace, by defending property, by cheapening the price of law and by observing strict economy in every department of the state. "Let the government do this, the people will assuredly do the rest."

The situation today is not now. The world has periodically overwhelmed with similar or worse conditions and has emerged greater prosperity and prosperous than before. Confidence, appeal to the history of mankind supplies reasons for confidence in the future.—Toronto Mail and Empire.

Dates Back Many Years

Prince Edward Islanders Started Pea Farming in 1875

Summer visitors to Prince Edward Island will observe that the peas are almost as numerous in the province as the leaves are on farms in the United States. A writer in the York Sun, which points out that this business dates back to 1875 when pioneer breeders near Tignish started with a score of peas captured in the woods. "The original 30 were of the Admiral and Green of the Sautching Industry. In 1892 the Dominion National Pea Breeders' Association registered 70,000 members cube, all descended from the original group."



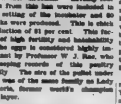
"Why do you bother to paint pictures? There are any amount of them to be bought."—Sir Wayne Jabez, Bart.

Cold Weather Lapses

University Of Saskatchewan Trying To Develop Frostproof Hen

And now they are looking for the frostproof hen at the University of Saskatchewan. The family of hen No. 330 is showing up remarkably well as cold weather lovers. While Saskatchewan was doing its worst in the way of blizzards these pullets in a cold house were safely producing their daily eggs. There are eight full sisters from an early hatch. The earliest started laying in August and they average 50 eggs each up to the present time.

The eggs of No. 330 are remarkable in another direction. Seventy-four eggs from this hen were incubated in one setting of the incubator and 50 chicks were produced. This is about production of 21 per cent. This factor of high fertility and hardiness in the eggs is considered highly important by Professor W. J. Rose, who is keeping records of this poultry family. The sire of the pullet under test was of the same breed as Queen Victoria, former world's champion egg layer.



(By Annette)

THE COWL, INCLINED THEMSELVES TO EVEN IN SCARF

Here's a marvellous dress for all the fur lovers wear. And best of all, it is a dress that only stop under a Winter Coat.

Made of black velvet, you see, built about the hips.

The bolero bodice is cut on very becoming lines. It is given an entirely new look through the use of fur, for that ends in a scarf at the back. It is a trend perfect with its rich dark brown tones with beige contrast in plain crepe.

Style No. 921 is designed in sizes 14, 16, 18 years. 36, 38, 40 and 42 inches bust.

You can copy it at a big saving. Black rayon crepe with white crepe is very chic and dignified or if preferred the cowl neckline may be made of self material.

Transparent velvet, crepy patterned or plain woolens, crepe satin and crepe de chine are delightful suggestions for this model.

Size 36 requires 3½ yards 54-inch with ½ yard 39-inch contrasting. Send 20 cents (in stamps or coin) to Pattern Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Trading Conditions Feebly Improved

Agreement Reached With Buyers Of Wheat Is Main Feature

Covering out of a series of conferences held in Toronto between representatives of the grain growing interests of poultry and officials of the Dominion Department of Agriculture, Hon. Robert Weir, minister of the department, announced an agreement had been reached on the part of the buyers to recognize Government grades as the standard for trading, and the establishment of substantial price differentials between classes and grades.

"The agreement marks one of the most important developments in the poultry industry in many years," says a statement issued by the agricultural department. The statement continues:

"That what this announcement means to the farmers of Canada is indicated by the fact that during the single process of trade feeding and prosperity finishing poultry for market from 10 to 75 cents in market values may be added to the individual bird. With the 15,000,000 birds to be marketed during the next two or three months this means the difference between profit and loss to farmers of from $5,000,000 to $7,500,000."

Canada's poultry census extends roughly from Oct. 30 to the New Year. During that time apparently 15,000,000 chickens and poles will be marketed in the country in addition to the turkeys, geese, ducks, etc. The average weight of the chickens will be about four pounds.

All poultry will be divided into two main grades, "milk-fed" and "grain-fed." The first does not necessarily mean that the bird has been fed to drink. It means that they have been crate fed until their crops have been softened and the fat taken on a milk ration mixture. The carcass are range fed with more athletic muscles.

The two grades will be sub-divided into several classes and the buyer will pay a differential of a cents a pound in favor of the milk-fed class. It will mean that the farmer who "finishes" his poultry, that is crate-feeds them, will get a substantial margin over the one who lets his stock run at large. With the present price of feed, it is estimated that the feeding will be a profitable undertaking.

Vancouver Harbor

Expect To Handle 100,000,000 Bushels Of Wheat This Winter

The Vancouver Harbor may be called upon this winter to handle about 150,000,000 bushels of wheat and the Commissioners state that the port is capable of doing this. The chairman, Sam McClay, is quoted as saying: "We have nearly 14,000,000 bushels elevator capacity now, with an additional 2,000,000 bushels being assembled November 15th, and we can handle ships and means of storing everything that comes to us."

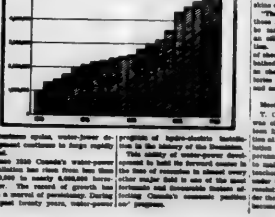
Canada's Clay Resources

In addition to many other types of clays Canada has immense reserves of clays and shales suitable for the manufacture of building brick, and structural and drain tiles.

Every town has a rich man who wears the same straw hat five seasons. And it's force of our business.

PROGRESS OF WATER POWER INSTALLATION

In taking stock of Canada's industrial progress during the present world-wide economic difficulty, one of the most inspiring features is the fact that the Dominion's water-power resources furnish a strongly representative basis for industrial progress. In the face of all the setbacks of business cycles, water-power development continues to forge rapidly ahead.



Since 1930 Canada's water-power installation has risen from less than 1,500,000 to nearly 4,000,000 horsepower. The record of growth has been a marvel of precisionacy. During the past twenty years, water-power development has maintained a succession of advances through all-obstacles—through the pre-war slump, through the disruption of the war itself, and through the drastic ups and downs of the last decade. And today, in the midst of world-wide depression, there is being carried forward the greatest program of hydro-electric installation in the history of the Dominion.

This outlay of water-power development is held to forward causes in the face of recession in almost every other major field is one of the most fortunate and favourable features of existing Canada's economic position.

DEAN OF C.P.R. CONDUCTORS

Charles H. S. Henderson, train conductor operating on the Canadian Pacific Railway between St. Stephen and Edmundston, N.B., lays claim to the distinction of being the oldest in point of service on the C.P.R. system. The present year it is doubtful exactly how old he is, but he will be 80 years of age in active service. In 1875, at the age of barely seventeen, he was conductor on the New Brunswick Railway between above points and he continued in the same capacity when it was taken over by the Canadian Pacific. Born in 1852, from the age of nine when he left his parents, he has been in continuous employment and since coming to Canada has remained in the employ of but three railroad companies. He has been in continuous employment and since coming to Canada has remained in the employ of but three railroad companies. He has been in continuous employment and since coming to Canada has remained in the employ of but three railroad companies.

Canada's Greatest Opportunity Lies In Increasing The Production Of Livestock

At a time when the prices for grains and other farm products have been suffering rapidly, livestock prices have shown outstanding strength. At present relative prices, says the monthly letter of the Royal Bank of Canada, it is decidedly more profitable for the farmer to export his grain in the form of cattle, cheese and bacon than to attempt to sell his grain in a world market burdened with surplus supplies from many countries.

Perhaps the outstanding opportunity in livestock at the present moment is in the market for pork and bacon. The demand for bacon in Great Britain was grown at an astonishing rate in 1931. Imports of bacon into Great Britain amounted to 698 million pounds in each of the last three years the total imports into that market have been more than 900 millions annually. This is an increase of 89 per cent and most of the additional supplies have come from Denmark. Canadian shipments however, are no greater today than they were forty years ago.

In 1924, the average price of Canadian hogs on the British market was equivalent to the price which prevailed in September 1930 in that market. In 1924 Canadian exports amounted to 126 million pounds. For the present year it is doubtful exports or they will amount to as much as 20 million pounds. In 1926, the price per cwt. was approximately 25 per cent higher than at present and the price of barley the most important grain for the bacon hog, was more than two and one-half times the present low prevailing. These facts seem to indicate that the possible margin of profit in hogs has improved decidedly.

British imports of dairy products have also been maintained, although the proportion secured from Canada is declining. Canadian exports of butter have practically disappeared and shipments of cheese are one-third less than they were five years ago. Canadian cheese long held first place in the British market and as late as 1928 received a substantial premium for its high quality.

The rapid decline in Canada's export trade in animal products has been partly due to the trend increase in domestic requirements. This has been very great during the past few years and production has not increased in keeping with the growing demand. Shipments overseas have been drastically cut and in some instances, such as butter and lamb large quantities have been shipped into Canada. Butter imports amounted to nearly 36 million pounds in 1929 and imports of mutton and lamb in over four million pounds. Substantial quantities of beef and pork were also brought in.

Millions of bushels of low-grade wheat and coarse grains are produced in Canada each year. Mill offals, screenings and similar products are available in abundance. Under prevailing conditions it is more profitable to market these commodities through the medium of livestock and animal products than by selling them as raw materials.

The home market itself offers opportunities for the expansion of Canadian production. The efforts of the British Government through the Imperial Economic Conference and the Ottawa Agreements should have resulted in considerable favorable to the extension of Canadian exports in the British market. But the much extended quality achieved by producers of Canadian bacon and cheese is not known overseas. Farmers and others interested in Canadian livestock might well consider these opportunities for the development of the industry and the improvement of both the domestic and export markets for such products. The necessity for improved methods and study supplies with quality and price in keeping with similar products from other countries is necessary if Canada is to regain her former position in international field. Present conditions seem to be favorable for the expansion of this industry and for greater diversification in Canadian agriculture.

Melting Ice Safe

Results Satisfactory Consistently Urge Ice Conservation Of Milk

Milk and milk products are generally recognized as the most important of all the foods required in the human diet, but it is not without its dangers as a carrier of disease germs it is one of the most important substances and aspect of the dairy industry constantly urges the pasteurization of milk as the one way by which it can be made absolutely safe. A wealth of material might be written about the value and safeguards of the process but the following letter from Dr. Bottrell Scott, D.D., of Hamilton, Scotland, Scotland, that the real distinction in "Diet in the Thirties" or "The Diet of the Hungry," Calgary Herald.

Every town has a rich man who wears the same straw hat five seasons. And it's force of our business.

Germany's Hard Times

Make Present Depression In Canada Look Like Scientific Prosperity

If it is thought that times are hard in Canada today, just give a thought to what the Germans are up against. A recent news dispatch points out that of 40,000,000 German men and women over 21 years of age, more than one dependent on the state. Wage regulations are proposed for German industry but even these mean only average $16.25 a week, and unskilled workers get around $12. This makes our own depression look like bounteful prosperity

Germany Has Big Libraries

Berlin Leads Cities With Over Nine Million Volumes

Statistics have just been published regarding the number of books in Germany's libraries. According to these the total number is 54,000,000 volumes, Berlin leading with 9,300,000 and Munich following with 4,300,000. In consequence of the regulation that every book or publication copyrighted work must be sent to the "Deutsche Bucherei" at Leipzig, that city now contains 3,130,000 books and four other German cities possess libraries that have over a million.

Development Of Dairying

The Manitoban Livestock Breeders' Association, in conjunction with the Winnipeg Board of Trade, is working on a scheme for the development of dairying and of increasing the production of poultry and eggs, and the rehabilitation of bogtorn farms.

"Another pint, please."
"No I've plenty."
"No, I am not nearly enough to drink with both hands."—Pages Colon, Yucatan.

Take Long Walks Fat Men are Told

How can you walk off your fat if you haven't any energy to do it? You can take off fat with Kruschen Salts if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet and exercise regularly.

There are six different salts in Kruschen that your body organs must have if you are to enjoy good health.

While you are losing fat you will be gaining in vigor, energy, vitality and power of endurance.

That means that each you will be able to walk many miles without fatigue and enjoy every step you walk.

Drug Stores all over Canada sell Kruschen Salts, and a jar costs but 75 cents. It's a fine blessing to fat people.

WORLD HAPPENINGS BRIEFLY TOLD

Francis Watts, the authority on tropical agriculture, died recently at Port of Spain, Trinidad, aged 71.

The port of Vancouver, I believe, is destined to become the greatest in the world, said the Minister of Marine Hon. Alfred Duranleau, in an address at Vancouver.

Dr. Charles F. Colter, D.D.S., who was largely instrumental in forming the Canadian Army Dental Corps early in the war, died in Toronto, in his 64th year.

When the Prince of Wales visits South America next year to open the British Trade Exhibition at Buenos Aires, he plans some extensive sight-seeing.

There were no legal barriers to the building in London, England, of a hotel by the C.P.R. despite a rumor from London to the contrary, company officials stated.

Another great European war in [illegible] Germany, is predicted by General Ludendorff in a pamphlet just published.

The trade delegation of the Canadian Chambers of Commerce was entertained in Shanghai at luncheon by the Pan-Pacific Association before sailing for Hong Kong.

The preparatory disarmament commission adopted the first article of the naval armament section of the draft convention providing for total limitation and reduction of tonnage.

The British dirigible R-34, which crossed from Scotland to Mineola, N.Y., in 1919, required 108 hours for the journey, 60 hours longer than the land-to-land crossing of the R-100 this year.

Premier MacDonald's official residence, No. 10 Downing Street, had a window smashed with a brick. A man whose name was given as Louis Colville Miller, 60, was arrested and charged with causing wilful damage.

Would Be Safe

Rudiments Of Flying Taught In London, England, From Table-Top

A table-top teacher for the rudiments of flying is being used in London, England, to teach student fliers. London, England, to teach student fliers. The "pilot" is provided with a real joy-stick, a rudder bar and throttle, fitted under the table at which he sits. On the table at his eye level is a large model airplane and the rear end of the case is open so that the pilot will feel a wind up to 70 miles an hour. All movements of the controls at the desk are recorded by the enclosed 'plane.

Silver Fox Breeding

Canada was the first to develop the breeding of silver foxes in captivity and she has so maintained her position in this respect that she is recognized as a world-leader by all other countries whose representatives periodically visit the Dominion to secure breeding stock and in search of knowledge and advice in the conduct of similar undertakings.

Personality Suffers In Mechanical Age

Toronto Minister Says Victorian Era Not Altogether To Be Pitied

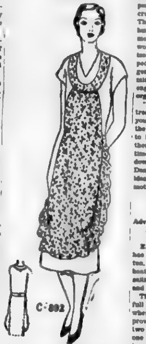
The rise in general intellectual development in the modern age did not entirely compensate for the loss of the dominating personalities of the Victorian era, Rev. G. Stanley Russell, pastor of Deer Park United Church, Toronto, told members of the Toronto Public School Teachers' Association at its annual meeting. The loss of individuality and personality, he said, was one of the by-products of the enormous increase in mechanization.

The art of hand-writing, he said, was passing because of the prevalence of the typewriter. People "banged" letters to one another on the typewriter, but the day of long hand-written personal epistles had passed its zenith. Because of the invention of the typewriter people were laying by the use of their hands in writing and because of the advent of the motor car, they were losing their legs. The chance for close observation of nature, and one benefit to health as well, were being sacrificed when people gave up walking.

The glory and personality had likewise gone out of war. Military training, he stated, had no real relationship to warfare today because war had become merely a thing of mechanical and scientific devices.

Much sympathy, he felt, was now being wasted on people who lived in the reign of Victoria. It was a very happy period, he said, despite the jeers which a certain fraction of the "moderns" buried at it.

(By Annette)



FRONT OF APRON AND RUFFLE CUT IN ONE

It's simple as A, B, C, to make!

You'll like this dainty apron immensely. It's so attractive to slip on over one's best frock.

It is gay chintz that is useful as well. It offers lovely protection to the front of the frock.

Aren't you surprised to learn that the front of the apron and ruffle cut in one piece? The belt is in two sections and is attached at sides and fastens at the back with button.

The top of the apron is joined to a yoke with U-shaped neck.

Made in a jiffy! You bet!

For the medium size, 1¾ yards of 40-inch material is sufficient.

Style No. C-802 is designed in sizes small, medium and large.

Red and white dimity prints, dotted swiss in pastel shade and blocked tissue gingham in yellow and white are dainty suggestions.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Reporter Plans Yukon Trip

Newspaper Man From Paris Will Write About Frontier Life In Canada

Sent by his newspaper, "Petit Parisien," to gather data on the northern parts of Canada, a young Parisian reporter, Alloucherie, passed through Montreal recently on his way to Yukon and Alaska where he intends studying the romantic and primitive surroundings that inspired Jack London's celebrated novels.

A year ago Mr. Alloucherie made a trip out west to investigate immigration problems, but, this time, his inquiry will cover the life of the mounted police, the prospector, the [illegible] and the missionary. His trip which has Vancouver as a starting point will extend as far as Ketchikan, Dawson and possibly Nome. Mr. Alloucherie intends retracing the path of the '98 gold rush.

Similar work, on previous occasions, has taken the young French reporter to Morocco and Syria, where he furnished the "Petit Parisien" with magazine material necessitated by tense competition now existing between the feature sections of Parisian newspapers.

New Job For Prince

Sir Philip Gibbs Thinks He Could Lead Emigrant Army

Sir Philip Gibbs, famous war correspondent and author, has submitted to the responsible authorities proposals for a novel overseas settlement crusade led by the Prince of Wales. The first contingent would be of one hundred thousand of the younger men with their womenfolk, who would form new colonies and organized on the same lines as the expeditionary force to France with general headquarters staffed by administrators and experts including engineers, agriculturists and social organizers.

"If the Prince went into the distressed areas saying 'follow me,' the young manhood would follow him in the great adventure if he promised to be their leader to go out with them and visit them from time to time. The Prince alone could break down the political opposition of the Dominions and rally them to a new idea of service on behalf of the motherland," says Sir Philip.

Long Cruise In Fishing Boat

Adventurers Reach Pacific Coast After Crossing Atlantic and Sailing Through Panama

E. W. Wilson, with a crew of three, has arrived in Nanaimo on the Brixton, "Lady Royal," a 25-ton fishing boat, after crossing the Atlantic, sailing through the Panama Canal and up the Pacific Coast.

The adventurous trip was at times full of hardships and danger. Once when more than 900 miles from land, provisions and water ran low. For two weeks the crew were reduced to one cupful of water a day. By steering into the passenger lanes, the little sloop was eventually sighted by the Matson liner, "Wilhemina," which supplied food and other necessities.

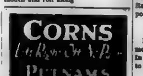
Will Build Produce Market

Twenty market gardeners in the Winnipeg region are planning the construction of an all-year produce market in Winnipeg, to be conducted by the growers, each of whom will occupy a stall. The cost of the building will run to about $35,000.

Milk Pool To Expand

The Saskatoon Milk Pool, whose corporate name is "The Saskatoon Dairy Co-Operative Marketing Association Limited," has decided to expand and go into the dairy business. It is now proceeding to get into touch with those eligible for membership.

Popular stories to the contrary; there is no such thing as a hoop-snake which can put its tail in its mouth and roll along.



SUNDAY SCHOOL LESSON

NOVEMBER 30

ZACCHAEUS THE PUBLICAN — A BUSINESS MAN CONVERTED

Golden Text: "The Son of Man came to seek and to save that which was lost."—Luke 19:10.

Lesson: Luke 19:1-10.

Devotional Reading: Psalm 15.

Explanations and Comments

The Resourceful Onlooker, verses 1-4.—When Jesus was passing through Jericho, a great crowd assembled to see Him. The rich Commissioner of Taxes or chief publican, Zacchaeus by name, being short of stature, realized that he would be unable to see Jesus. And no doubt the hostile crowd elbowed off the hated tax collector. He was, however, a determined and [illegible], and ran on ahead of the crowd and climbed up into a sycamore tree by the side of the road by which Jesus would pass.

"Zacchaeus ran before, we are told. Sometimes a man reveals the secret of his strength in some apparently insignificant deed. The forcefulness of the will of Zacchaeus lies not especially in the fact that he climbed the tree, but in the fact that he ran before. He anticipated Jesus. He saw which way Jesus was to pass, and made preparations for the best view.

The Self-Invited Guest, verses 5-7.—When Jesus reached the sycamore tree He looked up and saw Zacchaeus, and at once called him by name, and said unto him "Make haste, and come down; for today I must abide at thy house." His "must" was that of a shepherd who would care for a lost sheep. When Zacchaeus dropped down from the branches with great joy and hastened homeward with Jesus, the people began to murmur saying, "He is gone in to lodge with a man that is a sinner."

The Conversion Of a Business Man, verses 8-10.—"Think of Zacchaeus on the morning of that day! He was the chief among the publicans and he was rich. Full of guilty gains and entirely impenitent. In the far North the quicksilver freezes in the thermometer, which of course ceases to register, and the instrument is useless; but let the temperature rise, and the quicksilver becomes at once nimble and useful. That morning in Zacchaeus the moral quicksilver was frozen, and most likely it had been for years; he, however, no sooner stood in the white, fierce light of embodied righteousness than the quicksilver thawed, conscience acted, and the publican was convicted" (W. L. Watkinson). Not a word had been said about his speculations; yet in the presence of the righteous Lord he voluntarily and promptly made a clean breast of it.

"Ere God forgive the guilt
Make man some restitution."
—Browning.

Zacchaeus used the present tense as a vivid way of asserting his future course of action: "Behold, Lord," he said, "the half of my goods I give to the poor, and if I have wrongfully exacted aught of any man, I restore fourfold."

C.P.R. Hotel For London

Arrangements Have Been Made For Securing Suitable Site

Announcement was made by E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, of the acquisition of a site for the hotel proposed to be erected by the company in London, England. Mr. Beatty's statement follows:

"After protracted negotiations, the company has succeeded in securing a hotel site in London, facing Berkeley Square and Bruton Street. The block is a substantial one, containing approximately 77,000 square feet in area. Negotiations for its acquisition are just about completed, and when possession is secured, which will not, however, be for some months yet, the work of construction will commence. In the interim, the company's engineers and architects will proceed with the preparation of preliminary plans. The hotel, when completed, will contain a minimum of six to seven hundred rooms."

Winter Service Arranged

Mail Will Be Carried Into North By Air More Frequently

Arrangements for an air mail service into the Mackenzie River district through the winter of 1930-31 have been made by the Post Office Department, according to an announcement in the November supplement to the Canada Official Postal Guide.

The air mail service will supercede all previous mail services to this area and will effect more frequent and speedy communication than has been possible in the past. The frequency of delivery will be increased to more than double, and the time will be reduced to less than half.

The mail service between Herschel Island, Y.T., and Aklavik, N.W.T., will be performed by police patrol. Rae will be served irregularly by police patrol from Fort Resolution.

Automobiles Entering Canada

In 1919 the number of touring automobiles entering Canada was 320,000. In ten years (1929) this number grew to 4,000,000.

It was once supposed that the northern lights of Arctic regions could be smelled as well as seen.

Recipes For This Week

(By Betty Barclay)

CHERRY ROLLS

- 1½ cups special cake flour, sifted.
- 3 teaspoons baking powder.
- ½ teaspoon salt.
- 2 tablespoons butter or other shortening.
- ½ cup milk (about).
- 1 can (two cups) red cherries, seeded and drained.

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Roll ¼ inch thick. Cover with cherries. Roll in long roll, pressing edges together. Cut into 1½-inch slices. Place in greased pan and pour cherry sauce over them. Bake in hot oven (425 degrees Fahrenheit) 30 minutes, basting often. Serve hot, with sauce poured around them and a tablespoon of whipped cream placed on each slice. Serves six. Cherry sauce calls for 1 cup sugar, 1 tablespoon flour, 1 cup cherry juice, 1 cup water and 1 tablespoon butter. Combine sugar and flour, add fruit juice and water, and cook 1 minute. Then add butter.

APPLE SAUCE PUDDING

- 1 junket tablet.
- 1 tablespoon cold water.
- 1 cup thick apple sauce.
- 1 pint milk.
- 3 tablespoons sugar.
- ½ teaspoon vanilla (or other flavoring).

Season the apple sauce to taste with [illegible] nutmeg, and divide it among 6 dessert glasses. Prepare the junket according to directions on the package. Pour carefully at once over the apple sauce. Let stand undisturbed in a warm room until set—about 10 minutes. Then chill.

Safety First

The Sabetha Herald editor is now spending a brief period out of town. Last week the make-up man accidentally added a boxing bout paragraph to the story of the most prominent wedding of the season. It said: "The assembled crowd greatly enjoyed the fight, which was a slugging match from start to finish."

May Not Be Practical

Value Of Reading Machine Yet To Be Proved

A new invention from Berlin is a "reading machine" which will project printed pages upon a screen, enabling either a family or an entire audience to read together. The projector greatly enlarges the picture, permitting several pages of normal size reading to be reproduced from a film the size of a postal card. Whether this invention will be of any practical value remains to be demonstrated. The inventor declares it will revolutionize the publishing of books, since one of these small films can take the place of several books.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within.

The sure and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

Encourage Seed Cleaning

Saskatchewan Municipalities Take Advantage Of Government Assistance

Six Saskatchewan rural municipalities were provided with combination seed cleaning outfits, under arrangement with the Provincial and Federal Governments during this, the first year of operation of the scheme, according to Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan. Under the plan the cost of the machines is shared by the two governments, the municipalities supplying the engine, the housing and transportation equipment.

There has been no execution for murder in Denmark since 1892.

TOO MUCH ACID
may be causing those frequent headaches

WHEN there's too much acid in your stomach, you must force yourself to work, and even pleasures are too great an effort. Appetite lags; the digestion is poor; the whole system suffers.

Laboratory tests show an acid condition is due to errors in our modern diet. But you need not wait to diet your way out of the trouble! *Take a tablespoonful of Phillips' Milk of Magnesia.*

This will neutralize the excess acid instantly; make you feel like a new person in just a few moments.

Take a little whenever heartburn, sick headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too acid. Whenever you are taking cold or feel sluggish, weak, constipated, Phillips' Milk of Magnesia has a gentle laxative action.

Delightful to take. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. It always bears the name Phillips' for your protection.

PHILLIPS MILK OF MAGNESIA

Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean ill health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary cheap cathartics.

ENO'S "Fruit Salt" in a glass of water, every morning is the safest, surest and most pleasant way to inner cleanliness and perfect health.

THE DUSTY HIGHWAY

Copyright 1930

CHAPTER V.—(Continued)

He moved on slowly, reaching Nick's gate and looking up at a doorway beautiful despite its peeling paint. There was no sign of Gay. In Bakersville most men came home at noon, and at eleven-thirty their wives are in the kitchen. With the unerring instinct of one born and raised in the community, John Maxwell made his way toward the side door.

He saw then, that Gay was in the orchard, hanging some diminutive pink garments on the line. Her task done, she glanced across into her neighbor's garden, where, still clad in crisp blue linen, Mrs. Halliday was superintending the setting-out of plants. Glancing up, she caught Gay's eye, and bowed. There was nothing friendly in the act—nothing akin to the greeting she had tossed across the square to Nick, a few hours earlier. John Maxwell's grey eyes hardened. Then, as Gay caught sight of him, he smiled.

"Mr. Maxwell! What brings you out this morning?"

"Only the spring. Couldn't seem to settle down to work, and Nick gave me leave to take a holiday."

Gay laughed and said: "Will you stay to dinner with us?"

"Not today. Guess you have enough to do cooking for your own three boys. Nick's still a boy to me, you know, if he has been married long enough to acquire a family. Do you like your new neighbors, Gay?"

They had reached the porch, and the girl sank down wearily, glancing at the pocket of her dress, which was held at one corner by a safety pin.

"I hope you don't think I use pins instead of needles for my mending!" Her glance strayed to the trim blue figure across the hedge, and her color rose. "It's Sonny does it. He can just reach my pockets and he will pull at them. Sometimes he tears them when I can't stop to mend."

She was silent for a minute before she said, in answer to his question: "You asked about the Hallidays? I hardly know them. Nick called one night when I was laid up with a headache. He says they're very pleasant. She's an artist, and they're fixing the house beautifully. It makes me crazy to fix ours; but everything takes so much money. There's Sonny calling. He's just waked up, but baby's sleeping. Do wait and see him, Mr. Maxwell."

"Yes, I'll wait. I want to poke round your pansy bed. Most all ours got winter-killed this year."

But when Gay had gone John Maxwell didn't move toward the pansies. He sat on the steps, watching the blue-clad figure opposite. The flush that had mounted to Gay's cheeks as she glanced at her new neighbor, had not escaped him, nor had the tired lines beneath her eyes.

He wondered if it were only the children who had caused Gay's lack of sleep. Was it possible that Nick, the steadiest fellow in the whole world, was making a fool of himself over another woman? Stranger things happened every day, and Nick was only a boy—a boy who had never quite had his fling.

John Maxwell understood. He himself, had married at twenty-one. He remembered a time some four years later, after the advent of the second baby, when life had seemed a good deal of a treadmill. But there had always been Mary. Never for a moment had he looked at anybody else. Surely Nick—

"Here's my big boy, Mr. Maxwell."

Gay stood in the doorway, Sonny, fresh and sweet in a pink romper, in her arms. For a moment the tired lines had left her eyes, and only the pride of motherhood was there. John Maxwell, many times a grandfather, thought he had never seen a sweeter picture. He stretched out his arms, and with a delighted cry the boy went to him.

"He wouldn't do that with everyone," said Gay. "He's rather shy."

"I think he remembers my last visit, as well as my watch charm that always fascinates the youngsters."

The caller had seated himself upon the steps again, and given the boy his watch. Sonny stared at it a moment soberly, then held it to his ear in a way that made them laugh.

"He looks more like his daddy than he did, Gay."

"I've noticed that. I love a boy to look like his father. It's strange, Mr. Maxwell, but Nick wanted a little girl. I thought a man always wanted a son, and Nick's such a man's man, too. But I honestly think he was disappointed, especially when the second baby wasn't a 'little sister'; though he wouldn't change either of them now," she added, smiling.

"Daddy?" asked the child, looking up questioningly at his mother.

"Nearly time for him," Gay answered, and smiled tenderly. "Daddy's the first word he said, Mr. Maxwell. I remember feeling the least bit hurt! And Nick's such a wonderful playmate that he adores him. I —"

She stopped because the boy had uttered a delighted squeal. He wriggled away from John Maxwell's knee, while the watch, forgotten, hung limply by its chain. Nick was coming! With swift, unsteady feet the child ran to him; and with a sense of genuine relief the president of the First National Bank saw that his paying teller had no eyes for the lady across the hedge. He stooped with outstretched arms, and lifting his small son high, kissed the top of his bright head, hugged him a moment rapturously, and settled him on his shoulder as he came forward.

"A pretty sight, that," said John Maxwell softly.

But Gay did not speak. She had arisen, and was watching her husband with an intensity not quite natural in a wife of four years standing. The blue figure in the adjoining garden was also watching; though Nick was serenely unconscious of an audience. He came nearer, grinned, and said, "So this is how you take a holiday, Mr. Maxwell, calling on my wife? Mind if I kiss her? It's a sort of habit I've acquired."

"A good habit," said John Maxwell quietly. "Don't stop for me!" and the fact did not escape him that as Nick obeyed, Mrs. Halliday shrugging as if disgusted at this display of family affection, turned away.

"Damn her!" said John Maxwell below his breath.

He said it again [illegible] in his private sanctum at the bank [illegible] afternoon. Nick [illegible] that he stay to dinner, and as they started back to work, Mrs. Halliday appeared on her front porch. She didn't speak, but her smile was so intriguing that Nick stopped, exchanged a few words about the garden, promoted Mr. Maxwell as his "chief," and, at a subtly expressed hint from the lady, promised to stop over after [illegible] and survey her peony plants.

"I've been hard at work in the garden all the morning," she apologized prettily, with a glance at her spotless linen gown. "If you'll forgive my appearance now, I'll promise to look less disreputable this evening."

"You look," Nick instantly replied, "like a part of the garden itself," which bit of gallantry brought a sudden, satisfied light to the woman's eyes.

The walk to the bank was, on the whole, silent. It was as they turned into Main Street that Nick said, as if it were something he'd been considering, "Queer, isn't it, how some women can work in a garden, or 'round a house, and look so confoundedly neat? Now Gay—"

John Maxwell snorted angrily.

"Neat! My dear boy, that woman never set out a plant in her whole life! She stands about looking pretty, and ordering some man to do the dirty work. Take care, Nick, that she doesn't take to ordering you!"

Nick stared at the frowning visage of his old friend; then laughed and said: "To do her dirty work?"

"There are all kinds of dirty work, my boy," answered John Maxwell, so soberly that Nick exclaimed: "Good thunder! Mr. Maxwell, you don't think—"

"I don't think anything," broke in the older man hastily, already fearing that his indiscretion might put ideas into Nick's head. "I don't think anything except that you'd better take care of Gay. She's got hollows in her cheeks."

They had reached the bank, and without another word its president marched into his private room and slammed the door.

"Damn her!" he said for the second time that day.

Yet, when he cooled off and thought it over, he realized that he had no grounds whatever for his suspicions. As he had said to Gay, Nick was still a boy, though he had shouldered a man's responsibilities. Why shouldn't he enjoy talking with a pretty woman? John Maxwell smiled at the thought that he, himself, was not averse to doing so! Should he blame Nick because Gay seemed tired and listless? Most young mothers were, being unused to broken sleep and sudden loss of freedom. He remembered when Mary had looked like that and his two daughters as well.

(To Be Continued)

"In May and June I was badly rundown and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—*Mrs. George R. Gillespie, Punnichy, Saskatchewan.*

WHEN CHILDREN FRET

THERE are times when a child is too [illegible] or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness, Castoria has a good taste; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

CASTORIA

Maybe.. you've never thought of this

Next time you want soft water in a hurry try Gillett's Lye. Dissolve one tablespoonful in a gallon of cold water* and use this solution for cleaning sinks, refrigerators, floors, tiling, etc.

For washing dishes, dissolve one tablespoonful of Gillett's Lye in one quart of cold water. Keep in a labelled bottle and put a few drops in the dishpan whenever you wash up.

*Lye should never be dissolved in hot water.

Belonged To Trafalgar Fleet

"Implacable" May Be Kept In Repair If Plans Are Successful

After a century of service in the Royal Navy, "The Implacable" some 30 years ago, was condemned to be sold. She is the last of the ships present at Trafalgar now actually afloat. Wheatley Cobb persuaded the Admiralty to lend him the ship, and she was moved to Falmouth and maintained at his expense. For the last three summers she has been used as a holiday training ship. Efforts are now being made by naval, military and civil leaders to keep "The Implacable" in repair and provide for its maintenance.

Guard the Baby Against Colds

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist, that the health of the little one will be good and that he will thrive and be happy and good-natured. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Income Tax Collection Record

Record Breaking Mark Is Set By Income Tax Collections

A new all time record for income tax collections has been set since April 1, 1930, up to the present, $60,000,000 having been deposited with the Federal treasury in that period by Canada's taxpayers. According to announcement at the Department of National Revenue, this total is approximately $2,300,000 ahead of the like period last year.

The record-breaking mark set by the income tax collections is interpreted in government circles as indicating business conditions in the Dominion are favorable. Money, at least, cannot be extremely scarce with the taxpayers paying up so promptly.

Other financial returns for the period under review are not, however, so favorable. The customs revenues have dropped $30,000,000, while excise revenues are down $15,000,000. The drop in the latter is attributed largely to the prohibition of liquor exports to the United States.

New Survey Ships For Canada

Construction at an early date of two hydrographic survey vessels, one for use out of Victoria on the Pacific Coast, and the other for the St. Lawrence, is under consideration by the Dominion Government, stated Hon. Alfred Duranleau, Minister of Marine, who was in Victoria on an official visit of inspection.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Dice used by Egyptians in Queen Cleopatra's time are exhibited at the Field Museum in Chicago.

For Dry Skin—Minard's Liniment.

Afraid Of the Truth

Impossible To Get Uncensored News From Russia

Complaints are sometimes made that so many British newspapers, including the London Times, do not maintain accredited correspondents in Moscow. But in Russia today there is no place for a responsible correspondent of an independent newspaper. When the Times send a correspondent to Russia it will be to supply its readers with honest and unbiased information, and such information can clearly be neither gathered nor telegraphed by a correspondent working under an arbitrary system of espionage. There is no discrimination in this matter, as is sometimes supposed between Russia and the rest of the world. If similar conditions were ever to prevail in Italy, for instance, or in Turkey, the correspondent of the Times would instantly be withdrawn, as correspondents have sometimes been withdrawn from foreign countries in the past. It is not the least significant indictment of the present regime in Russia that its leaders are afraid to let the world know the truth.—London Times.

China To Have Auto Factory

Establishment of an automobile factory in China, involving expenditure of several million dollars, is being planned by a Shansi Province millionaire in conjunction with a syndicate of Germans. It will produce an automobile patterned after prominent German makes. It will be located at Taiyuan, capital of Shansi.

Little Helps For This Week

"Whatsoever a man soweth, that shall he also reap."—Galatians vi. 7.

God will not seek thy race
Nor will He ask thy birth
Alone He will demand of thee,
What hast thou done on earth?
—Forman

And they who sowed the light shall reap
The golden sheaves of morning.
—James Russell Lowell

The present life is the seed-plot of the future state, and the harvest which we reap in eternity is the same in character and quality as that which now we sow. Every thought we think, every word we speak, every action we perform, every opportunity of service neglected or improved, is a seed sown by us, the fruit of which shall multiply either untold miseries or myriad blessings in the eternity into which we go.

—William M. Taylor.

For treatment of caked bags in cows, or garget, use Douglas' Egyptian Liniment — the quick, sure remedy. Saves time and expense. Prevents blemished stock.

Canada's Major Power Systems

Canada has eighteen "large" hydro-electric power systems, such systems being defined as those with an annual output of 100,000,000 kilowatt-hours or more.

If everyone ate his food uncooked, says a European scientist, the normal span of life would be 140 years instead of 70.

New discoveries of caverns containing paintings of wild animals made by prehistoric cave men have been found in France.

COMMUNITY POULTRY KILL

The community poultry kill which was held at Tofield recently was an interesting sight to see. The party of killers and dressers included both white and colored persons and they went at their work in a business like manner. The equipment included a large boiler and the birds were dipped into hot water before being picked. It took the pickers only a short time to remove the feathers from a bird and the water while being hot enough to assist in the removal of the feathers was not hot enough to mar the appearance of the picked birds.

The morning a Mercury representative visited the tent, was quite cold, and the workers were working under unfavorable conditions. The colored persons especially appeared to feel the cold much.

HOCKEY MEETING

On Monday evening a meeting of the Tofield Hockey Club was held at the Mercury Office. It was reported there was a balance of $1.25 on hand.

W. Worton was re-elected manager; Les. Glover was elected captain and Horace McHaffey re-elected secretary.

It was decided to hold a whist drive on Tuesday next.

The line-up of the team will not be known until after the first few practices. Ice is now being laid and as soon as the rink is opened practice will commence.

SUCCESSFUL DANCE

An item of news which should have been recorded in our last issue was the dance sponsored by Horace McHaffey, Jack Church and Jack Kinoer. This dance was arranged before the "dirt movers ball", and for a time it looked as if it would be a failure. However the sponsors of the event stuck to their guns and despite a very successful dance being held a few days earlier, their event was a complete success, socially and financially. The hall was very gaily decorated and with Martin's orchestra of Edmonton supplying the music, everyone present had a very enjoyable time.

Local and Personal

Born.—To Mr. and Mrs. Wm. Kallal on Sunday, November 30th, a daughter

Service will be held in Holy Trinity Church (Anglican) on Sunday, December 7th at 3:00 p.m. Sunday school at 11:00 a.m.

Miss Minnie Wood who is on the Edmonton telephone staff visited her home over the week end.

Mr. R. Skitch is visiting in the city for a few days.

Fred Hammond (the electrician) spent a few days in Edmonton.

Mrs. Lee Rirden is spending a few days in Calgary.

Mr. and Mrs. Jim Hansen motored over from Camrose on Friday.

Mr. T. W. Jacob left Monday for Nebraska, U.S.A. where he will visit relations for a few weeks.

Mr. and Mrs. Warner and family and Mr. and Mrs. Dodds and family visited at the D. W. Warner home on Saturday.

Mrs. Ward returned from the city this week after spending a few days there.

Bound pearl beads ready to mail 15c. to $1.25. Lucille's Beauty Parlor.

Miss Helen McCauley visited at her home here over the week end.

Miss Bessie Bell attended the University dance on Friday evening in the city.

Don't forget the whist drive to be held in the Institute rooms by the Tofield Hockey Club on Tuesday night next. The boys need a little help to start the winter and your attendance will be appreciated. Cosy room, and good lunch for 35c.

Owing to some mechanical difficulty early in the week, we are a day late with the paper this week. We expect to have the paper out again on time next week.

Ketchamoot Items

Preaching services will be held next Sunday, December 7th, in the afternoon. Half hour Sunday school 2 p.m., preaching service 2:30 p.m.

A congregational meeting of the Ketchamoot branch of the United church, was held at the school house on Wednesday evening. The board was present and several members, financial business was discussed.

Mrs. J. D. Wheeler who has been staying at the Barnes' home this fall expects to leave for Kansas City, Mo., on Tuesday to spend the winter with relatives.

Miss Annie Bruin of Amisk Creek, spent a few days with her sister, Mrs. Henry McGinitie last week.

Mr. and Mrs. McGowan and son motored to Edmonton for the day, returning home in the evening.

Messrs. L. Carlisle and J. H. Ingram motored to Edmonton on Monday with a truck load of stock.

Mr. and Mrs. S. Nomeland and Forvel, Mr. and Mrs. Campbell, Mr. and Mrs Marsh Mitchell, Ivan Mitchell, Misses Hazel Sears, Mildred and Gertrude Ingram, William Ingram and Stanley Sears, attended the wedding dance of Mr. and Mrs. Oliver Thompson in Kingman on Friday evening.

By the way, what has become of our Kingman correspondent, we miss their news, and would like to see their happenings once again in the Mercury.

Mr. and Mrs. O. Barnes, Mr. and Mrs. J H Ingram and Mrs. Wheeler were Sunday guests of Mr. and Mrs. T. D. Ferguson of Lakeshore.

Mr. and Mrs Wm. Lee and family were Edmonton callers on Thursday.

Mr. Howard Lee left one day last week for Drumheller to play on a hockey team for the winter.

Messrs. Geo. Lawson, F. Sleepe, C. Coombes, Fred Sutton, Paul McMullen are away on a hunting trip around Edson.

Our sympathy is extended to the Murray family in the loss of their husband and father. He was a resident of our community some years ago. The family bought the Haugen farm when they first came to the country. Mr. W. A. Mitchell is a nephew of the late Mr. Murray.

SURPLUS OF WHEAT VERSUS BUYING POWER OF CONSUMER

Mr. Editor:

Just to see if it is possible to start a ball rolling, I have taken the liberty to ask if you would be good enough to publish this letter.

We hear it said on every hand that there is an over supply of wheat. Then the first question I want to ask is how could a surplus of wheat cause starvation. Yet that is what is given out to the public as our chief difficulty, surplus of wheat. I note with considerable interest that Mr. J. McFarland says we must get other country's to cut down on production and do so ourselves. He says he does not believe it can be done, but it must be done.

Then we might as well look for other avenues to solve the difficulty. The first thing, as I see it, is to increase the buying power of the rank and file of the people. But is it not rather strange that we also have a surplus of oats and of barley. Quite a coincidence. It proves to me that it is not the surplus, or over production as it is termed, that is out of line but it is the buying power that is out of line. What surprises me is, that some of our men who are supposed to be leaders do not see that, and say cut down production. I will point to some of them. At one time, Canada was a large exporter of butter, now she is the third largest importer of butter. It was a red letter day for New Zealand when Canada went out of the butter market. Then Canada went off the export bacon market and the result was Denmark took that market, not by curtailing production, but by producing more hogs and still more hogs. I think this is enough to prove what I am trying to get across and that is this. Other lines of commodities must come down in line with the price of wheat and meet the other exporting countries at their own game, and thereby increase buying power. We never will do any good by cutting down production, we would find ourselves in exactly the same position as we are to-day with our butter and bacon market. We are rich in coal mines, yet we are in danger of losing that market. I am glad to say not in Tofield, for in 20 years I havebeen here there always has been coal mined and shipped out, it speaks well for the management of our local mines. We cannot look for large consumption of any community when a government has to resort to a dool system, and it never will prove a remedy. Then the thing to look for is what caused the trouble and it is easy to apply the remedy. But I am quite sure it would not be cutting down production of wheat. I do not care to go into all the details of what I would recommend as a remedy, some might think there was a political reason, but I can assure you I am not thinking in way of political propaganda but earnestly trying to find a way out of our economic problem, and as I said at the start of this letter, start the ball rolling in the hope that some writer of more ability will take this up, or several of them, the more expression of views the better, if the Editor can stand the publishing of them.

J. FERGUSON.

SWISS BELL RINGERS WILL PLAY TOFIELD

The management of the Tofield theatre has made arrangements to put on a big double show, Saturday, December 6th. The musical Eckardts, Swiss Bell Ringers, dancers, vocalists and comedians, will put on their complete show in conjunction with the full picture programme. As a special attraction this season Mr. Eckardt has engaged Mr. Ted Curtis and Mr. Chas. Conquerer, female impersonators, late of Capt. Plunkets "Dumbells." Don't fail to see the "girls" you'll be surprised. Also Mr. Ray Charlton, radio entertainer, from Toronto, you're going to like Ray. This is one of the biggest entertainment values ever offered the public at one price of admission. Full picture programme and two hour stage show. One show only starting at 8 o'clock. It's going to be a big night so be there early.

CURLING CLUB MEET

On Monday of this week the Tofield Curling Club held a meeting in which matters pertaining to the club were discussed. Curling has already commenced and a successful curling season is anticipated. A few of the old time curlers are taking a vacation from curling this year and others who have not curled before are becoming devotees of the roarin' game.

Lindbrook News

Last Saturday was the day of the big wind and to date we hear of no fatalities in this district. Hay stacks suffered somewhat and we hear that Mr. A. Gills separator was blown over and Mr. Glenn's radio poles went the same way. This Saturday just past was the start of the snow season, six or eight inches having fallen so far and up to now, no really bad drifts.

The W.A. Lindbrook branch gave a whist drive last Friday week in the school. It was qrite a success both socially and financially and we hope that it may be repeated this season.

The trustees of Lindbrook school gave a whist drive last Friday and same was in aid of a fund to provide sports equipment for the school. It was well attended and enjoyed by all present and the financial end was satisfying as well.

A car of coal was unloaded here last week and several grain cars loaded.

Mr. A. Whibley has bought the "dak bungalow" (apologies to Kipling) from Mr. Silversides at the store here and intends moving same to his farm one mile west.

Mr. Silversides is preparing to move his store on to a new site near the road. At present he is unearthing the gas tank. Some job with two feet of frost.

We wish to congratulate Mr. Seale of Tofield on his winning the $500.00 prize from the Family Herald and would like to know his suggestions with regard as to how to farm to avoid the results of these depressions both industrial and agricultural.

U.F.W.A. NOTES

The U.F.W.A. met at the home of Mrs Baptiste on November 27th. The programme consisted of a reading by Mrs. Warner on "Xmas cuf from other lands" and the month ly bulletin which was on "Peace" was read by Mrs. T. E. Seale. Mesdames J. Francis, Olson, Murray, T. E. Seale and Baptiste served lunch.

The annual meeting and election of officers will be on December 11th, at the Municipal building.

Closer Union, Not Secession

In times of depression, unemployment, hard times, national disaster, there is always a tendency on the part of suffering people to demand a radical change in prevailing conditions and this demand not infrequently takes the form of an agitation not merely for a change of government, but in the form of government itself. Far away fields usually look green, much greener than those close at hand and far greener than is actually the case. Thus in monarchies the cry is raised in favor of a republic; in republics an agitation is started to supersede the democratic form of responsible government by a form of state socialism; in socialist republics the demand is for the establishment of an out-and-out communist state.

Because Canada, in common with other countries, is suffering from the existing period of world-wide depression, unemployment and inability to profitably market its surplus products, the cry of secession is raised. A Provincial Prime Minister, Mr. Baxter of New Brunswick, was the first to give voice to the idea at this time, thus reviving an old cry in the Maritimes. He did not openly advocate the secession of his Province from Confederation but in view of the continual loss by the Maritimes of industries and financial institutions through their removal to the central provinces of Quebec and Ontario he asked the question whether New Brunswick would not be better off if it withdrew from Confederation.

In Western Canada the same question has been raised at meetings of farmers who apparently are not satisfied with the economic relationship existing between the east and west and are not in accord with the fiscal policy which finds favor and strong support in the industrial centres of Ontario and Quebec. They therefore advocate the secession of the West from Confederation and the setting up of a new and separate British Dominion which would enjoy complete freedom of choice in the matter of fiscal policy. In a word, they hold that a fiscal policy which may be advantageous to the central industrial provinces is not in the interests of the agricultural western provinces, and that inasmuch as it is impossible to have two fiscal policies, one for the east and one for the west, the best thing to do is to separate politically and build up two British Dominions instead of one on the North American continent.

Such radical ideas do not flourish when times are good and people prosperous. It is only when people are discouraged and suffering loss and conditions look dark and desperate, that such suggestions are advanced and receive more or less consideration.

But secession is not the path which the people of any part of Canada should travel. The Dominion has passed through many grave crises. It has weathered many a storm. It has grown stronger as a result. In its very unity is to be found strength, not only for the whole but for each provincial unit. Linked together all the provinces are stronger financially, and in every way, than they could possibly be if divided and separate.

The genius of the Canadian people can surmount the existing difficulties. It may require patience and fortitude. It certainly will demand a large measure of patriotism and unselfishness. There will have to be less insistence on the part of any one section of the Dominion that their views alone must prevail. There must be more widespread acceptance of the fact that the economic position of east and west is radically and fundamentally different; that while they are the complement one of the other, neither can prosper and survive if one seeks to dominate and seek to control. Insistence on any such blind and selfish programme must end in disunion.

But Canada is yet a long way from an impasse where the only way out is secession of either the Maritimes on the one hand, or the Western provinces on the other hand. Central Canada cannot prosper without the business which the far eastern and the far western provinces give to it, and inasmuch as it is the western provinces that are suffering most acutely today and are least benefited by the fiscal policies which Central Canada prefers, it would seem the part of wisdom that Central Canada must modify its views.

Instead, however, of talking or even thinking secession at this time the whole thought and energies of our people, east, west and central, should be devoted to the patriotic task of working out a compromise policy which, while giving neither east, west nor central all that they may desire, will, nevertheless, work neither hardship nor injustice to any part, but will give to one and all a fair-handed deal and equality of opportunity to develop their industries and businesses along legitimate lines.

We have differences in outlook, different problems, different ideas as to the way for the solution of these problems, but we are inherently one people, with a common past and a common future. Our greatest gain and our permanent prosperity lies in strengthening, not weakening our union.

New Air Equipment

Oxygen Breathing Apparatus Permits Flying At Great Height

Oxygen breathing apparatus and full equipment for night flying are features of the Gloster Gauntlet, a new all metal single-seater fighter designed for flying at great heights. The aeroplane is fitted with the Jaguar air-cooled radial motor. At 10,000 feet above the ground the Gauntlet moves at 161 miles an hour; at 20,000 feet the speed is 172 miles an hour. Time needed to climb with full load on board to a height of 20,000 feet is 19½ minutes, and the service ceiling is 27,000 feet.

King Frost

takes at all unprotected parts. For frost bite rub well with Minard's. It kills the pain, heals the injured tissue.

MINARD'S "KING OF PAIN" LINIMENT

Failed To Produce Rain

Aviators In China Seek To Generate Precipitation By Attacking Storm Clouds

During a recent drought which developed a water famine in Hong Kong, China, skilled birdmen sought to generate precipitation by attacking storm clouds with a chemical called iiodin. This material is supposed to induce refrigerating action when it penetrates the clouds, causing condensation and eventual rainfall. When put to the test, however, the chemical failed, as have the majority of devices designed to produce rainfall artificially. Aviators showered the clouds directly above Hong Kong with more than 100 pounds of the chemical, but not a drop of rain resulted from this scientific attack.

Bird-Banding Records

The Canadian official records of bird-banding returns, through which the migration of birds are traced and recorded, are kept in the National Parks of Canada Branch, Department of the Interior, Ottawa.

Mother: "I don't like to shout at you, Harold."

Little Harold: "And I can't say that I like it either, Mummy."

Prizes Go To Alberta

Take First Honors In Pig Club and Calf Club Competition At Winter Fair

Alberta is well satisfied with the result of the judging at the Royal Winter Fair, according to H. A. Craig, deputy minister of agriculture. In the pig club team for the second time the sunny province has carried off first place, the team this year being made up of William Schmidt and Robert Wylie, both of Vegreville. Saskatchewan came second and Manitoba third. In the calf club competition the Alberta team of Borden and Vernon McKnight of Camrose led all other provinces with Quebec second and Ontario third. First place in winter wheat went to S. Alsopp of Wembley, in the Peace River district. The showing made in spring wheat was not quite so good, Alberta carrying off fourth, seventh and 14th place in a large and keenly contested class.

Automatic 'Phone For Blind

Disc Is Fitted With Numbers and Letters In Braille

No sooner have people become accustomed to the automatic telephone where on a ring with holes for letters and figures, they find the wanted number for themselves, than another invention comes in sight. This is the automatic telephone for the blind which the Paris Post Office has designed. Over the ordinary disc another ring is fitted, with numbers and letters in braille. The blind person can easily slip it over the disc, and then is able to find letters and numbers with as much ease as those who are blest with sight can.

Overwork or Worry

Taxes the Health Of Thousands Of Young Girls

In the "teen-age" years when school or office work is exacting and outside activities use up so much energy many girls undermine their health and spoil their happiness for years to come.

At such a time Dr. Williams' Pink Pills will be found most valuable. They purify and enrich the blood, build up the nerve cells and correct run-down conditions. Concerning them Miss Margaret Torrey, Indian Road, Toronto, Ont., says: "When I was attending high school I suffered a complete breakdown. My heart would palpitate at the least exertion, I could not sleep and nothing I ate agreed with me. I began taking Dr. Williams' Pink Pills and before long I gained in weight and every distressing symptom left me."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Africa Taking the Lead

Women Have Been Appointed As Members Of Church Synod

A remarkable thing has happened in the Church in Uganda. It has been decided that 12 African women shall have places at all future synods. England has grown used to the idea of a woman Cabinet Minister, and England will not be startled by the thought of women on an ecclesiastical council in Africa; but Africa itself is startled.

For long years the African woman has been regarded as little better than a beast of burden. In some parts of the world a woman may not even eat in her husband's presence. But now African women are to be members of the synod, along with three kings and many great chieftains.

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument, its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

Win Highest Honors

British Columbia Apples Score High At Imperial Fruit Show

High honors in the Imperial Fruit Show in London, England, have been won by British Columbia apples, exhibited by the Associated Growers of the Okanagan Valley in competition with fruit from all over Canada, according to cable advices received by the Department of Agriculture in Victoria. The B.C. fruit has been awarded the cup presented by the Agents-General of all the Canadian provinces in London, for the finest all-round exhibit. The trophy was won by Nova Scotia last year, the award being based on the total marks received by all classes of fruit shown by any exhibitor.

For the first time in history China is importing many silk cocoons from Japan.

Of two evils some people choose both as samples.

VICKS VAPORUB

Progress Of Mankind

Human Element Has Always To Be Reckoned With In World Affairs

Mr. MacDonald's statement of his belief that "it was absolutely impossible for mankind finally to go backward" would have received a readier endorsement from the last generation than from the present. The Victorians were optimistic, they believed that, with popular education and suffrage and the electric telegraph, they had set the feet of democracy on the right path, on which it had only to go straight forward to reach an early millennium. Well, it has not worked out quite like that, and one feels that Mr. Gladstone and John Stuart Mill (to say nothing of the others), have been spared a good deal of pain by not living until 1930.

Apart from that, there is a ring of fatalism about Mr. MacDonald's words which both reason and experience reject. If mankind can partially and for a time go backward (as it has), why not wholly and irrevocably? And if the individual man has free will, why not the mass of men? Surely man is not a bullet fired with unerring aim from a divine gun, but a driver at the wheel of his own car, which he must drive carefully if he is not to land in the ditch? It is not enough to preach that all's well with the world because God's in His heaven. Man on his earth has also to be reckoned with; and in him one has not quite that fine Browningesque confidence.—London Observer.

Lord Willingdon's Successor

Earl Of Athlone Or Viscount Lascelles May Be Appointed

"Reliable reports reaching Ottawa from England indicate that either the Earl of Athlone, retiring governor-general of the Union of South Africa, or Viscount Lascelles, only son-in-law of King George and Queen Mary, will be the next governor-general of Canada," says the Ottawa Evening Citizen in a feature story.

The term of His Excellency Viscount Willingdon as Governor-General of the Dominion expires on August 5 of next year. The Earl of Athlone is the brother of Her Majesty Queen Mary. Viscount Lascelles is the husband of Princess Mary.

The Citizen says it is understood on good authority that Premier Bennett consulted with King George regarding Viscount Willingdon's successor while in England attending the Imperial conference, and thus a definite announcement in the matter may be expected in the near future.

Confer Honorary Degrees

Three Dominion Prime Ministers Are Given Degrees At Edinburgh University

The prime ministers of three of Britain's dominions added to their list of university degrees when the University of Edinburgh conferred its honorary degree of Doctor of Laws upon Rt. Hon. R. B. Bennett, of Canada; Rt. Hon. James Scullin, of Australia, and Rt. Hon. G. W. Forbes, New Zealand.

The premiers were guests of the Overseas League. All three visited the Scottish National War Memorial in Edinburgh Castle, and received the freedom of the city.

Miller's Worm Powders will not only expel worms from the system but will induce healthful conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness and pain, and there can be no comfort for the little one until the cause of suffering be removed, which can be easily done by the use of these powders, which are very effective.

Canadians Are Honored

The children of Japan added their welcome to the demonstrations of friendship which have been given to the trade delegation of the Canadian Chambers of Commerce since its arrival in Tokyo, Japan. Twenty thousand children gathered in a natural amphitheatre and sang choruses to the visiting Canadians. The scene was one of great beauty, and one of the most impressive events of the tour.

Switzerland expects bumper fruit crops this year.

Minard's Liniment for all Pain.

Civil Service Appointments

Applications For Positions At Ottawa Must Be Made Through Civil Service Commission

Reiterating his determination to administer the department with "justice, economy and honesty," Hon. Arthur Sauve, postmaster-general, has issued a public statement dealing with dismissals of civil servants. It was not always understood, he said, that the civil service commission was paramount in all matters pertaining to public employees, their dismissals and their appointments. Ministers of the Crown were subservient to the commission, as were ordinary members of parliament.

The statement then continued:

"If a serious complaint, duly made under oath, be made against an employee of the post office department an enquiry shall be ordered and a decision reached in accordance with the evidence and the report made. If a member of parliament asks for the dismissal of a postmaster and if he assumes responsibility for same, the rule requires that I grant such dismissal.

"I enjoin upon the members to exercise great prudence in such cases and to refrain from lightly subscribing to very serious responsibilities."

Thousands of requests for government jobs from persons scattered from the Atlantic to the Pacific were being received by cabinet ministers, the statement said. It was a fallacy and misapprehension for persons to apply in this fashion, it said, adding that the only proper channel was through the civil service commission. Even where a postmaster was dismissed from office his successor was not named by the postmaster-general but by the commission.

The postmaster-general promised rigid compliance with the laws governing appointments and dismissals.

War Claims Are Settled

Secretary Of State Concludes Business With Germany and Austria

Satisfactory agreement with Germany and Austria for the settlement of all claims arising out of the sequestration of enemy property in Canada and of Canadian property in Germany and Austria during the war were concluded by Hon. C. H. Cahan, secretary of state, who returned to Canada on Sunday, Nov. 23, on the "Empress of Australia," from visits to Berlin, Germany, and London, England. The agreements were negotiated in accordance with the terms of the Hague protocol accepting the Young plan.

New Laying Record

Leghorn Pullet In British Columbia Lays 357 Eggs In 365 Days

A new world record of 357 eggs in 365 days was made by Leghorn pullet number five in the test at Agassiz, B.C., under trap-nesting rules. The eggs averaged more than 26 ounces to the dozen. The bird is from the stock of the University of British Columbia, and is owned by Mr. and Mrs. Whiting of Port Kells, B.C. The success of the bird is attributed largely, by W. H. Hicks, superintendent of the Experimental Farm at Agassiz, to its being fed with lots of skim milk and greens, in addition to the usual scratch grain and mash.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexions of exquisite charm. Adds a subtle finish to the daintiest woman. Invaluable for softening the hands and making them flawlessly white. Cool and refreshing. Daintily fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Saskatchewan Fish

The first distribution of Loch Leven trout fry in the Cypress Hills waters in Saskatchewan was made in 1924, with additional distribution in each succeeding year. In the 1929 angling season some of the trout which were caught weighed as much as six pounds and measured twenty-six inches in length and thirteen inches in girth.

Necessity knows no law, but many a young lawyer knows necessity.

The British Empire now produces 67 per cent. of the world's rubber.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

Value Of Storm Warnings

Seventy Years Ago Disaster Overtook British Seamen Who Ignored Forecast

The recent report of the Director of the Meteorological Office indicates an increasing demand for forecasts, the value of which has been proved over and over again, but the first official storm warning was issued in a very different atmosphere.

Seventy years ago, the British seaman, who was only too ready to pay heed to happenings invested with a superstitious significance, refused to believe that anyone in an office in London could be better informed of coming changes in the weather than the man on the spot!

The consequence of this scepticism was the tragedy of Black Friday.

Admiral Fitzroy, early in February, 1861, issued his first warning to mariners, which was to the effect that a gale was threatened from the south-west and then northward.

A strong southerly wind was followed by a rise of the barometer, and the masters of about 200 coal-laden ships at north-east coast ports, concluding that fine weather was coming, set sail on the unlucky Friday for London and other Southern ports.

Soon after they got out into the North Sea a furious gale arose.

During the night of Black Friday and the following day over eighty ships were wrecked within the limits of Hartlepools Bay.

Working On Telephone Line

British Columbia Starts Link Of Trans-Canada System

Construction of the British Columbia link of the first trans-Canada telephone system—a project which will mean the expenditure of $1,250,000 in the province—has commenced, it is announced by the British Columbia Telephone Company.

The British Columbia portion of the system involves the erection of some 654 miles of telephone line, of which 135 miles has already been built.

The importance of the new line from a Dominion standpoint is that at the present time, telephone calls from Vancouver to Eastern Canada have to be routed across the United States, via Seattle.

Anti-Fascists In Trouble

Several Arrests Made In Rome For Political Reasons

Seven arrests have been made during the past few days in Rome for political reasons, probably in connection with a number of chain letters denouncing the government.

Bartolo Belotti, a statesman of the old regime, was arrested and sent to "Confino," meaning one of Italy's prison islands, because of opposition to the government. Belotti was minister of finance under Premier Nitti and is now chief of the anti-Fascists.

Another man arrested for the same reason is Prof. Giuseppi Renzi, professor of philosophy at the University of Genoa, who also was sent to "Confino."

B.C. Salmon Pack Record

A new record salmon pack for British Columbia, is recorded this year, the total—as at October 21st—of 2,095,710 cases, being 30,250 cases ahead of the high record of 1926 and 837,946 cases above the 1929 pack.

Relieve your Cold with Minard's Liniment.

"I had to discharge my nurse for being cruel."

"What did she do?"

"She kicked poor Fido for biting the baby."

MILBURN'S HEART AND NERVE PILLS

Price 50c a box

Smothering and Fainting Spells

Everything Would Turn Black

Mrs. Andrew Blank, Harcourt, N.B., writes:—"I had been troubled with smothering and fainting spells and everything in front of me would turn black, and I would fall down in a faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and decided I would give them a trial. I used four boxes and found they help me wonderfully."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

PRESENT LOW WHEAT PRICES ONLY TEMPORARY

Toronto, Ont. — "We must find some method of inducing the buyers of wheat in Great Britain to return to their customary preference for Canadian wheat," declared Dr. W. W. Swanson, economic adviser to Premier R. B. Bennett, at the recent Imperial Conference. "And," he continued, "we must take precautions to see that this preference is never lost again."

A great audience of leaders in Toronto's business and financial life listened intently to the story of the Imperial Conference and the economic problems Canada faces, as it came from Dr. Swanson, head of the department of economics in the University of Saskatchewan, and nationally known expert on Canadian trade and commerce problems.

After reviewing all the varied matters that entered into the complex problem of Canadian trade and imperial trade, Dr. Swanson declared the whole question so far as Canada was concerned, revolved around the market for the Dominion's wheat. The best market she could ever get was in the British Isles.

"At the present moment Canadian wheat, as always, holds the premier place in reputation and in quality in the British market," he said. "But temporary financial depression, and momentary surplus in the market together with another influence to which I cannot refer at this point, tend to lessen the advantage which we hold, and there is no question that the immediate solution of our wheat marketing problem depends on the willingness of the buyers of wheat in Great Britain to increase their proportion of purchases from Canada."

Dr. Swanson made open reference, however, to the Russian dumping of grain in England. He declared, in speaking of the preference proposals submitted by Premier Bennett, that they would, frankly, result in an increase in the price of wheat in Britain.

"At the present time," he explained, "wheat is selling, not at a price set by fair and open competition, but at levels to which it has been lowered by the slave labor of the Soviet republic, driven by a heartless group of fanatics who do not scruple to starve a nation in order to make a case. I believe that anxious as are the people of Britain to protect themselves from exploitation in the prices of their foodstuffs, it will be hard to find even a handful there who do not accept this view."

Dr. Swanson declared himself a born free trader, but nevertheless, he was actively in favor of Premier Bennett's preference offer. In supporting it in London, he declared, "I conceived that I was doing more service to the ideal world freedom of trade than I could have accomplished in any other manner. I felt I was assisting at the mobilization of the greatest army in history for the penetration of unjust trade barriers raised by foreign powers."

The speaker also felt it important to correct any impression that the Dominions were not ready to consider tangible alternative offers. The fact was, he said, the British Government did not make any definite alternative offers. These proposals such as the quota on wheat, the bulk purchasing scheme and the idea of import boards, "were all submitted to the conference for examination and discussion. They were considered without prejudice. That none of them was found capable of immediate establishment was not owing to any unwillingness of the Dominion delegations to consider alternatives to tariff preference, but entirely owing to inability of the conference to accept any of these schemes as immediately workable."

The present low price of wheat is simply explained by the fact that a temporary financial depression exists in all occidental countries and that a momentary surplus of wheat is available for the market. "I lay stress on the temporary nature of these conditions," he said. "The depression affected every primary product in the world and every product of Canada, from the salmon fisheries of British Columbia to the lumber producers of the east." Such a general condition could only be temporary, said the speaker. It did not represent a condition of over-production.

Dr. Swanson said he was not a politician and knew nothing of politics. "But," he continued, "I know the needs of the farmers of the west—their distress and their high courage. For their sake and that of our beloved country I trust that this great question will be raised above the level of mere party strife."

Imperial Conference Results

Dr. Swanson Says Premier Bennett Was the Outstanding Man At Gathering

Toronto, Ont.—Far from being a failure, the Imperial Conference "had laid the foundation for future developments of great significance, not only to the Dominion of Canada, but to the Empire," declared Dr. W. W. Swanson, head of the department of economics of the University of Saskatchewan and economic adviser to Premier Richard B. Bennett at the Imperial Conference, when he arrived in Toronto on his way back to Saskatchewan.

That there are factors present in the wheat situation which would lift the markets to higher levels, was Dr. Swanson's opinion in respect of the present wheat crisis. He thought the effect of the 60,000,000 bushels of wheat which Russia had thrown on the British market was disproportionate to the volume and Russia, he thought, would not long tolerate a state of affairs where internal distress was being caused by the exportation of wheat at prices below production costs.

In Dr. Swanson's opinion, Canada's Premier scored a magnificent personal triumph in persuading the British Government and the governments of the other dominions to convene at Ottawa next year. Mr. Bennett, he declared, was without question the outstanding man at the conference.

Prospector Dies In North

Overcome By Cold Drops Behind Companions On Trail

Winnipeg, Man.—Another victim of the northland trail, has been claimed with the death of Ingruard Curley, a 23-year-old Danish prospector.

Carrying a heavy pack, Curley dropped behind three companions, who were mushing their way from Central Manitoba Mines to Great Falls in north-eastern Manitoba.

Missed when the party stopped for a noon meal, a search was immediately instituted, and far back on the trail he was found, still alive but badly frozen. A huge fire was built and first aid treatment administered but he died within a short time in his rescuers arms.

Employees Share Profits

Experiment Being Tried Out By B.C. Lumber Mill

Victoria, B.C.—Establishing a precedent that may have far-reaching influence in the lumber trade of the Northwestern Pacific area, the Sidney Lumber Company, Limited, has successfully operated its extensive mills at Sidney for three months on a strictly profit-sharing basis with 125 employees sharing the proceeds of lumber sales in strict proportion to the wages they would earn in times of prosperity. The experiment is the first of its kind to be attempted on the Northwest Pacific Coast.

Load Poultry Cars

Regina, Sask.—Cars will be placed at 81 points throughout Saskatchewan for the loading of dressed poultry, it was announced by D. Graham, secretary of the Saskatchewan Co-Operative Egg and Poultry Pool. Producers are urged to deliver their product to the cars at central assembly points, he said, before December 10, as the last cars for the eastern markets will be moving out by that date.

Request New Type Cars

Canadian Livestock Unions Want Movable Partitions In Stock Cars

Ottawa, Ont.—Application of the Canadian Livestock unions seeking the equipping of railway cattle cars with two or more movable partitions will be heard by the Railway Commission on December 5.

Heavy monetary loss is sustained by cattle owners owing to bruising, broken limbs and even suffocation, cattle suffer during shipment in the type of cars at present in use. By the use of movable partitions, the applicants hold, injury to shipments would be reduced to a minimum and mixed carlots of livestock would be possible.

Eskimo Marooned On Ice

Used Rifle Stock To Paddle Way To Safety

Point Barrow, Alaska.—Marooned on a small island of ice while hunting a polar bear, Joe, an Eskimo, fashioned a rough raft from the ice and used a rifle stock as a paddle to make his way to safety in a 42-hour battle, finally reaching shore ice near here. He was exhausted, hungry, and with frost-bitten fingers. While he was on the ice, temperatures ranged from 20 to 30 degrees below zero.

SAFETY CLAUSE IS ADOPTED AT GENEVA MEETING

Geneva, Switzerland.—A "safety clause" permitting a country threatened by attack to lay aside the restrictions of the general disarmament treaty, was adopted by the preparatory disarmament commission.

The clause was proposed by Hugh S. Gibson, United States representative, who explained that while the United States was willing to accept very rigid rules binding the nations to the treaty it was ready to consider the fears of other nations.

The only opposition to the clause came from Russia, which declared it unacceptable to the Soviets who are convinced the treaty ought to be absolutely binding on the states under all circumstances.

It was generally understood the clause was designed to quiet the fears of some of Russia's neighbors. It envisages a situation in which a country is threatened by attack and regards it as essential for self preservation to lay aside the treaty restrictions and have full liberty to arm itself.

The clause provides that a state in invoking the "safety clause" shall first notify other parties to the convention and the permanent commission of its intention, fully explaining the circumstances.

The commission also decided that administration of the prospective treaty shall be placed in the hands of a permanent disarmament body with its seat at Geneva.

The composition of the permanent body was left for the general conference to decide. A sub-committee presenting the proposal was unable to agree upon the body's composition. Great Britain, the United States, France, Italy and Japan wished to have its membership restricted, while China, Turkey and Finland held out for each party to the convention to have a seat in the permanent commission.

BRILLIANT MILITARY CAREER

Major-General V. A. S. Williams who was honored by being made honorary life member of the Royal Canadian Northwest Mounted Police Veterans' Association. Major-General Williams served as a very young man in the frontier forces in the North West Territories at the commencement of his brilliant military career.

Diversified Farming

Says Western Farmer Should Not Put All Eggs In One Basket

Toronto, Ont.—In depending for their livelihood on wheat alone, Western Canada farmers are "putting all their eggs in one basket," declared G. I. Christie, president of the Ontario Agricultural College, Guelph, addressing the Canadian Independent Telephone Association here, Tuesday, Nov. 26, at its annual convention.

"Low price grain does not spell ruin to the farmers, for in a country where you can grow grain you can raise livestock," said Dr. Christie. Canada, he added, had a great chance to break into the bacon markets, which are now being virtually monopolized by the Danes.

Canadian Pictures For Britain

Collection Of Scenes To Be Sent To Royal Photographic Society

Saskatoon, Sask.—Dr. L. G. Saunders, professor of biology at the university here, has been selected as one of the ten Canadian pictorial photographers to contribute to a collection of Canadian pictures. The collection is under the organization of the Royal Photographic Society of England. Dr. Saunders has done a great deal of work for the Federal Government in Prince Albert National Park and has made an intricate survey of the fishing waters of the park.

May Pay Old Staff

Ottawa, Ont.—Cabinet consideration is being given the matter of adding five years' service to the superannuation of staff members of the Department of the Interior who face retirement following transfer to the prairie provinces of their natural resources. While the resources were under control of the Ottawa Government work in this connection fell to the Federal department.

Killed By Gun Trap

Beausejour, Man.—Rene Lussier, Lac Du Bonnet woodcutter, put his foot in a gun trap while wading through frozen bush country near here and died almost instantly. When his foot struck a wire connecting the trap, a gun report rang out and Lussier's companion carried the bleeding body to a nearby homestead.

LUCKY LADS

Provincial winners of the annual Canadian Pacific Railway Swine Club Contest, photographed with C. W. Atkin, assistant general agricultural agent of the Canadian Pacific, and their trophies prior to their departure for a free excursion to the Royal Winter Fair at Toronto, where they stayed at the Royal York Hotel as guests of the company. From left to right, they are: George Inverarity and J. R. Christison, of Carberry, Manitoba winners; Miles Glazier, Mr. Atkin, and Leslie Smith, of Wynard, Saskatchewan winners; Frank Shyako and William Strynaka, of Willingdon, Alberta winners; and Hilbert de Leeuw, of Kamloops, a member of the British Columbia club.

May Try Atlantic Trip

Flight Of DO-X This Winter Still Being Considered

Lisbon, Portugal.—The giant flying boat Dornier DO-X, reached Lisbon, Nov. 26.

Dr. Claude Dornier and Mrs. Dornier disembarked from the DO-X at Coruna, Spain, and left for Madrid to go to Paris and Berlin.

The explanation given in Coruna was that the builder of the DO-X wanted to be present at the opening of the International Aircraft Show in Paris. The little sister of the DO-X known as the DO-S is one of the most interesting exhibits there.

Unofficially it was learned from Coruna that the trans-Atlantic flight has not been abandoned but officially no expression was obtainable. That the flight will not start before the end of the year seems certain.

Such Portuguese seafaring authorities as Admiral Cagoe Coutinho who was first to cross the South Atlantic ocean by air are of the opinion that the Azores-Bermuda route is wholly out of question in December and January, but that the DO-X can readily enough make the Canary Island, Cape Verde Islands and the Brazilian Coast route to New York.

Reduced Rates On Coal

Government Contemplating Further Extension Of Low Rate On Alberta Coal

Ottawa, Ont.—While no official announcement has been made it is learned on good authority that the government has under consideration a further extension of the reduced freight rate on Alberta coal moving into the central markets of Canada. The rate of $4.73 a ton on such coal shipments was extended until the spring of 1932, and now the advisability of making a further extension is being taken up. Under the arrangement the government makes good the amount which the railways are out of pocket on shipments from the west to the central markets at the reduced rate.

MOVE IS MADE FOR REDUCTION OF FLOUR PRICES

Ottawa, Ont.—Important developments in the Dominion Government's campaign for lower bread prices are anticipated at an early date unless the price of flour is reduced. Hon. Gideon D. Robertson, Minister of Labor, has been investigating the prices of bread and flour for the past four months with the assistance of the staff of the combines investigation branch and the investigators have now reached the stage where action of one sort or another is impending.

Following suggestions thrown out by the minister some months ago the price of bread was reduced by about 20 per cent. or a little more than two cents a loaf on the average over the whole of Canada. The price of flour, however, did not come down and the opinion was expressed at the department of labor that the next step must come from the milling companies.

Senator Robertson laid the results of his investigations before the cabinet meeting and afterwards announced he was calling a number of leading millers into consultation to see if something could not be done to lower the price of flour. With wheat now at about 60 cents a bushel flour is selling at approximately the same price as when wheat was $1 a bushel.

Should an investigation under the Combines Investigation Act be ordered it would be the most extensive inquiry of the kind ever held in Canada. Owing to the wide ramifications of the milling and baking industries the inquiry would have to be nation-wide in scope. For this reason it would take considerable time.

In order to secure prompt results and to avoid embarrassing any industry the government prefers to enlist the co-operation of the interests concerned. Should this prove effective as it did in the case of the baking concerns no action would be taken. Should it fail, however, the information and machinery necessary to setting an investigation under way at short notice is in readiness.

Many complaints in connection with the price of bread have been received by the government and through quiet but vigorous investigations a mass of authoritative information has been accumulated. The government is fully aware of the importance of keeping bread prices down to a minimum. The daily consumption of bread in Canada runs to about 3,000,000 loaves and a reduction of only one cent a loaf would mean an immense saving to the Canadian people.

STABILIZATION OF PRICES ASKED BY FARM PARTY

Saskatoon, Sask.—Organized agriculturists of Ontario and the prairies have asked unanimously for government stabilization of prices on a fair [illegible] cost basis.

A [illegible] two-day interprovincial agrarian parley came to a close a resolution was approved favoring [illegible] of prices at a level [illegible] exchange of agricultural products and of other goods and services.

The resolution must first receive a place before the in camera conference. It does not restrict its proposal to agricultural goods. It favors a general probe to determine the relation between farmers' production cost and the cost of other goods and services, and establishment of a Dominion Government bureau of standards for marketing farm products.

The resolution is more embracing than one of the price fixing attitudes expressed by United Farmers of Canada, Saskatchewan section, United Farmers of Alberta in recent deputations to Ottawa officials. Both the Alberta and the Saskatchewan body favored a price equal to $1.00 per bushel at shipping point for No. 1 Northern wheat, but no stand had been taken to seek control of the standards and prices of manufactured goods. United Farmers of Manitoba have not previously gone farther than to support the prairie premiers' efforts to obtain stabilized grain prices.

"Agricultural products are today standardized under grading regulations," it was mentioned in regard to the standards bureau, which was calculated to be of assistance in the production cost probe. "Similar grading or standardization of other products is a necessary step toward determining relative values for the purpose of exchange."

Allied in support of the resolution were delegates from United Farmers of Alberta, Manitoba and Alberta; of United Farmers of Canada, Saskatchewan section, and of the Canadian council of agriculture.

Faith In Saskatchewan

Optimistic Forecast Is Made By Hon. C. W. Buckle

Toronto, Ont.—Optimistic forecasts as to Saskatchewan's future reaction to the current depression were made by Hon. W. C. Buckle, Saskatchewan Minister of Agriculture at the luncheon at the Royal Winter Fair. Mr. Buckle said although the province appeared to have been hit hardest by 1930 crop conditions, it will pull through successfully.

Mr. Buckle stated that 20,000 acres of farm land suffered a total crop failure, and that $1,500,000 were being spent on rural farm relief.

Will Drill For Gas

Regina, Sask.—The C. O. Moore interests will start drilling for gas in Saskatchewan at once, if the franchise which has been granted by the city council is ratified by the ratepayers, it was announced at a banquet given by the Darlington Oil and Gas Company here. Ald. Chas. Gardiner was chairman of the meeting which was attended by about 25 business men of the city.

Silk Mill For Coast

Vancouver, B.C.—Erection of a silk mill at Port Moody, 15 miles east of Vancouver costing approximately $250,000, is under consideration by the Western Canadian Silks Limited. The factory will give employment to 100 persons, and the raw material will be imported from Japan and China.

Epidemic Of Mumps

Ottawa, Ont.—The alarming total of 362 Ottawans are suffering from mumps. Despite the fact this large number of cases has been reported since November 1, H. J. Smith, secretary of the civic health board, declared that the disease is of a mild nature. A 21-day quarantine is made compulsory in each case.

School For Pilots

London, England.—A scheme to establish an Imperial School of Air Pilotage, for training and testing future professional pilots, is being submitted to the British Air Ministry by a special parliamentary sub-committee.

Colonel Starnes Re-Elected

Ottawa, Ont.—Colonel Cortlandt Starnes, the veteran commissioner of the Royal Canadian Mounted Police, has been re-elected chairman of the St. John Ambulance Association.

CONFUSION and DISGUST

or—

LAW and ORDER

THERE ARE MANY REASONS
WHY YOU SHOULD NOT SIGN
THE PROHIBITION PETITION.

STOP and carefully study the question before putting your name on any petition that upsets law and order.

LOOK at the alternative result. The bootlegger back again unchecked and uncontrolled.

LISTEN to the results of 10 years' attempted prohibition in the United States.

We in Alberta have no liquor question because it is under control. In the United States all is confusion and disgust.

Prohibition never has and never will be a success. Leave Alberta's Liquor Act alone. Do not sign the Prohibition petition. We don't want the bootlegger back again.

Moderation League of Alberta, Inc.

STRONG POSITION SHOWN BY BANK OF MONTREAL IN ANNUAL STATEMENT

Striking evidence of the soundness of underlying conditions in Canada is afforded by the strong statement the Bank of Montreal is forwarding to its shareholders for the fiscal year to October 31st. Owing to its importance, the statement of the premier bank is always looked for with a great deal of interest. Undoubtedly this will be more particularly the case this year, on account of the complicated economic conditions that have prevailed throughout the world.

In this account there will be special satisfaction that the Bank has been able to maintain its usual strong position. As was to be expected, under the conditions, the total volume of business is down from head, there has been a gain in several of the principal departments during the past six months. This would seem to indicate more favorable conditions and will be regarded as reassuring to the business interests of the country. Of special import to the many shareholders will be a profit and loss statement showing that profits for the year have been ample not only to provide for the usual dividends and bonus, but also to allow of an appropriation of $2000,000 for pensions and the carrying forward of a considerable balance to profit and loss account.

Strong Position

The general statement of assets and liabilities is an unusually strong one. Total assets are reported at $426,765,527, up from $423,589,649 at the end of the first six months of the year. Of the total liquid assets amount to $159,192,479 at which level they are equivalent to 59.32 per cent of total liabilities to the public and compare with $275,450,266, included among them are cash and Dominion notes of $100,247,419, or 13.54 per cent of total public liabilities.

The article on the car, in the next column to the Mercury's regular Canadian Medical Association's article, this week, without a heading, in the demand on our available space is heavy

THE GAS

The car drum has in the inner end of the canal which leads into the car from the outside. The structure is a membrane of considerable strength to act as a drum head, picking up sound waves and transmitting them to the cochlea, the three small bones which lie behind it in the middle ear.

In addition to acting as a drum head, the ear-drum also serves as a barrier to keep out foreign substances. This is one reason why you break in the drum is serious as it exposes the middle ear to infection from without.

In order to hear, it is not absolutely necessary that the drum be intact. The extent to which any tear or hole in the drum may interfere with hearing depends upon the location and size of the injury.

Behind the ear-drum is the middle ear or tympanic cavity. Here are the ossicles, the three small bones joined by the ear-drum.

The Eustachian tube, which connects the middle ear with the throat, opens into the middle ear. The tube serves as a passage for air and thus keeps the pressure within the middle ear on the inside of the drum. The equality of pressure is important for proper hearing.

If the Eustachian tube becomes blocked through inflammation or other causes, air does not get in and hearing is interfered with. If there is infection of the nose and throat, it may spread to the Eustachian tube, and then to grave danger that if the case is bitter, the disease may cause infection will be formed up the tube and will cause disease of the middle ear. The mere should not be blown forcefully at any time, but to do so when the individual is suffering from a cold in the head is to invite trouble of a very serious nature.

This mentoid cells which open into the middle ear have nothing to do with hearing. They are similar to the head sinuses which drain into the nose. They are important in, for instance, in so many cases, where infection of the middle ear, the infection spreads into the hollow cavities of the mentoid, the bony prominence situated behind the ear. When this occurs, we find a condition called mentoiditis, which is serious and requires immediate care.

Prevention of these conditions is by giving attention to the nose or throat.

What a wonderful Christmas Gift!

Complete

Electric Service for Your Home

An Electrified Home on Christmas morning! How appropriate! How pleasing to every member of the family! How easy to have such a delightful home gift!

If your family is not among the thousands who are already enjoying the marvelous service of electric cooking, electric refrigeration and other electric home helps, decide now that they shall. What could be more in keeping with the spirit of home happiness

—the spirit that is Christmas—than to have the folks look into the kitchen on Christmas morning and find an Electric Range, a Refrigerator—or any one of the many helpful electrical servants. Wonderful servants that have established new standards of home enjoyment!

Here, indeed, is a worth while Christmas Suggestion.

We want you to know how easily you may buy all or one of these appliances on a very liberal time payment plan—and operate them very economically on our rate.

Call our representative and talk it over.

JACKSON DODDS, General Manager

CHARLES S. GORDON, President

The strength of a bank is determined by its history, its policy, the management and the moral of its customers. For 113 years the Bank of Montreal has been in the forefront of Canadian finances.

Real Measure Of Success For The Farm Is the Value of the Crop for Each Acre of Ground

The real measuring stick to apply to farming as an industries of success to the ultimate value of the crop taken off an acre of ground. It is out of the land results from the total acreage operated by a farmer that the business stands or fails. Therefore, the question to what can the acre of land of any farm be made to produce, not merely in the one state or key or grain, but by any subsequent volume that the addition of such a process as feeding the crop to livestock may make to the revenue per acre? In other words, in what way can "manufacturing" processes be used in order to secure the desired revenues per acre of land.

Most farmers in Canada this year are realizing that it is unsafe to depend on the sale of the products of their acres in their raw state there is the West should straight grain farming has been pushed upon as attended it has become evident that it is unsafe to have no means of carrying farm processes any further for, at least a part of the crop. It has been formed some that there must be maintained on each farm the means of turning grain into livestock or livestock products in order to minimize the effect of a breakdown of cash grain prices.

To provide such safeguards by separate and profitable operations. A "plant" must be built up carefully in order to have it efficient. This "plant," which consists of livestock, requires time and skill to build up, but once built it can be continuously maintained.

It is important to note how the money returns per acre are increased when livestock are fed. Where the carefully built up over years aided by skilful feeding learned the rugh practice and study, the amounts of feed required to produce a hundred pounds of hog is decreased.

An acre of pulse yields results in high feed values. It is evident that to get the best returns per acre which is the ultima's measure of success an efficient "plant" of breeding stock must of necessity be maintained and the study and experience of breeding and feeding must be applied from year to year. In some places an acre of grain will yield margins over cash prices if the crop only when feeding grains are efficient. On the average there will be a very nice increase in acre income.

It will seem that volume of production in any year should not be limited to the size of the crop harvested, but in order that the "plant" may be maintained and kept producing, a certain amount of feed should be provided to carry through the year. Many farms will operate more successfully when an excess of livestock is kept beyond what the acres will produce. Often the maintenance of farm fertility or the reduction of the weed nuisance requires that the livestock should be in excess of what the farm alone can support. In some cases the acres will yield the largest income when nearly all the grain or other concentrates are purchased. In any case, the planning of a definite program whereby a certain number of livestock is maintained year in and year out is fundamental.

When production is put on this basis serious study will be given to the problems of buying supplies are to be made continuously and economically available

Canadian Clay

Canada is fortunate in possessing resources in many types of clay employed in the manufacturing industries. It is used in large amounts in the making of such materials as cement, paper, and textiles, but the greatest use is in the clay-working industries of this country in which over 1,500,000 tons of various types of clay enter into the composition of the products each year

Advertising Is Cure For Business Ills

Noted Businessman Says It Is a Necessary Stimulant

Roger W. Babson, noted economist gives advertising as his prescription for business ills.

Writing in the Collier's Weekly Babson says that advertising on a larger scale than the world has ever known will prove the necessary stimulant toward economic recovery.

"As time when studied business depression in life rather than in literature," he says, "I see in current conditions the call for advertising. There's nothing wrong with the product but poor circulation. Money is being held instead of circulated.

"Advertising is ideally fitted and competent to accelerate the circulation. It is the most effective known way of accomplishing the speeding up of money and thereby giving us more business at better value since business is the nation's greatest need."

Canadian Poultry

Exhibition Of Canadian Made At Various Competitions Shows Good Effect

That the production of Canadian poultry of the various competitions was having direct and beneficial result for Canadian poultry raisers was the opinion expressed by W. Weldon, provincial commissioner of agriculture. This statement was made following the publication of an article stating that a consignment of selected birds valued at $4,000 was being shipped from British Columbia to Japan to be used as foundation stock on the Imperial Farms there.

Mr. Weldon, who was in attendance at congress in Crystal Palace, England, stated that the Canadian exhibit attracted much attention and he believes that the number now being filled can be directly attributed to the congress.

C. H. Williams, president of the organization, is expected to attend.

Defends All Comers

Seventy-Eight Year Old Farmer Wins Plowing Match in Sahara

In a celebration of the honesty of entirety is held on to be the greatest and longest supremacy was furnished at the recent plowing of the North Shropshire Plowmen's Association.

First honors in the high-cut class of plowing were won by Alexander McKercher, of Wrenster, who is 78 years of age. He also won first prize for the best finished furrow as well as all the horse implements for the veteran competitors. His victories in the two main open events were the best ever obtained. He was supplied by Hamblin of the finest horses in Shropshire. Many of them had won honors in similar contests. He finished all contests.

London Letter.

Found a Ready Market This Year in United States and Eastern Canada

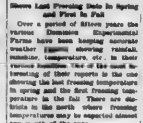
Bagged strawberries from British Columbia, put up in cotton, found a ready market this year. About 100,000 pounds were bought by American interests and large quantities were sold in Eastern Canada. In the Saanich district 504,187 pounds of berries were processed, 190,000 in the Mission Municipal district, and 166,000 pounds in the Maple and Mission areas.

"Mary, is my bath ready?"

"All but the hot water, ma'am, it's all ready."

"What's the matter with hot water?"

"It's cold, ma'am."



Premier Howard Ferguson of Ontario, to be appointed at the recent opening of the British parliament.

To Sell Family Portraits

Earl Of Egmont Will Dispose Of Valuable Family Heirlooms

The London Daily Mail says that all of the Egmont family portraits, the property of Frederick Joseph Trevelyn Perceval, the London resident who succeeded to the title of Earl of Egmont last year, are to be sold.

The collection comprises 63 portraits of various members of the Egmont family from the 17th century on, and are by, among others, Lely Kneller, Reynolds and Hoppner.

Looks After Its Own

The underworld of United States cities seems to look after its leading members when necessities fill them full of bullets. A New York hospital has received anonymously $2,000 with the request that a victim of some trough gangsley receive "the best attention that money can buy." And sangg a deadly, law-abiding man, who never shot any one nor has been shot at, has to pay his own hospital bills.

"B'ars in them Hills"

Jack Brewster, guide and outfitter of Jasper National Park, as seen his hunter guests who went to seek trophies in the big game hunting districts which lie just outside the borders of Canada's largest National Park last game sanctuary. Hazi Byck, of Louisville, Ky., who went hunting with Brewster this Fall, supported the outfitter's claim when on returned from his hunting expedition with the skin of an eight foot grizzly which was discovered by the guide to be stalking the hunter while the hunter was busily engaged in stalking a bull moose. Byck turned in his trouble and brought down the grizzly with a well-placed bullet which cut the main artery of the animal's heart. While on his hunting trip Byck succeeded in filling his license, securing some magnificent trophies of Rocky Mountain sheep and goats, deer, moose and caribou.—Canadian National Photo.

War Debt Cancellation Would Have Eased Depression Says Sir Robert Borden

Interesting Report On Temperatures Of Canada

Shows Last Freezing Date In Spring and First In Fall

Over a period of fifteen years the Dominion Experimental Farms have been keeping accurate weather records showing rainfall, humidity, temperature, etc. in their various localities. One of the most interesting of their reports is the one showing the last freezing temperature in spring and the first freezing temperature in the fall. There are districts in the north where freezing temperatures may be expected almost any month of the year.

As a basis for the comparison the freezing point of 32 degrees on the Fahrenheit scale has been chosen. The indication of frost by the thermometer does not necessarily mean injury to growing crops. In all cases thermometers are housed in cages located a few feet above the ground. The temperature recorded therefore represents that of the air in the immediate vicinity of the thermometer Slightly higher or lower temperatures might reasonably be expected at the ground level, while the extent of natural shelter, nearness to large bodies of water and contour of the land also serve to modify the temperature. The Central Experimental Farm at Ottawa has on an average 146 frost-free days, from May 7 to Oct 1. Harrow Ontario, has approximately the same record with 161 frost-free days. As a contrast to this the farm at Kapuskasing, Ontario, which is only two hundred miles north of Ottawa, enjoys only 62 frost-free days, from June 22 to August 22. The records also show that at Kapuskasing frosts are of quite frequent occurrence in June, July and August. Lacombe, Alberta has quite a number of summer frosts which is perhaps the reason for the greater attention given to live stock in that district. As a contrast to these is the farm at Sidney on Vancouver Island, which has a record of 224 frost-free days—from April 1 to November 15. The final freeze up at Sidney does not come until December 20. The nearest record to this is held by Agassiz, B.C., with 187 frost-free days from April 21 to Oct 26. The rest of the Experimental Farms vary from 90 to 176 frost-free days with an average of 116.5 days These figures show how varied is Canada's climate, and indicate why agricultural practice vary as in different parts

Homestead Entries

Edmonton Land District Leads All Others In Western Canada

For the first nine months of the year the Edmonton office led all others in Western Canada in the recording of homestead entries, surveying its own record for the corresponding period of 1929 by 1,204. Between January 1st and September 30th, 4,115 homesteads were filed upon in the Edmonton land district, compared with 2,932 for the similar nine months of 1929 The figure was more than one-third of that for all Western Canada, which granted 11,349 homestead applications as compared with 11,175 for the corresponding period of last year

Alberta Oil

Production Figures Show a Rapid Growth In This Industry

Comparative figures of oil production in Alberta during July, 1930 and the same period last year indicate a rapid growth in the industry in Alberta Canada The figures compiled by the Department of the Interior from reports of operators show the total production in July at 113,181 barrels, or an increase of 1, 872 barrels over the same month last year. An increase of 11,736 barrels over that of July 1929

Canada's Leading Manufactures

In total capital invested, the pulp and paper industry of Canada was second only to electric light and power plants in 1929, and in total number of employees served only to sawmills. In the distribution of wages and salaries however, and in the value of manufactured products, the pulp and paper industry headed the list of all Canadian industries in 1929.

Getting Down To Facts

Speaking of a recent fire in a Missouri town, one exchange said a certain family lost all its property. The other newspaper said the family lost a used Ruver, and J. E. Ford of the Dunnville Eagle says they both were probably right.

Canadian Product Favored

Imports Of Canned Salmon From Canada Show Increase In Britain

Imports of canned salmon from Canada last summer as the final ten months of the year over last year, while imports from United States of the commodity had showed a heavy decrease in the same period, stated Rt. Hon. William Graham, president of the Board of Trade in the British House of Commons.

The minister made the statement in contradiction to an assertion that the canned salmon industry of British Columbia had been severely affected by the Soviet Government dumping salmon on the British market.

Poor Linen Cases

An Englishman on a visit to the West decided to go horseback riding. The hostler who was to attend him asked "Do you prefer an English saddle or a Western"

"What's the difference?" he asked.

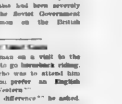
"The Western saddle has a horn," explained the attendant

"I don't think I'll need the horn," said the Englishman "I don't intend to ride in any rodeo."

He "How old are you"

She—"I've just turned twenty three"

He "Oh, I see thirty-two."



"You want a job as chauffeur?" "Yes, as a source."—Pogue Chiel, Wyandotte.

WORLD HAPPENINGS BRIEFLY TOLD

The ban on importation in Canada of love birds, parrots, parakeets and cockatoos has been removed.

The alarming total of 802 Ottawans are suffering from mumps, of a mild nature, it was revealed by the health board.

On a 76-acre tract recently added at Shippigan, Gloucester, Scottsmoor, has been found a large amount of high-grade sand for glass making.

Charles S. MacDonald, president and general manager of Canadians, Ltd. Life Association has been elected a director of the Bank of Canada.

Lord Byng commemorative of the Metropolitan police and fire-men Canada's governor-general, decided he would resign as head of the police through ill health.

Surging his native country in Canada, Lieut.-Col. L. M. Mackintosh, of the Hungarian army, team, won the military touch-and-go championship at the Royal Winter Fair in Toronto.

The British government, by way of a subsidy will help the British Broadcasting Company's putting on the air the grand opera performances a year in England.

Captain Edward [illegible], the medal on chairman who had charge of Shamrock I., Shamrock IV and Westward Ho! recently at Brightlington, England.

Trade and commerce between nations should be carried on in the same way as business between individuals, in the opinion of Hon. P. D. Pattullo leader of the opposition in the British Columbia legislature.

The text of the Commerce Committee bill to be introduced in the British parliament provides that the proposed body will be empowered to investigate prices of clothing foods and any other articles of common use.

New Map Of Canada

Gives Comprehensive Idea Of Location Of Outstanding Resources

A new map of Canada in colors on a scale of one hundred miles to the inch, that indicates at a glance the country's resources, mineral, railways forests and agricultural areas has been issued by the National Development Bureau, Department of the Interior at Ottawa.

The map affords a comprehensive idea of the location of Canada's resources, whether power developed and undeveloped, fisheries various types of farming, and other outstanding resources. It is of such convenient size as to be suitable for ready reference, and should prove of value to educationists, business men, and, in fact, to all those who are connected with, or interested in the development of Canada's resources.

Copies of the map may be obtained free of charge by adults from the above mentioned bureau.

Another Scientific Feat

Note Transplanted To Watch Crystal Keep Its Pitch

British scientists have succeeded in growing hair on a watch crystal. The has been accomplished at the laboratories of the Wool Industries Research Association. A woman scientist takes tiny grafts of a guinea pig's skin, transplants them to the surface of an inverted watch crystal and feeds them with blood plasma and a special extract to nourish the roots. The hair keeps a growing, and in many cases has reached a decidedly alarming effect.

To make it "stay back in one length of material. The front is in three sections. The left and right section are joined to the back, and the shirt-section forms the front piece. The back is sewed and hooked at the sides and shoulders. The girdle is attached at either side of the front at perpendicular.

Style No. 804 is designed in sizes 36, 38, 40, 42, 44 and 46 inch bust.

Men's cotton shirting makes an ideal garment for this model and percale, gingham, broadcloth, poplin and linen are also suitable for this pretty apron frock.

Size 36 requires 2 yards 48-inch and 7½ yards binding.

Will Award Scholarship

Every Province In Canada Represented At Boys' and Girls' Grain Judging Competitions

Scholarships valued from $300 up to $700, were decided upon as prizes in the five students standing highest in the junior grain judging competition to be held in connection with the World's Grain Exhibition and Conference at Regina in 1932 as a crowning of the boys' and girls' judging competition committee held under the chairmanship of C. H. Hamilton, of Toronto.

Originally it was intended to offer a trophy valued at $2,500 to be entered in the inter-county section of these competitions securing the highest standing. While it is still intended to offer a trophy of this kind, the committee decided that instead of putting up the money for the trophy it would be more in keeping with the spirit of the competitions to offer a number of scholarships of equal value.

The scholarships, said, as conclusive evidence of irregularity in the Russian grain trade, that it would be wholly impracticable to [illegible] Chicago. Hedging operations on the Chicago board of trade, he explained, were entirely absent on the Canadian market. The truth about all is that Canada is the greatest hedging market for wheat in the world. Millers, dealers, millers of all countries use it to hedge their regular business transactions because it leads in volume of trading.

Bulging As a Business Practice

Short Selling Of Grain Wisely As Act Of Business Judgment

The October Bulletin of the National City Bank of New York gives a clear-cut explanation of hedging operations. The article reads, in part:

"Hedging sentiment has been created by reports that the Russian government had been selling short on the Chicago market, and rules regarding cancelling over 7,000,000 bushels are said to have been framed.

"Everybody seems to have forgotten that only a few weeks ago charges were made that the Russian government was selling short on the Chicago market. The truth about it all is that Canada is the greatest hedging market for wheat in the world. Millers, dealers, millers of all countries use it to hedge their regular business transactions because it leads in volume of trading.

Canadian Poultry To Japan

Consignment Of Selected Birds From British Columbia Shipped Through Fierce In Japan

The Emperor of Japan is among the recent new customers for British Columbia pure-bred poultry. A consignment of selected birds shipped from for $4,800, from some of the best poultry farms in British Columbia, is now on its way to the Imperial farms in Japan. The birds will be used as foundation stock for breeding.

Each of the hens in the consignment has a record of 200 eggs per year or over. Included in the shipment are a son and five sisters of "Mollie," or Hen No. 6, who held the record in 1927 as the world's champion egg layer, with 351 eggs in 364 days. This White Leghorn was one of the chief attractions at the World's Poultry Congress held in Ottawa in connection with the Canadian National Exhibition. Rhode Island Reds and Barred Rocks are the principal breeds in the consignment bought by the Emperor of Japan. Several large orders for Japanese poultry raisers have been filled by British Columbia breeders in recent years.

Will Use Canadian Coal

Manitoba Government Institutions will use Canadian coal this winter and tenders for 30,000 tons will be awarded shortly.

Sunday School Lesson

DECEMBER 7

STEPHEN—AN EARLY INTERPRETER OF CHRISTIANITY

Golden Text "They chose Stephen, a man full of faith and of the Holy Spirit" —Acts 6:5.

Lesson: Acts 6:1 to 7:60.

Devotional Reading: Isaiah 53:7-12.

Stephen, Acts 6:1-8.—Stephen was a man, of special gifts, full of faith and of the Holy Spirit, the most prominent one of the seven men appointed to help in the work of the early church. In addition to the duties of caring for the poor, he also undertook evangelistic work, and preached with great power and success, and brought wonders and miracles among the people. The number of disciples in Jerusalem increased tremendously, and a great many of the priests from the province of Asia Minor These men disputed with Stephen, but had being able to cope with the wisdom and the Spirit by which he spoke. They produced men to declare that they had heard him speak blasphemous words against Moses and against God.

Stephen, stirring up the people and the Sanhedrim, the elders and the scribes, and they seized Stephen and led him before the Sanhedrim, or Council. False witnesses appeared and [illegible] continually spoke against this man, saying that they had heard him say that Jesus would destroy the temple and change the customs of Moses received in John 2:19).

And all that sat in the Sanhedrim fixing their eyes on him, saw his face as it had been the face of an angel. What was it they saw? "Certainly not some visible outward sign, such as artists love to paint around the heads of saints. I think we may rather find beautifully feebly we take that strange, spiritual luminousness, which is the effect of a coming and eternal glory. Such thoughts were filled with "the God of Glory," and Stephen's own spirituality expressed the source of that divine beauty.

Leading upward, full of grace, he prayed and found a happy place God's glory smote him on the face

First Apple Steamer

The first steamer to carry apples direct from Annapolis Royal, Nova Scotia, to London, England, was the "Neptune," which sailed on April 3, 1881. The shipment consisted of 6,000 barrels, and arrived in London in 14 days. This venture was fairly successful, and that time the business has continued to increase in volume.

Radio Used In Crime Detection

Winnipeg is the first city in Canada to equip its police department with radio telephone transmitters to be used exclusively in the detection of crime.

Bread cut into slices of any desirable thickness and wrapped in paper by machinery is possible by a new device in London.

Guardians Of The Pacific

Japanese Submarines Seen Behind Canada, United States, and Japan Most Co-Operate

As the "other guardians" of the Pacific, the British Commonwealth, the United States and Japan pool resources, declared Prince Takugawa, prominent Japanese statesman, speaking before the Canadian Club at Toronto. "Certainly I do not ignore my own Pacific country," he proceeded. "But it can not be denied that the three nations I have mentioned are in reality the chief guardians of that region. It is pleasant to think these are the nations whose co-operation at the recent conference in London, England, brought about the result which it did."

"I have never been so strongly impressed with the fact," he said, "that the all nations of the civilized world are dependent on one another, and that no country in the world can do anything without affecting the interest of the other countries."

Recipe For This Week

(By Betty Barclay)

CHEESE BISCUITS

2 cups special cake flour, sifted
2½ teaspoons baking powder.
½ teaspoon salt
2 tablespoon butter or other shortening
½ cup grated cheese.
¾ cup milk and water, equal parts.

Sift flour once, measure and sift baking powder and salt, and sift again. Add shortening and cheese. Add liquid gradually until soft dough is formed. Roll ¼ inch thick on slightly floured board with floured biscuit cutter. Bake in hot oven (400 degrees Fahrenheit), 15 minutes. Makes 12 biscuit.

COFFEE CARNIVAL

2 tablespoons quick-cooking tapioca.
1 teaspoon salt.
½ cup seedless raisins.
2 cups unsweetened coffee infusion.
½ cup sugar.
1 teaspoon vanilla.
1 cup cream, whipped.

Add tapioca, salt, and raisins to coffee, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Add sugar. Cool. Add vanilla; fold in cream. Serve in sherbet glasses. Serves 6.

THE MERCURY, TOFIELD, ALBERTA

Coal Mining Again Enjoy Hard Work

Millions of men and women all over the world take Kruschen Salts daily—not because they are really sick, mind you—but because they know the little daily dose of Kruschen keeps them strong, fit, energetic and free from ill-health, and that's the system they enjoy.

People who take Kruschen Salts in a glass of hot water every morning won't have headaches, and are always free from constipation, dyspepsia, biliousness, sluggish livers and indigestion.

They have no poisons in their system because Kruschen Salts helps Nature flush out the liver, kidneys and bowels of all waste matter and poisonous matter.

If you want joyous health and energy, you must take a little of Kruschen in your tea or your coffee every morning before breakfast—not a big dose, but just enough to cover a shilling—and you will be full of health and vim, and full of the joy of living.

A bottle of Kruschen Salts costs but a few pence, and lasts for weeks, which proves that a little does a lot of good. Ask for Kruschen Salts at any chemist's or store throughout the world.

CHAPTER V—Continued.

"I've been a fool," he announced gravely to himself. "Perhaps this sudden heat has affected my judgment. But when I remember how those two people made Bishop's wife burn by their hasty marriage—and how Mary and I were sworn to a female exhaling up for them, I can't bear that it shouldn't turn out right. Only to a fool would it seem strange. If she does look the votes of her more staid minded neighbor. And Nick's true bloo, or I don't know the meaning of the phrase I've made a mountain out of a molehill. Just because the boy's mind wandered when he saw that woman across the street. I'm an old fool! It's none of my business anyway." And with that comforting conclusion he went home to his Mary.

But that, when he and Mary strolled through their garden, discovering the blighted parsley, his mind went back to Nick. He wondered if the boy were stroking in another garden beside his own sweetheart.

"Mary," he said, "have you met those people who bought Hollins Smith's old house?"

"No. They haven't been to church, and I imagine they're not sociable. I tried enough for callers after all they're doing to the house I'm going to transplant some more hollyhocks. Johnny they're too crowded. Would you put them on the east side of the garage or near the wall?"

"I wish you'd call," answered her husband with irrelevance.

"Call? Oh, you mean on Mrs. Malibay? Have you met her?"

"Ten Nick introduced me as we passed the house.

"And you like her looks? But she's young. Johnny Perhaps she wouldn't want an old woman calling on her."

John Maxwell bent down to examine a green shoot carefully, then straightened up and faced her.

"If you don't mind, I'll answer that question now. I want an unbiased opinion of the woman, and I know no one else who can give me it. Before we run on. After you've turned in your report I'll confess everything."

"Confess?" laughed Mary Maxwell, and her husband added: "Don't worry. I may be a gay old dog, my dear; but it's not my own skin I'll confess when you bring your verdict merely the fruit of my agile imagination."

"I never thought your imagination was especially agile, Johnny," replied his placid companion of fifty years, "but if I am sure you the price of a detective I'll take the job! Come, dear, we must go in. It's getting damp."

It was also getting deep in another garden, a garden on Elm Street, where four people stood and had a bed of peonies. Could John Maxwell have seen the group he would have been relieved, for if Nick were stabbing none his captivating neighbor, her husband was there also, as well as Guy. It was she who broke a silence that for some reason had become embarrassed.

"I—I don't like leaving the baby two nights in a row. Mary might wake up."

"But I haven't shown you the plans for my rose garden" protested Mrs. Halliday. "I've painted in the colors and it's quite charming. Do come in. It will take only a moment; or, if you must go, Mrs. Hastings, perhaps your husband will stay and see it."

She turned to Nick, lifting eyes that were almost childlike in their pleading. Her husband was watching, and a faint smile touched his lips.

"Not jealous, are you? If I remember right, Nick, you were always advised you not to mind if I noticed a pretty face—and there's no doubt that Mrs. Halliday has a pretty face."

"Tsk—she's pretty; but—well—Oh, Nick, of course I'm not jealous; but I can't help feeling that she isn't of—of—acorns me. Perhaps it's just her wonderful clothes, but she seems to me to [illegible] and unsettled."

Nick laughed, but the laugh didn't ring exactly true, and for some reason his wife's anxiety quite sobered. Guy moved a space away.

(To Be Continued).

Rugby Played By Romans

Game Was Not Introduced By Rugby School Boys

The birthplace of Rugby football is generally accepted to have been Rugby School, England, but it is carried back farther than that. The Romans played it in the days of Julius Caesar, as she extended a friendly hand to parleys with her heathen. There had anyone been watching, they would have seen a vast unbroken space. It was so rolled because of the efforts of the players to run and carry the ball from their opponents and in this respect the game resembled the modern game of Rugby. In harpastum the players were divided into two bands. Behind each side was a line down. Between them was another line and the ball was thrown at this time, the two sides then striving to carry it over their opponents' line. No doubt the Romans brought the game into Britain, for in the ancient town of Chester a ball game was played which closely resembled Rugby. It is also chronicled that the Danes played the game in the land of a Dane who had been captured and slain. In the Tudor period the game had made such headway that a statute was introduced to prevent it, as it was a serious hindrance to the practice of Archery.

Useful In Camp

Useful In Camp—Explorers, surveyors and others who have to camp will find Dr. Thomas' Eclectric Oil very useful. Rubbed on the feet and legs are wet and cold it is well to rub them freely with this oil. Then a cold will be the prevention of pains in the muscles, and should a cut, or abrasion be sustained, the healing could be better on a thousand or boiler.

Home Old Words

According to a "Standard Dictionary" being compiled at the University of Chicago, to show the historical development of new words in this country, "anglophobia" has been in use since 1795; "anti-climax" made its appearance in 1826; and "sweet tooth" a hankering for sweets in 1891

Combating Tuberculosis

Great Advances Have Been Made In Recent Years in Dealing With This Scourge

(By Canadian Social Hygiene Council.)

Nearly fifty years ago a boon young doctor in Germany, who knew how to make use of his odd minutes, found a new germ, or seed, of disease, as his mother found for the first time a very old germ which had slain its tens, or thousands, and indeed its many millions, since the world began. That young man was Robert Koch, and the germ was the germ of tuberculosis. Before that was found the doctors knew a score of diseases in different parts of the body that were characterized by nodules (tubercles) and so many of these nodules gone to pieces. And more than they have the required number, and war breaks out. Then it is no wonder to flee each other, just submarine nosebag machine gone firing navy at each other. If that ever happens man will perhaps realize how useless it is to spend astronomical sums of money for battleships.

Since these diseases, or rather this disease had been for centuries and was still the greatest of all killers of men, it was natural that when the end of all people died of it. For generations of people, and among the village of a thousand people had at least three funerals a year from this cause alone. And since it was the greatest killer of young men and women, many of the best lives were cut short by this scourge.

But when it was announced that the germ or seed of this disease had at last been found hope ran very high that the end of the disease was in sight. Koch found a way to destroy it. What was the secret? The discovery was conquered in a decade. So the germ was de-injured in many new ways and the end of the disease was in sight, or so we thought. We are still at it. But words cannot at to describe the progress to the good germ. And within a few years the death rate from tuberculosis in the United States and Canada. The events of the world, the music of the concert halls of New York and London are carried to the remotest corners of the globe The Mounted Police officer in the sub-Arctic regions is no ogre alone. He keep neighbors company by him, playing for him from the big cities

If radio has accomplished so much in the first few years, what will the next ten bring? Engineers know a great deal on that topic they did ten years ago, and with their added knowledge what may they not do by 1938? Sports are by and concentration

During the first ten months of the year a total of 671 private dwellings have been built in Winnipeg at an aggregate value of $2,330,000.

COLDS IN HEAD THROAT or CHEST

Relieved by Rubbing in Zam-Buk.

First Ten Years Of Radio

Progress Of Broadcasting In Almost Every Community

A short time ago the tenth anniversary of broadcasting was attained, the pioneer station of America, KDKA Pittsburgh, having, in the first week of November, 1920, transmitted its first program over the air The broadcasting equipment was crude the "effect" was not upper room in a shack reached by an iron ladder, and the program was furnished by a few gramophone records

The progress of broadcasting almost stems the imagination A few years ago it was a novelty, and neighbors crowded the home of enterprising friends to listen-in to the new wonder Today it might be said that in home is complete without one There are twenty million radio sets in the United States and Canada. The events of the world, the music of the concert halls of New York and London are carried to the remotest corners of the globe The Mounted Police officer in the sub-Arctic regions is no ogre alone. He keep neighbors company by him, playing for him from the big cities

If radio has accomplished so much in the first few years, what will the next ten bring? Engineers know a great deal on that topic they did ten years ago, and with their added knowledge what may they not do by 1938? Sports are by and concentration

Little Helps For This Week

"Know ye not that ye are the temple of God and that the Spirit of God dwelleth in you?"—1 Corinthians iii. 16

Where'er the gentle heart
Finds courage from above,
Where'er the heart forsook
Warms with the breath of love:
Where faith hath rear'd her altar,
City of God! Thou art.

Where life is common ways
With cheerful feet we go.
When in life's common ways
Who trod the way of woe
Where life is in the heart,
City of God! Thou art.

—Frederick Tuckerman Palgrave

A sacred spirit dwells within us, A deeper voice across the storm of our evil and good. There is no good man without God.—Seneca.

H. E. ROGERS

Tofield Co-op. Store News

Our two weeks advertised sale is over and with a certain degree of success, in fact as good as could be expected with general conditions as they are.

We learned from our venture of a genuine sale that the people in general did appreciate our efforts to meet hard times and scarcity of money. Many who had not been trading with us, came in and bought and got acquainted with our store. One man told us that he had visited Camrose, Edmonton, Chipman and Tofield and that Tofield Co-op store was the best place of all to buy in by at least five per cent.

A great many sales were lost, on account of our sale prices being for cash only, and a good many said they would get a little money coming later out of produce they could have to sell.

It is an absolute necessity with us, that we reduce our stock, and we realize that to do so, we must continue to give sale discounts and have decided to do so. It is a hard thing to do without going into a losing game with us, we are not singling out a few articles to sell at less than cost and get you in business that way, we are carrying out on every line. Certain lines we are selling at less than cost and will say no store can do that quite true, but we drop in price wholesale is taking place, and we have to clear this stock so we can replace it with the new. Some of our lines we are taking a straight 20 per cent reduction on the regular markup on all staple goods such as footwear 10 per cent on our regular mark up. Our stock is too large to attempt to enumerate in an advt.. Our stock of groceries is always fresh as we do a larger turnover in groceries, and this is the reason we can give a special price on practically all groceries. Small profit and volume of turnover has got to be our motto and the store and consumer both reap the benefit. We have to do it to meet the price of grain you help us do it. All prices are for cash only.

FAMILY HERALD AND WEEKLY STAR FARM RELIEF COMPETITION

MR. T. E. SEALE OF TOFIELD WINS FIRST PRIZE

Editor - Note.—We are very pleased both to congratulate Mr. Seale and to print below his prize winning letter.

The Editor,
Family Herald and Weekly Star,
Sir: Since Canada is too great an agricultural country to be content simply in supplying her own food requirements, and, since it is important as well as undesirable aristocratic to limit agricultural production in Canada, it follows, that the Canadian farmer is to be not an exporter, and, as an exporter, must be prepared to accept for his produce, for the most part, both at home and abroad world prices.

Hence, the problem of farm relief is, "How to enable the Canadian farmer to sell his produce at the world price level, and, at the same time, maintain a standard of living equal to that enjoyed by the people in the protected industries."

The following should materially assist in attainment.

1. The immediate placing of a tariff, embodying full protection, on all farm products that can be successfully produced in Canada. The chief benefits derived from this tariff would be: First, Prevention of dumping; Second, the development of a more balanced production on Canadian farms.

2. The appointing of a commission to report on the widest possible thoroughly to investigate Canada's agriculture conditions and to find out the facts: First, How the Government might be of assistance to agriculture; Second, in view of the recent revolutionary improvements in farm machinery, the present family unit system of co-operation is fundamentally unsound.

3. The Federal grant, that forthwith, next to technical education, be exclusively but devoted entirely to rural education work. Possibly on the other field can greater assistance be given to Canadian agriculture. The discovery of Edmonton Fort William to Edmonton Fort William is $7.41 per hundred on twins, car load lots.

4. An immediate development of co-operative marketing in agricultural products, which implies such a campaign of education and demonstration as will overcome existing prejudice, and furthermore where possible by trade treaties. All agricultural exports to be granted rate of high consideration of their grade.

5. The appointment of a permanent Consumers Investigation Board. The function of this Board would be to investigate all the public regarding the retail price of any commodity in order to show the consumer where his dollar goes. The appearance of any waste in the production and distribution of any commodity the farmer has to buy, or of profiteering, would be a basis on which could successfully work towards the lowering of the cost of farm production.

T. E. SEALE.
Tofield, Alberta.

The Domestic Animals Act (Municipalities)

SALE AND REDEMPTION OF IMPOUNDED ANIMALS

Notice is hereby given under section 48 of the Domestic Animals Act (Municipalities) that one heifer, two years old, black with white spot on forehead, no brand, mark 11 on left hip, was impounded in the pound kept by Anton Swarz, Hay Lakes, Alberta. Local and Personal

The Anglican W.A. would like to thank all those who helped to make their banner a success.

Mr. Clifford Lee was home over the week end.

Mrs. T. Herndon and Mrs. Wallace Herndon visited the city on Tuesday.

The W.M.S. of the United Church will meet with Mrs. W. C. Swift on Thursday, December 18th, at 2 p.m.

The Ladies' Aid of the United Church wishes to thank all those who helped to make their banner a success.

Mrs. Plumb and family of Aetna Bank, were guests of Mrs. McCarthy for a few days last week.

Mr. and Mrs. Lamberty of Edmonton visited Mrs. Taylor on Sunday.

Mr.Melson of Viney visited his sister, Mrs. J. Noland on Sunday.

Mr. Eldridge was a guest at the McConley home on Sunday.

Mrs. Splisted sr., returned on Saturday evening after spending a week in the city with Mr. and Mrs. Hood.

Mr. Geo. Agnew and lassie returned from their hunting trip this week. They were successful in procuring a moose and a deer each.

Annual Tobeliers to visit Edmonton recently were Mr. and Mrs. Plumb, Mr. and Mrs. Inman, Mrs. Rogers. Mrs. McCauley, Mrs. Mallard, Mrs. Church, Mr. Mallard, Mr. and Mrs. McLaughlin, Mr. and Mrs. Hall and Horace McNally.

The surveyors have all left after working several here for about eight months.

Miss Muriel Malcolm and Miss Mildred Malcolm spent the week end with Miss Malcolm's parents at Tofield.

Miss Beirnes and Miss Watt were guests at the Beirnes home over the week end.

Miss Bertha Lee and Mr. Atkinson were visitors at the J. Lee home over the week end.

Jackie Melance was successful in winning the medal offered by Mr. J. Wills for the highest average in Ingram school for November.

An enjoyable birthday party was held at the Melance home on December 5th, Jackie, on that day celebrating his sixth birthday. Games were played after which the guests sat down to a bountiful repast. Everyone had an enjoyable time and voted the party O.K.

DOUBLE WEDDING OF LOCAL INTEREST

A beautiful double church wedding was solemnized at Sedgewick, Alberta, November 19th, 1930, when Miss Pern D., daughter of Mr. and Mrs. S. E. Johnson, of Watford, became the bride of Ernest Hackler, son of Mr. and Mrs. Ernest Hackler of North Platte, Nebraska, and Miss Elizabeth R., also daughter of Mr. and Mrs. S. E. Johnson, became the bride of Bayard R. Carlisle, son of Mr. and Mrs. T. N Carlisle of Wellfleet, Nebraska, and formerly of Tofield, Alberta.

The brides were attended by Miss Dollie Hackler, sister of Mr. Hackler and the latter's brother-in-law, sister of the brides and grooms were attended by Mr. Morris Johnston, brother of the brides, and Mr. Robin H. Carlisle, brother of Mr. Carlisle.

The brides were beautifully gowned in lemon georgette and wore hats to match. They carried bouquets of Johanne Hill roses. The bridesmaids were pea green and carried pink premier roses.

The marriage ceremony was performed by Rev. Hackler of Curtis, Nebraska, and took place in St. Michael's Church in Wellfleet.

After the wedding ceremony the wedding party repaired to the home of the bride's mother where a beautiful wedding dinner was served to a host of friends of the happy couples. Many beautiful and useful presents were received.

Mr. and Mrs. Hackler will be at home to their friends at North Platte and Mr. and Mrs. Carlisle at Wellfleet, Nebraska.

"Is your wife having any success in learning to drive the car?"
"Well, the road is beginning to turn when she does."

Ketchamost Items

Dressing poultry and sawing wood is the order of the day, with ideal weather for the work, and all poultry in good shape. Some went to the Peal, Mr. Brisk was hoping and some have been shipped to the coast, where we understand the prices were satisfactory.

Mr. G. R. Owen of Vilna came down from Edmonton on Wednesday and spent the day in Tofield and district.

Messrs. John Lee and C. W. Slaughter got to the Ryley flour mill on Monday of last week.

Misses Margaret Mitchell and Hazel Whitman accompanied Mrs. Audley to her home at Tees over the week.

Mr. Russell, school inspector at Camrose visited our school on Friday.

Mrs. A. Barnes and son Archie of Bevill spent Thursday and Friday at the McMullen home.

Mr. and Mrs. Whittaker and family of Edmonton visited at the Harrison home on Sunday last.

Mr. Joe Sutton is making the round sawing wood and chopping grain in this district.

Annual Tobeliers to visit Edmonton recently were Mr. and Mrs. Plumb, Mr. and Mrs. Inman, Mrs. Rogers. Mrs. McCauley, Mrs. Mallard, Mrs. Church, Mr. Mallard, Mr. and Mrs. McLaughlin, Mr. and Mrs. Hall and Horace McNally.

THE PRESS PAST AND PRESENT

Editor's Note.—The following paper was read at a meeting of the Tofield Young People's Society and was prepared and read by Mrs. Bulloch.

The first newspaper appeared in 1641. "The Weekly Review". This was in many form and dealt with political matters and was strictly censored. Others followed, notably the Oxford Gazette, later renamed London Gazette. By 1695, there were over by four printing presses in England, at London, York, Oxford and Cambridge. In the latter half of the century several privately owned newspapers started, only to be quickly dropped. Some like the "Flying Post" left a blank sheet, that the first subscriber might fill in with current news, before passing it on.

Papers were few and were passed from person to person. Most of these papers listed news and dealt with political discussion. Athenian Gazette (Dunton) and Defoe's Review, also dealt in political discussion, the articles on contemporary social life and literature. Shortly followed the Tatler and Spectator, essay type of news paper, which commented on contemporary life, etc., through the fictitious persons of Roger de Coverley. During the 18th century, the progress of the press was greatly hindered by lack of news, owing to political bigotry by worthlessness of writers, and by absence of great topics for discussion.

Not until the accession of George 3rd did that reputable Pitt's administration bring to the national spirit and rise of honest interest, free the press to power. Journals became unobjectionable for political bias, interesting manner in wrong administration as had never been done before. John Wilkes, himself a citizen profligate, by his power to use such sympathy, through the press, a serious problem. Printer and Bookseller, was instrumental in running a need of parliamentary reform in people that took land in the struggle which the press and to the secrecy of parliamentary proceedings. Wilkes was imprisoned by a general warrant and subsequently burned down. He has been pretty hard times. Undoubtedly operating a garage in the city for the Canadian time, being in partnership with another man.

Mrs. Lamont with young daughter is at the coast, where reports say she is prostrated. The occurrence is one of the more tragic as Mrs. Lamont is expecting another child very shortly.

Mr. and Mrs. Ray Lee were guests of Mr. and Mrs. Herman Lawson on Sunday.

A pleasant afternoon was spent at the Williams home on Wednesday afternoon, when Mrs. Whelpton entertained the M.A.S. A large crowd of members and others were present. In addition to the devotional part, considerable business was transacted. The deficit of last year was paid and ten dollars was donated to the Soldiers' Fund. A delicious lunch was served by the hostess assisted by Mrs. Lovlebone and Miss Hannah Jensen.

GOVERNMENT SUITABLY RECOGNIZES FAITHFUL SERVANT

W. O. Glover Receives Gold Pencil and $100.00 After 30 Years Service With Telephone Department

Mr. W. O. Glover can now look back on twenty years unbroken service with the Alberta Telephones. As a memento of the occasion and as a recognition of faithful service performed, the telephone department, a few days ago presented Mr. Glover with a gold pencil and $100 Mr. Glover, during the past twenty years has seen a great many changes in the telephone system, particularly as regards rural line construction. Twenty years ago it was rare for a farm house to have a telephone, now it is the accepted thing.

Prior to coming to Canada, Mr. Glover worked as a lineman for 12 years in Liverpool, England, nine years of this being foreman of the gang. In 1910 he came west to Waskatenau where he worked for the Alberta Government Telephones for five years and in 1915 came to Tofield where he has worked since that time.

In 1925 the Alberta Government Telephones presented him with a gold pencil, he then having fifteen years continuous service.

The many friends of Mr. Glover will be pleased to hear that his service have been recognized and will wish him many more years of health in which to carry on his work.

FORMER TOFIELD MAN SHOT AND KILLED AT EDMONTON

"Jake" Held-up Has Tragic Ending
Wilfrid Lamont, 39, merchant, was shot and killed shortly before 6:00 p.m. Tuesday in the Norwood service station, 92nd street, and 111 ave, allegedly by P. A. Moore, proprietor of the station, when the victim, it is reported, attempted a practical holdup joke. Moore was arrested and charged with murder.

"He came into the office and said 'Stick up your hands'" and I wasn't taking any chances, so I let him have it," Moore told police officers. Moore and Lamont were alone in the filling station office at the time of the killing.

The bullet, fired from a .38 calibre revolver, punctured Lamont's heart and he dropped to the concrete floor. Subsequent police investigation disclosed that Lamont was unarmed.

Wilfrid Lamont was well known in Tofieldites having worked here for Swift and Emery a few years ago. He left here to go to Holden, where he opened a garage which was sub-

THE PRESS PAST AND PRESENT

has newspaper boomed.

Such a storm arose over the that Wilkes was freed. The matter finally ended in establishing the right of the press, to criticize not only parliament but the sovereign himself. This was in 1770, 70 years after the press was supposed to be free. This freedom of the press has undoubtedly in the 19th and 20th centuries brought about reforms more quickly than would otherwise have been done. Reform bills, factory acts, religious freedom, reform of Irish administration have been largely brought about by the press playing before the people the need of reform and people, in a manner forcing parliament to grant reform.

Wars also are influenced by the press. The Crimean war, Boer war, and particularly the Great War 1914 to 1918, have shown this. In the hundred years war, the country as a whole was not at war, one being roused to the same extent. This was brought about by newspapers. Nevertheless papers put material before the people, before, during and after the war to the last contrary to an extent never done before and the people as a whole were interested.

Everyday life is influenced by newspapers. Prices quoted, articles on world-wide problems, advertising, news from other countries, all influence our buying and selling.

Newspapers to-day are mostly owned by large capitalistic concerns and these through their columns, influences our political economics and social life to an extent never do so before. They widen our sphere of interest by bringing to us news events which are happening in the furthest corners of the globe.

For example, today Russia is selling wheat, petroleum, furs, etc., and manufactured goods of all sorts to Great Britain cheaper than any other country can do, and only buys to a very limited extent from us. The Canadian farmer, being in partnership with facts before the people and possibly, another name.

The radio has somewhat taken over the press in some of the power of the press, but all the more tragic as Mrs. Lamont is expecting another child very shortly.

PROPERLY BREWED **BEER**
A HEALTHFUL FOOD

Thousands of the working classes, while engaged in hard, physical labor, find in beer, a cheap, healthful food, which, besides its nourishing effect, possesses invigorating and strength restoring qualities.

Beer, therefore, must be considered as a beverage conducive to health in the direction of moderation and true temperance.

Cool Heads and Clear Thinking

There are times that test men. In the present economic conflict raging throughout the world, men are being put to the test just as truly as they were during the stress and strife of the Great War. There is tragedy and suffering now as there was then. And because of these conditions men and women today are very apt to allow their usual habits of thought and action to slip their moorings and to indulge in unconsidered, reckless thought, speech and action which in their more sober moments they would not only refuse to countenance in themselves but would condemn in others.

It is well that people should give serious consideration and study to the existing situation, not merely as individuals as they themselves may be affected but collectively as a community in the interest of the welfare of all. It is well that difficulties should be made known, that just grievances should be clearly stated, [illegible] suggested remedies should be outlined, discussed and, in the light of the circumstances, action taken. Therefore the many meetings being [illegible] throughout the country are a gratifying sign of an aroused public interest in the public welfare, but only so if their object is constructive, that is to find a way out of difficulties, to better conditions, and not destructive, [illegible] leading to only greater confusion of thought and still greater chaos.

Public discussion calls for real leadership, thoughtful, sane and constructive. It is not the man who shouts the loudest, who berates everybody and everything, who calls for drastic action against this or that law or institution, who is the real friend of the country or of the people for whom he professes to be most sympathetic. This class of individual always comes to the front when men are [illegible] and feeling in a more or less desperate mood. He does not [illegible] to appeal to their reason, but to their feelings and passions. He is not a true and safe leader, but a man bent on destruction and generally [illegible] capable of advancing any sound constructive policy that [illegible] productive of good.

Attempts by [illegible] of this type to sway the feelings and passions of people and [illegible] capitalize upon the hardships which people may be temporarily [illegible] should not only be frowned down upon by the stalwart right thinking [illegible] and women of this country, but these last mentioned men and women who are and always will be the real backbone of any country should not hesitate to speak out boldly in opposition to the unsound [illegible] and actions of these trouble makers.

Newspaper reports of meetings in different parts of the country [illegible] protests and opposition of the more intelligent and [illegible] people present, resolutions are adopted demanding the adoption [illegible] and the taking of certain lines of action which, if carried [illegible] existing conditions would only serve to prolong [illegible] difficulties and make them infinitely worse. Secession proposals, threats [illegible] defiance of law and organized resistance to law officers [illegible] burning. These mean more, not less trouble and [illegible] ement of remedy.

In China [illegible] American countries, revolution may still be the [illegible] method [illegible] achieving reforms, and in the present world-wide [illegible] revolution has been resorted to in those countries, but whether conditions will be bettered thereby, time alone will disclose. But in Canada, Great Britain, the United States, the people enjoy democratic political institutions which place the power of constitutional action right in their own hands. If present national, provincial or municipal policies are not sound and in the best interests of the masses, then the people themselves can right them. They may not be able to immediately correct all their economic difficulties, because in this world no one nation can govern its own economic conditions, much as it may strive to do so. But it can itself adopt those policies which it believes are best calculated to ease its difficulties, solve its problems, and advance the welfare of its people, not one class or section alone, but the general interests of all.

It is to the evolution of such policies that the thought and energies of people should now be devoted, not in following blind leaders of the blind who would tear up and destroy on the vague promise that upon the wreckage so created they would build up something different, but in explanation of the exact nature of which they are so delightfully indefinite.

In conclusion, let it be repeated that these are times that test men. These are times that call for cool heads, clear-thinking; not for wild talk and a multitude of untried theories.

Pensions For the Blind

Saskatchewan Body Requests That Federal Government Be Asked To Take Action

To ask the provincial government to petition the Federal Government for pensions for the blind in Saskatchewan, a delegation of members of the advisory board of the Canadian National Institute for the Blind met Premier Anderson at the parliament buildings, Regina, recently.

The delegation to the Saskatchewan Government is a result of the action taken by the Manitoba Government at its last session when they received a similar request for pensions for the blind in Manitoba from the Manitoba division of the institute.

The Saskatchewan delegation was composed of members of the advisory board of the Canadian National Institute for the Blind in Saskatchewan, assisted by Captain Baker, general secretary for the institute in Canada, and Major E. Fleming, general manager of the central west division with headquarters in Winnipeg. The chairman of the delegation was Dr. J. C. Middleton, who is the chairman of the Saskatchewan advisory board.

Valuable Invention

A machine has been invented to test the toughness of beefsteak. A dial attached to the blade of the simple but ingenious instrument records the degree of difficulty which the blade encounters in cutting [illegible] the tissue of the meat.

Worry will reduce a person's weight, but few people ever [illegible] that remedy.

Deposits in savings banks in Germany are increasing.

England may change its horse-power tax on automobiles.

CORNS
Stop Aching Drop Off
Use PUTNAM'S Corn Extractor

Canada's 1930 Wheat Crop

Latest Official Report Places the Crop At 393,834,000 Bushels

The latest official report on the field crops of Canada estimates the 1930 wheat crop at 396,854,000 bushels or about 11,000,000 bushels more than the previous official estimate made last September. Of the 396,854,000 bushels produced for all Canada, 374,000,000 bushels were grown in the three Prairie Provinces—Manitoba, Saskatchewan and Alberta. This year's wheat crop is about 91,000,000 bushels more than in 1929. Between 40 and 50 million bushels of wheat in the Prairie Provinces is still to be threshed.

The 1930 oat crop will total 429,156,000 bushels, an increase of over 146,000,000 bushels compared with the yield in 1929. Barley will return 137,963,000 bushels or about 35,000,000 bushels more than last year. The total production of rye is placed at 22,286,000 bushels, an increase of 9,000,000 bushels over 1929.

This year's average yield of wheat per acre in Canada was 15.9 bushels.

Demand For Homesteads

Many Inquiries Received For Information Regarding Vacant Lands in Northern Saskatchewan

Under the new provincial land regulations, 60 homesteads in northern Saskatchewan were purchased through the Prince Albert land office in November. Indicative of the widespread interest of prospective settlers, about 1,000 enquiries have been received as to what lands are vacant under the new scheme by which, unless more than one desires the same quarter, vacant Crown lands are sold for from $1 to $3 an acre. Land has recently been taken up in various portions of the northern section of the province, in the Hudson Bay junction, Meadow Lake and Nipawin areas. Many of the new settlers are from the southern section of the province.

Valuable Chart Found

A seventy-year-old chart developed from a soil survey in Alberta has been located after being lost for years. H. A. Craig, deputy minister of agriculture for Alberta, announced that the chart, produced for the British government in 1860, had at last been found.

Demanding Federal Assistance

Ottawa Flooded With Suggestions For Relieving Distress in the West

Resolutions demanding federal assistance for western farmers are flooding into the capital daily, every mail bringing scores of declarations from Boards of Trade, farmers locals and other bodies. The proposals in these resolutions vary greatly but agree in demanding a minimum price to be fixed for wheat by the Dominion.

Cabinet ministers, quite frankly, are amused at the widespread dissatisfaction obtaining in the west and are at a loss to know what to do in the circumstances.

The resolutions, as a rule, ask for the following measures:

1.—Abolition of the gold standard.

2. Payment by parliament of all outstanding debts of farmers, including grocery bills, chattel mortgages, overdue interest and 25 per cent. of all mortgages.

3. Fixing of the price of wheat at anywhere from 70 cents to $1 per [illegible].

The Federal Government regards all these suggestions as entirely impracticable and unworkable and there is no intention of granting any relief to the west other than that afforded by the unemployment fund.

France and Disarmament

French Nation Would Seek For Security First

And, for the French of all orthodox schools of political thought, the precedence of security over disarmament is indisputable. They have in practice reduced armaments, but the theory that armaments should not be reduced until there is security is for them as unshakable as the rock of Gibraltar. There are plenty of arguments to the contrary, but they do not convince the French. One can ask whether absolute security is meant and in that case, as there is no such thing as absolute security, there is an end of disarmament. One can ask whether, if relative security is meant, with what degrees of relative security the French would be satisfied—and to that there is no answer. One can argue that disarmament is one of the conditions of security—but the French would only repeat that they would have security first.—Sisley Huddlestone in the New Statesman.

Paved Highway Across Canada

Predicted That It Will Be a Reality Within Ten Years

Canada's proposed Atlantic-to-Pacific highway was pictured as a paved thoroughfare of the future to delegates attending the annual meeting of the Canadian Association of Tourist and Convention Bureau at Winnipeg. Mayor Ralph H. Webb of Winnipeg, disclosed that western mayors had been assured by Prime Minister R. B. Bennett, with whom they conferred at Ottawa some time ago, that the Dominion government was prepared to participate in the completion of the highway on a fifty-fifty basis with the provinces.

Mr Bennett had added at that time, said Mayor Webb, the prediction that within ten years the highway would be paved from the Maritimes to British Columbia.

Helium Gas

Western Canada the Potential Source Of Supply For the Empire

The disaster to the airship R-101 and subsequent discussions about the use of the inert gas helium instead of inflammable hydrogen to provide the lift interest deeply two regions in the British Commonwealth, Canada and Trinidad. At present the entire world supply of the gas is obtained from the United States, and helium will lift the airships now being constructed there. Prospectors have discovered large potential supplies of the gas in Western Canada, and, dependent on the future of airship policy, there is a likelihood that efforts will be made to recover the gas.

Appreciates Canada's Action

United States Attorney-General Says Liquor Smuggling Driven From Canadian Border

Liquor smugglers have been driven from the Canadian border to the high seas by the Canadian Anti-Export Act, United States Attorney-General Mitchell discovers in his annual report issued at Washington.

"The Canadian nation dealt a severe blow to border traffic when it amended its Export Act of May 30, 1930, and outlawed direct clearance of liquor from Canada to the United States," the report says: "The natural result of this restrictive legislation was to drive some additional professional smugglers to the high seas, where their activities would be more likely to succeed. The French possession of St Pierre, Miquelon, which for a number of years has been the chief rendezvous and supply point for the liquor-smuggling fraternity off our eastern coast, has experienced a substantial increase in this form of traffic.

"It is also noteworthy that 25 of the 29 foreign liquor ships seized during the year were British. Vessels of this nationality still predominate in the trade, even though the chief smuggling base is French. Increased activity in Nova Scotia ports has been observed, because most of the vessels which operate in the smuggling trade out of St. Pierre are documented in Nova Scotia ports and are owned, at least ostensibly, by Canadian citizens.

The hampering of the [illegible] smuggling traffic across the Canadian border has already been mentioned. This action on the part of Canada is real evidence of the desire of that nation to co-operate with us in the solution of our smuggling problem and is very highly appreciated."

Twenty-seven thousand seven hundred and nine persons went to jail for violation of the prohibition laws in 1930—5,017 more than in 1929 and 4,239 more cases were pending at the close of the year than at the close of the previous year.

Enforcement of the National Prohibition Act, says the report, "showed improvement over 1929."

May Go To Mexico

Doukhobor Colony From Canada Reported To Be Negotiating With Mexican Authorities

A despatch from Mexico City says that Peter Verigin and Aaron Sapiro, representatives of the Doukhobor colony of Canada, conferred with the secretary of agriculture regarding the possibility of 10,000 to 20,000 Doukhobors coming to Mexico if the government would help them to acquire land.

Verigin and Sapiro received the support of the executive committee of the National Confederation of Chambers of Commerce, and this group obtained the hearing before the secretary of agriculture.

It was said that if the Doukhobors came to Mexico they probably would settle in the northern portion.

Makes Breathing Easy. The constriction of the air passages and the struggle for breath too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untried, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Railway Crossing Accidents

Nineteen Deaths From This Cause Recorded For September

Deaths as a result of railway crossing accidents in September numbered 19, according to a report issued by the board of railway commissioners. There were 45 accidents and besides those killed 70 were injured. By provinces, accidents were: Prince Edward Island, 1; Nova Scotia, 3; New Brunswick, 5; Quebec, 13; Ontario, 10; Manitoba, 2; Saskatchewan, 2; Alberta, 5; and British Columbia, 4. Only three of the 45 accidents occurred at protected crossings.

The total for the month of all accidents in connection with railways was 183, in which two passengers, seven employees, and 41 others were killed.

Imports From U.S. Lower

Imports into Canada during October from both United States and Great Britain showed material decreases from corresponding figures for 1929, with United States losing proportionally more trade than Great Britain. Total imports for the month aggregated $78,358,000, compared with $116,271,000 in October, 1929, a decrease of $37,913,000.

Production of aeroplanes and aero engines in England is near a record peak.

Minard's Liniment for Frost Bite.

Was Weak and Run Down
Could Scarcely Do Housework

Mrs. Edward A. Allen, Bonanza, Alta., writes:—"I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework, in fact, I would have to lie down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Western Horses For Russia

Saskatchewan Man Receives Order For 2,000 Horses From Soviets

A sale of 2,000 Canadian horses has been negotiated with the government of Soviet Russia by Alphonse Champagne of North Battleford, Sask., he reported on his arrival in Ottawa, following a business trip to Europe. The horses will be shipped from Western Canada at an early date.

Mr. Champagne formerly sat in the House of Commons for North Battleford, but now devotes his entire time to private business. He stated that his preconceived notions of conditions in the Soviet have been completely changed as the result of his visit to that country. "I found not only government officials but the people generally friendly to Canada," he said, "and anxious to further commercial relations between the two countries."

Artist Travels With Circus

Dame Laura Knight Produces Paintings That Breathe Of the Big Top

After travelling with a circus through England during the summer season, Dame Laura Knight has placed her paintings on exhibition in London. They are said to have made a sensation, those of ponies, zebras and elephants being almost alive with color. Some of the sketches of behind the scenes are particularly vivid and spontaneous. When members of the circus troupe visited the exhibit they gave an acrobatic turn to show their appreciation. The fair artist travelled as a regular member of the troupe and shared their joys and hardships.

Douglas' Egyptian Liniment is especially recommended for spider, or infection of cow's teat. Invaluable also in cases of spavins, curbs and splints.

No Permanent Depression

Bank President Refers To the Soundness Of Our General Economic Condition

"In this virile country of Canada with its abounding resources there can be no permanent depression," Sir Charles Gordon, president of the Bank of Montreal, stated in his address at the annual meeting of the bank at Montreal. Sir Charles' review of the business of the bank and of the Dominion during the past year contended that under all the circumstances Canadians could justly congratulate themselves upon the inherent vigor and soundness of their general economic situation.

Yugo-Slavia's population has just been estimated at 13,400,000.

Postal Business Good

Over [illegible] Canadian Postage Stamps Used Last Year

[illegible] than 1,400,000,000 Canadian postage stamps were used last year, and if they were placed side by side they would stretch a distance of 19,780 miles, it was stated in the course of an address by Mr. C. G. Cowan, vice-president of the British American Bank Note Company, printers of stamps for the Dominion Government, delivered at the eighth annual banquet of the St. Lawrence Stamp Collectors' Club of Montreal. About ninety tons of paper were used in the manufacture of these stamps, which were stuck on 1,400,000,000 envelopes with thirty-five tons of glue.

An excellent protection against worms can be got in Miller's Worm Powders. They render the stomach and intestines untenable to them. They heal the surfaces that have become inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and their operation is altogether health-giving.

Report Is Denied

No Embargo Planned On Grain Shipments To Vancouver

Speaking for the Canadian Pacific Railway, there is no intention under the present and immediately prospective conditions to place an embargo on grain shipments moving by the company's lines to Vancouver. This statement was made by W. M. Neal, general manager, Canadian Pacific Railway, western lines, in commenting upon an item appearing in the press predicting "strong possibility" of the railways declaring a grain embargo in British Columbia.

What Science Has Done

Science has changed things a whole lot. Nowadays if a man has a pain in his right toe or a twitch in his left arm or a set of slightly twisted eyes, it's off to the dentist for him. His teeth come out—painlessly—and their room and place is taken by a handmade set of Crown Derby that produce pain only in the pocket.

Relieve Your Cold with Minard's Liniment.

[illegible] The World

A modest Scotchman, in speaking of his family, said: "The Douglas family is a verra verra auld Scotch family. The line rins awa' back into antiquity. We dinna ken hoo far back it rins, but it's lang, lang way back and the history of the Douglas family is recorded in five volumes. In about the middle of the third volume, in a marginal note, we read, 'Aboot this time the warld was created.'"

Western Representatives:
HUNTER-MARTIN & CO., REGINA, SASK.

BRITISH COAL MINERS REJECT STRIKE PROPOSAL

London, England.—There will be no great national coal strike in Great Britain, for the time being at any rate. Delegates to the [illegible] conference here turned down a strike proposal by the narrow margin of 230,000 to 209,000. Their decision also implied there would be no strike ballot in the mining districts in question as previously [illegible] most likely.

Interest has now turned to the individual districts, above all to Scotland, where 85,000 miners are still out, and to South Wales, where the outcome of the negotiations going on between the owners and miners may well give a lead to the whole country.

In the South Wales fields probably the most important coal area in the country, the principal point at issue is the miners' demand that the 7½-hour working day, established by the new Coal Mines Act, be enforced. The owners have insisted that they be permitted to spread the 45 working-hours in a week through five eight-hour shifts and one five-hour shift.

Credit was being given to Premier Ramsay MacDonald for his part in averting a national walkout. He and other members of the cabinet, sitting with the delegates themselves, urged that every effort be made to reach a settlement with the owners and his counsel prevailed.

Viceroy Of India

Name Of Ramsay MacDonald Is Suggested For Office

London, England.—The Daily Mail says a suggestion has been seriously advanced that Premier Ramsay MacDonald become viceroy of India in succession to Lord Irwin, who will retire in April.

The Mail adds that the idea is a result of the good impression which Mr. MacDonald has made in conducting the Indian round table conference. It admits that such an appointment, which customarily is accompanied by a peerage, may appear fantastic, but says that the idea is more than mere rumor, and believes the appointment would satisfy the Indian people.

The question of Lord Irwin's successor is a favorite subject for speculation in political quarters just now. Lord Gorrell is most frequently mentioned.

Aviators Leaves Message

Capt. Burke and Companions, Missing Aviators, Carve Words On Tree

White Horse, Yukon Territory.—"October 17, leaving for Wolfe Lake, need food badly."

Such was the message discovered carved in a tree near the stranded 'plane of Capt. E. K. A. Burke and two companions who have been missing in this north country since October 11. Pilot E. L. Wasson and Joe Walsh, veteran prospector, returned here after having inspected the 'plane at close range. Wasson and Walsh sighted the machine from the air ten days ago and three days later flew to within fifteen miles of the location, mushing the intervening distance on snowshoes.

Relief For Indians

Any Distress Will Be Taken Care Of By Government

Ottawa, Ont.—Prompt action will be taken by the government to relieve any distress reported among Indians this winter, Hon. T. G. Murphy, Minister of Interior and Indian Affairs, said on his return to Ottawa after a month's trip to the west.

Mr. Murphy conducted a personal examination of numerous Indian reservations in the neighborhood of the larger western centres and brought back the impression that in the southern sections, at least, conditions among the Indians were [illegible].

Canada Doing Her Part

Ottawa, Ont. Canada is doing her part as regards aiding in the world suppression of narcotics. Reporting for the health committee of the League of Nations Society in Canada at an executive meeting of the society, Senator Dr. H. S. Beland pointed out drugs were neither manufactured in nor exported from Canada. Through the R.C.M.P. and narcotics branch, the Dominion Government maintained a close tab on importations.

Argentine's present radio boom is greater even than last year.

By-Election Won By Labor

Voting In Whitechapel Favors the Government Candidate

London, England.—James Hall, Labor party candidate, won the by-election for Whitechapel recently.

The results of the polling were, James Hall, Labor, 8,544; Barnett Janner, Liberal, 7,445; T. L. E. B. Guinness, Conservative, 3,735; Pollitt, Communist, 2,106.

The victory represented a greatly reduced majority for Labor. Labor's vote of 8,544 out of the total of 21,830 compares with the 13,701 ballots cast for the party, out of 21,639, in 1929.

Whitechapel, comprising, for the most part, one of the so-called poor sections of London, had returned Labor candidates in 1923, 1925 and 1929, and each time with a large majority. The majority of Harry Gosling, Labor nominee, in the general election of 1929 was 9,180, one of the largest in the Kingdom. The vote then was: Gosling, 13,701; Sedgewick, Liberal, 4,521, and T. L. E. B. Guinness, Conservative, 3,417.

HEAVY GRAIN CARRY-OVER HAS BEEN DISPOSED OF

Port Arthur, Ont.—The statistical situation as far as Canada's wheat crop is concerned is in a good condition, according to E. B. Ramsay, chief grain commissioner for Canada, who arrived in Port Arthur. "We have a high quality crop to sell and the movement has been fairly free," he said, explaining that between 5,000,000 and 7,000,000 bushels were being shipped to Europe every week.

The heavy carry-over of approximately 100,000,000 bushels of last year has been disposed of, Mr. Ramsay explained, and if the present shipments to Europe can be kept up to the end of the season, the carry-over for next year will be back to normal. There was every likelihood that this would be the case, depending to some extent on the quality of the Argentine wheat, which will come on the market in February.

Dumping of Russian wheat on the British market had its effect, Mr. Ramsay stated, but he pointed out that the Russian surplus had been exhausted and the situation from now on would not likely be disturbed by anything the Russians could do.

Although pointing out that his department had nothing to do with the marketing of the grain crop, Mr. Ramsay said "I feel we are at the bottom of it now. No one can really tell what is going to happen, but I believe there will be a gradual change for the better."

Assembly Completes Work

Disarmament Commission Asks League To Set Date For Conference

Geneva, Switzerland.—Completing its task of drafting a general disarmament scheme for consideration by a world conference the preparatory commission invited the council of the League of Nations to set a date for this momentous assembly of statesmen.

The commission rejected an effort by Germany to have the commission recommend the specific date of November 5, 1931, for convening the general conference.

Canada lost a fight to delete from the article military 'planes and personnel used in civil work, such as patrolling forests and carrying aid to distressed citizens in remote places. The Canadian plan was supported by the United States and it is understood some arrangement will be reached at the general conference to meet the wishes of both countries.

Britain Protests Radio Speech From Russia

Regarded As Direct Violation Of Anti-Propaganda Agreement

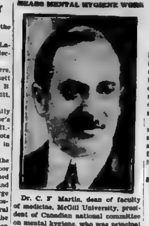
London, England.—The British government will send a formal protest to Moscow against a radio speech broadcast from the Soviet capital, Rt. Hon. Arthur Henderson, foreign secretary, informed the House of Commons.

The speech, he said, is regarded as "inciting British workers to revolution," and was in direct violation of the anti-propaganda agreement.

Fire Threatens Northern Town

The Pas, Man.—The settlement of Gillam, more than half-way up the Hudson Bay Railway from The Pas, was threatened by fire, according to word reaching here. A restaurant, a pool room and a general store were wrecked by the blaze before it was controlled. Damage totalled $6,000.

HEADS MENTAL HYGIENE WORK



Dr. C. F. Martin, dean of faculty of medicine, McGill University, president of Canadian national committee on mental hygiene, who was principal speaker at a meeting in Convocation Hall, Toronto.

Trans-Canada Drivers Make Slow Progress

Finding Trip In Motor Car Is Hard Work

Hearst, Ont. — Pushing doggedly forward through northern Ontario bush country in 10-below-zero weather, Healy Needham and Gus McManus climaxed three weeks of discouraging reverses in their attempt to be the first to cross Canada by motor car, when they arrived on December 2 at Gauthier's trading post at Pagwa River, 90 miles west of here.

Word that in the past week they had covered 70 miles of trackless spruce swamp country was received here. Both men and their roadster are in good condition.

RAMSAY OPPOSES PLAN TO REDUCE WHEAT AREAS

Port Arthur, Ont.—E. B. Ramsay, chief commissioner of the Board of Grain Commissioners of Canada, addressing the Port Arthur Chamber of Commerce at its annual meeting here, said he was not in sympathy with suggestions for a cutting-down of wheat areas of crops in Western Canada, principally because the whole transportation system of Canada depended on the amount of grain moved.

He preferred to rely on greater yield capacity, quality and transportation facilities as advantages required by Canadian wheat to capture world markets. Mr. Ramsay also took occasion to say that he did not place too much reliance in resolutions that came from so many [illegible], declaring that they often went through merely because there was no one ready to oppose them.

He intimated he preferred a personal study of and contact with actual conditions by the board, actuated with a desire to administer the Canada Grain Act in the public interest.

He pointed out the Canadian grain crop was moving freely. There had been no embargos, he said, and he predicted none; and he believed that by July next things would be pretty well cleared up. The worst had been passed, he thought.

It was his opinion Port Arthur and Fort William would not suffer unduly from the competition of the Hudson Bay route. Replying to a suggestion of Mayor Gibbon that the head offices of the Board of Grain Commissioners should be in Port Arthur, Mr. Ramsay said that if his personal opinion had governed in the matter, they would not be in Winnipeg.

BUY CHRISTMAS SEALS

When a Feller Needs a Friend

Constitution For India

Plan Is Gradually Taking Shape At Round Table Conference

London, England.—In rough outline, a federal constitution for India is gradually appearing in the discussions of the round table conference. It is emphasized in authoritative quarters that no decisions have been reached as yet. The scheme appears only in skeleton form. Everything still is in the tentative stage.

But discussion in the conference, sitting as a federal relations committee, is turning on these subjects as coming within the domain of India's proposed new federal authority:

1. Shipping, navigation, and navigation services.
2. Salt.
3. Currency and coinage.
4. Trade, commerce and banking.
5. Control of opium cultivation.
6. Control of petroleum and explosives.
7. Geological survey.
8. Invention, designs and copyright.
9. Migration from and into India, and interprovincial migration.
10. Traffic in arms and ammunition.
11. Survey, meteorological services, census and statistics.
12. Immovable property in the possession of the government of India.
13. Federal public services.

Indian princes, rulers of their own states, and representatives of British India alike agree that all the above are matters of common concern. It is the policy of the conference, therefore, in plotting out the new federal authority, to consider them first.

Consideration of four other vital subjects has been deferred. These are: First, defence of India and all matters connected with the army and navy, including naval and military works and cantonments; second, external affairs, including the naturalization of aliens, and pilgrimages beyond India; third, relations with the states in India; and, fourth, political charges.

Start Lengthy Flight

British Aviators Attempting Record Trip To Capetown

Croydon, England.—Miss Winnifred Spooner, 23, and Flying Officer E. C. T. Edwards, started December 3, on a 10,200-mile air journey to Capetown in their blue and silver monoplane. They will attempt to break the nine-day flight record to the South African city.

The aviators intend to fly by day and by night, taking alternate turns at the controls.

Miss Spooner has been flying for three years. Early in 1930 she completed a flight from South Africa to Croydon.

She is a sister of Captain Tony Spooner, former Royal Air Force pilot and now flying instructor of the Montreal Light Aeroplane Club.

Eckener To Testify

London, England.—The court of inquiry into the crash and destruction of the R-101 in France recently, has been resumed after an adjournment of several weeks with Dr. Hugo Eckener, master of the Graf Zeppelin, present to give his expert testimony.

Should Watch Chinese Markets

Vancouver, B.C.—Greater attention should be given to the market opportunities of Hong Kong and southern China if Canadian business men wish to capitalize those opportunities, said Paul Sykes, Canadian trade commissioner to Hong Kong.

Had Outstanding Success

Saskatoon, Sask.—Outstanding success in the $500,000 fox show was recorded by Dr. R. H. Macdonald, Saskatoon, who won three first and two seconds in the six classes he entered.

Constitutes a Precedent

Australia First Dominion To Have Native-Born Governor-General

London, England. — A native-born Australian will succeed Lord Stonehaven, the present governor-general of Australia, in the person of Rt. Hon. Sir Isaac Isaacs, chief justice of the Commonwealth, according to announcement made.

Sir Isaac Isaacs will take up his duties when Lord Stonehaven's term expires at the beginning of the new year.

The announcement of his appointment, made by the Imperial Government, on behalf of His Majesty, constitutes a precedent in Empire annals. The new governor-general will be the first native born citizen of his country to represent the King in any of the Dominions.

While Sir Isaac is in fact the first native-born governor-general of any of the older self-governing dominions, he is not the first in the Empire. Both the governors-general who have served in the Irish Free State since its inception have been of Irish citizenship. Timothy Healy (1922-1928), came from Bantry, and James McNeill, present governor-general, is a native of County Antrim.

Flour Price Probe

Department Will Have Co-Operation Of Large Milling Companies

Ottawa, Ont.—Further inquiry into flour prices in Canada will be made by the Department of Labor, and in this inquiry the department has been offered the full co-operation of the great Canadian milling companies. Announcement of the continued investigation was made by Senator G. D. Robertson, Minister of Labor, at the conclusion of a two-hour conference with representatives of seven large Canadian milling companies of the Dominion.

"It is probable that a report summarizing the results of the labor department's inquiry by registrar into bread prices will be completed in the not distant future," said Senator Robertson, "and the offer to furnish all desired information, volunteered by the millers, will be accepted. The flour inquiry will be pursued further as rapidly as possible, it being obvious that many factors enter into the matter which must be the subject of full inquiry and consideration before a definite departmental decision can be made as to whether or not an inquiry by commissioner will be necessary in the public interest."

HERMAN TRELLE AGAIN WINS THE WHEAT TITLE

Chicago.—Canada's fame as the finest wheat producing country in the world was again maintained when Herman Trelle, the modest agriculturist of Wembley, Alberta, in the northern Peace River district, was once again crowned "wheat king" at the Chicago International Hay and Grain Exposition.

Repeating his success of 1926 when he brought the Peace River area to world attention as a premier agricultural producing district, Trelle, who four years ago won the title of world's oats king as well as the wheat crown, has again marked his victory with an exhibit of hard red spring grain.

It was a double victory for Canada, however, as George Avery, of Kelso, Sask., in the heart of the prairie grain growing belt, was declared the reserve champion. He exhibited sample of Durum, while, to the surprise of eminent grain authorities in attendance at the International, beat out the championship hard red winter samples, the best in their class, of C. Edson Smith, a former "wheat king" of Corvallis, Montana.

The Canadians were recipients of congratulations from all parts of the continent, and especially from western Canada and the home provinces of the winners.

Trelle's championship was the sixth for Canada in the 12 years of the International show. The other six times, it has gone to growers from Montana, the veteran C. Edson Smith being the only other grain man twice-crowned king of the wheat lands. It was also the first time that a soft Durum variety, as entered by Avery, had won a major award, the reserve championship.

Featured by perfect uniformity and balanced content, the exhibit of the newly crowned monarch of wheat weighed 67.5 pounds per bushel, a record weight. The reserve championship grain weighed 61.1 pounds to the bushel, and also was of perfect uniformity. Trelle considered his winning samples the best he has ever exhibited.

BRACKEN TALKS ON TROUBLES OF WHEAT GROWERS

Winnipeg, Man. Over-production of wheat arising out of high prices during post-war years was blamed by Premier John Bracken for present troubles of prairie farmers. Mr. Bracken spoke before the delegates to the annual meeting of Union of Manitoba municipalities gathered at a banquet given in their honor by the Provincial Government.

"Who is to blame," Mr. Bracken asked, "for encouraging cultivation of 13,000,000 more acres since the war, and the production of seven times more wheat than we can consume?" The farmer should not be called on to bear the burden. There are some who say that proposals to stabilize the price of wheat are unsound—but they are better than having to adopt the living conditions of the serf-agriculturists of Russia."

Cause of present difficulties lay in high prices for wheat in the years following the war, bringing in their train nearly 40,000,000 added acres of wheat lands throughout the world and resultant depressed prices, the premier asserted. Only calm investigation of the causes of depression, adoption of new methods, efficiency in production, and trade arrangements with importing countries to insure markets could improve conditions, he believed.

Mr. Bracken recommended to delegates that they call on the Dominion Government to implement its promise to assume payment of old-age pensions. When the Dominion did that, he said, the province would further relieve the municipalities of the health levy.

Wheat Quota System

Plan Is Favorably Received By Canadian Grain Exporters

Ottawa, Ont.—Proposals for a quota system in Great Britain for wheat grown in the Empire have apparently been favorably received by Canadian grain exporters. Commenting on the statement made in the British House of Commons by Rt. Hon. J. H. Thomas, secretary of state for the Dominions, that study was being given to such a scheme, Hon. H. H. Stevens, Minister of Trade and Commerce, said that no unfavorable reaction had been evident in this country.

Proposals for quotas were considered by the committee on economic co-operation at the Imperial Conference, Mr. Stevens said. The committee had concluded that quota systems were feasible, but the minister laid emphasis on the fact that institution of quotas was a matter for legislation by the British government only.

"Another matter that should be made clear," Mr. Stevens said, "is that fixed prices would not be involved, but a quota would merely provide Canadian wheat a sheltered market in Britain."

Asked what protection of Canadian grain might be expected to be provided for under quota, the minister gave the opinion that 25 to 35 per cent. of Canada's exportable surplus would be involved. The operation of a quota would not be require Canadian exporters to be responsible for the storage of grain overseas, Mr. Stevens said.

Eckener Gives Opinion

Zeppelin Expert Is Heard At Court Of Inquiry Into Dirigible Disaster

London, England.—Dr. Hugo Eckener drew upon his knowledge as the world-foremost Zeppelin expert, to reconstruct the loss of the British dirigible R-101 for the court of inquiry investigating that disaster.

He said it was undoubtedly leakage in the gas containers which sent the ship into a dive against a hill in France, and it was probably a break in an electrical circuit which set the craft afire.

Fair Dates Selected

Chicago, Ills.—Following is a partial list of Canadian fair dates selected at the meeting of the Showmen's League of America and the International Association of Fair and Exposition managers. Calgary Exhibition, Calgary, Alberta, July 6 to 11; Canadian National Exhibition, Toronto, August 28, September 12; Edmonton Exhibition, Edmonton, Alberta, July 13 to 18.

Big Sum For Defence

Washington, D.C. — The United States will spend $690,000,000 for national defence in the next fiscal year, if Congress adheres to the budget estimates forwarded by President Hoo-

THE TOFIELD MERCURY

W. Worton Publisher

A Weekly Newspaper Published At Tofield, Alberta

THE WHEAT QUESTION—

THE LETTER published by the Mercury last week, written by Mr. Ferguson, raises a question which at the present time, the best brains of Canada are grappling with. In spite of conferences of premiers, the wheat market has steadily fallen until Western Canada at large is seriously alarmed.

To attempt to solve the question, i.e. to make a statement, which if followed, would bring back wheat prices of a year ago, is for us, impossible. The best that can be done here, is to make a few statements based upon our own observations.

Perhaps the first thing to bear in mind, is, that while wheat is a universal food, and while it can be sold at the market price in Canada on any legal business day, and while it is not a perishable product in the usual sense of the term, it is not the basis of wealth. The marketing of wheat, like any other product, must necessarily be subject to the law of supply and demand. To change this would require the concerted action of all governments of countries where wheat is grown, and this is hardly ever likely to happen. It then follows that when there is a shortage of wheat, prices will be high and when there is an abundance of wheat prices will be low. The only exception would be for one country in exchange for other advantages, to agree to buy wheat from one other country only, thus bolstering up the price in the growing country thus effected.

As wheat can be grown in very many countries of both hemispheres, and as one country does not give detailed statistics as to its wheat crop, it is difficult for experts to determine exactly what amount of wheat there is in the world, and whether there is an actual surplus, is an open question. We believe there is, but have no knowledge of real value on which to base our belief. It necessarily follows that if there is a surplus and the surplus is maintained or increased, we are in for a period of low priced wheat.

If this reasoning is correct, there are two ways in which wheat growers of the world in general and Canada in particular, can bring about more profit in growing wheat, one to lessen the cost of growing it, and the other to curtail production, the second being something in the nature of a negative remedy for if one does not grow wheat, one cannot possibly get any profit from it.

Pehaps without knowing it, Western Canada have been passing through some very prosperous times. The capital investment of an equipped farm to-day is much more than in pre-war days, and if it was inevitable that a swing back to prewar values should take place, it is also inevitable that some of us should be caught with liabilities on a falling market.

To our mind, the problem of readjustment, if it can be called such, lies with the individual, rather than the group. If each individual will undertake to put his own affairs in order, it would automatically put the affairs of the group in order. We know of no one rule that would straighten out everyones difficulties.

It would appear to us however, that each farm should be as self contained as possible. By this, we mean that the farmer should live on the fat of the land—from his own farm. We know it is easy to sit in a chair and say what a farmer should do and that it is another thing to get out on a cold winter's morning and do it. Nevertheless, rural life has been a climb steadily upward and the peak has not yet been reached. By making a farm as much a self contained unit as possible, is going to lower the yearly overhead, and lowering the yearly overhead, automatically lowers the cost of producing a bushel of wheat or anything else raised on the that farm.

Here in Canada, there is one thing that to us at present seems out of alignment compared to the pprice of farm products, viz: the cost of the manufactured article. Raw materials are cheap, but the manufactured article remains on a fairly high plane. Readers will remember that when farm products gradually rose in value due to the war, the cost of labor gradually rose also. It would appear then if pre war values were approximately correct, that labor entering into manufactured articles should come down. Wool is a glaring example. Contrast the price of the raw product with the price of the finished article.

Just one other thing. It sometimes occur to us, that in this western country we place too high a value upon material wealth. In other words we live to do business rather than do business to live. After all, there is very little actual want of necessities in settled rural communities, but there is plenty of actual want in large cities. Contrast the farmer with his own farm alongside the city workman dependent on someon'e whim for his job and daily bread.

We sincerely hope that "times will improve" but it is our opinion that when they do it will be because of the individual's efforts to help himself rather than anything the government or any other body might do. At the best they can only be a guide.

GRANT FLEMING, M.D. — ASSOCIATE SECRETARY

MEASLES

Of all the communicable diseases with which the human race has to contend, measles is the most readily spread. It is essentially a disease of childhood, and very few escape it. Rarely seen under five months of age, its reaches its greatest incidence between the sixth and seventh years.

The younger the child, the more serious is the condition. Among the communicable diseases of childhood, measles ranks second as a cause of death, and approximately ninety per cent of deaths from measles occur in children under five years of age.

Because measles is a common disease, it is generally not taken seriously by parents, many of whom seem to regard it as an annoying experience which has to be gone through as has the cutting of teeth.

This attitude of regarding measles as a trivial condition is not justifiable. True it is that the vast majority of children who contract the disease recover with no apparent ill results. It is also true, however, that measles destroys many lives. It may not appear that the child died of measles, in many cases it will be said that death was due to bronchial pneumonia. This is correct, but the child would not have developed bronchial pneumonia if it had not contracted measles. Among the children who recover from an attack, there are many who will have some permanent damage done to eyes, ears, lungs, heart and other parts of the body. It is also observed that the general loss of resistance due to an attack of measles seems to favor the development of tuberculosis, and so we not infrequently see that measles gives tuberculosis a chance to establish itself in the child.

This serious picture of measles is presented in order to cause parents to realize why measles should be regarded seriously. The younger the child, the more serious the condition, so we should make every reasonable effort to prevent young children, particularly those under three years of age, from coming in contact with anyone suffering from the disease.

It is a well established fact that if children with fever or acute colds are put to bed, and the conditions later turns out to be measles such children, because they have been kept warm and at rest in bed, are more apt to escape the serious complication. This suggests that bed is the place for the child who is sneezing, or who has a runny nose or watery red eyes. The condition may not be measles, but it very often is, because measles begins with the same symptoms as the common cold and, in both cases, the child should be put tobed.

Questions concerning health addressed to the Canadian Medical Association, 184, College Street, Toronto, will be answered personally by letter.

WANTED.—To rent quarter or half section, good wheat land preferred. What have you to offer? Can move anytime suitable. Give particulars to Mercury Office, Tofield.

Here and There

Radio came into play recently in maintaining the Royal Canadian Mounted Police tradition of getting its man when Mrs Donald McIntosh of Glasgow wrote C P R headquarters in Montreal to help locate her son Angus after months of silence. The railway through J J Scully general manager eastern lines, got in touch with J W Spalding, superintendent commanding Saskatchewan district of the R C M P who in turn applied to radio sources. Angus who was listening in at Saskatoon got the message from home and at once communicated with his mother.

George M Inverarity and J K Christison of Carberry Manitoba won the boys and girls swine club championship on Canadian Pacific Railway lines in the province at the annual competition recently held at Manitoba Agricultural College. They won the Manitoba Cup for their club for the second time gold medals for themselves and qualified for the trip to the Royal Winter Fair at Toronto this month as guests of the railway.

A novel form of entertainment is being offered at North Sydney, N.S., where passengers are being taken out on local sword-fishing crafts for which a small fee is charged. Many are availing themselves of this opportunity of seeing the huge fish harpooned from the deck of a boat. An instructor explains the method used in catching these monsters of the deep.

Farmers from all parts of Canada will again be competitors in the International Livestock, Grain and Hay Show to be held at Chicago, November 29 to December 6. In the competitive class for hard spring wheat winner of which is acclaimed as the world's wheat king, Canada has won 16 times in the past 19 years and the province of Saskatchewan has won the crown on 11 occasions.

Capt. Eddie Collins, Mickey Cochrane and Cy Perkins of the world's champion Philadelphia Ath[illegible] and Tris Speaker world's [illegible] player of former years, have been spending the first half of November in the New Brunswick woods, shooting deer, moose and bear and also adding wild geese and brant to their bags by a visit to Bathurst on the Gulf of St. Lawrence coast. Fredericton was the starting point for their hunting trips.

The championship of the 11th Canadian egg laying contest, just concluded at the Central Experimental Farm at Ottawa, goes to a pen of white leghorns entered by Richard Green of Farringdon Park, Preston, England, while second place honors went to Mrs. W J Thompson of Birch Hills, Sask., with a pen of barred Plymouth rocks. Third place was taken by a pen of Rhode Island reds entered by the University of British Columbia. The best laying individual bird in the contest was a Rhode Island red, No. 336 entered by Dan Russell of New Westminster, B.C. It made a score of 287.6 points for 249 eggs. The contest lasted as usual, 52 weeks.

Six international army officers' teams will compete at the Royal Winter Fair Horse Show to be held at Toronto, November 19-27. They will come from the United States, the Irish Free State, Hungary, Sweden, Germany, and there will also be a Canadian team. Teams will consist of four officers each who will enter the lists for the much prized International Officers' Team Challenge Trophy.

LITTLE GREY MULE

Nobody asked what he thought of the war

How his conscience stood, or anything more

But they took him to France, to stand his chance;

It's all right—only a mule.

He pulled his load to the top of a hill

A shot rang out—he lay quite still

"Anyone hit" "No, we're quite fit,"

It's all right—only a mule.

TOFIELD HOCKEY CLUB HAVE SUCCESSFUL WHIST DRIVE

On Tuesday night the Tofield Hockey Club staged a whist drive at the W.I. Rooms. The event was a success both socially and financially. Mrs. Firth and Mrs. Rogers tied for lady's first, Mrs. Firth winning it by drawing the highest card. Bill Stairs won gentlemen's first, and Ray Martin won gentlemen's consolation. Mrs. [illegible] won lady's consolation.

DON'T BE FOOLED!

YOUR SIGNATURE HAS VALUE CONSIDER!!

If you put your name on a petition, it means you have considered carefully what you have signed.

IS IT YOUR TRUE AND CONSIDERED OPINION THAT THE PRESENT LIQUOR ACT SHOULD BE MUTILATED?

Think what it would mean to abolish hotel beer rooms and club licenses. It would open the door to bootleggers and "blind pigs." Alberta today is law-abiding. Don't bring back the disregard of law as it was in prohibition days.

THINK TWICE! DON'T SIGN!!

Leave the Act alone. We don't want the bootlegger back again.

Moderation League of Alberta, Inc.

To Command New Canadian Pacific Giant

Captain R. G. Latta, more familiarly known to [illegible] Atlantic passengers as "Jock" Latta, has been selected to command the new 42,500-ton Canadian Pacific liner Empress of Britain. The promotion comes to Captain Latta after 26 years' service with the Canadian Pacific Steamships, which he joined in 1904 with the rank of 4th officer. In the next six years Captain Latta sailed with several ships and eventually became chief officer of the Montcalm in 1910. The expiration of seven years as chief officer saw his promotion to commander of the Monmouth. Six years [illegible] in 1923, he anticipated promotion to the crack ship of the fleet by his appointment to her namesake, the Empress of Britain, which was later renamed the Montroyal. After a short interlude on the Empress of Scotland, the Scottish shipmaster went to the Empress of Australia, command of which he relinquished after conveying Premier R. B. Bennett to the Imperial Conference, in order to "stand by" the new Empress of Britain during the last stages of her construction.

During his many years as commander of Canadian Pacific liners on the St. Lawrence seaway, Captain Latta has conveyed many famous people across the Atlantic, numbering amongst his more distinguished [illegible] H.R.H. the Prince of Wales, who launched his new command; Prince George, the Duke of Gloucester, Lord and Lady Willingdon, Rt. Hon. Stanley Baldwin, Rt. Hon. L. C. M. S. Amery, Rt. Hon. Winston Churchill, Baron Byng of Vimy, former Governor-General of Canada and commander of the Canadian Corps in France; Prime Minister Ferguson, of Ontario, Lord Dawson of Penn, physician-in-ordinary to H.M. the King, and many others distinguished in the fields of finance, politics and art.

The Empress of Britain, which will make her maiden voyage to Quebec next June, is here shown in an artistic presentation of what she will look like when she enters service next June. Captain Latta is inset.

Line Of Profitable Exploitation In Northern Areas Being Rapidly Pushed Backward

No doubt many people heard of the Sverdrup Islands for the first time when they read that this Arctic group now belonged to Canada. The Dominion has paid Commander Otto Sverdrup the sum of $67,000 in return for his exploratory services in that region from 1898 to 1902, and in return the Government of Norway fully recognizes Canadian sovereignty, which now covers the entire Arctic sector north of the Canadian mainland.

The Sverdrup group has a total area about equal to that of Nova Scotia and according to Commander Sverdrup, who is corroborated by Inspector Joy, it holds a peculiar species of rabbit which marches upright on its hind legs. Otherwise the islands seem to be notable chiefly for the fact that they are our farthest-north properties, 800 miles beyond the Arctic Circle.

So Commander Sverdrup has his $67,000 and we have the islands, and everybody seems to have come out of the deal with profit with the exception of the Government of Norway, and it is not complaining. We do not quite know what we are going to do with the islands. There appears to be no practical advantage in a rabbit which walks on its hind legs, and at the moment this Arctic is not a convenient summer resort. Nevertheless it is well that Canada's northern regions should be rounded off by legal possession of [illegible]. Recalling the extraordinary manner in which the line of profitable exploitation has been pushed backward in recent years, few would care to predict that Sverdrup's discoveries are worthless. A few years ago Hudson and James Bays were far beyond the bounds of civilization and now there is a railroad to Churchill and next year the rails are going to Moose Factory. The future may hold for the Arctic regions advances relatively just as sensational; and in the meantime a good many newspaper readers and editors - will have consulted their atlases and will know just a little bit more about the receding North.—Ottawa Journal.

World's Greatest Apple Continent

North America Is Famous For Its Many Varieties

North America is claimed to be the greatest apple continent in the world with orchards ranging from Canada to the Gulf of Mexico and from the Atlantic to the Pacific. From Nova Scotia come specimens that rank among the finest and when its fruit trees bloom in spring, their white and pink adornment lends enchantment to the view. Quebec and Ontario, particularly the southern districts, present an equally attractive spectacle. On the Pacific coast the famous Okanagan Valley can hold its own anywhere. Which produces the finest variety is an endlessly debated question, though housewives have been reported as virtual plumpers for the Baldwin as the best cooking apple.

The United States Department of Agriculture in a statement recently issued produces figures showing that the consumption of apples in that country has doubled in the last ten to twelve years. While buyers show a decided preference for red apples, New York has a fairly good market for Greenings, so have Chicago and Philadelphia. Should the price ever seem too high the New York Times reminds the consumer that during the gold rush of ninety years ago [illegible] sold for [illegible] $60 to $70 a bushel in California. No less than 7,-000 varieties of American apples have been recorded, but only fifty are regarded as of commercial importance. While apple have been cultivated in Great Britain since the period of the Roman occupation, that country is now this continent's best customer.

Decrease In Fall Plowing

Only 36 Per Cent. As Compared With 46 Last Year

Fall plowing was not so good this year as last. A crop report issued by the Dominion Bureau of Statistics states: "For all Canada the proportion of land intended for next year's crops that had been plowed at October 31, 1930, is estimated at 36 per cent., as compared with 46 per cent. in 1929 and 39 per cent. in 1928. By provinces, the proportions for 1930 are as follows, with the corresponding figures for 1929 within brackets: Prince Edward Island, 60 (75); Nova Scotia, 32 (46); New Brunswick, 72 (56); Quebec, 74 (75); Ontario, 60 (56); Manitoba, 60 (84); Saskatchewan, 21 (18); Alberta, 8 (43); British Columbia, 48 (46)."

Alberta Gasoline Consumption

Preliminary figures compiled by the Deputy Provincial Treasurer for Alberta show that a total of 37,000,-000 gallons of gasoline was purchased in the province during the first nine months of the year, resulting in a revenue of $1,850,000 to the province, less the refund on gasoline used for industrial purposes. Last year's nine months' purchases amounted to 34,-000,000 gallons.

A National Undertaking

The B.C. Telephone Company has announced the beginning of construction of British Columbia's link in a complete trans-Canada telephone system. The provincial link will cost $1,250,000. All Canadian telephone companies are co-operating in this national undertaking.

ATTENTION SCHOOL GIRLS!

All Tingey models are created and sketched in Paris and the patterns are made in New York.

If you'd like to look really smart, you must have a woollen frock with a bolero jacket.

For hardy wear feather weight tweed offers a marvelous possibility, to say nothing of its decided chic. It is adorable in Bordeaux-red mixture with a blouse of plain white linen or wool jersey.

The all-round box-plaited skirt, belted at the normal waistline is so pretty and girlish. The blouse has long sleeves so the little bolero jacket may be removed when too warm in the classroom.

Wool challis prints, wool jersey crepy patterned and plain woollens, covert cloth and tweed-like cottons are suitable for this practical model.

This pattern may be obtained in sizes 6 to 14. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Planters Win Enviable Place

British Reports Praise Flavor Of Canadian Grown Tobacco

At the exhibition of British industries held in London, England, at the beginning of the summer, manufacturers made a great display of the tobaccos grown in different parts of the Empire. The Canadian product, alongside Rhodesian and Indian tobaccos, won a large measure of success. Its aroma and flavour were praised by the experts. It is well known that our tobaccos are cultivated nowadays for the best brands of cigars and cigarettes. The flavour which they enjoy is principally due to the care which is given to their culture and treatment. Planters understand the necessity of using scientific methods to get the industry established on a profitable business basis. They have adopted the best commercial varieties and have won an enviable place in British and foreign markets.

Russia Buys Hogs

Purchased Twenty Thousand Pigs From Germany

Twenty thousand pigs, worth several million marks, have been bought by the Soviet Government from German farmers and transported to Russia via Poland in sealed railway wagons. The Soviet is paying 30 per cent. of the purchase price in cash and the rest on a credit guaranteed by the German Government. The pigs are to be used for breeding purposes, it is said, but it is believed in Germany that most of them will eventually find their way into the Russian slaughter houses.

Encourage Poultry Raising

Booklet To Be Sent Out This Winter To Saskatchewan Breeders

Between 3,000 and 4,000 poultry breeders of Saskatchewan will receive this winter a catalogue booklet to assist them in their work, according to arrangements made by the Saskatchewan Poultry Breeders' Association executive. The catalogue will contain the names of owners of "record of performance" flocks, of which there are from 15 to 18 in the province, approved flock breeders and turkey breeders.

Alberta's Rhodes Scholar

Kenneth W Conibear, who achived his early education by home study in the practically school-less northland, is Alberta's Rhodes scholar for 1930. The selection has just been announced. Conibear, who hails from Fort Smith in the Northwest Territories, will graduate from the University of Alberta next May in honors philosophy, and leaves in September next for a three-year course at Oxford.

Policy To Help Agriculture

Constructive Policies Are Outlined By Federal Minister Of Agriculture

Great increase in pork production in Canada on account of the grain situation was predicted by Hon. Robert Weir, Federal Minister of Agriculture for Canada at a recent banquet in Toronto given by him on behalf of the Federal Government to agriculturists, business executives and government representatives attending the Royal Agricultural Winter Fair. Mr. Weir outlined a constructive policy for promoting greater prosperity for agriculture in Canada, emphasizing quality production. For improvement of live stock the Dominion Government will supply sires where demand justifies, arranging change of location after two years and will supply brood sows of bacon type at cost to farmers, and hopes to import outstanding sires of different breeds of horses. It is also proposed to set up laboratories available at nominal fees to eradicate disease from poultry and to take effective steps to prevent importation of disease. Hon. Mr Weir advocated more scientific methods of feeding, using home grown feeds and attention to science of marketing, as measures calculated to insure Canada's continuous and increasing importance in agricultural production.

Not the Last Word

Commercial Fish May Yet Be Found In Northern Bay

The report of fish sterility in the deeper waters of Hudson Bay is not the last word in that important respect. There remain the shallower depths of James Bay, the estuary of immense inland streams where various species and many fish exist and have been taken. The same condition exists in Northern Manitoba where salt and fresh water commingle where food is washed into the inlets and stream mouths. Fish in commercial quantities have been taken there.

Deaths From Alcoholism

Deaths from alcoholism in the United States declined last year from the total attained in 1928. A census bureau tabulation of the total deaths attributed to that cause in the registration area, 46 states, the District of Columbia and a group of nine cities in the other two states showed 4,339 deaths against 4,637 recorded in 1928.

Cattle Shipments To Britain

Another shipment of cattle to Great Britain left Montreal recently some 800 head, with a further shipment of 400 head scheduled to follow. The opinion is expressed that other orders are likely to go forward before the close of the year.

Represent West at Royal Winter Fair

Swine Club Judging Champions, representing the Western Provinces, made a clean sweep of the judging contests at the Royal Winter Fair, held recently at Toronto. The photograph shows the winners of the four western provincial titles and the winners of the Dominion Championship in Swine and Calf Judging. The teams from Alberta were successful in defeating teams from all other Provinces of the Dominion in Calf and Swine Club work and also captured the coveted Robb Trophy for Swine Club Judging and the W. J. Black Trophy for Calf Club Work. From left to right the photograph shows: Top row: M. H. Bowman, special representative, Agricultural Dept., Canadian National Railways, Vancouver, B.C.; Avery McConnell, Wiseton, Sask.; Ivan McDonald, Wiseton, Sask.; T. P. Devlin, superintendent of farm employment, Canadian National Railways. Second row: W. E. Schmidt and Robert Wyllie, of Vegreville, Alta., Dominion Champions in Swine Club Judging, and Gordon and Vernon McNeight, of Camrose, Alta., Dominion Champions in Calf Club Judging. Bottom row: Bill Perry, Armstrong, B.C.; Agnes Creighton, McConnell, Man.; Sadie McConnell, McConnell, Man., and Arthur Nash of Armstrong, B.C. —Photo Canadian National Railways.

New And Unique Mineral Found In Alberta May Have Far Reaching Possibilities

Long and somewhat secretive laboratory investigations are expected shortly to add a new mineral to the roster of the Dominion's products. Though research was carried on in university and industrial laboratories in the east, principally Toronto, manufacture is to be chiefly in the west.

The mineral is vermiculite, or as it is more commonly known, zonolite. Its potential uses are chiefly as to isolation and as an acoustical treatment in buildings.

Samples of the raw material seen in Calgary were, in appearance and to touch like crude mica of dark green color. It is a silicate and soluble in most acids. Coming from the mine, it varies in size from dust to pieces several square inches in area.

In the raw form, it weighs 144 pounds to a cubic foot. But, once heat is applied to it it expands enormously till it has a bulk weight of approximately 10 pounds per cubic foot. It is this peculiar characteristic, research workers say, which gives it its commercial possibilities. It also changes in color to a lustrous gold. In Calgary tests have been made by grinding the mineral over different size wire screens, then firing it in a 30 ft. kiln.

"The economic value of zonolite," says Angus Graham, Toronto research engineer who came west to aid in the experiments, "is attributable to its thermal and sound insulating properties, its ability to withstand high temperatures, its light weight and pleasing appearance."

He goes on to say that not only does it not burn but that tests show that it does not readily transmit heat. Canadian experiments are supported by highly technical investigations carried on by the Bureau of Standards at Washington. The mineral was used as high temperature insulation for bake ovens and dry kilns, pipes and boilers.

Tests made by Prof. G. R. Anderson, of the University of Toronto in his laboratory there demonstrated zonolite's ability to absorb sound. The eastern scientist used it in the form of a lustrous gold plaster, three-quarters zonolite, one quarter wood pulp. His research shows that, at a tone frequency of 512, it has a sound absorptive coefficient of .25, -in other and non-technical words, it soaks up sound and noises to a degree that makes its use feasible in treating this nuisance in buildings. Since psychologists are, at the same time, reporting the adverse effect of too much noise on the human system, the discovery of the mineral is timely.

So far, chief sources of supply are in the United States, but traces of the material have already been found in Canada and these are being carefully followed up. Potential development is largely due to the work of Canadian engineers and scientists.

Possibilities of the mineral were discovered by accident. E. N. Alley while prospecting an old mine shaft for molybdenum and vanadium placed a miner's candle in the wall of the shaft. It touched a projecting piece of vermiculite. Noticing, with surprise, the expansion and change of color under the flame he took samples. This led to the development.

Research work has been carried on with no publicity. Only now have the results been issued to technical papers. Nor will any of those linked with the work make claims for anything revolutionary. They simply list the characteristics of a new and unique mineral expressing the opinion that it will soon be utilized commercially, and generally. It has already been tested in the west as an acoustic treatment on theatres. One large Canadian concern is, however, sufficiently impressed by the results to sponsor continued experiment and test manufacturing processes in the west.

Crate Feeding Pays

Many Good Reasons Why Crate Feeding Of Poultry Is Profitable

Some very good reasons why crate feeding poultry pays are supplied by the Division of Poultry Husbandry of the Dominion Experimental Farms, among which are the following:—

Crate feeding pays because it produces the milkfed grades which bring the best prices.

The leading wholesale merchants are now buying poultry by government grades, with substantial differentials between each grade.

The premium secured for birds which grade "Milkfed" makes crate feeding well worth while.

All poultry intended for eating purposes should be properly finished before being marketed.

The farmer should crate feed because it is the only way by which he can get the premium secured for milkfed poultry, the last pound, which brings the finish, costs the least to produce and increases the value of the bird by from 50 to 75 cents or more. It is the best way in which to properly finish poultry for market.

The consumer wants milkfed poultry because: It is the milkfed grades alone which give assurance of the quality which satisfies. It gives him the best value for his money in tender succulent chicken, it comes from the oven tender, juicy and sweet, the kind of bird he really likes to eat.

To Produce Better Grain

J. C. Mitchell, Of Dahinda, Sask., Will Devote Energies To This End

Three times winner of the world's championship for wheat at the Chicago International Grain Show, J. C. Mitchell, of Dahinda, Saskatchewan, does not expect to compete for further honors at the world's grain show, in Regina, in 1932. Instead he will undertake educational work among Saskatchewan farmers with the object of encouraging them to compete at the show.

Although Mr Mitchell claims that there is a great deal of satisfaction in producing better grain than has ever been produced before, he has stated in the past that from a financial standpoint the experimental work does not offer much inducement to the average farmer.

Manitoba Butter

Sixty Carloads Shipped This Year To Toronto Market

M. A. Gibson, provincial dairy commissioner, states that since 1915 nearly $30,000,000 worth of creamery butter has been shipped out of Manitoba, the peak being reached in 1925, when 300 carloads valued at $2,007,600 were shipped. This year 60 carloads have been shipped to the Toronto market where Manitoba creamery butter commanded a premium over the local product.

One On the Joker

One of a small company cracking jokes asked: "Can you tell me the difference between a Scotsman and a coconut?"

No answer being forthcoming, the speaker said, "Well, you can get a drink out of a coconut, but ——"

"Excuse me," put in one of the company "but I happen to be a Scotsman. Would you like a drink?"

"Oh, yes," eagerly answered the joker.

"Then buy a coconut," was the reply.

Germany Has Air Rules

A new set of aviation rules has just been issued in Germany. 'Planes must fly over cities at an altitude permitting them to make a forced landing at an airport. All 'planes must pass others from the right and must give a wide berth to the left when approaching a plane in the air. Red lights are to appear on a 'plane when it is about to land.

Air Line To Cape Town

The tragic loss of R-101 has not halted the British government's plans for future development of air routes with heavier-than-air machines. Early in the new year the first stage of the great airway across Africa to Cape Town will be opened and giant new machines carrying 40 passengers, multiple-engined for safety, will be put in operation.

Strong Canadian Wood

Tests made by the Forest Products Laboratories, of the Forest Service, Department of the Interior, Canada, show Douglas fir to be one of the strongest and stiffest of Canadian woods.

New Species Of Deer

Two thousand carideer, a cross between a large woodland caribou and a reindeer, are to be distributed among the reindeer herds of Alaska. The breed has been built up through five years of experiments on Nunivak Island in the Behring Sea. The interbreeding has produced an animal 50 pounds heavier than either the caribou or the reindeer. W. B. Miller, director of the work, says.

Heavy Wheat Shipment

A consignment of 200,000 bushels of wheat has been sold to the Mexican Government on behalf of the Canadian Wheat Pool. The deal was put through by the Canadian trade commissioner to Mexico, according to an announcement made at the office of Hon. H. H. Stevens, Dominion Minister of Trade and Commerce.

WORLD HAPPENINGS BRIEFLY TOLD

"Tootsie," claimed by her owners to be the world's oldest cat, is dead at Winnipeg. She was 28 years old. There are no survivors.

The net value of Britain's national wealth is now $[illegible],000,000 according to Sir Josiah Stamp, noted economist, who in 1914 put the figures at $71,550,000,000.

The total estimated wealth of the prairie provinces is $[illegible],000,000 according to a statistical analysis issued by the Industrial Development Board of Manitoba. This is 25.31 of the Canadian total.

The United States and France are shown by the [illegible] of the Federal Reserve [illegible] to control the World's supply of gold. Together the two countries hold about 60 per cent of all known gold.

Defending Britain's policy in India, Sir [illegible] today as guest of honor at a [illegible] in New York called the relations between Great Britain and India the most pacific in their history.

Juvenile immigration into Canada will be limited to actual demands, it was decided at a conference attended by federal and provincial government representatives and those of interested societies.

The Royal College of Physicians and Surgeons of Canada, organized a year ago, now has a constitution, set of by-laws and a code of ethics, all of which have been ratified by the fellows of the college.

A hostel is to be opened in Ottawa by the Canadian Legion to provide shelter for veterans of the Great War now in poor circumstances. It will have 50 to 100 beds and a free lunch counter.

Eighty-eight years of age, Jerry Robinson, one of Winnipeg's most noted pioneers and business men, died at his home following an illness of only two days. He succumbed to an attack of pneumonia.

Canada's Fishing Grounds

Most Extensive In World and Yield Is Exceptional In Variety

"The Dominion's fishing grounds, both sea and inland, are perhaps the most extensive in the world and they yield food fishes in exceptional variety. Of prime natural quality, these fish are marketed in numerous different forms — fresh, frozen, canned, dried, smoked, etc. — by an industry whose processing methods have kept pace with the most approved fisheries practices. As a result, fresh or prepared fish of the first quality are always available to the Canadian consumer. It is also to be said that in many cases fish foods are cheaper than other food products."

As indicating the importance of the fishing industry to the country, a statement of the Department of Fisheries points out that the industry represents an investment of some $62,000,000 and is the direct source of livelihood for some [illegible] Canadians and their dependents as well as an indirect source of employment for a large number of others in various industries in all parts of the Dominion. Annual fishery production now ranges between [illegible] and fifty-five million dollars and the fisheries add approximately $[illegible] to the country's export trade every year. The fisheries resources, however, are capable of much further development and increasing [illegible] attention to their exploitation on sound lines must make the fishing industry a still greater contributor to the economic strength of the Dominion.

Above are shown three noted medical men, who attended the annual meeting of the Canadian national committee for mental hygiene in Toronto. (1) Dr. A. H. Desloges, general director of hospitals for insane in province of Quebec. (2) Dr. A. Grant Fleming, professor of preventive medicine and public health at McGill University, who has been appointed medical director of hygiene council to succeed Dr. C. Hincks and (3) Prof. J. M. MacEachran, director of department of philosophy at Alberta, Edmonton.

SAUL OF TARSUS — HOW A PHARISEE BECAME A CHRISTIAN

Golden Text: "I count all things to be loss for the excellency of the knowledge of Christ Jesus my Lord: for whom I suffered the loss of all things, and do not count them but refuse, that I may gain Christ." — Philippians 3.8.

Lesson: Acts 22.3-15.

Devotional Reading: Isaiah 6.1-8.

Explanations and Comments

Paul's Birthplace and Education, verse 3. Paul had been charged with being an enemy of the Jews and their laws, and he began by declaring that he was a Jew through and through, born in Tarsus of Cilicia but educated in Jerusalem, having been taught by the great Rabbi Gamaliel "according to the strict law of our fathers," and that he was as zealous for God as they all now were.

The Arrester Arrested, verses 4-9. — In his zeal Paul had persecuted those of the "Way," he told the mob in Jerusalem, binding and sending men and women to prison. The high priests and elders could bear witness that he had received letters giving him authority to make arrests, and armed with these he had started for Damascus that he might bring back to Jerusalem for punishment the followers of Christ whom he might find there.

Paul was very near Damascus, after a long journey of one hundred and fifty miles, when suddenly at noon an extraordinary light shone about him and he fell to the ground.

Voice and answer followed. "Saul, Saul, why persecutest thou Me?" "Who art Thou, Lord?" "I am Jesus of Nazareth, whom thou persecutest."

Instant Obedience, verses 10, 11.— "What shall I do, Lord?" was Paul's humble question. He believed in Christ. He had instantly turned from a persecutor to a follower, and given himself to his new Master's service. To know what Christ would have him do became thereafter the one desire of his heart, for he was the bond-servant of Christ, to him to live was Christ.

"Arise, and go into Damascus," [illegible]

May Tax U. S. Publications

Federal Government Likely To Impose Some Form Of Duty

The Montreal Gazette published the following despatch from Ottawa.

"A determined effort to lessen what amounts to unfair competition for Canadian manufacturers is almost certain to be made by the present government in its revision of the tariff for the coming session, by imposing some form of duty against periodicals entering Canada and bearing a large amount of advertising of foreign-made goods. Such a blow would be aimed at large weekly publications from the United States, and it is expected that the duty will be imposed on a percentage basis, and that the publishers will be required to furnish advance copies of their publications to the department of national revenue for purposes of appraisal.

Bounty Aids Butter Import

Reason Australia Can Compete With Canadian Product Says Caulder

The reason Australian butter can compete on the Canadian market is because there is a bounty of about nine cents on every pound exported, thus giving the Australian exporter leeway in price-cutting, according to J. A. Caulder, former president of the National Dairy Council of Canada.

Mr. Caulder pointed out that for every four pounds of butter produced in Australia, one pound was for export.

The speaker pointed out that 60 per cent. of the Canadian West was suitable for dairy production, and he strongly recommended introduction of more mixed farms in the West to overcome the present wheat depression.

CHAPTER VII.—Continued.

"You shouldn't feel that way," he went on after a thoughtful moment. "There's nothing in the least crude about you; but sometimes, dear, you're not so— so friendly with folks as I am. Perhaps you're bashful, but I've sometimes thought you'd be misunderstood by strangers. Tonight, you know, really you weren't especially cordial, Gay."

"Was I impolite?"

Her voice trembled, and Nick said quickly, "Lord, no! But I couldn't help wishing you'd act more— well the way you act with me."

A queer little smile crossed Gay's face.

"The lady might be surprised, Nick, if I held her hand, or anything like that."

She expected a laugh, but he seemed not to have heard. [illegible]

Maxwell, don't try to be funny, or interrupt. It was the black dress I meant — mohair, my dear — long-sleeved—with cuffs, and the thermometer at eighty! I like a well-dressed maid as much as anyone, but I've never yet forgotten that they're flesh and blood like the rest of us, and black, in summer, and long sleeves——"

"It's only May, my dear."

"Well, May in Bakersville might be August anywhere else. Anyhow, I wanted to scream because Julie looked so funny. She's bobbed her hair, and——"

"Jo-hoshaphat!" exclaimed John Maxwell. "She must look——"

"She does. I told you I wanted to scream. But I didn't. I said, with really remarkable self-control: 'Good-afternoon, Julie: Is your mistress at home?'

"'You mean Mis' Halliday?' asked Julie. 'I heard her say last night that she did hope no more stupid Bakersvillers would call, but there ain't nothin' stupid about you, Mis' Maxwell, so I guess she'll see you. You wait, and I'll go find out.'"

"Oh, Lordy!" chuckled John Maxwell, rocking with mirth. "Oh, Lordy! If that isn't Julie to the life! Well, my dear, were you eligible?"

"Evidently I was. Julie left me at the door, but I went into the living-room myself, to save the girl a scolding in case Mrs. Halliday saw fit to receive me. Oh, Johnny! you should see that room! Whatever else the woman is, she knows how to arrange a house. White paint, soft grey walls, a few fine water colors to brighten things, comfortable chairs, a beautiful piano at the north end—soft-shaded lamps——"

"Look here," interrupted John Maxwell suddenly, "are you making an inventory for the insurance man?"

"I could," answered his wife decidedly. [illegible]

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

and what made you sorry for Mr. Halliday."

"Well, I can hardly explain it; but once he was introduced she almost ignored him, though in justice to her I'll admit that he didn't seem to care, and he kept looking at her in a perfectly maddening way, as much as to say, 'What new pose is this, I should like to know?' He did start to leave us once, but just then Julie appeared with a tea wagon——"

"Did she ask Julie to pour tea?" queried John Maxwell innocently.

His wife threw him a withering glance, then she shook with mirth.

"It was a joke on me, John, but for just a second I thought it was a baby carriage! I didn't think they had children, but——"

"They haven't. Nick tells me that children would interfere with their careers."

Death Of Capt. Sverdrup

Famous Norwegian Arctic Explorer Dies At His Home In Norway

Canada had a very particular interest in Captain Otto Sverdrup, the famous Norwegian explorer who died at Oslo, Norway. It was quite recently that the Dominion Government announced the payment of $67,000 to Captain Sverdrup in recognition of services which he performed in the realm of scientific research. As his activities were largely in the northern [illegible] archipelago, it was recognized that his discoveries and studies had been of peculiar benefit to Canada. The sum was also paid the Norwegian explorer as a consideration for the delivery to the Dominion of all original maps, records, diaries and other materials in his possession.

On behalf of the government of Canada, Sir George Perley, acting prime minister, has cabled to the British minister at Oslo, Norway, asking that he convey to the Norwegian Government Canada's regret in the death of Commander Sverdrup. In his cable, Sir George refers to Commander Sverdrup's "splendid services to Arctic exploration," which, he says, have long been recognized in Canada.

Varieties Are Numerous

Japanese Glad To Secure Chrysanthemums Grown In Canada

The flower of gold, or the golden flower, for this is the literal meaning of the word chrysanthemum, may have been a term appropriate enough when it was first cultivated in the orient, but now its application is dubious. Horticulturists, and particularly those in the west, have developed so many shades and varieties that they almost range across [illegible]

Musk-Oxen In Northern Canada

Between Nine and Ten Thousand Animals In the North

Between 9,000–10,000 musk-oxen roam the northern islands and mainland of Canada, according to the estimate of W. H. B. Hoare, of the Department of the Interior, whose report of his examination of the Thelon game sanctuary east of Great Slave Lake has just been issued by the Northwest Territories and Yukon Branch. Mr. Hoare spent two years in the north, 1928 and 1929.

Canada and Greenland are the only countries in the world where at present the musk-ox is to be found in its natural state. It equals in size one of the small breeds of Welsh and Scotch cattle and in appearance resembles a small buffalo.

There are 250 of the animals in the Thelon sanctuary, while Mr. Hoare believes the greatest herd is on Melville Island where 4,000 head roam today. He estimates about 1,000 musk-oxen in North and East Greenland.

R. M. Anderson, chief of the biological division of the National Museum, in an appendix to the report, gives a higher estimate, stating Canadian herds total 12,000 animals and Greenland 1,500.

Road Gravelled To Park

Highway From Prince Albert To National Park Is Now Completed

The highway from Prince Albert to the Prince Albert National Park is now an all gravelled, all weather road, while the gravelling from Saskatoon to Prince Albert is rapidly approaching completion. This was the statement made at the quarterly meeting of the Prince Albert Board of Trade, when great satisfaction [illegible]

Keep Up The Flow

At this season of the year cows coming off the pastures are apt to drop in their milk production. Even if you are busy a little care and attention given to the cows will more than pay for itself. A little chop, an extra sheaf, regular water, all helps to keep up the milk flow, and for maximum financial returns, ship or bring your cream to the

The Toy Strewn House

Give me the house where the toys are strewn
Where the dolls are asleep in the chairs,
Where the building blocks and the toy baloon
And the soldiers guard the stairs;
Let me step in the house where the tiny cart
With its horses rules the floor,
And rest comes into my weary heart,
For I am at home once more.

Give me the house with the toys about,
With the battered old train of cars,
The box of paints and the books left out
And the ship with her broken spars;
Let me step in a house at the close of day
That is littered with children's toys,
And dwell once more in the haunts of play
With the echoes of bygone noise.

Give me the house where the toys are seen,
The house where the children romp,
And I'll happier be than man has been
'Neath the gilded dome of pomp.
Let me see the litter of bright-eyed play
Strewn over the parlor floor,
And the joys I knew in a far off day
Will gladden my heart once more.

Whoever has lived in a toy-strewn home,
Though feeble he be and gray,
Will yearn, no matter how far he roam,
For the glorious disarray
Of the little house with its littered floor
That was his in the bygone days,
And his heart will throb as it throbbed before
When he rests where a baby plays.

—Selected

Local and Personal

Miss Gray visited the city this week.

Mrs. C. G. Bain and baby daughter who have been visiting the formers parents left recently to join Dr. Bain in Tacoma, Washington, where they will reside.

Mr. and Mrs. Bert Lovell motored to the city this week.

Born.—To Mr. and Mrs. Herdelbrecht, on December 8th, a daughter.

Born.—To Mr and Mrs. Chas. Nachman, on December 12th, a son.

The car belonging to Carl Wiese which was stolen from the Tofield garage just over a month ago, was located in Edmonton last week. The thieves kept it for several weeks and then tried to dispose of it to an auto dealer. The auto dealer 'phoned the police and it proved to be Carl's car.

A joyous birthday party was held at the Burnett home last Thursday when Edward celebrated his birthday by entertaining a few of his young friends. Games were played and a bountiful spread placed before the youngsters, to which they did full justice. All had a most enjoyable time, and wished Edward many happy returns of the day.

Pete Lorbekmo is a hunter sure enough. Going into the wilds to bag his game, he comes back with the material evidence of a successful hunt. He brought round a very nice moose roast to the editor this week which proved to be excellent eating.

We appreciate very much the correspondence from McKenzie district, but we must once again remind correspondents that they MUST sign their name, not for publication, but as evidence of good faith.

The C.W.L. will hold a bridge and whist drive at the W.I. rooms on Monday, December 22nd. Admission 35c. All welcome.

Amisk Creek

The Ladies' Aid held their monthly meeting at the A. Patterson home on December 9th. Most of the members and several visitors were present. Some business was done. It was decided to get together some clothing and send to the Sunshine Club in Edmonton and help the old Peoples' Home in Bawlf with a small sum of money and send $15.00 to the Norwegian Lutheran Church to be devoted to charity work. A quilt and cushion was raffled off. Mr. McDonald, teacher of Sellberg school held the lucky number for the quilt, and Mrs. Emil Pederson won the cushion.

Gunvald Flaaten motored to Ponoka to visit his brother last Wednesday. Iver Moen from Bardo accompanied him. On their return they were guests at the Joe Olstads home in Wetaskiwin.

Mr. and Mrs. H. Hillerud's infant son passed away last Friday morning. The baby was three weeks old and has not been well for the last couple of weeks.

Mr. and Mrs. Hershberger motored to Edmonton last Wednesday returning the same evening.

A.Erickson and Carl, Alice and Lily Berg, Mrs. P. O. Flaaten and Gunvald attended the Lutefisk dinner and Ladies' Aid sale of fancy work held at the Throndhjem Lutheran Church on December 6th.

Mrs. P. O. Flaaten and Gunvald returned last week from St. Paul de Metis where they were visiting with friends and relatives for about a week.

Emilia Pearson returned home from Bentley where she has been assisting with the work at her brothers place since July.

The Y.P.S. are now preparing for a Christmas programme in the Church.

Mr. and Mrs. R. O. Berg motored to Mundare to visit their daughter, Ruby who is working there.

Miss Lena Anderson of Ryley is assisting with the work at the E. A. Moen home.

Some of the young people from here went out to Poe last Monday evening to charvari the newly wed couple, Mr. and Mrs. John Holtie, at the Mr. and Mrs. Sorenson home, parents of the bride. The visitors were treated with a tempting lunch and cigars were passed around. A purse of money was presented to the bride.

Mrs. Johnson has been assisting with the work at the P. O. Flaaten home.

We take this opportunity to wish each and every one of the Mercury readers and staff, A Merry Christmas and a Happy New Year.

CAR GOES OFF GRADE—
HAPPILY NO ONE HURT

While Carl Weiss, Frank Dunn and Paul Thompson were motoring into the city last Saturday, the car in which they were travelling went off the grade and turned turtle down a steep embankment. Very fortunately none of the occupants of the car were hurt, although it was a very close escape from serious injury or possibly a fatality.

The car left the grade about fifteen miles west of town, the cause being the slippery condition of the road. The occupants were brought into town by a passing motorist of Roundhill, and they left later for Edmonton by train.

The car rolled over several times, and when it came to a stop it was upside down. The occupants scrambled out as best they could, but beyond a few bruises and bumps, there were no serious hurts.

SUNDAY SCHOOL TO HAVE BANQUET

Instead of the customary Christmas tree concert the children of the United Church Sunday school will be entertained to a banquet on Friday night of this week. The officers and teachers of the Sunday School are preparing the spread and the mothers supplying the eatables.

On Monday the primary department are having a party. Both events take place in the basement of the church.

Town Gossip

It's really surprising what one will discover if one goes out late enough at night. Last Thursday night or rather early Friday morning, as the editor was going up the street to hang the papers for routes one and four on the post office door knob, he heard sounds of harmony that broke upon the stillness of the night

* * * * * * *

Someone reaching for distance on the radio and getting the Russian choir, at the New York Opera House or even Moscow. However as the distance was shortened it was realized that no radio was ever so real into as this.

* * * * * * *

And then we discovered the truth.

* * * * * * *

Without letting Mr. Gordon or any of the other musical directors into the know, Walter Bellamy was "secretly" training a male choir. As his chief assistant he had Mr. Duckfield, and who has not heard that those from Wales are extremely musical.

* * * * * * *

"Now we'll have something with a little pep" said the assistant director, "and what has more pep than "Oh Canada." Then "upon the midnight clear" came the strains of "O Canada" from several musical throats. If the choir in any degree lacked harmony, it more than made up for it in loyalty.

* * * * * * *

Of course there are many other selections which they can render, but unfortunately there is no big Christmas concert billed at which it can render them.

* * * * * * *

Any way a few more practices and "A wandering minstrell I have been of songs" * * * * *
—And sleepy lullabys."

* * * * * * *

An old friend has left us. It stood in the centre of the street and shed its kindly radiance into the Mercury office for four years or more. Except on rare occasions, such as when a team ran into it and broke the globe or when by some mischance the mantles were broken, it kept us company more by night than by day. The gas lamp did its duty well but like all things had to make way for something more modern.

* * * * * * *

Sometimes at night when sleep did not come readily, the gas light could be depended upon to keep company. The restaurant across the street would turn out their light at two a.m. and then the street light occupied the centre of the stage. If you gazed at it long enough it would assume fantastic shapes and through the wire screen over the bedroom window, if you squinted, it would assume strange angles and contours unknown to ordinary lights.

* * * * * * *

It was the last to bid one goodnight and the first to bid one good morning and it was with some regret that we saw the post chopped down as an enemy rather than a friend.

Tofield now has higher and brighter lights, and more of them, and no doubt on the whole an improvement has been made. Electricity as an illuminant has surplanted gas, and a step forward has been made.

* * * * * * *

We are told that there was a real demand for tea at Jobb's store last week. Nabob tea at 25c. was a real attraction. But it was too good to be true. Jobb's store DID advertise good values but the Mercury got things mixed and put 25c. where it should have put 75c. Even at 75c. it was a good buy at Nabob tea regularly sells for more.

* * * * * * *

The Mercury has been particularly free from mistakes of this kind (touch wood) but when they do occur, and they do even in the city papers, there is no compulsion on the part of the merchant to sell as many people think. Fortunately there are enough really good buys advertised in the Mercury to keep the buyer informed on actual values.

CANADIAN NATIONAL

A Happy Christmas

The Christmas season of good cheer and good will has come again. The centuries-old song of the angels "Peace on earth, good will toward men" is still being sung in the hearts of mankind. There is present peace between the nations in the world that they are not engaged in physical warfare, and the League of Nations is striving mightily to maintain that condition. But in the sphere of trade a bitter war is in progress, one of the most intense yet waged in the history of the world. While the nations are co-operating to prevent physical warfare, they are opposing each other in a great trade battle.

In this great trade struggle no two nations appear to be allied together. It is not a struggle between two groups of nations as was the case in the Great War, but an encircling battle in which each nation is fighting against all others. Selfish national interests overshadow everything else and in the struggle all are sustaining loss, while the general public welfare is completely lost to sight.

And as the struggle goes on the individual citizens in all countries suffer. What the ultimate outcome will be no man can foretell. But what everyone does know is that there is world wide business depression, widespread unemployment, a world glutted with food products which cannot be sold at a profit to the producer, while at the same time thousands of people are in want for the necessities of life.

MASS BUYING PLAN IS URGED FOR FARMERS

Toronto, Ont.—A great "trading agency" through the Canadian farmer would sell all his products and purchase all his requirements, was urged by William Irvine, M.P. for Wetaskiwin, Alberta, in an address at the annual banquet of the United Farmers of Ontario. The full economic power was to be found in the buying as well as selling, and it was for the preservation of this power he pleaded. This should be preserved, he said, for the purpose of raising the agricultural status in Canada to a level of that of any other class in the community.

As a means of utilizing this power they would form this "trading agency" which would be composed of the various agricultural pools now in operation throughout the country. Through the massed purchasing they would be able to secure their requirements at a much lower price and he thought Canadian manufacturers would be able to secure standard rates for their products.

Mr. Irvine suggested that the attitude of the farmer should be one of hopefulness, true to the co-operative principle economically, politically and socially. The co-operative attitude should be taken especially [illegible]

Five Resources Districts

Will Be Established In Saskatchewan To Replace Lands Branches

Regina, Sask.—Five resources districts, to supersede the lands branches under the Dominion Government, will be established by the Department of Natural Resources for administration purposes in Saskatchewan, Major John Barnett, deputy minister of natural resources, stated here.

The principal office will be established at Regina, where the department headquarters are located. Three offices will be established in the north, the principal office to be at Prince Albert. An office for the administration of resources in the southwest will be established at Moose Jaw.

The province will be divided into five districts, each to be directly under a superintendent, with the exception of Regina, which will come under the main administration office of the department.

Legislation for the administration of the resources of the province will be introduced at the January session of the legislature, and will include provincial acts to supersede the federal bills under which the resources were previously administered.

The Provincial Lands act taking the place of the Dominion Lands act has been completed, is ready for presentation to the legislature and is practically identical to the Dominion act, with the exception that there is no homestead provision.

Carnival At the Pas

Arrangements Have Been Completed For Annual Winter Fete

The Pas, Man.—Preparations for the glamorous winter carnival and for the 200-mile non-stop dog race from The Pas to Flin Flon and return, were completed at a meeting of citizens, December 9. The gathering re-elected Dr. F. C. Robertson, mayor-elect of The Pas as president.

The race will be run over the same course and under the same conditions as in previous years. Among the mushers who will be entered this year will be Emil St. Godard, regarded by many as the greatest dog racer of the present day. Earl Brydges, who last year defeated him for the first time in the dog derby here, and probably Leonhard Seppala, famous American dog racer.

No date has been set for the derby, but from present indications it will be early in March. It will follow the Quebec derby which ends on February 21.

GRANT FLEMING, M.D. — ASSOCIATE SECRETARY

AN OLD MAN OF——?

Quite frequently we read in the newspapers an account of the death of some citizen and, as part of this account, it is said that he was an old man. Reading on, we learn that he was in his sixties.

In the eyes of many young people, particularly those in their early twenties, any person over sixty is old and ready for the scrap heap. We all know how difficult it is for the man of fifty to obtain new employment, he is classed as old in the labor market.

Is this a reasonable attitude? If it is, we can only say that the human machine is wearing out too quickly. After all, it is not the number of years a man has lived that determines the state of his body. It is the condition of his body at the present time that indicates his real age, the extent of his capacity for work, and what his expectation of life is.

We would not put into the same class all makes of motor cars, irrespective of the care they had had, five years after they had left the factory. No, we would take into consideration, to begin with, the type of car, and even more would we consider the care the car has received since it had been on the road.

We do not start out into life with equal advantages. Some of us have [illegible] than others. The true age of a man's body at any period of his life depends upon the type of body with which he started life and the care he has taken of it since.

This casual way of calling people old because they have reached a certain age is all wrong. It comes rather as a shock to an individual when he is made to realize that because he has had so many birthdays, he [illegible] is considered [illegible] belonging to the old age group.

He need feel nothing of the kind; he is only the age which he has made himself to be through the care he has taken of himself. Abuses and carelessness lead to premature old age. [illegible] that can be reported where [illegible] had lived to [illegible] a hundred years [illegible] despite the fact that he had done everything which tends to cut life short.

There is much more interest and value in a healthy life than in a long one. Reasonable attention to right living and the avoidance of overindulgence will increase the number of healthy years we can hope to enjoy.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

49th ANNUAL BANQUET

The 16th annual banquet of the Forty-ninth Battalion (Edmonton Regiment) will be held at the Macdonald Hotel, Edmonton, at seven o'clock Saturday, January 3rd. Every year the banquets of this famous battalion havebeen a success and they afford a splendid opportunity for the old comrades to meet again, to sing the old songs and to spend a very pleasant evening. Every man who at any time served in the forty-ninth battalion is eligible to attend this banquet and is urgedto do so.

The men of this battalion are proud of the forty-ninth and its glorious history. If it was good to fight shoulder to shoulder in the days of long ago, it is good to meet frequently as the years go by and enjoy again the good comradeship of old friends.

RURALSERVICE

The car had come to a sudden standstill on a country road. The motorist descended, diagnosed the trouble and then applied at a neighboring cottage for assistance.

"Pardon me," he said to the old woman who answered the knock.

"Do you by chance possess any lubricating oil?"

The old woman shook her head.

"Any oil will do," said the motorist hopefully; "castor oil if you have any."

"I ain't got any," said the old woman, regretfully, "but I could fix you up with a dose of salts."

Then there is the Scotch motorist who waits for a hot day before he will buy gas, as he has heard that expand with the heat.

British Badminton Team

Here are the British Badminton experts who are touring Canada from coast to coast to measure their prowess against the best Canada can offer. They arrived recently on Canadian Pacific liner Duchess of Atholl and play in Ottawa, Moose Jaw, Winnipeg, Calgary, Vancouver, Victoria, Edmonton, Toronto, Kingston, Montreal and will sail from Saint John on the return trip about the middle of December. They are travelling across the Dominion by Canadian Pacific. From left to right they are: D. C. Hume, R. C. F. Nichols, Major E. A. Wagan, president Quebec Badminton Association, J. F. Devlin, Sir George Thomas, R. M. White, R. L. Condy, editor Canadian Lawn Tennis and Badminton Magazine, and H. S. Uber.

SPECIAL SESSION TO REHABILITATE FARM LIFE OF DOMINION?

Will there be two emergent sessions of the Canadian Parliament within six months?

One was called last September within six weeks of the election of Premier Bennett to deal with unemployment. At that time there was a year old and serious but not acute problem of farm depression. Solution of it had been attempted by the western prairie provinces.

The months which have elapsed since the September session of parliament have not indicated that provincial efforts were successful. Conditions in the prairie provinces are beyond local control. They are predicted upon local crop reverses and upon world market conditions.

They are accentuated by conditions in other branches of industry which the September meeting of parliament was designed to alleviate; but the farm conditions in many communities could not be foreseen in September and could not be materially benefitted by the action then taken by the government.

Premier Bennett, cabling from mid ocean, has declared that the position of agriculture in Canada is his first concern and that until it is properly readjusted he has no time for official welcomes. What his decision on arrival will be is not [illegible] but the impression in Ottawa is that he will call parliament together at least a month earlier than he anticipated in order that the agricultural situation may be dealt with.

The backbone of Canadian purchasing power is the new wealth brought [illegible] each year by the grain fields of Canada and until that power is [illegible] there can be no return of national prosperity.

WANTED.—To rent quarter or half section, good wheat land preferred. What have you to offer? Can move anytime suitable. Give particulars to Mercury Office, Tofield.

PRESENT PROHIBITION CAMPAIGN BRINGS BACK MEMORIES

The memory of the public is brief, but it surely has not forgotten the prohibition years in Alberta.

In asking you NOT to sign the prohibition petition, we give as our reason the fact that none of us want to contribute to the bringing back of that era of law breaking and hard liquor drinking, of moral degradation and youth degeneration.

OUR YOUTHS ARE PROTECTED UNDER the PRESENT LIQUOR ACT

No one under 21 can be served on licensed premises or buy from the Government liquor stores—the bootlegger will sell them, though!

DO NOT SIGN THE PETITION

Leave the Act alone. We don't want the bootlegger back again.

Moderation League of Alberta, Inc.

Claim That Wild Oats May Be Turned To Profitable Account as Basis of Stock Feed and Porridge

There is hope at last that farms in Western Canada which are dirty with wild oats may be turned to good account. But, as in other agricultural lines at the present time, there is not much profit in this new use for wild oats.

This use is none other than being manufactured into porridge, and according to Charles W. King, of the Wheat Pool, it is very excellent porridge with a flavour distinctly its own but very attractive.

Two wild oat hulling machines have recently been received at the government elevator at Saskatoon, and will be installed shortly. Porridge making can then be undertaken in earnest.

The Wheat Pool has been devoting study recently to finding a market for the large amount of wild oats which are mixed with western wheat. Last year a demand was developed in Cuba for Canadian wild oats where the grain was fed to mules, and the mules are not kicking. The oats last year fetched 24½ cents per bushel F.O.B. Fort William.

But many of the screened oats sent to the United States, were processed there and the hulled feed oats retailed in Eastern Canada at $45 per ton.

Accordingly hullers were placed at Fort William and samples are now available.

The analysis of the product shows 17.6 per cent. crude protein, eight per cent fat and only three per cent. fibre a composition university authorities here believe should prove a valuable feed for poultry, calves and young pigs.

The protein percentage is higher than that of wheat, western wheat running usually from 14 to 15 per cent protein.

As soon as the new hulling machines are installed at Saskatoon, tests will be made, but with coarse grain prices at the lowest levels for years, H. Seddon, in charge of the government elevator, is doubtful if the new feed will be of great importance. If, however, grain gets back to more normal levels this type of feed would be extremely useful to [illegible].

An Advance In Beautification

Importation Of Plants, Trees and Shrubs Show Increase In Past Few Years

An increasing interest in the beautification of parks and gardens in Canada is reflected in the importations of trees, shrubs, roots, perennials and bulbs in the past 10 years. In 1919 the Plant Inspection Service of the Canadian Government Department of Agriculture examined 900,000 plants, etc., at ports of entry while last year the number examined was over 12,000,000. Inspection stations are maintained at Halifax, St. John, Quebec City, Montreal, Ottawa, Toronto, Niagara Falls, Windsor, Winnipeg, Estevan and Vancouver, where imported plants are examined to ensure freedom from insect pests and plant diseases.

Canadian Butter To Hong Kong

World travellers who have occasion to stay over at Hong Kong may be served butter that has a quality flavour. A British Columbia creamery has recently been awarded a contract by a Hong Kong firm of provision merchants, for the shipment of 80 boxes of butter per month. For the past eight years shipments of British Columbia butter have been made to Japan and it has sold at a premium in the markets of that country.

Refuses To Talk Depression

Subscribers to the Commercial Daily newspaper published at Pine Bluff, Ark., will have to look to other publications henceforth if they are in need of "financial depression," "business depressions," "hard times," and the like. A front page editorial announced recently those terms would be banned by the Commercial hereafter.

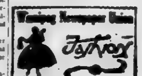
"It is no pleasure when my wife plays the piano. There are always other noises."

"Oh, she sings as well?"—Lustige Kolner Zeitung, Cologne.

Fig Industry In California Valuable

First Attempt To Grow Them Was Made Half Century Ago

The fig has only been grown half a century on this continent. The Californian fig industry is not so old as that. It was in 1880 the first experiment was tried with the fig on American soil. It is now a valuable industry there, but was not immediately successful. G. P. Rixford of San Francisco, who was killed by a railroad train recently, is given credit for the introduction of the Smyrna fig to California. He imported cuttings in 1880 and many of them were planted by Senator Stanford on his Vina ranch. These first plantings were a complete failure, the fruit did not grow larger than marbles, then dried up and dropped from the trees. It was not until George F. Roeding, of Fresno, and his father made a thorough study of figs in Asia Minor that the trouble with these first California plantings was discovered. The Smyrna fig bears only female flowers, while the Capri, or wild fig bears both male and female. The wild fig was brought to California. George Roeding took a quill and blew pollen from wild fig blossoms and produced four perfect Smyrna figs, the first ever matured in the country. Afterward the pollination was effected by means of a small insect called the blastophaga.



(By Eva A. Tingey)

A HAPPY POSSESSION!

All Tingey models are created and sketched in Paris and the patterns are made in New York.

It's so youthful—versatile—individual!

It's scarlet red wool jersey with narrow black fur trim.

The narrow belt has a black metal buckle.

It's so chic and up-to-the-minute. It's so charmingly sleek and slender. Circular godets provide a graceful fulness to the skirt.

The encircled arrangement of the fur at the neckline is slenderizing.

It's a stunning dress for college, for street, sports and spectator sports.

In black canton crepe with white fur, it's extremely lovely.

Featherweight tweed, crepy woollens, and velvet also suitable for this [illegible].

This pattern may be obtained in sizes 16 to 20 and 36 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

CAIRN IS UNVEILED

Cockburn Island, Ont., off which the driftboat "J. B. King" exploded with a loss of 30 lives on June 26 last, was the scene of an impressive service on Monday, November 22, when a large cairn was unveiled to the memory of the victims.

Feeding Dairy Cattle

How To Apportion Grain According To Butterfat Production

Common methods of apportioning grain to lactating dairy cattle are faulty because they tend to overfeed the low producers and underfeed the high producers, according to R. G. Connelly, New Jersey extension service associate dairyman, who explains that in most cases cows receiving liberal amounts of silage and legume hay are commonly fed one pound of grain for each three pounds of milk testing 5 per cent butterfat, and one pound of grain for each four pounds of milk testing less than 5 per cent.

This rule has been found unsatisfactory because the cows will eat more roughage than is needed to maintain body weight, and studies show that the recommended amounts of grain do not provide the nutrients required for the stated pounds of milk.

Feeding trials conducted by the Department of Agriculture showed that Jerseys and Holsteins, when fed three pounds of silage for each 100 pounds of live weight cow, and an unlimited amount of alfalfa hay, will maintain a daily milk flow of ten and sixteen pounds respectively without grain.

Jerseys producing milk testing 5 per cent. butterfat require .6 of a pound of grain for each pound of milk over ten pounds. Holsteins giving milk testing 3.5 per cent butterfat require .4 of a pound of grain for each pound of milk produced over sixteen pounds. Holsteins giving milk testing more than 3.5 per cent. should receive .45 of a pound of grain for each pound of milk over sixteen pounds. Jerseys giving milk testing more than 5 per cent. should receive .55 of a pound of grain for each pound of milk over ten pounds.

By this method of apportionment, it is possible to feed cows more in accordance with their individual production. In the long run, this method is more economical, says the specialist.

First Steamer To Carry Apples

The first steamer to carry apples direct from Annapolis Royal, Nova Scotia, to London, England, was the "Neptune," which sailed on April 2, 1881. The shipment consisted of 6,800 barrels, and arrived in London in 14 days. This venture was fairly successful and from that time the business has continued to increase in volume.

There are almost 500 persons in United States whose incomes reach or surpass the million dollar mark.

ROLLING STOCK BUILT IN B.C.

Let the rest of the world sing the hard times blues—but Victoria hums the optimist song to the accompaniment of hammers and pneumatic drills. As a means of unemployment relief and to provide useful facilities for the logging industry of Vancouver Island situated along the Esquimalt and Nanaimo Railway, the Canadian Pacific Railway is constructing two hundred logging cars of a special design. These cars, one of which is being assembled in the above picture, are the first railway rolling stock to be built in British Columbia from B.C. products.

Won Place At Chicago Show

Saskatchewan School Boy Competed With Hundreds Of Experienced Wheat Growers

A fifteen-year-old high school boy of Grand Coulee, Sask., Milton Gansborn, won a place for his wheat in competition with hundreds of experienced growers of Canada and the United States at the Chicago International Hay and Grain Show, the list of winners discloses.

In the contest for the best hard red spring wheat at the big show, through which Herman Trelle won the coveted crown of "wheat king," the name of Milton Gansborn appeared in 41st place.

Milton is already known to Reginans, for he took first place in the Kiwanis boys' wheat growing competition put on this fall by the local club, and received a cash prize of $50. Shortly after that he added to his laurels by taking second place in the open competition sponsored by the Regina Board of Trade for wheat growers of the district, in which there were 137 entries.

He also secured second place in the Sherwood Municipality contest for the best samples of grain grown in the municipality.

Thus by his work with exhibition wheat this year this Saskatchewan farm lad earned about $75 in prize money.

Growing prize wheat and working on his home farm are only part of Milton's activities, for meanwhile he is pursuing his high school education to fit him all the better for future triumphs. He is in grade 11 and drives eight miles to school every day.

Used Crewless Launch

Merchant Ships At Mercy Of German Craft During War

That the Germans used in the World War an engine of destruction off the Belgian coast about which practically nothing has been revealed, was the assertion of Rear-Admiral G. R. Mount of the British navy in an address in opening a Missions to Seamen Exhibition in Leeds, England, recently. This was an electrically driven crewless launch controlled from the shore, capable of high speed and quick turning and carrying 800 pounds of gun cotton in its bow. It was designed to ram its prey. It took very skilful seamanship to dodge the craft which could port, starboard, or run with its helm amidships and took a lot of shaking off. Warships were able to sink it with gunfire once its nature was recognized, but merchant ships were at its mercy.

May Do Some Good

Present Economic Depression Seems To Have a Bright Side

When we feel low in our minds about the state of the nation in general and about business conditions in particular it cheers us to remember that—

Never before have leaders of industry, social workers and politicians tackled an economic crisis with so much intelligence and prepared so far in advance for a hard winter.

Never before have people generally done so much intelligent thinking about the causes of an economic depression and planning toward preventing a recurrence of hard times.

Never before have industrial leaders so generally conceded that fewer hours of labor without a reduction in wages is the most logical remedy for these conditions.

Canada's Aerial Photographic Fleet

Canada has for years taken the lead in aerial photography and surveying, and the program of last season upon which the world's largest aerial photographic fleet was engaged enabled her to maintain that pre-eminence.

Enviable Record Is Made By Canadian Air Mail Service East and West During Past Year

In the first nine months of 1930 over 380,000 pounds of mail were carried by air mail services in Canada. One-half of the services operate out of Montreal. Two new services are projected. One will cover the route from Amos to Rouyn, newly settled districts in Northern Quebec and the second from the Peace River to North Vermilion, in the Northwest Territories. The later calls for 16 return trips during the winter and will be continued for four years. There are [illegible] aircraft flying in Canada and the number of pilots is 717 of whom 400 are commercial pilots. Canada now has 72 air harbours.

Detailing the flights of the various air mail services, a recent report states that the Toronto-Buffalo line flew 7,800 miles in the three months July 1 to September 30, 1930, and carried 11,[illegible] pounds of mail. All scheduled trips were completed. A total of 15,000 miles were flown on the Montreal-Albany service, and the operating efficiency was rated at 100 per cent. One hundred and thirty seven passengers were carried in the last quarter.

Planes of the company operating out of Montreal, which has the contract for a number of mail services flew 176,324 miles, carried 891 passengers and its scheduled mail efficiency was rated at 96 per cent. This firm operates the Montreal-Toronto-Detroit, the Montreal-Saint John-Moncton, the Montreal-Quebec, and the Ottawa-Montreal-Rimouski services. Exceeding the former company in mileage, however, were the planes of a company operating out of Winnipeg. These flew 412,012 miles carrying 3,344 passengers, 316,000 pounds of baggage and on scheduled times was rated at 97 [illegible].

There are 21 light airplane clubs in Canada. For the nine months ended September 30th of this year members of the organizations had flown 11,867 hours. The membership totalled 2,387. Ontario has the largest number of flying clubs, with nine. Saskatchewan has three; Nova Scotia, Manitoba and Alberta, two each; Quebec, New Brunswick and British Columbia, one each.

West Egg Crates Standardized

Express Companies Ask Establishment Of Fifty-Eight Pound Weight

Suggestion by the Board of Railway Commissioners that the Canadian Produce Association and the Express Traffic Association get together and reach some "gentleman's agreement" with regard to standardizing the crates in which eggs are packed resulted from a hearing before the board at Ottawa, on the application of the express companies for an upward revision of rates on that produce.

Heretofore the companies have carried eggs at a flat rate based on an estimate of 55 pounds to the 30-dozen crate. They asked the board that an order be issued establishing the weight at 58 pounds to the crate, which would have the effect of increasing the tariff by enabling the companies to charge for three more pounds.

It was explained to the board that in Western Canada crates with specifications of half-inch wood and weighing in the neighborhood of 11 pounds were used for domestic shipment, while those in Eastern Canada were fabricated of wood seven-sixteenths of an inch and weighed about 16.25 pounds. When eggs were carried as freight by the railways as distinct from their being expressed, the railways charged on a basis of 56 pounds to the crate.

By a regulation of the Department of Trade and Commerce of 1922 the crate of five-eighths of an inch wood was required as the government standard. Notwithstanding this, however, egg importers were obtaining their produce from the United States satisfactorily in the half-inch containers.

It was brought out that a convention of produce men will be held in January, at Montreal, and the matter will be discussed there.

Needs Looking Into

Canadian Pig Threatens To Become As Rare As Buffalo

What has happened to the Canadian pig? Judging by the latest figures, he threatens to become as rare as the Canadian buffalo. It is an extraordinary story, and disturbing.

In 1927 Canada exported $35,000,000 worth of pork and pork products. Last year exports of the same products fell to $6,250,000. This year they are still falling. They threaten to fall to less than $5,000,000.

And that isn't all. For, incredible as it may seem, we are importing pork. In 1929 we imported it at the rate of about $500,000 a year. This year, judging from the figures of the first few months, we will import $4,000,000 worth. We are even importing lard.

Canada has more feed than she knows what to do with. She has feed for pigs galore. Yet here we are, with agriculture supposed to be our basic industry, actually importing pork. Having outlanders send us bacon.

People ask what is wrong with Canadian agriculture. It's a big question, but a sidelight upon it, surely, is this question of pork.—Ottawa Journal.

Went the Limit

Young Angus had been out for the evening with his best girl. When he arrived home he found his father still sitting up. The old man looked up and shook his head.

"Hae you been oot wi' yon lassie again?" he asked.

"Aye, dad," replied young Angus. "Why do you look sae worried?"

"I was just wonderin' how much the evenin' cost."

"No more than half a croon, dad."

"Aye. That was no sae bad."

"It was all she had," said Angus.

Has Radium Clock

Dr. Frank E. Simpson has in his office at Chicago, what is the closest approach to perpetual motion ever devised. It is a radium operated clock which has been running for four years without winding. It is operated by an invisible speck of radium which will continue to be the motive power for thousands of years until its energy has died.

Silver and Blue Foxes

The silver fox is a colour phase of the common red fox, the blue fox a colour phase of the polar fox. They are now established breeds through the experiments carried out by the pioneer fox farmers of Canada.

Enthusiasm to a man is what steam is to an engine.

Canadian Wood Stands Test

Railroads Of British Isles Using Douglas Fir Railway Ties

Last summer a trial shipment of Douglas fir railway ties was made to the British Isles. These ties, after being put through several exacting tests for the British Railways by the Forest Products Laboratories in London, England, have been declared highly satisfactory. One result is that inquiries are now being made through the British Columbia Government representative in London, concerning another shipment of about 300,000 Douglas fir ties.

Large railroads of the British Isles have been keenly interested in the result of the test of the Canadian ties, and if met on the question of price and quantities desired, it is expected further large orders may follow. The combined requirements of British railroads in ties alone runs into enormous totals annually. British Columbia has immense resources of Douglas fir trees and could meet orders from the British and other railways for millions of railway ties with despatch.

Greatly Appreciated

When Bournemouth, Hants, England, postal officials decided to do something to improve the post office pens, a dozen public pens were fitted with non-corrosive and almost unbreakable nibs. Public appreciation of this was so great that at the end of the first day only two nibs were left.

No Life Outside Earth

A study of meteor fragments gives no indication of any form of life in the universe outside of earth, Dr. George Frederick Kunz, of the American Museum of Natural History has concluded. He studied 850 meteorites, and presented his findings to the New York Academy of Science.

"You owe £5,000 and want to marry my daughter?"

"Yes, unless you know a better solution?"—Lustige Kolner Zeitung, Cologne.

WORLD HAPPENINGS BRIEFLY TOLD

The latest survey shows that only 1½ per cent of the United States and Canada are deaf and blind.

The Department of Interior has purchased Flower Pot Island in the Georgian Bay for national park purposes.

George Eastman, philanthropist, has made a gift of $1,000,000 for the establishment of a dental and throat clinic for school children of Paris.

The United States coastguard made an all time record in life-saving last year, the number of persons rescued being ...

In searching the human heart to find why its failing is the prime cause of death, the United States government will spend $10,000 next fiscal year.

Jack Miner, well known naturalist is experimenting at his game sanctuary to see if Ontario's marshes can be used profitably for raising bullfrogs.

It is reported from Hamburg that Thomas A. Edison has accepted the honorary membership offered him by the German "Erfinderhaus," an association of inventors.

Official figures of the national census taken last October, give Japan a population of 64,447,000, of which 4,017,000 represent gains during the last five years.

Jesse Ryme, whose home is in Quebec, has been brought out from the shores of James Bay where he was found in a demented condition, a victim of the northland hardships.

Port Dover, centre of fresh-water fishing on Lake Erie, aims to become the hub of the world's first fresh-water, genuine sockeye salmon industry. This fish has started to appear in the lake.

"Rocket" planes, 20 years hence, will carry tourists from America to Europe in three hours at less than the present fare for a 20-hour train journey, it was predicted by Fritz von Opel, of Germany.

Leaders of the Brazilian Agricultural League have plans for some sort of an approachment with Russia, whereby Sao Paulo coffee growers would be able to exchange their surplus for Soviet wheat.

May Reduce Crossing Accidents

Bright Colors Will Distinguish C.N.R. Self-Propelled Cars

With a view to minimizing local crossing accidents, the Canadian National Railways will, during the winter months, paint the front ends of eight self-propelled cars a bright yellow and red as a means of attracting the attention of motorists, A. McCowan, assistant general superintendent of car equipment, has announced. These cars, which replace steam locomotives in some sections of the system, are equipped with bells and whistles but are sometimes mistaken at first glance for an ordinary railway coach.

Cars on western region to make their appearance in this new dress are on Winnipeg to Somerset service, Saskatoon and Regina, via Dunblane and Moose Jaw and two more running between Victoria and Kessinger on Vancouver Island. The transition in coloring is being done so there will be no unnecessary tie-up in service.

Canadian Dollar At Par

Has Been Above Par In New York Money Market Since Last August

The Canadian dollar was quoted at par on the New York money market Dec. 1st, the lowest figure reached since August 20 last. Quotations on the dollar carried above par last June and it has remained at a premium of a fraction of one per cent almost constantly since that time.

Bankers attributed the quotation to the seasonal movement of funds across the border requiring large purchases by Canadians of United States funds.

Mexico is considering the reduction of taxes and freight rates.

"Three pounds of insect powder."
"Will you take it with you?"
"Yes, you surely don't expect me to send the fleas round here?"—Lustige Kolner Zeitung, Cologne.

Carbon Monoxide Poisoning

A Timely Warning For the Prevention Of Untimely Disaster

Owing to the comparative frequency, lately, of deaths from carbon monoxide poisoning, Honourable F. D. Munroe, M.D., Minister of Public Health, announces that an active campaign is being undertaken by the Saskatchewan Department of Public Health, with the object of effecting a province-wide dissemination of knowledge regarding the perils which are constantly present in connection with this gas. The appeal will be directed particularly to motor car owners, who perhaps are not sufficiently cognizant of the dangers involved. In addition to publicity by means of the press, the campaign will include a wide circulation of pamphlets dealing with the menace. The co-operation of the Department of Highways has been assured, and a warning pamphlet of information will accompany each set of motor license plates issued in 1931. This pamphlet will also be distributed to the public garages of the province.

Hon. F. D. Munroe, M.D., Saskatchewan Minister of Public Health and Minister in charge of The Child Welfare Act.

Carbon monoxide is a colourless, odorless and tasteless gas. It emanates from automobile exhausts, gas ranges, illuminating gas appliances, gas generators and coal-burning furnaces and stoves; it is the result of the incomplete combustion of gasoline, gas or oil. With the approach of winter, and the possibility of less adequate ventilation, the danger of carbon monoxide poisoning from motor cars increases; and the same may be said of furnaces and stoves. The precautions which should be taken against the insidious action of carbon monoxide gas when a motor is permitted to run in a garage cannot be over-emphasized. Owing to its being colourless and odorless, it takes its deadly toll often without warning of any kind to its victim.

The exhaust gas from internal combustion engines contains carbon monoxide in percentages ranging from a fraction of one per cent. to seven per cent. or even higher, the variation depending upon the proportion of air and gasoline in the mixture burned. The concentration of carbon monoxide increases with the proportion of gasoline; that is, with a rich mixture, such as might be used in cold weather, the attendant risk would be correspondingly great. A rough estimate of the volume of carbon monoxide which an automobile would produce would be one cubic foot per minute per twenty horse-power. This would be sufficient to render the atmosphere of a single car garage deadly within five minutes, if the engine were allowed to run with the garage doors closed. In streets where traffic is congested, the content of carbon monoxide rises to about one hundred parts per million of air, which is enough to cause a slight headache. A person breathing this gas in mild concentration may experience a slight dizziness at first, followed by a throbbing in the temples, headache, a feeling of sleepiness, fatigue, weakness and nausea. The mind becomes dulled, and it has been proved that although in some cases the individual may realize the danger of his position, he may yet be unequal to the exertion of opening the window or reaching the door.

It is important, therefore, that every person who owns, drives, rides in or repairs a car, or who is employed in a garage or repair shop, should realize the dangers which attend the presence of carbon monoxide gas. As already stated, the same menace accompanies the use of private lighting plants or gas engines of any kind in basements or elsewhere. Under no conditions should an automobile or an engine be allowed to run for any appreciable length of time in a garage, in a repair shop, or in a confined place, without the doors being open, a proper ventilating system being employed, or without the exhaust being connected with the outside by a direct air-tight outlet.

The occupants of a closed car should always have the windows lowered at least three inches, as it is possible that the exhaust gas may escape into the car and gradually overcome them.

When a person is found overcome by carbon monoxide poisoning, a doctor should be summoned at once, and in the meantime the victim should be placed in a warm, well-ventilated room, with arms outstretched. While the doctor's arrival is being awaited, artificial respiration should be employed.

The fundamental essentials of safety lie in foresight and caution; these are the most effective weapons in dealing with what has been termed, "the invisible peril of the motorists."

Mexico Banishes Death Penalty

New President Has Also Done Away With Jury System

Capital punishment is definitely banished under the new penal code for the federal districts and territories, approved by President Ortiz Rubio.

The president also announced he was taking steps to banish the death penalty in the army.

The jury system also is abolished under the new code, duelling is classed as a punishable crime, physicians are made liable for punishment for errors involving the death of a patient, and vagrants are subjected to detention and isolation.

Russian Lumber For Britain

Shipments Have Been Restricted To 500,000 Russian Standards

Shipments of Russian lumber to Great Britain have been restricted to 500,000 Russian standards for the present year and 600,000 standards for 1931, instead of proposed shipments of 750,000 and 850,000 standards respectively, the Department of Trade and Commerce at Ottawa has been advised. Such restrictions have been agreed to following negotiations between Russian sellers and the central soft wood buying corporation, comprising about seventy of the principal lumber importing houses of Great Britain.

The World's Sheep

There are estimated to be 700 million sheep in the world, equal to about one for every three people. Russia leads with 116 million, with Australia next with 90, and the United States has about 47 million. The world's wool clip is some 2,800 million pounds.

A Wealth Of Knowledge

Cambridge University has now on its twenty miles of shelves a million and a quarter books, nearly 200,000 maps, and over 100,000 manuscripts.

Believes Glass House Healthy

Bournemouth Woman Has No Faith In Ordinary Type

Miss Geraldine Fitzgerald, of St. James Square, Bournemouth, England, believes, at the age of 84, that a glass house is the healthiest place to live in.

Four years ago she lost faith in houses of brick and had a glass house built in the garden. She has lived in it ever since and declares she is better in health and happier in disposition.

Recently a reporter talked with her in her greenhouse home while the sunshine flooded the little place with light and warmth.

Miss Fitzgerald told him she had always been delicate and had suffered from typhoid, diphtheria, sore throats and tonsilitis.

"Now instead of always moaning and grumbling and fearing illness, I am better in health than ever I was. I can walk seven miles a day without feeling tired, and I am more fit at 84 than I was at 18.

"This is the secret of being able to do without doctors, and I am sure if people would only live in glass houses there would be none of the dreadful complaints we hear of nowadays."

Cooking is done on an oilstove and candles are used for lighting.

Partridge Going Eastward

Hundreds of flocks of Hungarian partridge have been seen in western Manitoba this year, convincing evidence that these birds are moving eastward out of Saskatchewan and Alberta. Reports as to the observations on the movements of these birds have been kept here by B. J. Hales, principal of the Normal School, and an authority on bird life.

Railway Mileage In Canada

The mileage of steam railways operated in Canada is 42,381. During 1929 there was a net increase in the miles of railways operated of 386 and in total track mileage of 411 miles.

Proved Economic Value

Revenue From Graf Zeppelin's Flights This Year Paid All Expenses

The Graf Zeppelin in 1930 made a total of 155 flights covering a distance of 14,275 miles and carrying 6,273 passengers and 2,200,000 pieces of mail and freight, weighing 12,166 pounds. The ship now will be stored up in her hangar and her gas removed, after which a thorough inspection test of all her parts will be made. On the basis of this study her officers expect it will be possible to estimate the normal length of an airship.

The sale of passenger tickets for long and short flights covered the cost of gas, salaries, insurance and depreciation, thus indicating the economic value of Zeppelins as traffic carriers.

Among the longer flights it is hoped to make in 1931 is a North Pole flight. This, however, depends largely on the economic situation. While the Graf Zeppelin is being overhauled, a new Zeppelin, the LZ-128, will begin to take shape in a new and larger hangar beside the Graf Zeppelin's shed. The construction of the new Zeppelin has been delayed by a change-over to permit its inflation by helium after the R-101 disaster.

Strange Discovery In Alaska

Giant Lizard-Like Creature Preserved In Ice Since Prehistoric Time

Reports received from Valdez, Alaska, said the carcass of a giant lizard-like creature, with fur in perfect condition, had been found on Glacier Island near Cordova.

The strange creature, reported to be 42 feet long, including a tail measuring 16 feet, was believed to have been preserved since prehistoric times by being encased in ice in the upper reaches of the Columbia glacier. The ice was believed to have worked its way gradually to the sea. The head was reported to be six feet long and the body 20 feet in length.

British Air Craft Marvel

Rival To the German DO-X Is Now Under Construction

Britain's rival to the German DO-X flying boat, work on which has just been started, is expected to be the finest in the world. The wings of the new monoplane will measure 160 feet from tip to tip, and the huge hull will have two decks containing five passenger saloons which will accommodate 50 passengers and have sleeping berths. The craft will weigh 33 tons. It will be able to fly 1,000 miles at more than 120 miles an hour. The furnishings will be luxurious.

Had To Be Doubled

The haggard-looking man got into conversation with the happy, care-free bachelor on their train journey to the North.

"Yes," said the former. "I'm the father of six daughters."

"Then you and your wife have six mouths to feed," replied the bachelor.

Haggard face shook his head.

"No; we have 12," he returned. "They are all married."

SUNDAY SCHOOL LESSON

DECEMBER 21

CHRISTMAS LESSON

Golden Text: "There is born to you this day in the city of David a Saviour, who is Christ the Lord."—Luke 2:11.

Lesson: Luke 2:1-20.

Explanations and Comments

Beginning the Lesson.—Our first and last lessons of the year are Christmas stories, the only ones told us in the Gospels. From which Gospel was our first lesson taken? Where is our story today found? Let us never forget that the study of the three Wise Men and their bringing of gifts to the Christ Child is in the Gospel of Matthew, and the beautiful song of the angels announcing the birth of the Christ to the Shepherds is recorded by Luke.

A poet, John Erskine, tells our story as in the words of one of the Shepherds:

Out of the midnight sky a great
dawn broke,
And a voice singing flooded us with
song.
In David's city was He born, it sang,
A Saviour, Christ the Lord. Then
while I sat
Shivering with the thrill of that great
cry,
A mighty choir, a thousandfold more
sweet,
Suddenly sang, Glory to God, and
Peace—
Peace on the earth; my heart, almost
unnerved
By that swift loveliness, would hard-
ly beat.
Speechless we waited till the accus-
tomed night
Gave us no promise more of sweet
surprise;
Then scrambling to our feet, without
a word
We started through the fields to find
the Child.

When the Angels Depart.—There is always one duty when the angels depart: we can do the thing they told us to do. Those shepherds on the plains of Bethlehem were wise men. They might have said: "We have had a lovely vision, beautiful while it lasted, but it was naught save a dream. Let us go back to our flocks."

They might have said this, but they did not. They were like Saul of Tarsus on the Damascus Road. Wherefore, O King Agrippa, I was not disobedient unto the heavenly vision." A life of glory followed. The shepherds also were obedient. They went with haste to Bethlehem. Wise men, indeed, to go with haste, to fix the vision in the moment of it!

They found a Baby in a manger, the newborn Child of the respectable poor, poor enough to be shut outside an inn, respectable enough to make no fuss and to accept the first shelter that offered. The shepherds saw no halo about His head, lighting all the place where He lay, such as the Old Masters delighted to depict; they saw no star in the sky; there were no more songs of angels. But they saw the glory of God in the face of a tiny Infant. They saw, and trusted, and rejoiced and went away.

Thus they fixed the [illegible] for all [illegible] and made all the ages their debtors.

Black Cat For Luck

A black cat recently entered Romford Police Court, London, England, and sat on the knee of a summoned omnibus conductor. When his case was called he passed the cat to another conductor. The cases against both were dismissed. Then the cat strolled over to sit beside the magistrate, crossing the path of the next defendant, and he also had his case dismissed.

An Epic Of The Far North

Gripping Story Recently Released By Department Of the Interior

A great story has recently been released by the Department of the Interior. It is a true story, being the day-by-day experiences of W. H. B. Hoare as he rambled about the 15,000 square miles that make up the Thelon game sanctuary in search of musk-oxen. The sanctuary is east of Great Slave Lake along the Thelon and Hanbury Rivers.

Canada and Greenland are the only countries in the world where the musk-ox exists in its native state and, as these animals are being exterminated much as the buffalo were some years ago, the Dominion Government set aside this sanctuary. Musk-oxen are about the size of the small Welsh and Scotch cattle and look like buffaloes. Mr. Hoare, with an assistant, A. J. Knox, was sent out by the Northwest Territories branch of the department to see how they were getting along. He spent most of 1928 and 1929 in the north.

The report Mr. Hoare made to the minister is a gripping narrative. Much latter-day fiction deals with life in the north, but it is doubtful if any of it exceeds in interest the modest, matter-of-fact records of what Mr. Hoare and his assistant did, the lives they led, the dangers they encountered and the hardships they endured. It gives some idea of what men suffer, often alone and unnoticed, to serve Canada.

After a description of the journey to the Thelon sanctuary, he tells of a blizzard which hit himself and his companion on May 26, 1928. After it was over they proceeded and discovered a bed of peat between Ford Lake and Artillery Lake. The bed was frozen but some of the peat they dug up burned well in the camp stove.

The diary tells of the long tramps the men took, their contact with caribou and their winter spent at Reliance. Early in March they were back in the sanctuary. A cabin had been erected by Mr. Hoare and Mr. Knox, and while Mr. Knox remained bringing supplies, Mr. Hoare started out alone on the trail.

American Pompeii

Ruins Will Be Sought By Expedition In Arizona Next Year

The ruins of an "American Pompeii" will be sought in Arizona next year by an expedition of the University of Pennsylvania Museum.

This was disclosed by Dr. Harold S. Colton, professor of anthropology at the university and a member of the expedition the museum has had for several years in the field near Flagstaff, Ariz.

The ruins, Dr. Colton said, are believed to lie beneath a layer of black basaltic sand 16 to 20 feet thick, which in turn is overlaid by centuries of drift sand deposits.

Tests indicate that primitive men have slightly keener eyesight than civilized white men, but in the case of hearing the situation is reversed.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER VI.—Continued

Mary Maxwell's lips tightened as she replied: "So I gathered before I left. You see, Johnny, just as Julie arrived with the tea wagon (she ran into that old rookery of Selina Smith's, my dear, and almost smashed the tea cups, exquisite egg-shell china, too), Gay came out under the trees with the babies. She certainly made a pretty picture, and I caught Mr. Halliday watching them with a different expression in his eyes. He looked quite human, and said: 'Why not ask Mrs. Hastings to join our party, Angela?' but his wife shrugged in a way that I should call insulting, and answered: 'With that day nursery at her heels?' Then she looked at me and added apologetically: 'Those children are cherubs, of course, but any child around a tea table is so—messy, don't you think?' And she handed me a glass of iced tea, and the most wonderful embroidered napkins I ever saw, and deliberately turned her back upon that group across the hedge."

"What did Halliday do?"

"He excused himself and went into the house. It was evidently what she wanted. She began questioning me then, and in three minutes I understood why she'd decided to be gracious.

"She wanted to find out about Nick Hastings!"

"John Maxwell, here's my verdict: that woman is what Tom, Jr. would call a vamp!"

"I am afraid," replied her husband, his eyes twinkling, "that you've been seeing too many movies. What did she ask you about Nick?"

"She began by saying that he was charming, and hinted that she understood his marriage had been too hasty. She used all the tact she possessed, John, and her eyes looked like a baby's, but I saw what she was up to. It was a pity, she said, for a man to marry so very young. Such affairs were apt to end unhappily, but then, in a little town like this such entanglements were not uncommon, and we should be charitable——"

"Good thunder!" broke in John Maxwell, unable to control his indignation, "she was implying——"

"I think she was, though she was extremely subtle. I was so furious that I spilt tea on that exquisite napkin. I told her I thought she had used the wrong word—that there was no entanglement about it—that the marriage was hasty merely because Nick was starting on a long vacation, and at the last minute found that he didn't wish to leave Gay behind. That's all. I left as soon as I decently could. She was sweet as syrup, and urged me to be neighborly; but I don't believe she'll return my call in a hurry! If she does, I'll have Katy tell her that I'm 'relaxing'!"

John Maxwell chuckled.

"I fear, my dear, that you won't relax till you reach the other side of Jordan; but anyway, you've verified my own opinion."

"If you had an opinion," responded his wife with spirit, "what on earth was your object in making me chase down on Elm Street in my best clothes, with the thermometer at eighty? Still—to see Julie Nipps with her bobbed hair and black mohair, was worth the effort! Now, John Maxwell, it's your turn to explain. I confess I'm curious as to why you're interested in the woman unless Nick——"

"As usual, Mary," interrupted her husband, "you've hit the nail on the head. I want you to tell me I'm an old fool. I can't really believe——"

He went on to relate his fears, while Mary listened with no interruptions. She even sat rocking quietly when he was through.

"Well?" he questioned.

"I was trying to put myself in Nick's place," she answered slowly. "You know, John, I'm rather good at that. My first thought when hearing anything surprising, is how I'd act myself; but I try not to speak till I've viewed it from another's standpoint. I learned that trick when the children were growing up. Sometimes they'd want to do things I didn't approve of—things I wouldn't have done in my own girlhood. It would be on the tip of my tongue to forbid it, and then I'd say to myself: 'Mary these youngsters are of another generation. Their standards are different from yours. Times have changed.' And I'd put myself in their shoes and see how I'd have felt twenty years before if I'd been forbidden to do things that all my companions were doing. It wasn't always easy, but it paid in the long run. Our boys and girls never did things on the sly; and if I decided my way was best I could make them see it, because they knew I wasn't hasty."

There was unveiled admiration in the look John Maxwell gave his wife. "But," he hesitated, "there's one thing that doesn't change with the generations, Mary, and that's the fact a man must be true to his own woman."

"I know; but do you think for a minute that Nick is untrue to Gay, even in his thoughts? I don't. I know the boy too well. He'd be as horrified at the idea as you or I, John. But for all that, I don't say he's not in danger with a vampire only across the hedge! Nick's younger than his years, and for all his charm he's unsophisticated. He's lived his life right here; and, though some of our friends pretend that Bakersville is the hub on which the universe revolves, we know it isn't. It wouldn't be surprising if a woman as subtle as Mrs. Halliday should dazzle Nick for a time. He married so young, Johnny; and for the last few years he's had so little change. That woman would not unnaturally stir his imagination. We've never had quite her like in Bakersville."

"Then you don't think me an old fool?" asked John ruefully.

"No. I wish you could send Nick off on a long vacation."

"But I can't just now. Besides, it's Gay who physically needs a change. She's got shadows under her eyes, and her pocket was mended with a safety pin. She apologized about it, but ——"

"M-m," came thoughtfully from Mary Maxwell. She rocked quietly for a while, visioning a slender figure, silken-clad, with a marvelous coiffure above innocent blue eyes. She stirred uneasily; then said: "I'll see Gay tomorrow. Kind deeds should be passed along; and do you remember the winter Janey was a baby and I so miserable, that Miss Rebecca Eaton came every week and took my mending home? Mercy! the help it was! I was too tired to care whether my pockets hung by a thread or not; but if you minded, Johnny, you never said so. Looking back, dear, I think you were rather wonderful."

John Maxwell reached for his wife's hand and squeezed it hard.

"You were rather wonderful yourself," he replied gently; then his face broke into an amused smile. "Besides, my dear, there was no vampire in the next yard!"

CHAPTER VII.

It was next morning, just after Gay had put her baby down for his nap, that she heard an unaccustomed step in the entry, and looking up beheld Simeon Bartlett standing by the door. Her face broke into a smile of welcome that was reflected in the twinkling blue eyes of her old friend. He dropped his gigantic umbrella in order to give her a bear-like hug, followed by emphatic kisses on either cheek.

"Where did you come from?" she asked breathlessly, extricating herself from his embrace. "Only the other night Nick was advising me to pack up and make you a little visit."

"Nothin' would suit me better, missy," he replied, beaming. "The old house got so lonesome I couldn't stand it a minute longer, so I up and took an early train. Had some business with John Maxwell anyway, and [illegible] get away; but my real business was to have a look at you and the kiddies. Ain't forgot their Uncle Sim, have they?"

"I can't vouch for little Nick," Gay answered, "but Sonny'll be rejoiced to see you. He's in the sand pile playing. Sit down, Uncle Sim, and cool off. It's terribly hot for May."

"Can't sit down more'n a minute," declared Mr. Bartlett as she led the way into the living-room. "I got to see John Maxwell before noon. Thought I'd come round this way and leave my grip—that is, if it's convenient for you to put me up."

"Did you think we'd let you go to the hotel?"

Gay laughed, but the old man noticed that she sat down quickly as if she were very tired, and that her eyes were shadowy. This wasn't the Gay he remembered, and his face clouded.

"Ain't you feelin' real smart, dearie?" he questioned.

She straightened up, and smiled.

"Now don't you begin worrying about me! I'll be all right in no time. I lost a lot of sleep while the children were laid up, you know. Nick helped all he could, but there are some things that no one but 'Mother' can seem to manage. Besides, the first hot days take all my vitality; and since the baby came I haven't had my usual amount of spunk. Don't say anything to Nick about it, Uncle Sim. He has enough on his shoulders anyway. Sometimes I wonder——"

(To Be Continued.)

In Winter

Outdoor work and play often give rise to sprains and frost bite. Keep a bottle of Minard's by you to rub on the affected parts.

Humane Society Awards

Many Westerners Receive Bronze Medals For Heroic Deeds

At a meeting in Hamilton of the board of investigating governors of the Royal Canadian Humane Association, attended by Captain George J. Guy, A. G. Bain, M. J. Overell, F. F. Treleaven and H. E. Waterman, the following awards were granted:

Bronze medals: Calvin M. Gordon, Webb, Sask., for rescue of Robert Freeborn, Sr., and Robert Freeborn, Jr., and Reggie Chamberlain, from drowning in Swift Current Creek, Webb, Sask., July 13.

Robert R. Gordon, Webb, Sask., for rescue of Robert Freeborn, Sr., and Robert Freeborn, Jr., and Reggie Chamberlain, from drowning in Swift Current Creek, Webb, Sask., July 13.

Parchment certificates: A. T. Speed, 237 Kingston Street, Victoria, B.C., for rescue of E. Moires from drowning at Ogden Point Docks, Victoria, B.C., July 26, 1928.

Charles Max Ramsey, 2312, 14 Street, S.W. Calgary, Alberta, for attempting to rescue Raymond Leonard Jago from drowning in the Elbow River, Calgary, Alberta, July 9.

Godfrey Hansen Weller, 1314 28th Avenue, S.W. Calgary, Alberta, for attempting to rescue Raymond Leonard Jago from drowning in the Elbow River, Calgary, Alberta, July 9.

Alma McLeod, Brandon, Man., for the rescue of Mrs. J. A. Dunn from drowning in Sandy Lake, Brandon, Man., July 19.

Constable Carleton G. Moore, Pangnirtung, N.W.T., for the attempted rescue of native Koodloo from drowning at Pangnirtung, N.W.T., July 16, 1930.

Mrs. Robert Walker, Blue River, B.C., for the rescue of Evelyn Massey from drowning at Elenor Lake, Blue River, B.C., August 28, 1929.

Trans-Canada 'Phone Line

All Canadian Telephone System To Be In Operation By New Year

Work has started on the building of the British Columbia link of the Trans-Canada Telephone Line. A direct system through the Crow's Nest Pass to Alberta will be provided to replace the present system of routing telephone calls between British Columbia and other parts of Canada across the United States via Seattle. The proposed system will cost $1,250,000 and will involve some 650 miles of telephone line, 125 miles of which has already been built.

The principal Canadian telephone companies and provincial systems are co-operating in the trans-Canada project and it is expected that an entirely all-Canadian telephone connection between Halifax and Vancouver will be possible by the end of next year.

Cheapest Of All Oils. Considering the qualities of Dr. Thomas' Eclectric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Shipments Of Wheat

From August 1 to October 30, 1930, shipments of wheat from Canada totalled 75,240,000 bushels to 26 countries and shipments of flour in the same period totalled 2,175,273 barrels to 63 countries. The British Isles was the largest buyer of wheat and flour having taken 49,807,595 bushels and 774,811 barrels respectively. Germany was the second best customer for flour with 308,215 barrels.

Education On Canadian Matters Is Advisable

Ontario Postmaster Thinks Average U.S. Citizen Has Plenty To Learn

The average United States citizen needs enlightenment on matters affecting Canada, and it is the duty of United States publications to furnish this enlightenment, in the opinion of R. J. Dunsmore, postmaster, St. Thomas, who recently wrote to the National Geographic Society as follows:

"Re renewal of my fees for the National Geographic Society. I beg to advise you that I have decided to discontinue my membership. I see no consistency in continuing to send my good Canadian money to the United States, when I have had the same good Canadian money scornfully, even insolently, refused acceptance in Boston, Los Angeles, El Paso, New York and other United States centres, at a time, too, when Canadian money was rated above par.

"I might suggest that the National Geographic Magazine with its wide spread influence, could do a great service to the people of the United States by enlightening their appalling ignorance of Canada. The average United States citizen appears to regard Canada as a land of perpetual snow, inhabited by Indians and French-speaking people. You might tell them that in the section of Southern Ontario, where I live, we grow as fine a grade of tobacco as is raised in Kentucky; that our farmers are growing rich raising tobacco. Also, we grow peaches and grapes equal to anything grown in California. The very barn yards of our farmers are lighted by electricity. Incidentally, you might tell them that Canada owns one-half of all the fresh water on the globe, and that there is room in the one Province of Ontario (there are nine Provinces) to set down four of the United States, namely, New Hampshire, Connecticut, Rhode Island and New Jersey (if I am quoting Gen. Ben Butler correctly.) When we see wealthy and supposedly educated United States motor tourists coming through Ontario in mid-summer carrying heavy furs, snow-shoes, toboggans, etc., asking if there is much danger from wild animals (this is not a mere newspaper yarn—it is true); when they land at Windsor, Ontario, and ask the nearest policeman to be directed to (Windsor Castle), then surely you will admit that the general public of the United States should be taught in their schools a little of something else besides the wonderful importance of the great United States of America.

"Travelling in the United States, a well educated Washington, D.C., man, was horrified when I pretended that I didn't know who Herbert Hoover was. As a matter of fact, I could have told him the history of the Hoover, or more correctly, Huber, family right back to his German grandfather in Hamburg. In turn I asked him who Mackenzie King was (at that time Premier of Canada.) He didn't know; had never heard of him. Then, I asked him, why should I know anything about President Hoover?

"Will you kindly remove my name from the membership list, and accept my thanks for the very courteous treatment accorded me by your office in the past."

Cause Of Stuttering

Rather Odd Theory Is Held By Southern California Professor

Stuttering probably is most often caused by the victim using his right hand when he is really is left-handed, or vice-versa. This is the theory held by Dr. Milton Metfessel, professor of psychology in the University of Southern California.

It may work with either hand. A naturally right-handed person, may be using his left, or vice-versa. In either case a conflict is caused in the brain resulting in speech disorders, he says.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

Not Without Recognition

Dr. Griffin: "I must say that the world is very ungrateful towards our profession. How seldom one sees a public memorial erected to a doctor!"

Mrs. Golightly: "How seldom? Oh, doctor, think of our cemeteries!"

Minard's Liniment aids Sore Feet.

Saves Fishes From Drowning

The pulmotor, used to save human beings from suffocation, is now used to save fishes from drowning when they breathed up all the oxygen in transportation tanks of water.

An Eskimo hut, heated by seal-oil lamps, has a temperature of 70 to 80 degrees.

Price 50c a box

Palpitation Of The Heart

Nerves Were All Gone

Miss Rose Griffin, Asbern, Man., writes:—"About five years ago I was troubled with palpitation of the heart caused by a shock, and my nerves were all gone, and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and wish all others who suffered as I did would give them a trial."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Abyssinian Ruler Ambitious

Wanted Unity Of Empires and Proposed Marriage To Queen Victoria

Rulers of Abyssinia are ambitious, according to Prof. S. A. B. Mercer, who lectured recently in Trinity College Library, Toronto.

In the days of Queen Victoria, Professor Mercer told his audiences, the Abyssinian Emperor conceived the idea of uniting the two empires. He wrote to Queen Victoria asking her hand in marriage. The British queen did not reply and for some years thereafter the thwarted suitor satisfied his disappointed affections by maltreating every white man he could lay his hands on.

In more recent years, the speaker recalled, the Emperor and six kings of Abyssinia had toured Europe. One of the kings was immensely intrigued by a Rolls Royce he saw in London, England. He also saw a French car which appealed to him. He bought both and returned with his two cars and a mechanic. But he overlooked the fact that there were no roads in his mountainous kingdom. However, he solved the problem by having a road built around his place on which he still drives his two high-powered cars.

Professor Mercer argued against the popular belief that races do not change in color. The Jews of Abyssinia, he pointed out, were black. Yet they had never inter-married with the black race. In thousands of years of living in the country they had completely changed in color, though their features were still those of the Semitic race from which they had sprung.

Recipes For This Week

(By Betty Barclay)

CHESTNUT PUREE

Either the large French chestnuts or the small native kinds can be used for this tempting soup.

1 quart chestnuts.
1 pint white stock.
1½ pints milk.
2 tablespoons butter.
2 tablespoons flour.
2 teaspoons sugar.
Salt and pepper.

Shell and scald the chestnuts. Heat the stock and milk, and thicken with the butter and flour. Add seasonings. Boil the chestnuts until soft and put through a potato ricer. Add to soup. Heat well.

SAVORY BUTTER SANDWICHES

2 teaspoons lemon juice.
2 teaspoons anchovy paste.
2 teaspoons mustard.
4 teaspoons Roquefort cheese.
4 tablespoons butter.

Put all ingredients into a bowl; beat until smooth and creamy; spread on crackers; cover each with another cracker, and use with cocktails or simple salads.

A Foe To Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measures about this remedy. It goes right to work and drives asthma out. It reaches the inmost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

Manitoba Jewels

Jewellery is being fashioned from semi-precious stones found in the Winnipeg River district in Manitoba. These include sandstone, moonstone, jade, rose quartz, aquamarine, golden beryl, white beryl and sapphires. These are being mounted in Manitoba gold and are proving very attractive to visitors to the province.

B.C. Apples For British Isles

Six ships recently took large consignments of British Columbia apples to the British Isles. The apples were brought from the Okanagan Valley, the principal apple growing district of British Columbia, in 40 freight cars.

Clay As Purifier

Added to their many other uses some varieties of Canadian clay are employed for the purifying of lard and oils.

New York is the leading manufacturing city in the United States.

Minard's Liniment for all Pain.

Little Helps For This Week

"Let Him do to me as seemeth good unto Him." 2 Samuel xv. 26.

God never would send you the darkness
If He felt you could bear the light;
But you would not cling to His guiding hand,
If the way were always bright
And you would not care to walk by faith
Could you always walk by sight.

So He sends you the blinding darkness
And the furnace of sevenfold heat;
'Tis the only way, believe me
To keep you close to His feet
For 'tis always so easy to wander
When our lives are glad and sweet.

There is a bird, it said, that will never learn the song his master will have him sing while his cage is full of light. He listens and learns a snatch of this, a trill of that, a polyglot of all the songs in the grove, but never a separate and entire melody of his own. But the master covers the cage, makes the way all dark about him, then he will listen to the one song he has to sing, and try and try again until at the last his heart is full of it; then when he has caught the melody, the cage is uncovered.

—Robert Collyer.

International Boundary

Much Work Is Entailed In Keeping the Boundary Clearly Marked

To maintain in a state of effective demarcation the 5,500 miles of international boundary between Canada and the United States is one of the duties of the International Boundary Commission, the Canadian section of which functions under the Surveys Bureau of the Department of the Interior. This work involves the re-opening of the boundary vista through wooded areas, the repair of deteriorated boundary marks or monuments or their removal to other sites when necessary, the erection of additional monuments when required, the marking of the boundary on international bridges and in tunnels, and the revision of the boundary maps.

Cooking By Solar Heat

Day May Come When Fire Will Not Be Necessary

The bright day may come when Mrs. Housewife will not have to bend over a hot fire to cook that steak for supper. She'll just hitch her oven to the sun and let it go at that. That, with a little stretch of the imagination, was the hope held out by Dr. C. G. Abbot, secretary of the Smithsonian Institute, in an address before the Royal Canadian Institute at Toronto. Cooking has been carried on with great success by use of solar heat, he said, adding that there is great hope that engines driven by power from the sun may be a practical outcome.

Opposed To Modernism

A man who was opposed to the inroads of modernism, and distressed by the use of telephones and motor cars, Edward C. Witmore, 83-year-old proprietor of the Tailors' Cash Trimming House, at 86½ Church Street, Toronto is dead. In the death of this quaint man of another age, who lived a life of absolute solitude, the city loses one of its most interesting characters.

READ OF A CASE LIKE HER OWN

Decided to take Lydia E. Pinkham's Vegetable Compound

Moncton, New Brunswick—"Before my last baby was born I was very weak, nervous and discouraged. I saw an advertisement in the paper about a woman who had been like me so I bought a bottle of Lydia E. Pinkham's Vegetable Compound. I took three bottles and it carried me safely through that critical time. I have three children to care for and I feel well and strong. I have told two other women about your medicine."—Mrs. Geo Anderson, 82 Albert Street, Moncton, New Brunswick.

Lindbrook News

The mild spell of weather is helping the feed supply here wonderfully and both humans and cattle appreciate same very much. We need some compensation these days of ruinous low prices for all our saleable stuff.

The aspect of "Lindbrook Corners" is now vastly different. The store is being moved to the new road, not very far 'tis true, but enough to alter the landscape. Mr Norman Ellis is moving it by means of a stump puller.

The annual turkey sales took place last Friday and Saturday week. Mr. ... seemed to be the principal ... and the ... weren't as low as some predicted, neither did there seem to be so many turkeys raised round here as of yore.

Mrs. M. Swain is here from B.C. on a visit to her daughters, Mesdames Glenn and Whibley of this district. Mrs Swain expects to spend Christmas at Lindbrook and to return to the coast some time in January.

The final inoculation against diphtheria was performed on the children of the school here by Dr Law of Tofield. ... the kiddies by now are quite ... used to it.

A whist drive was given by Mr. and Mrs. W. Bates family of Hastings Lake last Friday and was thoroughly enjoyed by all.

Quite a nasty mishap occurred on the road going south from here last week. It seems that a gentleman, ... car stalled for one of those unknown reasons that cars do, got out in front to start her, forgetting that it was in agear. It started and ... went far enough to knock him down ... him underneath. There he lay shouting as best he could for ... Several cars passed and did not hear or see him. Then Mr. Clara Lindgren came along and being unable to move the car by himself, ran to the store and got the men working there to come to the rescue. This they did with all speed and soon had the victim free. He was taken to the store pretty badly crushed but nothing really serious. At least we believe he is O.K. for we hear of no inquests.

Lindbrook folk were shocked to hear of the death of Wilfrid Lamont formerly of Tofield and known to many ... and ... the manner by which he came by ... The sympathy of the Lindbrook people is extended to Mrs. Lamont and family in this distressing occurrence.

Mr and Mrs W. Glenn also Miss Evelyn Glenn visited the city this week.

Gifts Suggestions

A Good Silk or Linen Handkerchief makes an inexpensive and useful gift for any man or boy.
Initial Handkerchiefs plain white linen, each 25c. 3 for 70c.
Linen with colored borders and initial, each 35c. Box of three for $1.00

A Merry Christmas And a Happy And Prosperous New Year To All

The Tofield Mercury

Local and Personal

Miss Muriel Malcolm, who is attending college in Edmonton is home for the holidays.

Miss Helen McCauley who is attending normal school in Edmonton is home for the holidays.

Mrs. Noland and Miss Thelma Noland were visitors to the city this week. Mrs. Hill and Leslie will return with them on Wednesday to spend the holidays at Tofield.

Mrs. Emery and Mrs. Chapman returned home on Monday after a weeks visit with friends at Leduc and Edmonton.

Mr. and Mrs. McCullough, are spending Christmas at the Jobb home. Mrs. McCullough was Miss Helen Jobb before marriage.

Mrs. Weeks left for Detroit on Friday last for a few weeks.

Quite a large number of former residents of Tofield, particularly young folk who have left town to study and work in larger centres, are arriving home for the holidays. We mention as many as we are able to see, but we would esteem it a favor if relatives would give us any information they may have. Readers are interested in the comings and goings of former Tofield boys and girls and what they are engaged in while away.

Mr. and Mrs. Cap Lee and Miss Edith Glover motored to the city on Saturday last.

The banquet given by the Sunday School teachers and workers was much enjoyed by those present. After a bountiful spread was done full justice too, a programme was presented by the children. The little tots party on Monday too, was a complete success.

Mr. Pincott and Clifford visited Edmonton on Saturday last, returning on Sunday. They were accompanied home by Mary, Lucille and John Snell who are spending the Christmas holidays at home.

The Eastern Star and Masonic lodges have been active in preparing some Christmas hampers which they will distribute. They wish to thank Mr. Jobb for the unsolicited gift of 10 lbs of candy and all those who donated toys and other mediums of good cheer.

Until further notice the Tofield Library will be open from 2 to 4:30 on Saturdays.

The C.W.L. whist drive on Monday night was a pleasant social event. The prize winners of the drive and the draw will be published in our next issue.

CELEBRATES SILVER WEDDING

On Saturday, December 20th, Mr. and Mrs. Bert Swift gave a turkey dinner in honor of Mr. and Mrs. A. N. Booth, the occasion being the twenty-fifth anniversary of their wedding in Grandby, Que. The guests included Mr. and Mrs. J. E. Secord, it being their thirty-first anniversary and Mr. and Mrs. T. E. Seale. Mr. and Mrs. Booth were presented with a silver berry spoon, carving set and a beautiful boquet of carnations. After dinner the evening was spent chatting about old times and playing cards.

Lindbrook News

A Merrie Christmas to all from Lindbrook folk, it could be brighter but it could be worse, so make the best of what you've got, it is the spirit of the thing that counts after all, so again, "A Merry Christmas to all."

Lindbrook is the scene of activities installed their H.Qrs. on the corner near the scales and well; and from early dawn till dark the hum of motor trucks are heard as they ply to and from the siding unloading the gravel; also the locomotives on the track add to this "city's" noises as they put in full cars and pull out empties. It is said that there will be 200 cars unloaded here.

We omitted to mention in one of our recent issues re the "big wind" that it wrecked Mr. Scotts sheep barn completely, and also moved a roof of another barn two feet but left it on the roof. Mr. Bexter also had his sheep barn moved by it.

Lindbrook store is now in its "final resting place" to wit on the new road and Mr. Silversides also has his gasoline tank and stand up again by the store and ready for business.

Mr. and Mrs. W. Hooper and Miss Spende spent the week end in the city.

Ketchamoot News

Once again time has rolled around to wish the Editor and staff and all readers of the Mercury A Merry Christmas and Prosperous New Year.

Mrs. Ardley and pupils are busy preparing a Christmas concert to be held at the school house on Tuesday evening December 23rd.

Christening services were held at the regular Sunday services on Sunday. Mr. and Mrs. John Appleby's son received the name of John Keith.

Miss Margaret Mitchell has been detained home from school through chicken pox.

Mr. and Mrs. Barnes, son Ralph, and Miss Burrows, spent a few days with relatives in Calgary last week.

Mr. Lorne Lee underwent an operation for the removal of his tonsils in an Edmonton hospital two weeks ago.

Miss Pearl Gray of Lakeshore visited with friends in our district over the week end.

Mrs. Earl Carlisle visited last week with her parents Mr. and Mrs. McAllister.

Mr. and Mrs. Herman Lawson, Mr. A. F. Shultz and son Alvin motored to Edmonton on Friday. Alvin remained at the University hospital for an operation on his eye. Some two weeks ago at school porcupine quills were thrown around, one striking Alvin in the pupil of the eye. It is thought the eye will be saved.

Mrs. Geo. Lawson spent a few days with her daughter in Camrose, bringing home her small granddaughter, Maxine.

Communication

Deville, December 20, 1930
[To the Editor]

I would appreciate it very much if you would allow me a space in your paper to explain a few facts to some of your subscribers who would like to know the truth about the transactions between Lakeview Ltd. and the Cornhill Municipality.

In your issue of November 5th, you printed a letter from Ministik Lake Local of the U.F.A. with several resolutions passed by this local and the Municipal answer to same. Evidently this was not clear enough as there was to be a delegation sent to the last Council meeting for further information, but as this delegation did not show up I am taking this opportunity to go into details about Lakeview Ltd.

Mr. Harry Weeks who was president of Lakeview Ltd. came to me last spring with the plans of what Lakeview Ltd. proposed putting in as a summer resort on the west half of 16, 51, 21, w4 and asked me as councillor in division three if I could help them to get started by putting in a road for them so they could get in and out, with the trucks hauling material.

As these plans showed they contemplated spending $80,000 in our municipality which would bring in considerable taxes, I was quite in favor of the project and told Mr. Weeks I would talk to the ratepayers, and the council, and if I could be of any assistance, I would.

At a meeting held in Ministik School House with Mr. H. E. Williams in the chair, I asked the ratepayers of Ministik Lake if it was their wish that I do something to assist Lakeview Ltd. in getting started, and it was unanimous that I go ahead.

I then put the matter up before the Council and asked permission to spend $800 to put in a roadway for Lakeview Limited, which was granted.

I went to Lakeview and looked over the government road allowance, and with what little knowledge I possess in road building I could see it was next to impossible to put a road down the regular road allowance for less than three times the money I had to spend and could see I needed expert advice. This I obtained through Mr. Thomas Schultz, who is considered by the largest contractors in Alberta one of the best road builders and railroad graders we have in our province. This was no rumor as I knew Mr. Shultz was paid $75.00 per week all last summer and the same this year and I considered I was very fortunate to be able to obtain this man's advice and service.

Mr. Shultz looked over the regular road allowance and estimated it would take between $500 and $900 to put in one half mile of road due to three deep sloughs which had from two to three feet of water in at that time. As Mr. Shultz has had 25 years experience in this line of work I decided he was correct in his estimate and that it was necessary to either buy road allowance on the left or right of these sloughs to get around.

I went to Edmonton and consulted Mr. Weeks and Mr. R. H. Frouth the contractor, about this condition of the road allowance and an agreement was drawn up between Lakeview Ltd. and Cornhill Municipality whereby in consideration of Lakeview Ltd. donating a piece of land about 50 yards east of the regular road allowance, Cornhill Municipality would put in a road to the extent of $200 and would pay for one coat of gravel on said road upon the completion of Lakeview Ltd. original plans of spending $80,000 on this piece of land and tendering to Cornhill an itemized statement of the original cost of said gravelling to be paid over a period of five years, one fifth the original cost price to be taken off Lakeview's taxes each year and that Lakeview was to keep in repair and maintain the road in good condition.

This agreement was put before the council and was approved.

I then authorized Mr. Shultz to go ahead and do the work which he did for $185.00. The three trips Mr. Schultz and myself made and the staking out of the road didn't cost the ratepayer a cent, also three trips I made to Edmonton I did not charge up.

The road was then surveyed and the land registered in the Land Titles Office in Cornhill's name as the road plan 3340 MD, the plans of which are in the municipal office for anyone wishing to do so may exam-

Town Gossip

The gossip column takes this opportunity of extending the season's best wishes to all readers.

* * * * * * *

Christmas comes but once a year, and is a welcome break into a year of toil and striving.

* * * * * * *

By the very nature of things Christmas finds some of us better off as regards material things than others. But at this particular time, even if at no other, all like to feel that their neighbors are receiving a full share of Christmas joy as they themselves are.

* * * * * * *

Consequently, it is with real pleasure that the gossip column is able to record acts of goodwill by organized groups in the Tofield district.

* * * * * * *

Readers of the country correspondent column will recall that both Amisk Creek and Ketchamoot ladies' organizations have both done something to distribute cheer among those less fortunate and far removed from [illegible].

* * * * * * *

The U.F.W.A., too, have been busy thinking of others as well as themselves.

* * * * * * *

Then there is the man, who, because a little girl said hello to him as he came from work daily, and fearing that Santa might not have enough fine big dolls to go around, bought one for this little girl.

* * * * * * *

And then there are other gifts and acts of good cheer done here in Tofield and district which never see the light of publicity, and if one did direct the light of publicity upon them, the givers would not be pleased.

* * * * * * *

All in all, we are not such a bad bunch here in Tofield and district. Not half as ornery and mean as we would sometimes like to make ourselves believe.

* * * * * * *

Truly the Christmas spirit is a potent one.

* * * * * * *

Information to hand is to the effect that the Tofield "picture show" is to cease operation after next week. This is not the most cheerful news. A picture show may not be the most important things a town can possess, but it has its place in the general run of life in the small town, and it is not without some regret that we hear of the Tofield picture show ceasing operations.

* * * * * * *

The Saturday night show has been running for some number of years now. It was going under the partnership of Bowker and Elliott when we first "hit town." Bowker was enterprising and resourceful and managed in those talkieless days to stir up quite a little interest in the shows.

* * * * * * *

We remember on one occasion he bought some ordinary wall paper and tore it up into irregular pieces and then brought it round to the R. N. Williams printing office to have the name and particulars of the show printed upon it. It was headed "We have torn the wall paper off the wall to make room for you."

* * * * * * *

Those were the days of "The Million Dollar Mystery," the famous Keystone comedies and pictures that became "bigger and better" as time passed.

* * * * * * *

It may be that even small town and rural dwellers have become too sophisticated as regards pictures of the silent kind, but we are inclined to believe the picture directors or authors or both have gone stale. We are told Tofielders like "westerns," but no "western" ever gripped a Tofield audience like "When Winter Comes", or "The Little Minister" or "The Bonnie Brier Bush," or a few others that we remember. The court room scene in "When Winter Comes" had the Tofield audience enthralled. To keep up interest, pictures must have plot and counter plot, real meat for the intelligence of spectators. There seem to have been too much stress placed upon action, desirable as it may be, and photographic effects.

* * * * * * *

Anyway, we are wandering from the subject. We are sorry to see the picture show cease, and hope it is but temporarily.

* * * * * * *

We have taken hay, greenfeed and a nice young turkey on subscription accounts this year.

Canada's Markets Abroad

The securing of markets abroad for the products of Canada, whether those products be in the form of foodstuffs, raw materials, semi-manufactured or fully manufactured articles, is one of the biggest tasks confronting not only the Federal Government, but farmers, producers, manufacturers, financiers, and exporters generally. It is safe to say that the Government of Canada quite appreciates the fact whether it be for the time being doing its full share in this direction. Conservative auspices, is sincerely assisting to develop existing markets and to secure an entry into new ones.

The task is a difficult one at all times, and particularly so just now in view of existing world economic conditions. Yet because of these very conditions it is all the more imperative that the maximum effort be put forth.

Canada is a young country, with comparatively its vast extent of territory, an abnormal development, a comparatively small population for its size, and yet with its energy, activity and industry this Dominion is not only capable of handling, but is actually producing an enormous surplus over and above what the people require of certain products and commodities. The domestic demand is limited, therefore, keep the people of Canada busy and make them prosperous, this country prosperous. Canada must have foreign markets in which to sell its products, and those markets must be continuously developed in order that the ever-expanding production of the Dominion may be profitably sold.

The situation is no new thing and has been engaging the attention of successive governments at Ottawa for many years. It will be of interest to the people generally to know how energetically and effectively the work of securing and developing markets for Canada in other lands all over the world is being prosecuted through the offices of trade commissioners.

These Canadian trade commissioners abroad are credited with being largely responsible for the phenomenal development of the Dominion's foreign trade within the last decade.

During last year they obtained millions of dollars' worth of new business, arranged for work, new agencies and submitted 4,245 reports to Canada on items all without charge to the exporters concerned.

Commercial agents' offices are in strategic centres throughout the world. At present there are thirty-two posts, each administered by a Trade Commissioner and in addition there are fifteen assistants and eight junior officers in training in Ottawa for future work abroad. All but three of the fifty-odd Trade Commissioners, assistants and juniors are graduates of Canadian universities and the Trade Commissioner service is regarded as the ideal preparation for young Canadians with university training in arts, economics, science and commerce. The trade commissioners are usually appointed for a period of from two to four years, depending upon the climate in which the post in situated. They then return to Canada for an extensive tour of the Dominion. During this furlough they visit the principal cities of the Dominion, interviewing Canadian exporters and any one else who may closely first hand information on the territory covered by their foreign service. In this way they maintain personal touch with Canadian business men and keep thoroughly familiar with their country's industrial progress.

While the work of the Trade Commissioners is primarily concerned with the development of Canadian export trade, they may be called upon at times to do work that includes fees for other countries by Ambassadors, Consuls and Commercial Attaches.

Unusual Problem For League

Men Have To Settle Dispute Over Small Islands

Possibility is looming that the League of Nations may have to settle a dispute over instruments of the Smithborough, Ireland, band. The British Customs authorities have seized the pieces after they had been sent to the parish priest of Gondon, County Fermanagh. The was a sequel to the evidence given in a case heard at Monaghan from which it appeared that the members of the Smithborough band had a disspute and the instruments were taken to the parish priest's house. Part of the parish is in the Free State and part in Northern Ireland. The trustees authorized to take the instrument back to Smithborough instead of the customs duty, but the British Customs authorities have them now and are demanding duty on them as well as a penalty for taking them into Northern Ireland by an unauthorized route.

Cheap Transportation Method

Washington Farmers Use Pipe Line For Transferring Wheat To Market

Instead of hauling wheat fifteen miles over rough roads several grain growers in the state of Washington send it from farm to railroad by pipe line. The grain is forced through a one-inch galvanized iron pipe direct to the railroad tracks where surplus is shot into cars. Long shipments while in other sections wheat is run from the pipe directly into freight cars. Hauling cost about fifteen cents a bushel and the pipe line method less than two cents. Popular Mechanics Magazine.

Ancient Pottery Found

Pottery of pottery, arrow heads, wheat grinding stones and flint and unusual formations have been found on an ancient mound on the banks of Cache Creek near Lawton, Oklahoma. Practically every rock found appeared as if it had been made by Edgar Allan Poe stones are unusually sharp. Near the mound bones of extinct prehistoric animals were found recently.

Minard's is unequalled in swiftly ends the painful thing. Rub it in and leave you fuller and relaxed.

MINARD'S KING OF PAIN LINIMENT

W. N. U. 1889

Soo Capital and Labor As Allies

Confession and Riddle Must Disappear Says Sir Henry Thornton

Sir Henry Thornton, president of the Canadian National Railways, in an address at Philadelphia, Pa., said that future contact between Capital and Labor and between employers and employees will find its greatest progress and finest expression in what he described as the era of "The Serf."

Sir Henry Thornton spoke before the Franklin Institute in a lecture on "man and industry."

"Labor seeks its right to partnership," said Sir Henry, "and sagacious capital will welcome such a partnership with a recognition of the partnership principle. There, automatically, must disappear that contention and strife which is just as expensive in the industrial world as it is in the relations between nations.

"In the day to come, these industries will prosper most which give labor as equal partner, and Labor will best prosper when it recognizes the obligations and the dignity of that partnership."

Women and Cigarettes

National Crusade Against Woman Smokers Launched At Boston

A national crusade to save women from the alleged social, moral and physiological perils latent in tobacco was launched recently at Boston Against at the growing popularity of the cigarette a group here has organized the "Anti-Smoking League for Moral Suasion" will be the first weapon of the league, according to Mrs Robert P. Williams, president but when and if that fails, laws will be sought to prevent women from smoking cigarettes Pipes and cigars were not mentioned in the League's platform

Men will be invited to join, Mrs Williams announced. She admitted that there was slight chance of an immediate ban on cigarette smoking but she had hopes

"We aim to reform the minds of those young girls and young women especially young mothers, who are smoking cigarettes," she explained.

Some Strange Offerings

Among the offerings displayed on a table in front of the pulpit of Hyde parish church, Winchester, England, during the annual harvest festival, were a bottle of whisky, a bottle of beer, and five kippers. Other gifts were a chicken, a duck, joints of pork and mutton, a lobster, a hamper of coal, kindling wood, hops, milk, a bottle of mineral water and a jug of water

"Fight the good fight with all thy might" was one of the hymns sung at a wedding at Twickenham, England, recently.

WAR HERO AND FIANCEE

Commander E. Tyvo Berthon, D.S.O., of the Royal Navy, who served on H.M.S. Sirius, one of the block ships in famous Zeebrugge blockade during the great war, with his fiancee, Miss Doris Marjorie Stevens, of Wimbledon, England. Copyright, 1930, by Pacific and Atlantic Photos, Inc.

An Unusual Court Action

London Girl Suing Man in Absence For Breach of Promise Proceedings

London, England, is wondering just what sort of a case Miss Ellis Mills Arpen, a shop haired girl of 22, who, assuming the role of "common informer" has since legal actions which may set her a large sum of money.

The actions are for writs claiming damages of more than £100,000 from film corporations and movie houses on alleged infringements of a law of 1781 forbidding Sunday performances and recently sanctioned by a ruling of three high court judges.

Under British law a "common informer" may receive a part of the whole of penalties accruing to the crown as a consequence of the information given, and, subject to certain restrictions, it would appear that this statute would entitle for Miss Orpen.

Although there has been considerable agitation to close the Sunday movie houses by the Sabbath Observance League, the younger women, who works daily in London, told interviewers that she was playing a lone hand, and was not backed by any organization.

The rule of "common informer" is unusual in Great Britain in this day and time, but it has an ancient standing in British law, having been regularly used as long ago as the reign of Henry VII.

Linking Canada-U.S. Air Mail

Plans Will Operate Daily Between Winnipeg and Minneapolis

Agreement has been reached between the postal departments of Canada and the United States, whereby contact between the air mail services of both countries will be linked between Winnipeg and Minneapolis.

The details of the agreement are: Air mail will leave here from Winnipeg to Pembina daily by the new Canadian Airways Ltd. At that point, which is on the international boundary, the mail will be picked up by the United States Air Mail service and flown to Fargo and Minneapolis.

The agreement trains out a difficult point between the two countries The United States really desired to fly the Winnipeg route going and coming, but the Ottawa department insisted that Canadian planes be used for the Canadian end of the service.

The linking up of the two air mail services is the first step in the ultimate stage of world events, it was stated by William Mulvihill, deputy postmaster traffic manager for the Canadian Pacific Railway, who returned on the "Empress of Richmond," which arrived from Liverpool, England.

Improved Quality Of Sheep

Increasing recognition of the value of improving quality in sheep has led to 4,000 rams being graded in Canada this year. At the office of Hon. Robert Weir, Minister of Agriculture, it was announced that official lists of pure-bred rams are available and may be obtained from sheep promoters of the Dominion livestock branch.

Unless women be expelled from the house, no child can be healthy Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

"Let me prove to you that advertising brings results!" "I know," groaned the manufacturer, "Yesterday I advertised for a night watchman—last night by shop was broken into."

Minard's Liniment for Frost Bite.

Felt Tired Out All Day

Could Not Sleep at Night

Mrs Alphonsed Laberde, 9681 St. James St., Montreal, Que., writes: —"After a spell of the grippe I was left very nervous, and felt dreamy and tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills, and after using four boxes I was completely relieved of my trouble, and can recommend your Pills to everyone."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

MILBURN'S HEART AND NERVE PILLS

Price 50c a box

Canadian Copper

Production Of Refined Copper Greater Than Domestic Demand

The proposal in Washington that a duty be levied on refined copper brings out the fact that Canada shortly will be producing more of this product than she requires for her own use. For many years the Dominion brought practically all its refined copper from United States. One of the complaints often made was that Mister copper from Canadian mines went to United States where it was refined and returned to it in a much more expensive state for use here.

With the new plant at Copper Cliff which opened last July and the one erected by the Noranda and other companies, the Dominion will be a considerable exporter of refined copper if these plants, as well as the one at Ytell, B.C., all operate at capacity. It is estimated Canada can produce 50,000 tons of copper a year. The total production of which the United States will be entitled to will be neighborged of 250,000 tons.

At present there is a end to the market and a pound paid by the Dominion Government on copper refined in Canada from Canadian ore and used in Canadian manufacture. There is also a tariff against certain types of her metals.

Duke Tried a Farce

Believe Confession Of Russian Regicides Was Staged For Effect

A belief that Leonid Rannin, Russian engineer, whose death sentence was commuted after his conviction with seven others on accusations of plotting against the Soviet regime, is innocent of the charges against him was voiced by M. W. Brodin, of New York, consulting engineer and friend of Rannin.

Brodin, who was in Europe with Rannin, while the Russian engineer was allegedly negotiated with groups hostile to the Soviet government, declared he saw "never a sign of a plot."

The confession Rannin made accusing himself of sabotage and of plotting the overthrow of the Soviet government, as well as those of other proceedings at the trial of the eight engineers, was termed the "most astounding piece of propaganda I ever encountered," by Brodin. He further declared the confession was arranged by the Ogpu, Soviet secret police, as part of a "revolting farce" to strengthen the position of the Stalin dictatorship.

If the world's acreage of rubber could be stretched in a band around the equator it would make a belt almost half a mile wide.

Costly Wedding Gift

For Noted Aviator

Kingsford-Smith Receives Silver Cutlery Service From Oakland, California.

Among the costly presents for the wedding of Wing Commander Charles Kingsford-Smith and Miss Mary Powlas, which occured at Melbourne, Australia, Dec. 10, is a solid silver cutlery service in beautiful cabinet of bird's eye maple, presented by residents of Oakland, California.

It was at Oakland that the famous aviator began his circumnavigation of the globe and trans-Pacific flights, and ended the flight around the world after crossing the Atlantic.

Shipments From Flin Flon

Manitoba Zinc and Copper Being Exported in Large Quantities

Shipments of blister copper and of zinc concentrates are being made steadily from the Flin Flon mines operated by Hudson Bay Mining and Smelting Co. Ltd., at The Pas, Manitoba, according to T. P. White, superintendent of the National Geographic Society, replaced the lava wastes of the Aleutian Peninsula last summer and found the 15 vessels were discharging where no other plant life could survive.

Dr. Griggs, botanist, says the lava areas, covered 18 years ago during the first eruption of Katmai volcano, were barren of soil, and there was no apparent trace of nitrogen, necessary for plant growth.

Where the liverworts have been established long enough to decay and form beginnings of soil, however, other plants were starting, said Griggs.

Starved In Hard Luck

Series Of Accidents Marred Wedding Day For Jersey

Several things happened before during and after the wedding at Philipsburg, New Jersey, of Mr. and Mrs. William Koch. They were apprehensively as follows:

The bridegroom's father fell ill and could not attend.

The flower girl fell from a piano stool and broke her arm.

The bride's mother fell down a flight of steps, receiving severe bruises.

A party of friends drove ahead of the bridal automobile and stopped every time they saw a collision.

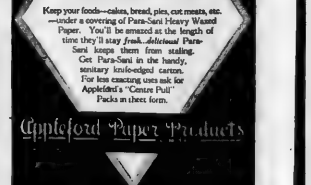
A passing motorist stopped to inquire if his aid was needed. As he stepped from his automobile a fourth car hit him and knocked him down.

Mr. and Mrs. Koch had planned to go to Niagara Falls. They changed their plans and booked for Wilmington, Delaware.

Visitors From Britain

Many British and European Tourists Are Expected To Visit Canada

Within the next two years visits to Canada by British commercial travelers, commercial and industrial men will be increased in number and enhanced in importance as a result of the dominating plans taken by the Canadian Pacific Railway Company, stage of world events, it was stated by William Mulvihill, railway passenger traffic manager for the Canadian Pacific Railway, who returned on the "Empress of Richmond," which arrived from Liverpool, England.



Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc. —under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh. Moisture-Proof Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary fold-edged cartons. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Appleford Paper Products

BIG REDUCTION IS NOTED IN OUR WHEAT STOCKS

Ottawa, Ont.— Canada's wheat stocks are gradually getting down near the totals of last year at this time. When the crop season opened on August 1, there was 112,000,000 bushels of a carry-over. Added to this was the new crop estimated at 280,000,000 bushels. This was figured to indicate an exportable surplus of 110,000,000 bushels more than in 1929 or about 200,000,000 bushels which could be exported. This was exclusive of wheat used for home consumption, seed, feed, etc. At the end of November last, however, owing to the increased clearances, the export surplus were only 58,000,000 bushels Higher, and accounted to about 278,000,000 bushels. This does not include wheat held in the United States.

The above figures were included in an official summary of the bureau of statistics issued recently on the wheat situation. It adds that the 278,000,000 bushels surplus is not unreasonably high for the season of the year, considering that the five year average exports of the last eight months of the crop year December 1 to July 31 amount to 167,450,323 and the average exports of July and Aug ats at the end of each July for the past five years was 76,000,000 bushels. On New Year's he will likely be in western home.

Five years, Premier Gardiner has been out and home and relishes to his native provinces of New Brunswick, on Christmas, and he will probably do so again in the coming season. On New Year's he will likely be in western home.

Shipping Fish By Air

New Venture In Northern Saskatchewan Has Been Inaugurated

Prince Albert, Sask., Dec. 31.—"Pickling," 600 pounds of whitefish, freshly caught at Lac La Ronge, were landed here by aeroplane in less than two hours after netting, by the Dahl Lake Fish Company, Saskatchewan and Construction Company. This has inaugurated the new fishing venture in northern Saskatchewan, announced by the cargo was unloaded, Capt. "Fabian Bill" Heanish took off for another load of 1,000 pounds more. The fresh catches are consigned to the Canadian markets, Canada and the United States.

Control Of Labor

Reverts To Thirteen Up Laws Governing Employment

Moscow, Russia.—Strict control of labor within the U.S.S.R. was announced by the Central Executive committee of the Union in a decree published here.

During the third year of the five year plan, according to the decree, there will be no changing of jobs by workers, technicians and others except with the formal permission of the authorities. Salaries and wages for each particular job will be the same throughout the nation, thereby eliminating all competition for labor, which was marked last year.

Governments Plan Reward For Aviator

Heroism Of Pilot Wesson Will Be Recognized

Victoria, B.C.—The provincial government in co-operation with the Federal Government, will recognize in tangible form the heroism of Pilot Everett L. Wesson, who recently rescued two members of the lost Bruce party in Northern British Columbia, it was stated here. A joint special grant will be made to Joe Walsh, the prospector who assisted Mr. Wesson in his rescue work.

Unscrupulous Advertising

Toronto, Ont.—A recommendation that the police department have one man solely for the purpose of scrutinizing all advertisements, and to follow up any that look suspicious, owing to the number of cases of young people being swindled out of their savings by unscrupulous advertisements in the daily press is contained in the presentment of the grand jury in general sessions made to Judge Widdifield.

Salmon Twenty May Fall

Seattle, Wash.—Sponsors of the international sockeye salmon treaty between the United States and Canada, headed by R. A. Sims, Port Townsend, forecast its failure. The treaty is dead, as there is no reason any why it should be discussed," said Sims. Sims is a former member of the State Fisheries Board.

Sales Liquor Haul

Providence, R.I.—The British oil screw boat "Maskinongy," registered at St. George, Newfoundland, was captured by a coast guard patrol boat, Tuesday, December 16, with a cargo of liquor off Salisbury Point, coast guard officials reported.

Population Of Logo Fearful Of Repetition Of Mysterious Epidemic

Liege, Belgium.—Population of the Liege district became highly alarmed at the appearance of a disease fearing a recurrence of the recent mysterious epidemic which killed more than three-score persons.

Many families of Engis, Jemeppe, Chiguee and Herstal prepared to move from the valley to the neighboring heights, and those suffering from asthma or other respiratory affections hurried especially to evacuate the lower places.

They were all the more anxious to leave where the news spread that post mortem examinations of the previous victims and scientific investigations of the tragedy had not been able to fix definite blame for the deaths

Spurred by the reappearance of danger, the government rushed the appointment of a special commission which had been decided upon at the recent cabinet meeting

One reason for fear is the fact that many persons have not recovered from the previous attack. At Engis alone, nearly 200 persons still are under medical attention.

HEPBURN TO LEAD ONTARIO LIBERAL PARTY

Toronto, Ont. Mitchell Frederick Hepburn, member of the House of Commons for Elgin West, was elected leader of the Liberal party in Ontario.

Only one ballot was necessary in the straight contest between Mr. Hepburn and Elmore Philpott, Toronto, newspaperman. Although the results of the division was not announced, it was understood Mr. Hepburn received 437 votes and Mr. Philpott, 97. There were 607 delegates at the convention.

Six names were put forward when nominations were called for at the opening, but the contest quickly narrowed down to a straight fight between the aggressive Western Ontario parliamentarian and Philpott. W. K. Murphy, K.C., and Arthur D. Roebuck, well-known Toronto lawyer, withdrew. Peter Heenan, former Dominion Minister of Labor, quickly withdrew. They were followed by W. E. N. Sinclair, K.C., of Oshawa, for more than seven years House leader of the party in the legislature, who declared he wanted to give the other fellow a chance." In withdrawing, Mr. Sinclair pledged the two men still in the running.

The new leader said he had no immediate statement to make regarding leaving the federal field. He was unable to say whether he would continue to represent West Elgin in the House of Commons until a provincial general election is held or whether he could contest a by-election. From other sources, and quite reliable, it was learned the chances were Mr. Hepburn would maintain a remote control over the Liberal members of the legislature and continue in the federal field for possibly one or two sessions.

Victoria, B.C.—The provincial government in co-operation with the Federal Government, will recognize in tangible form the heroism of Pilot Everett L. Wesson, who recently rescued two members of the lost Bruce party in Northern British Columbia, it was stated here. A joint special grant will be made to Joe Walsh, the prospector who assisted Mr. Wesson in his rescue work.

SPANISH REVOLT IS BEING KEPT WELL IN HAND

Madrid, Spain.—Widespread strikes with half-a-million men out and repeated riots continued in many parts of Spain; but the attempt to overthrow the monarchy seemed decisively crushed, at least for the time being.

King Alfonso himself continued to dominate the situation, keeping in constant touch with distant cities by telephone and conferring at length with his cabinet ministers. His right hand man, Premier Damaso Berenguer, was put to bed with a severe case of tonsilitis, but his doctors said he would recover with a bit of rest.

Throughout the kingdom the civil authorities had surrendered their position under martial law and troops were in charge at strategic points. The Foreign League came into several cities and the tumultuous cheers with which the people received them was interpreted as an indication that the men in the street is tired of the disorders of the past few weeks.

The artillery held Barcelona, four men were killed in a street fight at Oviedo, and mobs clashed with the soldiers at Santander, Valencia, Alicante, Isla Cristina, and Huelva, where dock workers refused to unload a fishing smack and the crew was thrown overboard. There were disorders also at Bilbao and San Sebastian, but both those towns seemed to be calm with the army in control.

The jails are full and batches of prisoners have been locked up in the modern picture house which have lost no audiences for days. It was expected that most of the prisoners would be turned loose soon and that leaders in the unsuccessful revolt would receive nothing heavier than prison sentences from the court martial which were in session.

Pay Causes Alarm

Payment Of Logo Fearful Of Repetition Of Mysterious Epidemic

Liege, Belgium.—Population of the Liege district became highly alarmed at the appearance of a disease fearing a recurrence of the recent mysterious epidemic which killed more than three-score persons.

They were all the more anxious to leave where the news spread that post mortem examinations of the previous victims and scientific investigations of the tragedy had not been able to fix definite blame for the deaths

Spurred by the reappearance of danger, the government rushed the appointment of a special commission which had been decided upon at the recent cabinet meeting

One reason for fear is the fact that many persons have not recovered from the previous attack. At Engis alone, nearly 200 persons still are under medical attention.

Gold Production Higher

Figures Show Canadian Output Made New Record

Ottawa, Ont.—Gold production in Canada reached a new monthly record for all time in October last, when the total output amounted to 174,870 ounces, according to figures compiled by the Dominion Bureau of Statistics. The bureau's monthly review shows all branches of the Canadian mining industry maintaining high levels of production with the output of the 13 mineral products showing advances over October, 1929.

SPANISH REVOLT IS BEING KEPT WELL IN HAND

Madrid, Spain.—Widespread strikes with half-a-million men out and repeated riots continued in many parts of Spain; but the attempt to overthrow the monarchy seemed decisively crushed, at least for the time being.

King Alfonso himself continued to dominate the situation, keeping in constant touch with distant cities by telephone and conferring at length with his cabinet ministers. His right hand man, Premier Damaso Berenguer, was put to bed with a severe case of tonsilitis, but his doctors said he would recover with a bit of rest.

Throughout the kingdom the civil authorities had surrendered their position under martial law and troops were in charge at strategic points. The Foreign League came into several cities and the tumultuous cheers with which the people received them was interpreted as an indication that the men in the street is tired of the disorders of the past few weeks.

The jails are full and batches of prisoners have been locked up in the modern picture house which have lost no audiences for days. It was expected that most of the prisoners would be turned loose soon and that leaders in the unsuccessful revolt would receive nothing heavier than prison sentences from the court martial which were in session.

LABOR PARTY ESCAPES DEFEAT BY SIX VOTES

London, England.—By the narrow majority of only six votes, Premier Ramsay MacDonald's ministry survived a division in the House of Commons.

The vote came on an amendment moved by the Home of Lords to the Expiring Laws Continuance Bill providing for suspension of the Dyestuffs Act for another year. The government was anxious to abolish the act upon its present expiration next month and therefore urged the Commons to reject the Lords' amendment.

By a vote of 264 to 228 the House of Commons did so and the Expiring Laws Bill was thus returned to the House of Lords for further consideration.

The fact that the Government was so nearly defeated was largely due to the absence of its usual Liberal support. Analysis of the balloting showed that the Liberals, who hold the balance of power and generally vote with the Laborites were for the moment led into three camps some voting with the government, some against it and some abstaining.

Rt. Hon. David Lloyd George, Liberal chieftain, was not in the House when the division was called. About 12 Conservatives were native in the House nor were paired for the division. Had this party polled its full strength the MacDonald government would have been defeated.

In well-informed circles it was believed that the Lords, specially since the encouragement they received from the narrowness of the government's majority, would insist on their amendment. In that case the government would either have to bow to their wishes, which was considered unlikely, or to run the risk of a slaughter division, which might well be even closer than the first

An alternative would be for the government to throw overboard the whole Expiring Laws Bill. Here Mr. MacDonald is in a difficult position, because the passage of this bill is necessary to secure the continuance of various measures, including the First Restrictions Act, which the government is most anxious to preserve

The situation has thus become one of the most complicated which has arisen in British politics for a long time, not only because it contains the possibilities of unexpected developments from the point of view of party politics but because it may also bring up the old issue of precedence between the House of Lords and the House of Commons in an acute form.

Delegation Waits On Postmaster-General

Mail Carriers Ask For Improvements In Their Routine

Ottawa, Ont.—Representing the Federated Association of Letter Carriers of Canada, a delegation waited on Hon. Arthur Sauve, postmaster-general, to press for improvements in the routine of the mail carriers.

Mr. Sauve promised careful consideration of the requests of the delegation, including the following: Holidays between May and October rather than in the winter months; increases and improvements in personal payment for overtime work and elimination of [illegible] the weight of the mail carrier's bag to 35 pounds when he leaves the post office; and regulations concerning magazines and newspapers in the mail and the disposal of undelivered letters.

Charge Is Dismissed

Judge Lindsey Is Acquitted By Magistrate Who Says He Is Closed

New York, N.Y. Charges against former Judge Ben B. Lindsey of Denver, growing out of his demand for a hearing during services in the Cathedral of St John the Divine two Sundays ago, faded among the shadows of a meeting in Ottawa between the cabinet and the Western Premiers, the retail farmers in the [illegible] wheat. Various agrarian associations in the prairie provinces favored establishment of wheat at prices ranging from 70 cents to $1 a bush No. 1 Northern. Fort William

Agricultural authorities state that if wheat values are stabilized at 70 cents per bushel the Federal Government would be required to appropriate $37,000,000.

Advocates Hog Raising

Says Raising Of Hogs Will Save the Situation In the West

Winnipeg, Man.—"The hog will save the situation in the west, just as it did in Ontario in the early days," declared Jacob Smith, general manager of the Harris Abattoir (Western), Ltd., remarked recently in an interview. Farmers are rushing to get into the hog business, he added.

Admitting that with greater production, hog prices will fall, Mr. Smith said they never had been at a time when the ratio between the cost of coarse grain and the price of hogs did not leave room for a profit to the farmer Canada, he thought, was the logical source of pork supply for Great Britain.

Talk Of Secession

Acute Economic Situation In Responsible, Says Bracken

Winnipeg, Man.—Fear that further demands for secession of the west from the Dominion may be heard before present problems are solved was expressed by Premier John Bracken of Manitoba.

"It is to be regretted that conditions are such in many parts that people feel they have justification for such reports," said Mr Bracken, referring to resolutions passed by a farm body at Wilkie, Sask., favoring secession unless agrarian relief is secured. "But I fear there will be more demands of this nature before our present problems are solved."

Grain Marketings Increase

C.N.R. Shoe Slightly Satisfactory Increase Over Figures For 1929

Winnipeg, Man.—Grain marketing along the lines of the Canadian National Railways show a highly satisfactory increase over the figures of 1929, according to a statement issued by C. P. White, superintendent of our service. This year 122,972,000 bushels have been marketed since August 1, while over the same period in 1929 only 94,500,000 bushels were marketed. An increase of more than 28,000,000 bushels is noted.

Prince Albert Wants Senator

Prince Albert.—Conservative workers of Prince Albert constituency have decided to petition Premier R. B. Bennett requesting that the present Saskatchewan vacancy in the Senate be filled by a man from this constituency. No name was suggested in the resolution.

May Represent Canada

Ottawa, Ont.—Hon. H. H. Stevens, Minister of Trade and Commerce, may be Canada's representative at the Buenos Aires exposition, which will be opened by the Prince of Wales on March 14 next.

PLAN MEETING OF PREMIERS AT REGINA, DEC. 30

Winnipeg, Man Prairie premiers are planning a conference with Rt Hon R B Bennett, prime minister of Canada, when he arrives in Regina December 30, to address a public meeting. The premiers of Alberta Saskatchewan and Manitoba hope to place their problems before Mr Bennett shortly after Christmas and during his sojourn in the Saskatchewan city

Premier J. T. M Anderson of Saskatchewan, on behalf of the Manitoba and Alberta governments has already issued invitations to the conference, which will attempt to have the conference held in Regina Premier Bennett, it is believed will be eagerly awaited announcement as to his plans for wheat marketing and prices, the vital factors in the Canadian west today Then the premiers hope to place before Premier Bennett their troubles arising out of the decline in wheat values and the condition of the farmers as a result of the grain situation

The Federal Government was in session at Ottawa between the cabinet and the Western premiers, the retail farmers in the [illegible] wheat Various agrarian associations in the prairie provinces favored establishment of wheat at prices ranging from 70 cents to $1 a bush No. 1 Northern. Fort William

Agricultural authorities state that if wheat values are stabilized at 70 cents per bushel the Federal Government would be required to appropriate $37,000,000.

RANDOM THOUGHTS ON CHRISTMAS—
(Canadian National Railways Magazine)

CHRISTMAS IS the season for the young. The older people are the hosts, the children the guests at the family party. It is the day when we become children again with all the zest and buoyancy and freedom from responsibility which is the happy characteristic of childhood. We enter the charmed land of make-believe, that land in which the child revels and from which we emerge all too soon to meet "the slings and arrows of outrageous fortune". Prosaic people who are ever insisting on facts and what they call realities may discount this day when imagination runs riot; but imagination is one of the greatest boons of life—take it away and life would be stale, flat and unprofitable. I pity the person who cannot read "Alice in Wonderland", I would rather write a book like that than be the author of the heaviest tome on political economy, or the most erudite scientific work ever produced. The one may be written by a learned statistician, the other by one who has explored the recesses of human nature.

Christmas is a day of reminiscence. Now and then, one meets with that most unfortunate of individuals—the person who reviews his early years with bitterness; but ordinarily it is not so; most of us look back and see these years through a golden haze of healthy sentiment. They may not have been comfortable years—for which most of us should say, thank heaven! but we now appraise them, not only by the touchstone of utility but of sentiment as well.

Sentiment! Another of our most precious possessions. It is a mark of the human to be sentimental; sensitive to influences and values that cannot be weighed, labelled and ticketed, or estimated as so much in the coin of the realm. People without sentiment are people without soul, heavy dull and often brutal. So, we give rein to memory, imagination, and sentiment, and we traverse the years and erect in the present, so full of care and struggle and disillusionment, the golden idol of youth.

But Christmas not only ministers to sentiment and thereby enriches us, it is provocative of practical suggestion as well. It is essentially a day of the home, with all that this imports, that most gracious of all institutions for unalloyed pleasure, as well as the most powerful of all agencies for the formation of character. And by home we mean a home, not a house, however elegantly appointed; not a dwelling place, or private inn, where we eat and sleep, too frequently miscalled a home. It is said that "stone walls do not a prison make, nor iron bars a cage" to the man whose spirit is free; neither do four walls, a roof and any number of partitions make a home. Certain human qualities there must be to constitute that noble institution.

The home is a place where manhood is appreciated, womanhood is honored, and weakness is respected and helped. It is not only a place where contentment reigns and comfort is secured, it is also the training school for those qualities that make for the highest type of citizenship; for if the qualities nurtured and produced in the true home were extended beyond its limits we should soon see a new era in all our social relationships and an end to most of our social ills. What are these qualities? We cannot do more here than enumerate some of them, and chief among them are.—

Mutual Confidence: Are we wrong in expressing the opinion that suspicion is one of the most baneful elements in social life. There is a feeling that we must be on our guard lest we be taken advantage of. Perhaps there is some ground for this but that is something which we need not now discuss. The point is that if the mutual confidences which exist in the average home were projected into society, we should have gone a long way towards peace and concord.

Mutual Respect: Perhaps it is this lack, as much as anything else, which lies at the root of distrust and dislike. Men must respect men because of what they are, namely, human beings. In the home there are differences in gifts, in ability, in education, but there is complete harmony among its members. There is respect for authority, and authority there must be, but it is an authority unselfish, sacrificial and considerate.

Mutual Forbearance: Each member of the home has regard to the personality of the other, and the noble and necessary quality of give and take obtains. Finally in the home the question of rights disappears, or, rather, disappears only to reappear in nobler forms by the emergence of the sense of duty. Christmas is not only a social festival; it is a social object lesson and a social challenge.

COMPARISONS ARE ODIOUS BUT THEY BRING OUT UNDENIABLE FACTS

Compare Alberta in Prohibition days, with bootlogging rampant, "blind pigs" in so-called drug stores, the "smart" hip flask, the disregard of law and order.

TODAY—Properly licensed hotels and clubs under strict government supervision, regulated beer rooms, controlled purchasing of liquor, decent hotels and a respect of the law.

Compare the country across the line, with its racketeers, gangs, corruption, murders, open defiance of authority. Look at Alberta, respected and honored. Would we change places?

Comparisons ARE Odious! But Here Are The Facts

DO NOT sign the Prohibition Petition. We do not want the bootlegger to flourish again.

WORLD HAPPENINGS BRIEFLY TOLD

Extension of air mail service from St. Paul and Minneapolis to Winnipeg has been set tentatively to begin January 15. The extension will complete an aerial service of 11,000 miles.

Eleven brothers whose ages range from 37 to 42 form a football team which has won six of eight matches played this year in England.

A flat increase of $100 in the annual salaries of all Dominion Government workers is to be one of the 1931 aims of the Civil Service Association of Ottawa.

Every sixth one of the 32,219 persons arrested in Montreal during the past eleven months were women, according to the annual report of the city police.

If men have to pay poll tax, employed women should pay too, thinks the Chatham city council, for it has drafted a resolution to the Ontario legislature urging the necessary enabling legislation.

A gift of $1,000 life insurance policy is made to each child born in the new Maple-Creek Hospital at Maiden, Man. Hospital authorities were of the opinion that the practice was unique in the United States.

Reduction of 50 per cent. in the number of Canadian immigrants arriving in November as compared with October, is noted in statistics issued by the state department at Washington.

The gross earnings for the Canadian National Railways for the period ending December 7, 1930, were $1,494,301, as compared with $4,447,000 for the corresponding period in 1929, a decrease of $712,986.

Gross agricultural revenue is not necessary, the town board of commissioners at Winston, N. Carolina, has decided not to collect taxes this year. Winston, founded in 1766, population 706, operates two farms to support itself.

When East Meets West

Orient Observes Custom Of Sending Out Christmas Cards

That "East is East and West is West" doesn't apply to Christmascards. There is now not a single country, from Ireland to Patagonia, which hasn't adopted the Christmas-card custom. Extraordinary are some of the cards desired, and side-splitting the wording of many of the orders.

An African chief desired "much Big Number of Christmas cards, to 100, showing White Christian Ladies in their dresses of the Night." He meant to say that he required only ten cards with white-robed angels!

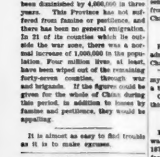
One of the queerest orders by a card firm ever executed was on behalf of a highly-placed Chinese mandarin. Gravely he examined some choice specimens—upside down—and thus made his selection. Etiquette imposed silence.

Cost Of Chinese Civil War

Loss Of Life In One Province Alone Over Four Million

The New York Sun calls attention to the cost of China's civil war in terms of human life. The Province of Hupeh is cited as typical. Here statistics show the population to have been diminished by 4,000,000 in three years. This Province has not suffered from famine or pestilence, and there has been no general emigration. In 21 of the counties which lie outside the war zone, there was a normal increase of 1,000,000 in the population. Four million lives, at least, have been wiped out of the remaining forty-seven counties, through war and brigands. If the figures could be given for the whole of China during this period, in addition to losses by famine and pestilence, they would be appalling.

It is almost as easy to find trouble as it is to make excuses.



"I cannot accept you as a husband, but I will be a sister to you."

"Good. When do you think we shall inherit our father's fortune?"—Blue Humor, Madrid.

The Christmas Fever

Is Well Worth Catching Says Woman Physician

Christmas fever, unlike most other fevers, fawns health according to a woman physician writing in a London paper. The premonitory symptoms become apparent about an hour the strains of the carol singers is reminded up of the season of peace and goodwill. Apart from the beneficial emotional reactions that these elevating ideas produce in the individual, the entire community singing plays a part. Its response is an attitude of sympathetic attention and thus an expectation, which heightens the psychic tone.

Then the season of good will, publicity, family and friendly reunions has factors sometimes of a tragic and disturbing nature. In the past eleven months over women, according to the annual report of the city police.

If men have to pay poll tax, employed women should pay too, thinks the Chatham city council, for it has drafted a resolution to the Ontario legislature urging the necessary enabling legislation.

A gift of $1,000 life insurance policy is made to each child born in the new Maple-Creek Hospital at Maiden, Man. Hospital authorities were of the opinion that the practice was unique in the United States.

Reduction of 50 per cent. in the number of Canadian immigrants arriving in November as compared with October, is noted in statistics issued by the state department at Washington.

The gross earnings for the Canadian National Railways for the period ending December 7, 1930, were $1,494,301, as compared with $4,447,000 for the corresponding period in 1929, a decrease of $712,986.

Gross agricultural revenue is not necessary, the town board of commissioners at Winston, N. Carolina, has decided not to collect taxes this year. Winston, founded in 1766, population 706, operates two farms to support itself.

When East Meets West

Orient Observes Custom Of Sending Out Christmas Cards

That "East is East and West is West" doesn't apply to Christmas-cards. There is now not a single country, from Ireland to Patagonia, which hasn't adopted the Christmas-card custom. Extraordinary are some of the cards desired, and side-splitting the wording of many of the orders.

An African chief desired "much Big Number of Christmas cards, to 100, showing White Christian Ladies in their dresses of the Night." He meant to say that he required only ten cards with white-robed angels!

One of the queerest orders by a card firm ever executed was on behalf of a highly-placed Chinese mandarin. Gravely he examined some choice specimens—upside down—and thus made his selection. Etiquette imposed silence.

Cost Of Chinese Civil War

Loss Of Life In One Province Alone Over Four Million

The New York Sun calls attention to the cost of China's civil war in terms of human life. The Province of Hupeh is cited as typical. Here statistics show the population to have been diminished by 4,000,000 in three years. This Province has not suffered from famine or pestilence, and there has been no general emigration. In 21 of the counties which lie outside the war zone, there was a normal increase of 1,000,000 in the population. Four million lives, at least, have been wiped out of the remaining forty-seven counties, through war and brigands. If the figures could be given for the whole of China during this period, in addition to losses by famine and pestilence, they would be appalling.

It is almost as easy to find trouble as it is to make excuses.

"I cannot accept you as a husband, but I will be a sister to you."

"Good. When do you think we shall inherit our father's fortune?"—Blue Humor, Madrid.

Greetings From Overseas

Canadian Boys and Girls Receive Christmas Greetings From Sir A. Stanley, Of British Red Cross

Sir Arthur Stanley is an stranger to Canada, having spent his highest days at Ottawa, when his distinguished father, Lord Stanley of Preston, was Governor-a-General from 1888 to 1893. Because he was keenly interested in Canadian sports in his youth, the Stanley Cup which is the crown and glory of Canadian championship hockey, was given, which perpetuates the Stanley name in this country.

As chairman of the executive of the British Red Cross, Sir Arthur has served his day and generation nobly in all matters pertaining to the health and happiness of the people by the promotion of Red Cross aims of mitigating suffering and establishing health service.

Writing to the boys and girls of Canada, Sir Arthur sends them all a Christmas greeting of which we be lows:

"Boys in the Motherland we are proud of you Canadian Red Cross Juniors, of your pioneer spirit, of your members and of your energy.

We know that by keeping the laws of health you are taking the first step in the service of your country; for it is on the health and vigour of her citizens that the prosperity of a people dwells. We know that through your efforts the crippled child and the many other ways you are helping the sufferings of these less fortunate than yourselves.

It is a great thing that boys and girls should take part in the work of the Red Cross and by doing those things which are good and kind, and by taking opportunities that come in the way of everyone of us to help others, you are worth; members now of that great Society which we hope you will continue to serve all your lives."

Recipes For This Week

(By Betty Barclay)

BRAN MUFFINS

½ cup flour.
½ teaspoon salt.
½ cup bran.
¾ cup orange juice.
¼ cup molasses.
1½ tablespoons molasses.
3 tablespoons melted butter.

Sift flour and salt; add bran, orange juice (in which soda has been dissolved and stirred until it begins to foam), molasses and melted butter. Beat vigorously, and pour quickly into hot, buttered gem-pans, and bake in a hot oven.

BRAZIL NUT MUFFINS

1 egg white.
¼ cup confectioner's sugar.
¼ cup almonds, chopped.
¼ cup dates, pitted and chopped.
½ teaspoon vanilla.
Few grains salt.

Shell the almonds. Plunge into boiling water, and rub off skins. Chop. Fill the dates. Chop.

Beat the egg white until stiff. Add sugar gradually, while continuing the beating. Add salt and vanilla. Fold in almonds, dates and figs. Drop from the tip of a teaspoon on a well buttered baking sheet. Bake in a slow oven about thirty minutes. Cool for a few moments before removing from pan with a spatula.

Ship Christmas Trees To U.S.

Make a Million Trees Shipped From Canada Each Christmas

More than half a million Christmas trees are being shipped from the province of Quebec each year to points in the United States.

During the past few months gangs of men have been busy in the woods cutting the young trees. From the woods the trees are hauled to railway stations where the butts are sawn off and the trees baled.

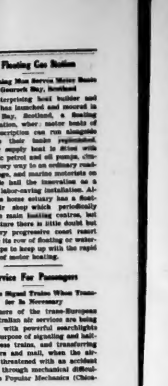
The supply of Christmas trees from New Brunswick for the United States is practically gone for the ninety-twenty lands, as the exportation of such trees cut on government-owned lands is forbidden.

Animal Instructors

Learning expression from monkeys, horses, and dogs is the latest system evolved by a German physical-training instructor. At his school he keeps a number of animals which the pupils observe carefully as they run, jump, swim, and climb. Then the pupils try to imitate the natural grace of the animals.

Golfer (to members absent): Pardon, but would you mind if I played through? I've just heard that my wife has been taken seriously ill.

Norwegian fishermen are considering shipping frozen fish to this country.



RED DICTATOR

Joseph Stalin, Red dictator of Russia, whose evidence broadcast in Soviet trial of engineers charged with accused strong protest in both England and France. Alleged confessions in Moscow trial implicates these countries in "plans" of an interventional war against the Soviet.

Made Turkey Yuletide Dish

King James I. Started the Custom In England

Despite its name, the turkey has nothing to do with Turkey or the Turks. It comes originally from America, and was first raised to a place of honor among Christmas dishes in England.

The turkey was a part in the story of Tubbie dish was a bear's head, but Jason hated pork, and English centuries who wished to retain his favor were obliged to abandon their favorite boar's head and substitute the bird. It thanks God for Timothy's unfeigned was first served at the court of King faith in Christ Jesus." James I., who declared that Lord Mountjoy, first brought the bird from the New World to the Old.

Christmas In Canada

In Canada at Christmas

They line the street with trees—
Christmas trees lit up at night
With little bulbs of colored light
As pretty as you please.

The people hurry past you
In furry boots and wraps;
The shops are like a picture-book
And all the big policemen look
Like Teddy Bears in caps.

As if some day at Christmas

You don't know where to go,
Just pack your boots up, I beg,
And start at once for Canada;
You'd like it there, I know.

—Punch

In Toronto

On Christmas Eve each year, a group of New York children go to the cemetery near the chapel of the Intercession on Broadway, and there place a wreath in memory of the late Clement Moore, author of "The Night Before Christmas."

According to recent figures, France has the lowest railway rates of any country in the world.

SUNDAY SCHOOL LESSON

DECEMBER 21

TIMOTHY—THE INFLUENCE OF HOME TRAINING

Golden Text: "From a babe thou hast known the holy writings which are able to make thee wise unto salvation through faith which is in Christ Jesus."—2 Timothy 3.15.

Lesson: Acts 16.1-3; Philippians 2. 19-22; 2 Timothy 1.1-6; 3.14-15.

Devotional Reading: Proverbs 3.1-6.

Explanations and Comments

The Salutation Of the Second Epistle Of Timothy, 1.1, 2.—Paul begins his letter with a formal salutation. Paul (the writer), an apostle of Christ Jesus through the will of God (that is, called of God to be an apostle), according to the promises of the life which is in Christ Jesus (according to the Gospel). "The Gospel is the promise of life in Christ; the life is the end and Christ is the way." To Timothy (the recipient of the letter), whom Paul delights to call "my son." Paul was the father of Timothy in the faith. Grace, from God the Father and Christ Jesus our Lord. "These blessings are the best we can ask for our dearest friends, that they may have grace to help them in the time of need, mercy to pardon what is amiss, and peace to carry them through the life."—Matthew Henry.

Paul's Affection For And Exhortation To Timothy, 1.3-6.—Paul thanks God, whom he has served with a pure conscience, that he has unceasingly remembered Timothy in his prayers. Paul desires to see his son in the fellowship of others in his prayers. And as it seems that the Lord has remembered him, and conveyed to Timothy his observation at night as well as signaling.

The signal encounters difficulties while following the railroad express lines, he signals to a train that is not in sight of one, and a train stops for the transfer of his load. His plan is to have the same connections with ocean liners for mail and passengers.

Canada's Best Customer

Great Britain Takes Two-Thirds Of Our Wheat Exports

Canada's wheat and flour exports for the first quarter of the present crop year, ended October 31st, show Great Britain still in the van of the Dominion's best customer, taking two-thirds of its wheat exports and more than a quarter of its flour shipments. Of the wheat exported, totalling 75,245,000 bushels, Great Britain took 49,567,595 bushels, and of the flour shipped, amounting to 2,175,272 barrels, the United Kingdom took 774,681 barrels.

Relief For Eskimos

Conditions of deprivation, faced by the Eskimos in the north, will be met by distribution of food and clothing at the government's expense, it was stated at Ottawa. On instructions from headquarters in Ottawa, Royal Canadian Mounted Police are to put supplies from Hudson's Bay posts and the requirements of the Eskimos.

The total number of kinds of animals now living approaches the 2,000,000 mark.

Make Your Windows Pay

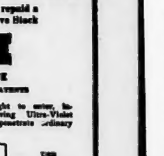
Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extremes of temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra Violet rays, which do not penetrate ordinary glass.



CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

THE WINDOLITE IS RECOMMENDED BY MODERN HOUSES LAYING PENS DAIRY BARNS NURSERIES AND EGG.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER VII.—Continued.

Her voice trembled. She stopped abruptly in an effort to control it.

"What's that you're wondering?" said the old man quietly. "Better tell Uncle Ben your troubles. Get them off your chest and you'll feel better."

Gay laughed shakily.

"I—I haven't any real troubles, Uncle Ben. They're all imaginary. Dicky's a dear, and I wouldn't change him for—for the President if the United States! Bad sometimes I wish he were a bit—if he hadn't asked me to marry him. Not in Blakesville anyway. Except for our two precious weeks in camp each year, he hasn't been away from me since he came back from our honeymoon."

"Well," nodded Uncle Ben, seeing that the story was not half told, "he's been off full as much as you have, hasn't he?"

"That's different," she answered quickly. "I love to go, but I love my own hearthstone best. I'm not the hens fate tramp that Nick is. The other night I was so tired of my self-imposed task of something hurt her; I was willing Jimmie had learned to crow, and our new neighbor began to sing. Her voice is—beautiful. I don't know what it is about a woman's singing that makes a baby cry. I'm not the only one who has stirred uneasily at spring night. Nick didn't say one word, but I knew how it made him feel. He wanted to run, run, run to the ends of the earth. He wanted the freedom he used to talk about. I—I almost hated the woman for singing that way—as much a night. It seemed as if she were singing straight at Nick. I—I almost believe she was.

"When she stopped—he got up without a word and we went inside, but his hands trembled when he turned on the lights. And I couldn't say anything. Uncle Ben, I'd have cried if I'd spoken, and didn't seem to be anything to say. Then suddenly he turned to me and smiled. It broke my heart. I'm afraid I'm going to have him be was feeling. But he came close and put his hand under my chin and tilted up my face so he could look straight at me.

"'Gay,' he said, 'you've got the most wonderful eyes in the world. They'd drag a man right back from the jaws of Hades. I hope you'll be on hand if ever I'm tempted to commit a crime.'

"He was speaking lightly to dispel the atmosphere that song had created, but when he kissed me I—I sort of gave out."

"Gave out?" questioned the old man, as she paused. "Gave out? What you mean, Gay?"

"I mean I—cried. Oh, Uncle Ben, I don't know why I'm telling you all this! I wouldn't tell another soul in the whole world; but you're the nearest thing to a family that we have. I don't cry easily, you know, or often; there's why I cry so hard when I do cry. I haven't been feeling very well, and I was sort of discouraged. Anyway, once I got going I couldn't stop. Nick was frightened, poor dear! He wouldn't let me go to bed until after midnight. It ought to have slowed the atmosphere, a storm like that—but it didn't. I heard Nick talking, then something dreadful is banging over me—the way you feel when an awful thunder storm is in the air."

Simeon Bartlett moved his hand to his limp collar, which had suddenly become oppressive.

"Whatever the lady's business, thought Simeon shrewdly, Nick was absorbed—too much absorbed to have noticed the opening door. Then suddenly the boy could restrain himself no longer. He moved uneasily and cried, his childish voice echoing through every corner of the room: 'Daddy, it's me! I've come!'"

Nick started, and his face broke into a smile of welcome. With one exception everyone in the room smiled, too. The exception was, of course, the lady in blue, who, at the first note of Sonny's voice had been forgotten. Nick did not see that with an impatient shrug she had slipped away, because at just that moment

Corns Quick Relief! PUTNAM'S Corn Extractor

ain't a fit place for a pale cat to reside in, to say nothin' of human bein's! If I hadn't carried my umbrella I'd be glad o' a manstroke, just walkin' from the depot. The host's got on your nerves, as they say,—that and havin' two babies pretty close together. I ain't lived seventy-four years for nothin', Gay, and I'd bet my best dollar they're not a thing alike you but what I said. I don't need to tell you that Nick's a good boy,—a damn good boy, if he does bamboo now and than when he's run. Chore you've had the same feelin' yourself, only a woman gets a mite more comfort out o' her babies. Now I'm goin' to my bally to Sonny, and take him down to the First National Bank. If you'll put him in his go-cart I'd admire to push him along down town. Makes me feel like a genuine grandad; and it'll give you a chance to rest up some before dinner."

"He ought to go bye-bye," said Gay smiling, "but he'll be delighted at an excuse not to! You're sure he won't be a bother, Uncle Ben?"

"I isn't ever seen the time yet, Gay, when I'd call a little child a bother. If Sonny's been a nuisance in business with a baby in the room, he sure ain't remember! I take him for but if I find I'm mistaken I'll put Sonny in the cage along o' his daddy."

Gay winced, and said, with a smile that was intended to appear free and ridiculous, but when anyone mentions that cage it makes me shiver. I don't like to see any things in cages, not even birds.

Simeon chuckled.

"That's a fine thing to say about a steady boy like Nick. Wish! He must be a heap different from most men I've met. But there dearie, I know what you mean. Nick's a fine husband and suitable for Nick. But so long as he holds the key himself there's no need to worry. I'll do up the dinner dishes, and you can take a little walk. Don't worry! Sonny'll get on well. There's no Sonny bony here or take him along on."

"Leave him with me," said Nick. "He likes this cage of mine. Sometimes we're canaries, and sometimes we're bears. It doesn't make much difference, does it, old boy?"

"Let's be canaries," said Sonny gleefully; and Nick agreed with a grin.

(To Be Continued.)

New Town Growing

Mission Is Youngest and Oldest To Be Civilized In Saskatchewan

The new town of Minton, located at the end of the steel of the Brownlee-Mind-Brinkan branch of the C.P.R., is now the youngest and freshest town in Saskatchewan. The townsite was surveyed only a short time ago, yet it has two stores, one lumber yard, three implement dealers, two elevators, one hotel, one hall and meat market, municipal hall, two livery stable shops, two garages, one oil station and an up-to-date post office.

Minton has a large territory of splendid mixed farming country, which contains some of the best wheat land in southern Saskatchewan. It is the first town on this side of the border on Highway No. 4, and the best town between Regina—1 the boundary line. The government had to close its $10,000 police station near here for lack of business in that line and there is now no police within 35 miles, nor need for one.

The farmers in this territory are exceptionally healthy and they nearly all own their own farms. Very few even have loans against their land. They're practically all engaged in mixed farming and keep a good deal of stock.

U.S. Naval Program

Proposals Made To Appropriate $380,000,000 In Three Years

The United States administration's first year program for construction of the new naval treaty navy has been laid recently before the House naval committee by Secretary of the Navy Adams. It was estimated to cost $134,653,900.

The bill for the construction of one 7,500-ton six-inch gun cruiser; one six-inch gun flying deck cruiser of 10,000 tons; four submarines of 1,100 tons each, one 'plane carrier of 13,800 tons; ten destroyer of 1,500 tons each; one destroyer leader of 1,850 tons.

Adams said the program was exclusive of the proposed modernization of the battleships New Mexico, Idaho, and New Mexico at a cost of $29,000,000, approved by the senate.

Douglas' Egyptian Liniment is a quick, certain remedy for Head Rolds or Throat. Free or five applications are usually enough.

Bingle: "When you found that you had not got your fare, did the conductor of the tramcar make you get off and walk?"

Mowle: "Only get off; he didn't seem to care whether I walked or not down!"

LADY SQUIRES AND DAUGHTER

Lady Squires, wife of Sir Richard Squires, prime minister of Newfoundland, with her lovely young daughter, Rosemary. The photograph was taken at Avalon, Newfoundland's famous aviation record imperial conference.

(By Eva A. Tingry.)

7314

THE LITTLE LASSIE

All Tingry models are created and sketched in Paris and the patterns are made in New York.

What a small daughter's figure—for she has a figure even at this early age. Some small girls are inbetween sizes within 36 inches, but a ballet or bodiced style suits others perfectly.

Today's versatile little dress can be worn either belted or loose. It is simple, yet distinguished for its charming and different yoke.

Also any material suitable in a child can be used, including cotton gingham, wool, and cotton weaves, rayons, challie and other thin woolen or washing silks.

French hands or tiny spots are a pretty yoke decoration. For a dressier afternoon model a deep yoke of self-outlining the yoke and cuffs of the sleeves. For simpler models, contrasting bindings of linen points is most attractive.

Pattern No. 7314 is designed for sizes 4, 6 and 8 years. It is ready for immediate delivery. It is hand cut. Send 25 cents (in stamps or coin) for Pattern to The Mercury, Pattern Dept., and plainly your name and full address, the number of the pattern and the size you want.

Minard's Liniment for all Pain.

Electric Power In Rural Saskatchewan

Electric Light and Power Now Provided Over a Wide Area

By the throwing of a switch in the Saskatoon power house of the Saskatchewan Government Power Commission, a new era for many towns in central Saskatchewan was recently introduced. This act marked the energizing of the new high tension power line to Shellbrook and the lighting up of that town and of a number of intervening towns by electricity supplied from the central electric station in Saskatoon.

While the towns along the northerly line in Shellbrook were the first to benefit from the big construction program of the power commission carried out during the summer of 1930, the act of electrifying those towns was only one of several such events expected to take place within a short period. About 600 miles of power lines will be functioning shortly and a large number of towns will be effectively lighted and supplied with power.

Shellbrook is about 120 miles from Saskatoon by transcontinent line. Another line will be constructed to Battleford and is being extended to Duck Lake, a distance of 60 miles from Saskatoon. Easterly the wires will soon be connected to Humboldt, about 75 miles from Saskatoon. Intermediately the lines run to Zealandia and thence to Colonsay, roughly 100 miles, and at this point connection will also be made very shortly with power from Moose Jaw. From Moose Jaw to Outlook the distance is also in round figures 100 miles. They represent the initial program of the Saskatchewan Government Power Commission to provide electric light and power over a broad area of the province.

Government-owned transmission lines to spread power over rural Saskatchewan have now become an established fact. Toward this objective, the first step was taken about two years ago when the Saskatchewan Government purchased from the City of Saskatoon the municipal light and power plant. This steam-electric generating plant, to become the key station for distribution in the central part of the province, was turned over to the Saskatchewan Power Commission and since then its capacity has been greatly enlarged to meet the demands put upon it in supplying power and light in Saskatoon, but to the numerous towns in the surrounding territory.

Sheep Good Horsemanship

Germans and Irish Riders Carry Off Honors At Toronto

Germany, closely followed by Ireland, carried off the honors in the most spectacular of the events in the horse show of the Royal Winter Fair at the Coliseum, Toronto.

A team of German and Irish military officers and their mounts won the leading honors in the Royal York's $1,000 Military Jumping Trophy. This accomplishment was achieved against the competition of the crack mounts and horsemen of four other nations — the United States, Sweden, Canada and Hungary—in a display of horsemanship which has probably never before been witnessed at the Fair.

The Germans won first and second prizes, and the entries of the Irish Free State won third and fourth prizes with the United States coming fifth.

It was a close competition over a difficult course. How close it was is indicated by the fact that the two German horses cleared the course with only 1½ faults each, while the two Irish horses cleared the course with only two faults each.

Pompeii Yields More Treasures

Ancient Roman Gold Objects Found After Being Buried Eighteen Centuries

Spurred on by discovery of a fortune in ancient Roman gold objects, buried for more than eighteen centuries under the lava of old Vesuvius, archaeologists are pushing on to additional finds.

One of them is a polychromatic statue of Venus and another a fresco of surpassing beauty. Both of them were in the same ancient house at No. 4, vis Abbondanza, hidden A.D. 79, when Vesuvius destroyed this ancient city.

A Proto Explanation

"Frederick," chided the wife, "you were talking in your sleep last night, and you frequently spoke in terms of endearment of a certain Euphemia. Who is Euphemia?"

"Why, my sister's name."

"Frederick! Your sister's name is Mary!"

"Yes, dear, but we always called her Euphemia for short."

Little Helps For This Week

"While I live will I praise the Lord: I will sing praises unto my God while I have my being."—Psalm cxlvi. 2.

Ah, me, the biggest eyes does not lie

In fact and vigil, spending dismal days

Only to lift the tribute of a sigh.

Given God no glory. Come with Zebedee's children

All ye who truly love the Lord most high.

For perfect prayer is found in perfect praise.

If, then, I were a nightingale, I would do that action of song;

If I were a swan, I would do like a swan. But now I am a rational creature, and I ought to praise God; this is my work. I do it; nor will I desert my office as long as I am allowed to keep it, and I exhort you to join in this same song.—Epictetus.

Where Gold Comes From

Largest Production Of Gold In Canada Made In 1929

The largest production of gold recorded in Canada was made in 1929 according to a report just issued by the Canadian Government Bureau of Statistics. The total output last year was 2,387,000 ounces, as against 2,000,000 ounces valued at $20,062,000 in 1928. Ontario and Quebec are the leading Canadian provinces in gold production, and have been greatly enlarged in recent years. The two Territory produced gold in 1929 as follows: Ontario, 1,629,987 ounces; British Columbia, 154,894 ounces; Quebec, 90,796 ounces; Yukon Territory, 83,062 ounces; Manitoba, 23,616 ounces; Nova Scotia, 2,667 ounces, and Alberta, five ounces. In Ontario, the Porcupine and Kirkland Lake areas contributed practically the whole of the output of the province.

Worms however generated, are found in the fibres of the bowels, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little ones until the bowels are thoroughly cleansed. An excellent preparation for this purpose is that held in Miller's Worm Powders. They will immediately destroy the worms, and under the conditions that were favorable to their existence.

ine and the agreement is in the safe in the municipal office and not burned when my store caught fire as some parties led the people of Ministik Lake to believe, and the story circulated by some one in Ministik Lake that Cornhill had to pay seven hundred dollars this year for gravelling on this road is another falsehood.

I might state here of the $65,000 to be spent on the project $30,000 has already been spent and that Lakeview Ltd. is now making plans for an early start in the spring. This information I received from the secretary of Lakeview Ltd.

There is just one more explanation I would like to give and that is the money spent in Ministik Lake district this year, of $1483 allotted to div. three, $525 was spent in Ministik Lake district and to save further phone calls to people not concerned I might say the balance of the money is all spent.

I hope this explanation will stop the deliberate falsehoods, that have been circulated throughout Ministik Lake, by some person or persons who were evidently ignorant of the facts pertaining to Lakeview Ltd. It has always been my attitude to give everyone a square deal. I have tried to be fair to all sections of division three but it is absolutely impossible to work in harmony with someone who won't work with you.

Respectfully Yours,
J. E. CURLETT,
Councillor Division 3.

Here and There

(651)

Officially closing the 1930 shipping season as far as inward bound Quebec terminus ships are concerned, Canadian Pacific liner Empress of Australia docked at Ancient Capital November 21, carrying back from the Imperial Conference Premier Ferguson of Ontario, Hon. Hugh Guthrie, Minister of Justice; Hon. C. H. Cahan, Secretary of State, and Hon. Thomas Chapais, Canadian delegate to the League of Nations.

Dressed poultry shows are being held in Regina on December 10th and in Saskatoon on December 11th for the purpose of arousing friendly competition in poultry production among the farmers of the province and further to advertise the poultry industry, according to W. Waldron, provincial markets commissioner. Mr. Waldron said that money prizes and special awards are to be given at these shows.

Little Julian Veboh, of Princeton, B.C., six years of age, has accepted foster parenthood of his 2½-year-old sister, Marie, and his 11-month-old brother, Mat, across the Atlantic on Canadian Pacific liner Montcalm, while their father treks back to his wifeless home in the mountains. The children were turned over to their grandmother at Cherbourg and will be taken to Prague, Czecho-Slovakia.

Headed by the Rt. Rev. Andre Lefebvre, Bishop of Ning Po, China, four priests and eight sisters, composing the largest missionary party to leave Canada for the Far East this year, left recently from Vancouver by S.S. Empress of Asia. They will join missions in Japan and Manchuria as well as China.

That the British and American people should assist the Kuomintang Nanking Government in the continuation of its difficult task of drawing China together, is the opinion of Col. Haley Hall, D.S.O., British Customs Commissioner, late of Tientsin, interviewed recently while en route to London, England, by Canadian Pacific Railway. "The brains, military power and general ability are to be found in this Southern Government, and only when China is reorganized will business conditions become stabilized," he added.

It is just 25 years since the provinces of Alberta and Saskatchewan were created. At that time the population of Alberta was 185,000. It is now about 650,000. Saskatchewan in 1905 had a population of about 195,000; now it is around 867,000. Total area of land under cultivation in Alberta, 25 years ago, was 660,000 acres, and in Saskatchewan 2,000,000. Today the two provinces have 15,000,000 and 30,000,000 acres under crop, respectively.

Two big bull moose—one of them one of the finest this year to come out of New Brunswick forests—and six buck deer were the trophies of the hunting party headed by Bob Shawkey, late manager of New York Yankees. Harry Rice, Yankee outfielder; Benny Bengough, former Yankee catcher, now with [illegible] and John Kracke, New York [illegible], were the other members of the party and all were successful in getting game.

The Southern Alberta honey crop this year will reach at least [illegible] pounds or almost double what it was [illegible], according to [illegible]. The quality this year [illegible] very high.

Of every Christmas you recall,
May this be the Happiest of all.

WISHING YOU A HAPPY CHRISTMAS AND THE BEST OF GOOD LUCK IN THE COMING YEAR

Local and Personal

Car owners and farm truck owners may procure their 1931 licenses from J.O.A. Letourneau at the municipal offices. There is a fee of 25c. in addition to the price of the license.

The W.A. will hold their annual meeting on Wednesday, January 7th, in the church at 2:30 sharp.

The Misses Audrey, Thelma and Mr. Gordon Jobb were home for the Christmas holidays.

Miss Bertha Lee, Mr. Clifford Lee and Mr. and Mrs. O'Brien spent the holidays at the John Lee sr. home.

Miss Helen McCauley is spending the holidays at home.

Miss Minnie Wood and some friends from the city spent Christmas day at the Wood home here.

Mr. and Mrs. Skitch spent Christmas in Edmonton with relatives.

Miss Lorett Boss was home at St. Albert for Christmas.

Mr. and Mrs. Malcolm and Muriel spent Christmas in the city with friends.

Carl Weise, Frank Dunn and Paul Thompson spent Christmas day at their respective homes in the city.

Among those spending New Years in the city are Mr. and Mrs. M. C. Hammond, Mr. and Mrs. B. Spilsted and Miss Lucille Gray.

Mr. and Mrs. Warner and family and Mr. and Mrs. Dodds and family spent Christmas week end at the D. W. Warner home.

Rev. and Mrs. Gordon and family motored to the city for Christmas.

W. Broen returned to Tofield for the Christmas holidays.

Miss Marion Cooper visited the Jobb home on Sunday.

Miss Clara Abbott spent the holidays at home.

Mrs. Glover and little son Harvey spent Christmas at the "Cap" Lee home. Mrs. Glover is Mrs. Lee's sister.

Mr. Martz, of Duhamel visited the Snell home for a few days this week. Mr. Martz is Mrs. Snell's father.

Gerald Thompson was down from Edmonton visiting his brother Paul over the week end.

Miss Stella Clement is visiting at the McCauley home this week.

Mr. and Mrs. Harmon Lewis of Edgerton visited at the W. Bowick home over the Christmas holidays. Mrs. Lewis was formerly Miss Blanche Bowick.

Skating commenced last week. The ice was soft and there has only been one nights skating. There appear to be some trouble with the water which prevents it hardening as it should.

Miss Edna Campbell is visiting her parents during the holidays.

Mrs. Galloway and family and Mrs. John Lee motored to the city on Tuesday of this week.

Miss Ellen Walker was a visitor to the city last week.

Miss Virginia Ball is spending a few days in Tofield visiting friends.

The McGuire family who have been living in the house just west of the bank, have moved to the McCusker house.

A very enjoyable whist drive was held at the home of Mr. and Mrs. Bert Lovel on Tuesday night, four tables playing. The awards were as follows: ladies' first, Helen McCauley; gent's first, Charlie Edwards; ladies' consolation, Winnifred Werton; gent's consolation, Arthur Cookson. A splendid lunch was served at midnight by the hostess.

Lily Haugen of Ingram school was successful in winning Mr. Will's medal for December.

CURLING CLUB'S BONSPIEL DATES ANNOUNCED

The Tofield gent's curling club are holding their annual bonspiel as usual this year. There was some feeling within the club that owing to general conditions, the annual bonspiel should be dispensed with for this year, but after once voting in the negative, the more enthusiastic members carried the day and the bonspiel will be held as usual.

Tofield bonspiel is quite an event and is known throughout northern Alberta as a gathering of good sports.

There are four main trophies, viz: the Grand Challenge; the C. W. Boon Cup; Terwillegar shield; and the Pincott cup. Appropriate prizes go to the winners of these events.

The dates set are January 13th, 14th and 15th, and J. W. Chapman is secretary to whom all communications should be sent.

Ketchamoot News

Family reunions were held in many homes on Christmas day. To mention them all would make our budget too long, therefore we will only mention the ones coming from a distance.

Mr. and Mrs. A. Harrison and family motored to Lamont to spend the Christmas day with relatives.

Mr. Martin Lawson is spending a few days in the city visiting friends.

Mr. and Mrs. Donald Creasey and small daughter Francis of Edmonton spent Christmas day with Mrs. Creasey's aunt, Mrs. G. W. Sears.

Mr. Ardley, of Toss, spent a few days at the W. A. Mitchell home, assisting his wife over the Christmas concert.

Mr. and Mrs. C. Coombes and family and Mrs. E. McMullen were guests of Mr. A. Brown of near Bowlf on Christmas day.

Mr. Howard Lee was home for a few days around Christmas.

Mrs. Keitha Oliver, Miss Marjorie Lee and Mr. Thomas are spending the holidays at the Peter Lee home.

Mrs. Harold Smith and little daughter and Miss Mabel Lawson of Camrose are spending Christmas holidays at the parental home.

Mr. and Mrs. McCowan and son Jimmie were guests of Mr. and Mrs. C. A. Ingram on Saturday evening.

Miss Hazel Sears accompanied Mr. and Mrs. Creasey to their home in Edmonton on Friday for a few days holiday.

Mr. and Mrs. C. A. Ingram and Mr. Mund were Sunday evening visitors of Mr. and Mrs. G. W. Sears.

Mr. and Mrs. T. D. Ferguson and son of Lashore and Mrs. M. Ingram Sr. of Tofield were guests of Mr. and Mrs. J. H. Ingram for Christmas dinner.

Mr. and Mrs. McAllister and family of Tofield, Mr. and Mrs. Earl Carlisle, Miss Elsie Matson of Hay Lakes and Mr. Robert Barrecloth of Bardo were Christmas guests of Mr. and Mrs. Carlisle and family.

Mrs. Ardley and pupils put on one of the best Christmas concerts ever held at the school house, consisting of songs and plays, showing many hours of careful training. Rev. Gordon kindly acted as chairman, Miss Selma Nomeland organist. After the splendid programme Santa Claus distributed presents and treats to the children. Mr. Schultz was on hand with a box of apples, so all received their share of the treats. Fortunately it was a warm night so many heard the programme while outside near the windows.

Bardo News

A Happy New Year to the Editor and Readers of the Mercury.

Christmas concerts and dinner and supper parties have been the order of the day the last week. The concerts at both Grande Forks and Bardo schools were well attended and enjoyed, as was also the Sunday school concert at Bardo church.

Among those home for Christmas holidays are the Misses Betsy, Esther and Alice Ness, Anna Jevning and Carey Brekan.

Mr. A. Moen left for a visit to the western coast on Tuesday last. We wish him a pleasant journey.

Mr. Alvin Anderson of Edmonton is visiting friends and relatives here.

HOLY TRINITY CHURCH

Sunday, January 4th
11.00 a.m. Sunday School.
3:00 p.m. Evensong.
T. W. Teape jr. of St. John's College, Winnipeg, will officiate.

Lindbrook News

The Christmas tree and concert given at the school here by the teacher, Miss A. Spende and pupils on the evening of December 23rd was an unqualified success. The school was prettily dressed Christmas fashion and the programme which was long and varied reflected great credit on pupils and teacher and was well put over, no stage fright even amongst the youngest performers. One noticeable feature was that several of the dialogues and sketches entailed the use of foreigners' broken English and also the Irish brogue, quite a difficult thing for even grown-ups to imitate, but these youngsters did it to a nicety. During an intermission, Mr. Findlay of McLaughlin, Alta., pulled off a few sleight of hand tricks which went over well. A supper was served and the presents distributed from the tree and bags of candies, etc., for each kiddie. After the concert some of the younger set remained for a dance. Those who attended this concert wish to thank Miss Spende and her pupils for the delightful entertainment and wish them all a bright, happy and prosperous new year.

The unloading of gravel is still going on here, quite a fleet of trucks being engaged on same.

Lindbrook folk wish all the friends and neighbors of Tofield and surrounding district a Bright, Happy, and Prosperous New Year and may 1931 be the start of a more prosperous time than the last few years have been.

We hear that Mr. Frank Kortzman has been and still is seriously ill with congestion of the lungs. Tough luck! Frank, coming right on Christmas too, but we hope soon to see you

COMMUNICATION

[To The Editor]

Dear Sir:—

The season of the annual school meetings has come again, and if you can spare space in your columns for the letter I am enclosing, I believe your kindness will be appreciated by a number of ratepayers in the various school districts.

The question of whom was eligible to serve as school trustee was always bobbing up in our district, and so a few years ago I wrote the Department of Education to give me a ruling on the matter, that would be perfectly plain to all ratepayers. I worded the question thus: "To be eligible to hold the office of school trustee, must one be a land owner." In reply they sent me the letter I am enclosing. Thanking you,

I am, yours truly,
MRS. PLANTS.

Madam:—

The answer to the question raised in your letter of January 2nd is "No". Take for example a case of a husband who is assessed for land in your district. If his name appears on the assessment roll, then his wife is also a resident ratepayer if she is 21 years of age and resides in the same house with her husband. Her name does not have to appear on the roll. The reverse would be the case also. The name of the wife might appear on the assessment roll, and then the husband would be qualified as a resident ratepayer. The same is true of a son, daughter, father, mother or sister under like conditions, so that any one of these persons would be qualified for nomination as a trustee provided they were also British subjects and able to read and write.

Your obedient servant,
J. T. ROSS,
Deputy Minister.

The lecturer, taking "Thrift" as his subject, had delivered an impressive address, and after answering many questions in the hall he regarded it as a compliment to find a man outside waiting to talk to him.

"You enjoyed the lecture?" he asked.

"Yes—yes!"

"And it has benefitted you?"

"I hope it has. You said, didn't you, that it was easy to get into debt?"

"Yes; I said so."

"Where?" demanded the gentleman eagerly.

Town Gossip

Old Santa, in the guise of Postmaster General of Tofield did his best to see that everyone received his or her Christmas gift on time.

* * * * * * *

According to the rules, we understand the local post office was not compelled to open on Christmas day. The citizens of Edmonton had no Christmas day delivery. But with Christmas mail still coming in and being possessed of a big heart, Mr. Clutterham did his best to see that everyone received their Christmas mail in time.

* * * * * * *

Christmas puts a very heavy burden on the post office staff of the country which burden in some respects is accepted as a challenge. For weeks previous to Christmas, postal workers are preparing for the grand rush and the marvel is with the enormous increase of work, they do as well as they do.

* * * * * * *

This includes the rural mail delivery men. These men do not get huge salaries, but just the same the big majority feel the responsibility of driving "the Royal Mail." Roads may be blocked with snow water or dust, yet if there is a way of getting through at all, delivery is made.

* * * * * * *

They too, are well loaded at Christmas and well deserve their one holiday, New Year's day.

* * * * * * *

The gossip column may not be just the place to discuss the proposed municipal medical bylaw, but in the absence of an editorial column this is as good a place as any.

* * * * * * *

There is some difference of opinion concerning it, which in many cases is based upon misconceptions of its method of working. Those reading the information concerning it in another column and, the bylaw also will be reasonably well informed.

* * * * * * *

The gossip column believes it to be an excellent thing for the ratepayers and doctor also, and the test of a good agreement is for each party to receive equal benefits.

* * * * * * *

Particular attention is drawn to the mileage feature. Only in the case of the first call is mileage charged, and then the rate is quite moderate. Subsequent visits on the same case are entirely free as also are maternity cases.

* * * * * * *

It would be worth while for the town council also to study this question. While there are a large number of people in town who are not property owners, there are also quite a number who are and for a reasonable annual tax, many would be willing to accept free medical attention for themselves and their families.

* * * * * * *

Years ago, it was a common sight to see in a large number of back yards piles of wood, placed there to be used as fuel throughout the year. Some people, the more industrious, kept a permanent pile of green wood sawed and split for use as the demand arose. To see a generous pile of wood split and neatly packed in the yard always indicated to us a careful person within the house.

* * * * * * *

Of late years, what with the thinning out of the bush and the almost universal use of gas for fuel, the wood pile has practically disappeared.

* * * * * * *

It was brought to our attention by seeing the Snell boys tackling, we could almost say heroically tackling a large wagon load of poles with the buck saw and axe.

* * * * * * *

In the real early days the buck-saw reigned supreme as a wood cutter, and it was often jokingly remarked that with a buck saw the wood warmed you twice, once when it was being cut and once when it was burned in the stove.

* * * * * * *

Generally speaking, however, the buck saw has long since given way to the power saw and it was not without some interest that we saw the youngsters sawing away steadily. Needless to say the whole wagon load of poles was quickly cut and split ready for use.

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm. Isn't it foolish to suffer any needless pain? It may be only a simple headache, or it may be neuralgia or neuritis. Rheumatism. Lumbago. Aspirin is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are always to be relied on for breaking up colds.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.

ASPIRIN

TRADE-MARK REG.

Wheat.

Wheat, at the present time, bulks larger in the eyes of the people of Canada, in the east as well as in the west, than ever before. The word "wheat" is on everybody's tongue; it is the outstanding subject discussed by railway executives, bank presidents in their annual statements, manufacturers, wholesalers, statesmen and politicians great and small. If never before, the Canadian people have now awakened to the fact that wheat is the most potent factor in the commercial, economic, financial life of this Dominion; that it is the country's very life blood upon the flow of which its prosperity, if, indeed, not its present existence depends.

The industries of Eastern Canada languish because western agriculture is in difficulty, severe difficulty. The east is beginning to remember, what perhaps it had forgotten, that in years past when its cities and towns were growing in population and wealth, when its factories were busy and working overtime, when new industries were being established and large additions to plant made to existing ones, were the years in which western Canada was prosperous. It was the enormous new and increasing purchasing power of the west that made eastern industry hum.

Now that western wheat is in the doldrums, a drug on the world's markets, which it is impossible to sell at a price that will even cover the costs of production, not to mention any profit to the producer, the whole country is suffering. This condition cannot long continue; it must change, and because this is so,—because a way out must be found, and therefore will be found,—western farmers can entertain hopes for the future.

Whatever happens to Canadian-grown wheat on the market, it still retains its pre-eminent quality. It remains the finest wheat in the world, and because this is so the present situation is all the more tragic. The outstanding quality and pre-eminence of western Canada's wheat was again demonstrated this year when once again the world's championship was won by an Alberta farmer.

It is twenty years since the wheat championship competition was inaugurated, and during those twenty years the three prairie provinces of Canada have carried off the championship no less than sixteen times, Saskatchewan winning it ten times, Alberta five times, and Manitoba once. In the other four years the honor went to one individual state across the line, —Montana.

This is a wonderful record for western Canada. It speaks volumes not only for our climate and the fertility of our soil, but for the enterprise of our farmers, their patience and skill. It has meant the use of good seed; it has given an impulse to the art of scientific cultivation; it has meant millions of dollars to hundreds of farmers whose names never appear in the prize-winning class, but who have been encouraged to adopt and follow right methods, and to sow only good, clean, registered seed in their fields.

It has added vigor to the fight against noxious weeds, insect pests, rust, and other factors operating against the production of the highest quality wheat. It has encouraged the scientists in their task of developing new and better varieties, earlier ripening varieties, frost and rust resistant strains.

These things may, at the moment, seem of little account to hundreds of farmers who are making a real struggle to meet their obligations and find the necessaries of life for themselves and their families. But the fact remains that the industry of agriculture in western Canada rests on a solid and enduring foundation; it is the superstructure involved in present production costs, transportation costs, marketing difficulties, general world conditions of over-production and loss of purchasing power wherein the trouble of today lies. These things can, must, and ultimately will be rectified.

And Now Codfish Shoes

Shoes made of codfish skin, tanned like leather, are to be part of women's wardrobe this winter. A concern in Lynn, Mass., has started work on salesmen's samples. The shoes suggest the lines of the sacred cod, with its eyes and gills, fins and tail, as well as the scaly markings. The linings are of deep blue, suggesting the ocean, and the laces are like fish lines, the ends being tipped with imitation hooks.

"Let us wait until the torchlight procession has passed."—Der Lustige Sachse, Leipzig.

Hints To Grain Exhibitors

Advice In Respect To Entries At World's Grain Exhibition

Hints given to prospective grain exhibitors at the World's Grain Exhibition and Conference at Regina in 1932 by Cecil Tice, secretary of the British Columbia committee, include the following: (1) Exhibits must reach Regina on or before March 1st, 1932; (2) Transportation charges must be prepaid; (3) All exhibits must bear the name of the variety. This is often omitted at fairs, causing needless confusion and loss of time; (4) Only one entry may be made in any one class, although exhibitors may enter in as many classes as desired; (5) Exhibits may be taken from any year's crop.

Planning Long Air Line

One of the longest airlines in the world, linking Berlin and Tokio, is a possibility, according to reports reaching here from the Japanese Aviation Bureau of the Ministry of Communications. The line as discussed now would be operated from Tokio to Hong Kong by the Japanese, over India by England, and the rest of the way by Germany.

FAMOUS GERMAN SCIENTIST

Prof. Albert Einstein, famous German scientist who is visiting this continent, is seen above with his daughter, Margot, immediately following her marriage to Dimitri Marianoff, Russian scientist and author, in Berlin.

Fastest Warship Launched

Nothing Can Outdistance Destroyer Built By British Navy

The New York Times publishes the following special cable from London, England:

What is believed to be the fastest warship in the world has just completed her trials for the British navy, reaching a speed of 40 knots at times without pressing her machinery in any way.

This is the new destroyer Flotilla leader, "Codrington," 1,530 tons, completed last June at the Swan and Hunter shipyard in Glasgow.

Nothing in the other navies have been produced to out-distance this British whippet, which with a full load could streak across the Atlantic in three and a half days if top speed could be maintained.

Approve Federal Plan

Alberta Horse Breeders' Association Endorse Policy For Assistance To Livestock Members

Approval of plans announced by the federal minister of agriculture for advancement of the livestock industry by assisted distribution of purebred sires, was voiced in resolutions passed by the Alberta Provincial Horse Breeders' Association in annual convention at Edmonton. The proposal to purchase several of the best stallions of draft breeds and the revival of the bull-loaning policy were specially commended as well as extension of the thoroughbred horse station policy.

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

National Park On Georgian Bay

Flower Port Island, part of an Indian reserve in Georgian Bay, has been purchased by the Department of the Interior, for National Park purposes. Announcement to this effect was made by Sir George Perley, acting prime minister. The sale price is fixed by appraisers.

"But, sir, there is no cause for complaint. The best people stay at this hotel."

"Well, I am used to different hotels."

"Yes, sir, but I didn't think you wanted anybody to know."—Fliegende Blaetter, Munich.

Radios In Canada

Popularity Of Radio Is Increasing According To Federal License Bureau

The radio is becoming increasingly popular in Canada. In the first eight months of the fiscal year more licenses were taken out than in the preceding year.

The figures were:

1930—Eight months, 444,676 licenses.

1929—424,146 licenses.

There are still four months to go and officials of the radio department believe licenses may reach the total of 500,000. Each license costs $1.00.

Manitoba shows a greater increase than either of the other two prairie provinces. So far this year 27,929 licenses have been issued in Manitoba, against 26,419 last year. In Saskatchewan the figures for this year are 35,921, against 32,951 last year; in Alberta, 19,555, against 21,470.

Winnipeg records the greatest advance among the cities with 16,953 licensed so far this year, against 15,-094 last year. The figures for Regina are 3,144, against 3,032; Saskatoon, 2,076, against 1,680; Moose Jaw, 1,085, against 1,072.

Discounts Russian Menace

Canadian Investigator Says He Thinks Soviets Are Sincere

Earnestness and sincerity are the characteristic features of the Russian people in the economic and social experiments they are making, says Dr. A. G. Lockhead, agricultural bacteriologist of the Dominion Government Experimental Farm at Ottawa, following a visit to the Soviet Republic. "The Russians firmly believed what they are aiming at will give the greatest good to the greatest number," he affirmed. "They believe the rest of the world will, of necessity, follow their methods."

Dr. Lockhead was Canadian delegate to the second international congress of soil science at Leningrad and Moscow. Every line of scientific research appears to be encouraged in the Soviet, he says.

The recent unloading by Russia of wheat, lumber and coal on world markets is essentially an effort to raise credit, rather than a deliberate part of a market-breaking scheme, Dr. Lockhead opines. In this connection, he believes the menace from the U.S.S.R. is not at present serious.

Keep Douglas' Egyptian Liniment handy. A sure, speedy remedy for burns, sprains, felons, blood poisoning, soft corns, warts, scald feet. Invaluable for inflammation and muscular rheumatism.

Where Women Predominate

In Europe there are 16 million more women than men, according to a statistical calculation. Germany has 3,000,000 more women than men, France 2,000,000, and Russia 4,000,-000. Portugal is declared to be a land where women form the highest proportion of the population.

Big Apple Shipment

The largest apple shipment yet forwarded from Nova Scotia to the European continent is on its way, consisting of 18,000 barrels destined for Antwerp, Belgium.

Ties Of Empire

Ideal Has Never Been Stronger In the Hearts Of the People

"It is unthinkable that we should lose Canada and if the Dominion had her way there would be little danger," declared Sir William Crawford, president of the Publicity club of London, England, which discussed the question: "Shall we lose Canada."

"At no time in the history of our country," said Sir William, "has the ideal of empire been stronger in the hearts of our people."

The meeting was addressed by F. W. Field, his majesty's senior trade commissioner in Canada and Newfoundland. Mr. Field said British exporters must expect increasing competition from Canadian producers in many trades and he showed that the United States exercised a great influence over the Canadian market. The Americans had established a thousand factories in the Dominion and, in the face of this strenuous competition, only the most efficient business methods by British firms would enable Britain to remain in the field.

Mr. Field agreed that Canadian tariff changes which had come into operation since May would, undoubtedly, limit British business, but he believed it was still possible to obtain a large share of Canada's import trade by strengthening and revising methods.

Restoration Of Chinese Credit

This Would Have a Most Favorable Effect On the Wheat Market

Rehabilitation of Chinese credit would have a decidedly favorable effect on the wheat market, J. I. McFarland, general manager of the Central Selling Agency of the Canadian Wheat Pool, stated in Ottawa. Mr. McFarland was commenting on reports from Washington that the British Government had entered into discussions looking toward re-establishment of credit in China.

Prior to the serious drop in the price of silver, Mr. McFarland said, China had become a large importer of Canadian grain.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

Export Of Apples

Four steamers loaded 29,837 barrels of apples at the Port of Halifax for British and Continental markets during the week ended November 30th, bringing the exports for the year to 500,551 barrels. The latter total compares with 508,182 barrels for the corresponding period of last year.

Cotton picking in Argentine this season is expected to start February 15.

Spanish moss is really a member of the pineapple family of flowering plants.

Famous Sheep Farmer Leaves For England

William Darnbrough Has Been In Saskatchewan Twenty-Six Years

Famous throughout the American continent as one of the Dominion's leading sheep farmers and renowned for his many victories in the grain classes at Toronto Royal and Chicago International shows, William Darnbrough, of Laura, Saskatchewan, has given up his farming interest there and left for his old home in Yorkshire, England. Mr. Darnbrough will return, however, for the World's Grain Show to be held in Regina in 1932.

Coming to Saskatchewan in 1904 without any knowledge of farming, Mr. Darnbrough quickly established a farm second to none in the district and he attained prominence as a sheep breeder. Since the war he has won an unbroken string of successes with his sheep and grain at the biggest shows on the continent.

Albert Robbins, another prominent Laura farmer, has taken over the Darnbrough holdings.

Volcanic Eruption In Java

Between 300 and 400 Persons Reported To Have Perished

A Rotterdam despatch to the London Daily Mail asserts that between 300 and 400 persons were killed in the eruption of Merapi volcano in Java last week.

Ashes and lava shot out from Merapi after the mountain had been comparatively quiet for eight years, and early reports asserted that at least 80 persons were killed as a great river of white hot lava flowed down the slopes.

Those who died were working in the fields and were surprised by the rapidity of the flow, hence had no time to escape.

In the meantime the volcano itself was an awe-inspiring sight, for huge columns of smoke boiled up from the crater and vivid flames flashed out like lightning from time to time.

Forests were set afire by the sweeping wall of lava and many villages were evacuated.

Praise For Sir Arthur Currie

"No words can express the gratitude felt by the British Legion to Sir Arthur Currie and his colleagues for their kindness to members of the British Legion and their families when they arrived as settlers in Canada," said the Earl of Jellicoe, head of the British Legion, when he spoke at a luncheon given Sir Arthur Currie by the Empire Service League in London, England.

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them *fresh* until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Copyright 1930

CHAPTER VII.—Continued.

Later, as they walked back to Elm Street, Nick pushing the go-cart, and Simeon holding the umbrella, Nick said: "I wish you'd take Gay home with you, Uncle Sim. She's not herself. I can't help feeling worried. The other night——" He paused for a moment, while the old man watched him from beneath half-closed lids, "she—she got upset by—— Well, our next door neighbor was singing. I suppose the music stirred Gay up. It was rather that sort, and she was feeling particularly tired. When we went inside she—cried. I thought she'd never stop. I was scared blue. It didn't seem quite natural for a mere song to upset her as much as that."

"Did it upset you, boy?" questioned Simeon, his eyes still on Nick's face.

Nick laughed, a short, nervous laugh, and answered: "Well, perhaps it did—a little. I was feeling restless anyhow. It had been a hot day, and the apple blossoms smelled so sweet and——"

"You got pinin' for that broad highway you used to talk about?" queried the old man.

A guilty smile hovered on Nick's lips.

"Only for a few minutes, sir. It's not often I think about it these days; but that night——"

"M-m," murmured Simeon. "Your wife knows you pretty well, don't she?"

Nick raised surprised eyes.

"Why, of course. Who should know me, if not Gay?"

"No one, so fur's I know. But ain't it possible that she wa'n't so much upset by the music, as she was by knowin' that the music had upset you?"

Nick stood stock still.

"Why—it—it never occurred to me!" he said.

"Well, if you was to ask my advice, I'd say maybe you better think about that side o' it. 'Tain't every man's got a wife like Gay."

"I'll go you one better there, Uncle Sim," said Nick heartily. "I'm the only man in the world with a wife like Gay. The Lord never made a double. But she needs a change. I've known it for some time. Since Janey Maxwell married and left town Gay's been lonely. I'd hoped our new neighbors would supply the want, but she and Mrs. Halliday don't seem to hit it off very well."

"What ails Mrs. Halliday?" asked Uncle Sim; and Nick laughed at the old man's assumption that the fault couldn't possibly be Gay's.

"Nothing, that I can see. It was she talking with me at the bank when you came in—a pretty little woman in a blue gown. She always wears blue—says it matches her eyes. Pretty eyes, too—trusting, innocent variety. Gay says they're too innocent, but I think she doesn't do the woman justice."

"She got any mister?" asked the old man suddenly.

"Yes—a cynical author about twice her age."

"Maybe those innocent blue eyes is what made him cynical," chuckled Simeon Bartlett. "Seems like I've heard o' such things sometimes havin' effect. Well, here we be. You set that ice cream in the coldest spot you can find, Nick, and I'll see to Sonny. I b'lieve I'm hungry. Didn't have time for no proper breakfast before I started."

During the meal that followed (and despite Uncle Sim's warning, Gay had a batch of the corn muffins she knew he liked), the question of the visit to State Line was broached again.

"You've got to go, dear," said Nick firmly. "It'll do you a world of good, and I'll come for Sundays. It will be a wonderful excuse for me to get away myself."

"Will you come this Sunday?" asked Gay wistfully. She felt suddenly homesick at leaving him at all.

"It's Thursday now, my dear," Nick answered, smiling, "and you can't get off till tomorrow. I'll give you one week of freedom from my company. And you needn't worry about me, Gay. I told Mrs. Halliday I was sending you away, and she suggested my going with them on a trip some Sunday, so I'll be provided for."

"That's very kind of her," said Gay; but her voice was cold, and Nick, rising, went round the table to kiss her cheek.

"If you think," he said, "if you think for one minute that I prefer an auto trip with the Hallidays, to a Sunday at Uncle Sim's with you and the kids, why you haven't the sense I give you credit for. But it was kind of Mrs. Halliday to ask me. You must be fair to her, Gay. She just took pity on me. She says Halliday's like a lost soul when she's away."

"And then," said Uncle Sim, in a tactful effort to clear the atmosphere, "I suppose he sets him down and writes one o' them cynical stories that makes a man want to get out his razor and cut his throat! But Nick's right, dearie, you need a change o' scene; and I need company somethin' terrible. I got a good woman doin' for me now, and you won't have to raise yer hand except to see to the babies; and if I'm not mistaken you'll find me some help there. You can stay as long as you want, and I won't urge you to stay a minute longer. As for Nick—maybe livin' in bachelor's hall for a spell will make him appreciate his blessin's."

Nick laughed.

"You bet it will! But I'll try not to mess things up too much, Gay. Don't let that worry you."

"She ain't goin' to let a darn thing worry her," announced Simeon. "Say, Nick, I'm not goin' to drag them babies forty miles by train in this weather. Is there a man in this pesky town who'll carry us over in an automobile—no tin Lizzie, mind you, but somethin' that's got springs? If so I'll interview him this afternoon."

"Sam Hilton's got a good car. He's a good driver, too. I wouldn't trust my family to everybody's driving over those hills. You make him go slowly, Uncle Sim. He can speed all he wants on his way back. Gee! I wish I were going with you!"

"M-m," muttered Simeon; then glancing at Sonny he said softly: "Look, folks! that baby's asleep over his ice cream!"

It was true. Sonny's head had lopped forward, and his eyes were closed.

"That comes of skipping his morning nap," said Gay. "Poor little man! I'll carry him upstairs."

But Nick was ahead of her, lifting the boy gently.

"Put him in our bed," she whispered. "Baby's still sleeping in the nursery. Well," she added, as Nick left the room, "if Sonny sleeps a while I'll be freer to do my packing. I've a pile of mending a mile high."

"Let it be," said Simeon, "and mend it after you get off. Now if you'll put away the left-over victuals (that's one thing my old woman never let me do), Nick and me'll wash up these dishes. And then I'll go back down town with him and see about gettin' transportation. Gorry! I feel like I was startin' out for foreign parts, takin' a whole family along like this! Sometimes I wonder what I did do 'fore I had you and Nick to bother with."

Gay smiled. The old man's happiness in the thought of her visit was contagious.

"And I wonder how we'd manage without you to fall back on times like this. I wish we could repay you, Uncle Sim."

"What about all them Christmases and Thanksgivin's I've spent with you?" he said gently. "Guess you don't owe me nothin', Gay. Here, Nick, you tackle that dish pan and I'll wipe. If you're late back I'll make it right with the boss. An' don't you get nothin' but crackers an' milk for supper, Gay. Nothin' tastes much better on a hot night, and it'll be good practice for Nick—eatin' light. I don't b'lieve he'll get him no roasts o' beef while you're off visitin'."

"I'll devour the left-overs," Nick answered, as he rolled up his sleeves, "and then patronize the village hash house. But you'll have to kill the fatted calf on Sundays, Uncle Sim. I shall have the appetite of a wolf."

"Now don't you go an' get all het up hurryin'," advised Simeon, as he and Nick were departing for the head of Main Street. "We don't need to start any special time; and my old woman used to say nothin' tired her out like rushin' round tryin' to get somewheres on schedule. Just you go slow an' easy like, and maybe I'll have a surprise for you come supper time."

"This seems to be a day of surprises," Gay answered. "If any one had told me this morning that before noon I'd be preparing to desert my husband, I wouldn't have believed him. I don't feel quite right about it even now."

Nick smiled—put his hand beneath her chin—lifted her face and kissed her. He stepped outside, then came back to perform the rite again.

Simeon beamed upon them.

"That's right," he said. "Better keep goin' while the goin's good!"—and opening his huge umbrella he considerately turned his back.

PUTNAM'S Corn Extractor

Wealth Of British People

Figures Show Over Ninety Billion All Saved Since War

Sir Josiah Stamp, who is president of the Royal Statistical Society of Great Britain, and who is also a recognized authority on national finance, has given his estimate of the wealth of the British people. He sets it down at $90,225,000,000. The nation, he says, spent the whole of its savings for five years on war, sold over one-quarter of its original investments, and has saved since the war at the rate of $2,375,000,000 per annum.

This indicates two things in particular—extensive economic potentialities, and a substantial recovery of strength since the war ended. Of course against the total savings during the post-war period must be set the loss of the war period, when no real saving was being made and when nearly all capital was depreciating. But even after that the net result is distinctly encouraging something that should act as a corrective of pessimism, to use Sir Josiah Stamp's own phrase.

The wonder is that a nation staggering under such a tremendous burden of debt and of taxation as Britain is today, can save anything at all. A less virile people would have given way under the double strain. But the Briton endures, plods on and saves. There seems to have been a new economic factor developing in the Old Country since the dawn of the twentieth century, and not even the holocaust of war has been powerful enough to destroy it. Those who are ever seeking to prophesy the approaching disintegration of the British Empire from the centre outwards might well pause and give the matter another thought in the light of these facts.

Opposition From Both Sides

Annexation Of Canada and United States Would Present Difficulties

The Detroit Free Press says: "If the question of annexation ever should arise seriously, there would be fully as much opposition on this side of the border as there would be on the other side, and perhaps more. Consolidation of the two nations which make up English-speaking North America would be a fearfully difficult thing, and the ultimate success of the undertaking would be extremely uncertain. There would be clashes of ideas, clashes of standards, clashes of tradition and clashes of general viewpoint toward life which could be reconciled only by the exercise of almost infinite wisdom and almost infinite patience, and whatever may be the equipment of the people of Canada, the people of the United States certainly have neither."

Freezing Fails To Kill

Fish and many insects can be frozen without destroying life. Caterpillars, according to entomologists, regularly live after being frozen during the winter. One investigator froze the grubs of the species known as daddy-long-legs, until they would readily break, and those not broken survived. Fish have been frozen in solid ice without killing them.

Canada's Forest Wealth

In the latest official estimate of Canada's national wealth, a value of over $1,886,000,000 is placed upon the forests of the Dominion, including the "accessible raw materials, pulpwood, and capital invested in woods' operations."

Manitoba Silica

Deposits of silica sand, possibly suitable for glass manufacture, are found on the shores of Lake Winnipeg, Manitoba, as well as at Beausejour, about 25 miles south of the lake.

Nearly 375,000 people are employed in the cotton industry in Bombay Presidency, India.

A friend in need is a surprise indeed.

The man with too much common sense misses a lot of fun.

Important Discovery By Russian Professor

Expects To Make Transmission Of Electricity Much Cheaper

Backed by the Royal Society and the British Government with money and all the appliances he needs, a Russian professor, Dr. Peter Kapitza, is carrying on work at Cambridge which is expected to result in an electrical discovery that will simplify and cheapen the transmission of current through thousands of miles of submarine cables, "third rails" and the vast net work of wires supplying power and light to factories and homes.

Dr. Kapitza is carrying out experiments of an almost fantastic magnitude. Among them are the discharging of gigantic pulsations of electricity through metals frozen so cold that a special plant for the production of liquid hydrogen has been built so as to produce temperatures lower than those produced by liquid air. And a comparison with the temperatures used would make a polar blizzard seem only a trifle colder than a midsummer's day.

If the resistance of metals to the passage of electrical current could be reduced only 5 per cent. it would be of colossal importance to electrical corporations. Dr. Kapitza believes it is possible to solve the problem of the resistance of metals to electricity and in the future conduct electricity great distances without present day losses.

Preliminary arrangements have been made to install a liquid helium plant when Dr. Kapitza requires still lower temperatures.

Artist Started Something

Curtailed His Expenses and Action Proved a Boomerang

Across the editorial desk from some unremembered source came a little bit of French allegory.

A portrait painter sat in his favorite cafe sipping his wine. His first small bottle finished, he was about to order more when his eye fell on a headline in the Figaro, "Hard Times Are Coming," so, instead of ordering his usual second bottle, he called for his check.

"Is there anything wrong with the wine?" asked the landlord.

"The wine is good, but I did not order a second bottle because hard times are coming and we must economize," explained the artist.

"Hard times," said the landlord. "Then my wife must not order the silk dress we planned, but must take one of cotton."

"Hard times," repeated the dressmaker when the order was cancelled. "This is no time to expand. I must not make the improvements I had planned in the place."

"Hard times, eh?" said the builder when the dressmaker cancelled the building plans. "Then I cannot have my wife's portrait painted."

So he wrote to the artist and cancelled his order.

After receiving the letter the artist went again to his favorite cafe and ordered a small bottle of wine to soothe him. On a nearby chair was the paper in which he had read of hard times two days before. He picked it up to read more closely and found it was two years old!

Propose Goodwill Flight

Capt. Boyd, Trans-Atlantic Flyer, May Make Flight To South America

The Canadian Government is considering a proposal to send Captain J. Errol Boyd, Toronto trans-Atlantic aviator, on a goodwill flight to South America next spring, according to a news story appearing in the Montreal Gazette. The flight will coincide with the British Empire trade fair to be opened in Buenos Aires by the Prince of Wales, March 14.

The Gazette states further: "Although no definite decision was taken, it was explained that financial backing for the mission may be forthcoming. The many advantages of such a flight were detailed to the cabinet by Senor Skinitizer who has been working in close connection with the Canadian Chamber of Commerce and Canadian Manufacturers Association in attracting public attention to this notable exhibition."

Demand For Ayrshire Cattle

"The Royal Winter Fair still maintains its reputation as being not only the great show window for Ayrshire breeders but also as one of the best market places for Ayrshire cattle," says a report of the Canadian Ayrshire Breeders' Association, which gives a detailed synopsis of the successes achieved by this breed of cattle.

Beads made of ostrich-egg shell are worn by bushmen of Africa.

All margarine plants in the Netherlands are operating at capacity.

Electric Ear Detects Noise

Invention Will Be Invaluable In Locating Trouble On Machinery

An electric ear with which engineers hope to reduce noise by setting one sound to kill another sound has been demonstrated publicly for the first time at Pittsburg.

This method of noise abatement consists merely in causing two sound waves to interfere. A big obstacle has been the human ear's inability to separate complex noises sufficiently for engineers to find out which one to set against the other.

The electric ear, it was announced, promises to overcome this handicap. Weighing 60 pounds, the size of a suitcase, its method of attaching to and "listening" to a noisy machine was demonstrated at the Westinghouse research laboratories by J. P. Foltz, Westinghouse inventor.

"In a somewhat different application it is also hoped that in the future this new portable ear may be used as an advanced fault-finder for airplane motors and propellers," said Foltz.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE BREAD PUDDING

- 1 package chocolate flavored junket.
- 2 slices whole wheat bread — ½ inch thick.
- Butter.
- 1 pint milk.
- Raisins.

Remove crusts from bread, butter lightly and cut in small cubes. Divide the cubed bread among 4 dessert dishes and add a few seeded raisins. Prepare junket according to directions on package. Pour at once over bread. Let stand in warm room until firm—about 10 minutes. Then chill.

CINNAMON APPLES

- 1 junket tablet.
- 6 medium sized apples.
- 1 cup sugar.
- ½ teaspoon vanilla.
- 1 pint milk.
- 3 tablespoons red cinnamon candies.
- 1 tablespoon lemon juice.

Peel and core apples and place in baking pan. Make a syrup by boiling the sugar (except 3 tablespoons which is used for the junket), water and cinnamon candies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, filling the center of each apple with syrup. When cooled, and the syrup has jellied, prepare junket according to directions on package and fill dishes. Let stand in a warm room until firm. Then chill.

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

Preference For Dominions

British Government Gives a Preference To Tenders From Empire

It is the practice of British government departments, in the case of contracts, to give a preference to tenders from the dominions and colonies, as compared with tenders from foreign countries, but only within reasonable limits. This was the reply of the financial secretary to the treasury, F. W. Pethwick-Lawrence, to a questioner in the British House of Commons, who asked whether any preference was exercised in favor of supplies from the Empire and Overseas possessions, even where such supplies were not the cheapest available.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Prize For Barley and Wheat

At the recent Royal Winter Fair at Toronto, W. Nesbitt, of Superb, Saskatchewan, won first prize with hanchan barley Registered and second prize with Marquis Wheat Registered.

There Should Be No Ugly Women!

There are 2 classes of women.

(1) The beautiful, healthy and attractive creatures.

(2) Those pitiful ones who don't know how to make themselves beautiful—rather those who don't know the vital importance of Kruschen Salts to physical perfection and attraction!

Kruschen Salts are a perfect blend of the six vital minerals which Nature ordained, glands, blood, nerves and body organs should daily receive from food if they're to function correctly—and which are impossible to obtain in this age of modern cooking.

Get a bottle of Kruschen—and before the bottle is half empty your complexion should be gloriously smooth and clear. Kruschen clears blood of harmful acids and poisonous waste matter which cause blemishes, blackheads and pimples. Your wonderful new energy will surprise you—mind feels so keen and alert—no more washed-out feeling getting up in the morning.

Little Helps For This Week

"Walk worthy of God, who hath called you unto His kingdom and glory."—1 Thessalonians ii. 12.

Let me not deem that I was made in vain,
Or that my being was an accident
Which Fate, in working its sublime intent,
Not wished to be, to hinder would not deign.
Each drop uncounted in a storm of rain
Hath its own mission, and is duly sent
To its own leaf or blade.
—Hartley Coleridge.

Even from a corner it is possible to spring up into heaven. Rise, therefore, and form thyself into a fashion worthy of God; thou canst not do this, however, with gold and silver. An image like to God cannot be formed out of such materials as these.—Seneca.

Remarkable Stars

Continuously Shooting Off Matter In All Directions Into Space

The most puzzling case of stars in the sky is that known as the Wolf-Rayet, so named because their peculiar character was discovered by the astronomers Wolf and Rayet at the Paris observatory in 1867. Observations carried out over a number of years by the Dominion Astrophysical Observatory, Victoria, B.C., have in part elucidated the mystery. These stars are continuously and violently shooting off matter in all directions into space. There is a constant stream of atoms travelling outward from the stars like a tremendous volcanic eruption over every part of the surface, some of the atoms reaching the terrific speed of 1,000 miles a second.

Central Electric Station Industry

Generation Of Electrical Energy For Public Use

Canada's central electric station industry—the generation or distribution of electrical energy for public use—has attained record proportions because the wide distribution and accessibility of her abundant water powers is such that, with modern means of transmission, low cost hydro-electricity for industrial, agricultural, and domestic use is available to all but a small proportion of her population. In sections remote from water-power, abundant supplies of native fuels constitute potential sources of electricity.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

First Coal Mine In Alberta

Coal was first discovered in Alberta by Nicholas Sheran, who opened a mine in 1872 on the west bank of the Old Man River. He broke his own trails, found his own markets, and hauled coal by ox-team to Fort Benton, Montana, and other distant points. A cairn has been erected in Lethbridge, Alberta, by the National Parks of Canada Branch, Department of the Interior, to commemorate these events.

Price 50c a box

Suffered From Heart Trouble

Became Weak and Run Down

Mrs. Wm. Diotte, Glensandfield, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

INFORMATION RE PROPOSED MEDICAL SERVICE BY-LAW

In order that various supposed misunderstandings and rumours re the proposed medical scheme be cleared up we are publishing the following facts, which are authentic and may be clearly understood.

1. That a proposed tax of three mills per quarter be introduced to cover medical and "partial" surgical care.

2. This tax gives the following service—

(a.) Office calls, no charge.

(b.) Maternity cases, no charge and no mileage, including pre-natal and post-natal care.

(c.) The fee for surgical cases is reduced by the amount the consultant surgeon receives, i.e. the local doctor assists and no charge. Example, an appendix operation would be reduced by $50.00; a gall bladder operation by $75.00, etc. No charge for tonsils and adenoid removal.

(d.) For trips, a charge of 10c per mile both ways is charged but on a case that requires further visits no mileage is charged other than the first visit.

Mileage on maternity cases is not charged as the purpose of the 10c. mileage is to cut down unnecessary calls and as a maternity case is clearly a necessary call mileage is perfectly not charged.

(e.) Health officer work is included and consists of required vaccinating and inoculating against infectious diseases, and of school inspections.

It may be added that the above serves only as an opening wedge and that if the people see fit to establish such a system it will naturally follow that a method of taking care of hospital case and nursing care will soon be provided.

DEHORNING CALVES

(Experimental Farms Note)

Many of the breeders of registered cattle, who follow the practice of showing, prefer to leave the horns on both males and females. The chief reason is that the animals look more broadly and attractive to judge and public. On the other hand, dehorned cattle, especially the males, are safer to handle and cause much less injury to each other, and as the horns on cattle under ordinary conditions serve no useful purpose, most cattle owners, prefer to have hornless cattle. It is more desirable to prevent the growth of the horns when the calves are a week to two weeks old than it is to remove them after the animals are three or four years of age. At an early age the horn or "button", is only loosely attached to the skull and development can be most easily prevented at this time.

At the Dominion Experimental Station, Lacombe, Alberta, the Holstein calves are dehorned with caustic potash at from one to two weeks of age. The hair is clipped from around the button and a heavy coating of vaseline is rubbed around it in the hair to prevent severe burns wherever the caustic is likely to touch. Heavy brown paper is wrapped around the stick of caustic to prevent it from burning the fingers. The top of the button is cripped off with a sharp knife and the end of the caustic is moistened with water and rubbed on the wound until bleeding is stopped. In applying the caustic care is taken that it does not run down the calf's head and either injure the eyes or take off the hair. After the caustic has been properly applied, the horn button is treated with vaseline.

It will heal up in a short time and if thoroughly done this will do away with any necessity of dehorning grown animals.

On the other hand if the dehorning is not done properly a scraggy horn develops which may be only two or three inches in length. This will be very unsatisfactory and may be worse than not attempting to dehorn at all.

CORNHILL MUNICIPAL DISTRICT

BY-LAW NO. 42

PUBLIC NOTICE is hereby given that there has been introduced in the Council of the Municipal District of Cornhill, No. 497, the following by-law:—

A By-law to provide for the appointment of a Medical Health Officer or Physician.

WHEREAS in order to carry out the provisions of the Municipal District Act in that behalf, it is advisable to provide medical and surgical attention, medicine and other services to the residents of the Municipal District of Cornhill, No. 497, and to appoint a duly qualified medical practitioner upon such terms and with such remuneration as shall be agreed upon.

NOW THEREFORE, the Council of the Municipal District of Cornhill, No. 497, duly assembled enacts as follows:—

(1.) That Council be given authority to engage a medical practitioner or physician.

(2.) That said physician will faithfully and to the best of his knowledge, skill and ability render medical and minor surgical attention promptly and as often as is necessary to all persons with in Divisions One, Three, Four, Five and Six, who are sick and require medical or surgical attention, and will provide transportation for himself.

(3.) That he be allowed to charge to each person attended ten cents per mile for each mile necessarily travelled.

(4.) That the salary or remuneration to be paid to such practitioner or physician, shall be determined by the Council.

(5.) It shall be the duty of the medical practitioner, or physician in the area within his supervision, and he is hereby authorized and required to perform all the duties and exercise all the power and authority of Medical Health Officer of the Municipal District, as defined or contained in any law passed by the Legislature of the Province of Alberta, or by the Dominion of Canada, or in any by-law passed by the Municipal District, or any resolution of the Board of Health relating to Health, or the prevention of contagious or infectious diseases, or any regulations made by the Provincial Board of Health.

Assessed valuation of area effected, $1,650,000.00.

A copy of the above by-law can be seen in the following places:
Deville Post Office
North Cooking Lake Schoolhouse.
Minstrik Hall.
Ketchamoot School House.
Kingman Post Office.
Tofield Post Office.
Municipal Office, Tofield.
Tofield Creamery, Tofield.
Alberta Pool Elevator, Kingman.
Lindbrook Store.
McKenzie Schoolhouse.
At the residence of each Councillor in area effected.

and further, that unless within thirty days from the publication of this notice, at least fifteen per cent of the proprietary electors of the municipal district petition the council to submit such by-law to the vote of the proprietory electors of the municipal district, the Council will proceed to pass the same.

Tofield, Alberta, Canada, December 31st, 1930.

J. O. A. LETOURNEAU,
Secretary-Treasurer.

MODERATION or PROHIBITION ?

The Moderation League of Alberta, an incorporated body by Act of the Provincial Legislature, claims that moderation is the only safe solution to the liquor problem; and further claims that moderation is exemplified in the present Liquor Control Act of Alberta, which takes nothing from the rights and freedom of the people, preserves the dignity and respect of the laws of the country, and protects the weak from their own folly.

DO NOT SIGN the Prohibition Petition

Moderation League of Alberta, Inc

Mr. Harris: "It's one of the first things a man should learn—his station in life."

Mr. Johnson: "I should think so. There's nothing more annoying than being carried on to the one beyond."

Noted Economist Passenger on "Duchess of Bedford"

Among the distinguished passengers on the "Duchess of Bedford" on her last run from Montreal prior to undertaking the two popular West Indies cruises announced by Canadian Pacific Steamships, was W. W. Swanson, M.A., Ph.D., Professor of Economics at the University of Saskatchewan. This professor, who is one of the best-known figures in the public life of Western Canada, is regarded as an authority on its economic and social problems. He has made several visits to Britain, Russia and other European countries to study agrarian problems. He is one of the authors of a report, at one time on the economics of the production of wheat and is a well-known writer and lecturer on this and allied subjects. A native of Osborne, Ont., he graduated at Queen's and later at the University of Chicago, and served on the faculty at Queen's from 1906 till 1912, when he accepted his present appointment. He has served on eleven on two Royal Commissions appointed by the Province of Saskatchewan; one on Livestock Marketing, and the other, which reported this year, on Immigration and Labor." Statesman. He is also chairman of the Committee investigating the Dairying Industry in that province.

Prof. W. W. SWANSON, M.A., Ph.D.
